APPENDIX VI: INSTRUCTIONS FOR RESIDENCE DESIGNATIONS

ENTRY/CODING INSTRUCTIONS

Refer to Part 8 Instruction Manual, Vital Records Geographic Classification, 1995 (use Section II only when certificates contain no county entry).

Disregard the name of a State, County, or City entered on the address line when an entry is reported in the space provided for these items.

When the State, County, or City entry has obviously been typed on the incorrect line, consider the entry when classifying residence.

If a city entry is reported with North, East, South or West, check the Atlas to determine if it is a separate geographic place or an inclusion of the named City. If the named place is not listed in the Atlas, consider the entry to be an inclusion of the City named (e.g., East Durham is not listed in the Atlas, and therefore, is considered to be an inclusion of the City of Durham).

If the County is reported and two Cities are reported on the City line, check Atlas to determine if one is an inclusion. If not, code to city with the largest population.

If no County entry is reported and the City is not listed in Part 8 Instruction Manual, Vital Records Geographic Classification, 1995, Section II, refer to the Atlas to determine County. If Atlas indicates City is listed in two Counties, refer to the U.S. Census Population, 1990, "Number of Inhabitants" and code to the county containing the largest part of the city's population.

If New York City is reported as place of residence and no borough is reported, code to Manhattan Borough.

When a county or city of occurrence/residence is given and State is not specified, refer to the State of Occurrence (Part 8 Instruction Manual, Vital Records Geographic Classification, 1995) and code to State of Occurrence if the county of city is listed in that State. If the named city is not listed as an incorporated city for State of Occurrence, refer to the List of Major Cities (Appendix V) and code the State indicated for that city. If not in List of Major Cities, code the State when the given city makes the State obvious (e.g., Richmond - code Virginia).

Code hotels, motels, and military institutions unless some other permanent residence is indicated.

FLORIDA VITAL STATISTICS APPENDICES - CODE TABLES

APPENDIX VI: INSTRUCTIONS FOR RESIDENCE DESIGNATIONS (continued)

RULES FOR USE OF CODING TABLE FOR PLACE OF RESIDENCE

(Apply Rules in Sequential Order)

If "rural" is entered, code by line 2 of table and stop.

If "rural" is not entered, find line item that fits reporting on certificate and heading that describes reporting in "City Limits" item. Code according to instructions given when horizontal line and vertical column intersect.

EXAMPLE: City but no county entry and outside of city limits. Select line 6A and column (b). Instruction where these intersect is to code "Balance of County 1/."

INTERPRETATIONS OF ATLAS NOTATIONS

If the notation "part of -" or "population included in -" appears, consider the entry to be an inclusion of the City named and code accordingly.

If the notation "rural", "mail to -" or "no pop." appears, code to BALANCE OF COUNTY.

If only the notation "mail to -" or "population included with -" appears, code to BALANCE OF THE NAMED COUNTY. ("Population included with" refers to an unincorporated place).

If the notation "Station", "Branch of -", or "Rural Station" appears, code to BALANCE OF COUNTY.

If the notation "Station of - P.O." appears, consider the entry to be an inclusion of the City named and code accordingly.
