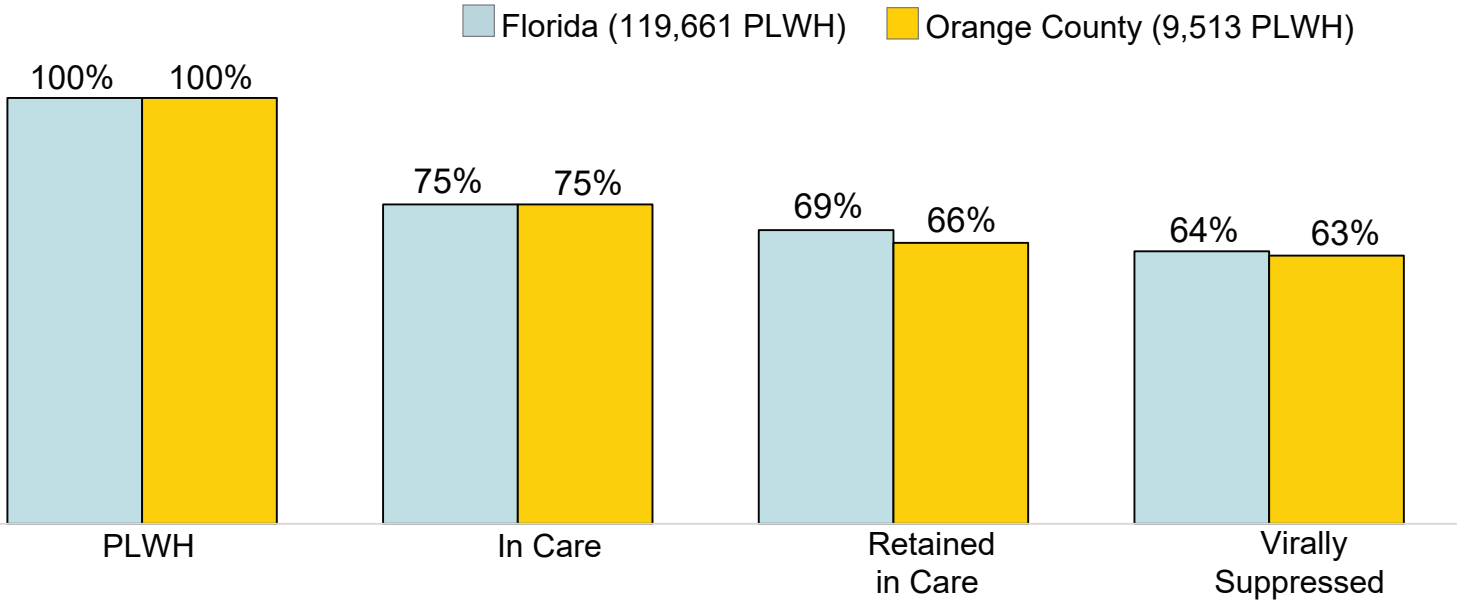
Orange County 2018 HIV Care Continuum The HIV care continuum reflects the series of steps a person living with an HIV diagnosis (PLWH) takes from initial diagnosis to being retained in care and achieving a very low level of HIV in the body (viral suppression). PLWH with a suppressed viral load (<200 copies/mL) are highly unlikely to transmit the virus to others.



In Care: Documented care ≥1 time in 2018. **Retained in Care:** Documented care ≥2 times, ≥3 months apart in 2018.
