[Bartow], Fla.—The Florida Department of Health in Polk County (DOH-Polk) is monitoring rabies among wild animals in the area. This is in response to a confirmed case of rabies in a raccoon that was killed in the West Frostproof area off State Highway 630 in Polk County on April 3, 2024. All residents and visitors should be aware that rabies may be currently present in the wild animal population.

People and domestic animals should always avoid physical contact with wild animals (e.g., raccoons, bats, foxes, skunks, otters, bobcats, coyotes), which carry a higher risk of human exposure and a need for rabies post-exposure treatment. If you are exposed to rabies, receiving appropriate treatment after exposure will protect you from the risk of rabies.

This rabies alert is for 60 days and includes the following boundaries in Polk County:

- **Northern boundary:** State Highway 630 West
- **Eastern boundary:** Lake Clinch
- **Southern boundary:** Kelly Road
- **Western boundary:** US 27

Take the following precautions to prevent rabies exposure:

- Keep pets under direct supervision and on a leash, and keep livestock secured on your property. If an animal bites your pet or livestock, seek veterinary assistance for the animal immediately and contact Polk County Sheriff's Office Animal Control at (863) 499-2600.
- Avoid contact with wild or stray animals. Do not handle, feed, or unintentionally attract them with outdoor pet food, open garbage cans, or other sources of food. If you have been bitten or scratched by a wild or domestic animal, seek medical attention, and report the injury to DOH-Polk by calling (863) 519-8300.
- Never adopt wild animals or bring them into your home; instead contact a [licensed wildlife rehabilitator](#).
- Call your local animal control agency to remove any stray animals from your neighborhood. Contact Polk County Sheriff's Office Animal Control at (863) 499-2600.
- Immunize your pets and livestock based on your veterinarian's recommended schedule.
- Prevent wildlife, including [bats](#), from entering living quarters or occupied spaces in homes, schools, and other similar areas where they might come in contact with people and pets.
