

Sumter County 2018 - 2023 Community Health Improvement Plan

Working towards an: Empowered • Engaged • Healthy • Active & Safe Sumter

July | 2018 – July | 2023

Revised November 2020

Revision Log

Name of Person(s) Making Revisions	Date of Revisions	Description of revisions (Including sections revised and goal or objectives changed)	Reason for Revision
Lauren McCurdy	9/20/2020	Formatting changes, strategic issue area 'Chronic disease' modified to include 'Infectious Disease'. Tobacco objectives strengthened to address health equity. HCV and HPV related objectives added. Updated objective numbers and labeling.	Strengthening the plan, accommodate changes in environment, meet PHAB standards requirements.
Daniel Chacreton	11/12/2020	Title page date format modified, all objectives revised to include baselines, Section added to explain CHIP implementation, evaluation, and role in policy change.	Revision made based on state feedback and plan review process.

Definitions

Community Health Assessment (CHA): One of the four MAPP core assessments. A systematic evaluation and review of various indicators that play a role in community health.

Community Health Improvement Plan (CHIP): A community health improvement plan (or CHIP) is a long-term, systematic effort to address public health problems based on the results of community health assessment activities and the community health improvement process. A plan is typically updated every three to five years.

Community Themes and Strengths Assessment (CTSA): One of the four MAPP core assessments. Aimed at identifying and evaluating key focus areas, perceived quality of life, and available assets that could contribute to community health.

Forces of Change Assessment (FoC): One of the four MAPP core assessments. “Focuses on identifying forces such as legislation, technology, and other impending changes that affect the context in which the community and its public health system operate (NACCHO, 2018).”

Ten Essential Services (ES): Public health activities that all communities should undertake, as described by the Centers for Disease Control and Prevention.

Mobilizing for Action through Planning and Partnership (MAPP): is a community-driven strategic planning process for improving community health. Facilitated by public health leaders, this framework helps communities apply strategic thinking to prioritize public health issues and identify resources to address them.

Medical Reserve Corps (MRC): The Medical Reserve Corps (MRC) is a national network of volunteers, organized locally to improve the health and safety of their communities.

National Association of County and City Health Officials (NACCHO): Founded in 1965, NACCHO comprises nearly 3,000 local health departments across the United States that for an organization focused on being a leader, partner, catalyst, and voice for change for local health departments around the nation.

Sumter-CHD Performance Management Council (PMC): The Florida Department of Health in Sumter County’s internal planning and leadership group.

Local Public Health Systems Assessment (LPHSA): One of the four MAPP core assessments. Focuses on evaluating the organizations and entities that contribute to the public health system and on their ability to provide the 10 Essential Public Health Services.

“Homegrown gardens in Sumter county are a great way to eat healthy, organic, and stay active!” ~2017-2018 Sumter STYL Participant

Executive Summary

The Sumter County Mobilizing for Action through Planning and Partnerships Steering Committee (SCMSC), led by the Florida Department of Health in Sumter County (Sumter-CHD) initiated the community health assessment process for Sumter County in 2017. This phase of the process culminated in the creation of the [2018 Community Health Assessment Report \(CHA\)](#), in May of 2018. Following the completion of the CHA, the SCMSC began the community health improvement planning process. This 2018-2023 Community Health Improvement Plan (CHIP) is the outcome of that process. A CHIP is a long-term, systematic plan to address public health problems in a community. The purpose of the CHIP is to define how the SCMSC, in collaboration with various community partners, will work together to ensure that, “All Sumter County residents and families will be empowered to engage in healthy, safe, and active lifestyles through strong partnerships and locally available programs and resources.” ~2018 Shared Vision

Using the MAPP framework, the SCMSC identified the following Strategic Priority Areas to address in the 2018-2023 CHIP:

1. Maternal and Child Health
2. Chronic Disease
3. Community Engagement

A summary of the goals selected to address the Strategic Priority Areas can be found below:

Maternal and Child Health focuses on preserving both the health of the mother and the child, through adolescence, from a variety of negative outcomes including infectious and chronic disease and injury. Goals to ensure this priority is addressed include:

1. Decreasing age 0-5 motor vehicle crash morbidity & mortality rates
2. Decreasing teen birth rates
3. Increasing the rate of mothers that initiate breastfeeding
4. Increasing the number of parenting support resources
5. Increasing access to parenting resources

Chronic and Infectious Diseases, for the purposes of this CHIP, includes a wide variety of non-communicable and communicable conditions in the adult population. Examples of chronic diseases includes disease conditions that result from poor dietary habits, mental health disorders, substance abuse, trauma/injury, diseases associated with physical inactivity, and conditions associated with risky health behaviors such as smoking. Goals selected to ensure this priority area is addressed include:

1. Reducing the rate of falls-related deaths & injuries
2. Increasing access to nutrition education

Figure 1 Source: National Association of County & City Health Officials (NACCHO)

3. Increasing access to physical activity opportunities
4. Improving data quality regarding health behaviors
5. Increasing rates of seatbelt use amongst target populations
6. Enhance tobacco prevention activities
7. Decrease rate of infectious disease transmission

Community Engagement centers on the ability of the local public health system to reach, effectively communicate with, and ultimately modify the health behaviors of the communities served. Goals selected to ensure this priority area is addressed include:

1. Increasing access to available health resources
2. Increasing collaboration amongst local community organizations
3. Improving data quality regarding health marketing effectiveness

NOTE: This is a living document and may be revised, as needed, to better address the health needs of the Sumter community. Revisions or updates will be made to this document on at least an annual basis.

MAPP Process

The MAPP framework, as discussed above, is a collaborative and iterative process that is centered around four main assessments.

1. Community Health Status Assessment (CHSA),
2. Community Themes and Strengths Assessment (CTSA),
3. Forces of Change Assessment (FoC), and
4. Local Public Health Systems Assessment (LPHSA).

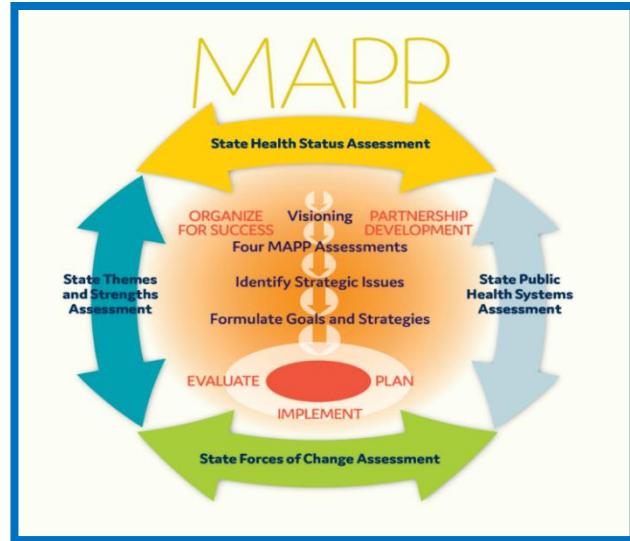

Figure 4 MAPP Planning Framework

These assessments were conducted by the SCMSC between 2017-2018. A complete report on the findings of these assessments can be found in the 2018 Sumter County Community Health Assessment Report. Assessments are conducted to identify local health priorities. A variety of data sources and data collection methods were used in the CHA in order to develop an accurate picture of the health of Sumter County residents. Table 1 lists the data sources and data collection methods used in the CHA.

Table 1: List of CHA Data Sources and Collection Methods

CHSA	CTSA	FoC	LPHSA
Florida Charts	Focus Groups	SCMSC Group Discussion/ Brainstorming	SCMSC Group Discussion/ Brainstorming
Florida Youth Tobacco Survey	Sumter Through Your Lens (STYL): Photovoice Project		
Florida Environmental Health Tracking System	Walkability Audits

Robert Wood Johnson County Health Rankings	Golf Cart Surveys		
United Way ALICE Report	Bus Stop Surveys		
U.S. Census Bureau	CDC CHANGE		
U.S. Department of Transportation	Steering Committee Survey		

NOTE: For a more expansive description of the methods used for the CHIP and CHA see the [2018 Sumter County CHA Report](#): Methods Section.

Strategic Priority Areas Identification

During the CHA process, several common themes and concerns emerged. Through a group discussion, a SCMSC Sub-committee consolidated the various issues and indicators of concerns into Strategic Priority Areas. These groupings were created based on commonality between:

- causative factors
- solutions
- pathologies
- populations impacted
- exacerbating factors
- programmatic considerations

Strategic Priorities that were raised in at least three of the four MAPP Key Assessments were selected as focus areas for the SCMSC. The three selected Strategic Priority Areas from the [2018 CHA](#) are:

1. Maternal and Child Health
2. Chronic Disease
3. Community Engagement

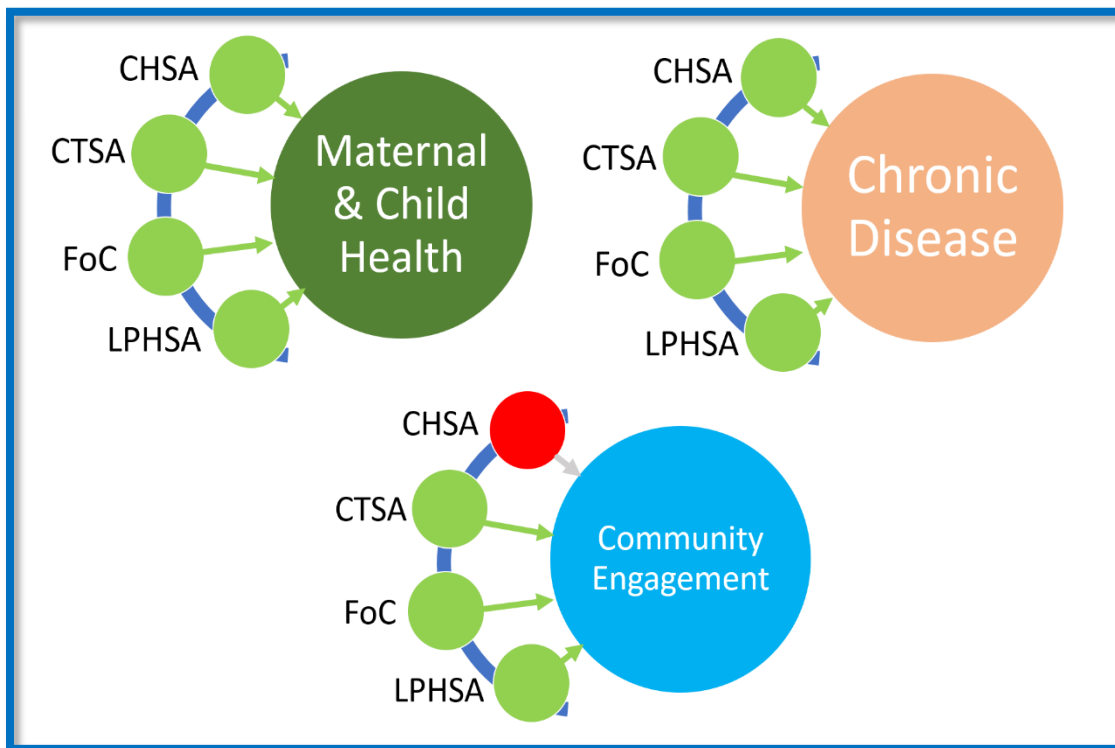

Figure 5 2018 MAPP Strategic Priority Area Selection Matrix

Figure 5 displays the selected Strategic Priority Areas and their corresponding MAPP Assessment justifications. A green dot (●) indicates that the issue was raised in at least one (1) data source included in that assessment. A red dot (●) indicates that the corresponding assessment failed to identify the issue as an area of concern.

Key CHA Results

Maternal and Child Health (MCH) focuses on preserving both the health of the mother and the child, through adolescence, from a variety of negative outcomes including infectious and chronic disease and injury. Data that pointed to this as a key area of focus includes:

- In 2019, the child abuse rate per 100,000 population ages 5-11 years was 692.4 for Sumter County (662.7 for Florida).
- From 2012-2014, the Sumter County hospitalization rate for those one to five years of age for all non-fatal unintentional injuries was 186.7 per 100,000 population. Motor vehicle crash deaths for this demographic group were also elevated.
- In 2019, the teen birth rate for Sumter County was 38.4 per 1,000 live births. Sumter County has the 9th highest rate of teen births in the state.
- In 2019, Sumter County ranked 59 of 67 counties for mothers who initiate breastfeeding. The percent of mothers who initiate breastfeeding was 76.3% for Sumter County (86% for Florida).

Chronic and Infectious Disease (CID), for the purposes of this CHIP, includes a wide variety of non-communicable conditions in the adult population. Examples include disease conditions that result from poor dietary habits, mental health disorders, substance abuse, trauma/injury, diseases associated with physical inactivity, and conditions associated with risky health behaviors such as smoking. Data that pointed to this as a key area of focus includes:

- Lake, Sumter, and Marion counties lead the state in falls-related deaths. Age-adjusted death rate per 100,000 population for unintentional falls was 21.8 for Sumter in 2019 (Florida: 10.0).
- Adult smoking rates in Sumter County are low (about 8% reported smoking, 2019), however E-cigarette use is on the rise.
- In 2019, 31.3% of adults in Sumter County were obese (27.4% in Florida). 41.4% of adults in Sumter County are physically inactive and 19% reported not having access to exercise opportunities.
- As of 2019, 71.5% of Sumter County residents were 55 years of age or older.
- In 2019, the ratio of mental health providers to patients in Sumter County was 1: 2,450 patients. Florida's ratio is 1 provider to 670 patients.
- In 2018, only 66% of drivers in Sumter County were wearing seatbelts during an assessment of driver behavior (90.2% in Florida, 2017).

Community Engagement (CE) centers on the ability of the local public health system to reach, effectively communicate with, and ultimately modify the health behaviors of the communities served. This strategic issue area can be understood by asking the following three questions:

- 1.) How well does the public health system understand the needs of the community and provide appropriate services to address those needs?
- 2.) How efficiently does the community identify and utilize available health resources?
- 3.) How well do local organizations and agencies collaborate to provide public health services to the community?

This strategic priority area was selected after it was determined to be a local area for improvement in the:

- Community Themes and Strengths Assessment (focus groups, steering committee survey)
- Forces of Change Assessment
- Local Public Health System Assessment (Essential Services 3 & 7)

Lake Okahumpka Park “trail has health tips to ensure individuals are exercising the safest way. The world trail provides a diverse set of exercises kits, while offering helpful ways to use them to decrease injury.” ~2017-2018 Sumter STYL Participant

Goals, Strategies, & Objectives

Strategic Issue Areas

- Maternal and Child Health
- Chronic and Infectious Diseases
- Community Engagement

2018-2023 CHIP Goals Summary		
Strategic Issue Area	Goal	Baseline
Maternal & Child Health (MCH)	1 Decrease ages 0-5 motor vehicle crash morbidity & mortality rate	562.7 per 100,000 population (pop.) (2014-2016)
	2 Decrease teen birth rates	24.1 per 1,000 live births (2016)
	3 Increase rate of mothers that initiate breastfeeding	78% (2016)
	4 Increase number of parenting support resources	1 (2018)
	5 Increase access to parenting resources	-
Chronic and Infectious Diseases (CID)	1 Reduce the rate of falls deaths & injuries	30.05 per 100,000 pop. (2015) & 229.44 per 100,000 pop. (2014)
	2 Increase access to nutrition education	-
	3 Increase access to physical activity opportunities	-
	4 Improve data quality regarding health behaviors	-
	5 Increase rates of seatbelt use amongst target populations	66% of evaluated Drivers in Sumter (2017)
	6 Enhance tobacco prevention activities	-
	7 Increase early detection of infectious diseases	Contact tracing at 9% (2020)
Community Engagement (CE)	1 Increase access to available health resources	-
	2 Increase collaboration amongst local community organizations	-
	3 Improve data quality regarding health marketing effectiveness	-

NOTE on objective format:

In the tables below, if the recording year of the baseline measurement is not explicitly referenced in the text of the objective then it will appear in parenthesis "(baseline recording year)" within the objective. Example: "By December 30, 2023, increase the number of local HPV vaccination doses given to those under 18 by 5% from a baseline of 392 (2019)."

Strategic Issue Area Outline: Maternal & Child Health

Goal	Strategy	Objective	Responsible
1	1.1) Develop car seat promotion program	A. By June 30, 2019, increase the number of car seat check in collaborations between Sumter-CHD & community partners from zero (2018) to at least one.	Sumter-CHD PMC/ATF
		B. By June 30, 2019, increase the number of locally selected strategies developed to promote existing car seat safety check resources from zero (2018) to at least one.	Sumter-CHD PMC/ATF
		C. By June 30, 2019, increase the number of locally selected strategies to promote existing car seat safety check resources from zero (2018) to at least one.	Sumter-CHD PMC/ATF
2	2.1) Provide teen pregnancy resources, education, & training	A. By December 31, 2021, increase the number of Sumter-CHD staff members assigned as the local maternal and child health project lead from zero (2018) to one.	Sumter-CHD Health Education
		B. By June 30, 2022, increase the number of Sumter-CHD teen pregnancy prevention programs from zero (2018) to one.	Sumter-CHD Health Education
3	3.1) Increase lactation resources, education, & training	A. By June 30, 2019, maintain the number Sumter-CHD certified lactation consultant at, at least, the 2018 baseline level of 1.	Sumter-CHD Health Education
		B. By June 30, 2019, increase the number of partnerships with community partners aimed at the creation of a referral system for breastfeeding support through the Sumter-CHD lactation consultant from zero (2018) to one.	Sumter-CHD Health Education
		C. By December 31, 2021, increase the number of Sumter-CHD breastfeeding education outreach campaigns from zero (2018) to one.	Sumter-CHD PMC/ATF
4	4.1) Increase parenting support resources	A. By June 30, 2021, increase the number of Sumter-CHD parenting support partnerships from zero (2018) to one.	Sumter-CHD Health Education
		B. By June 30, 2019, increase the number of Sumter County parenting support community organizations, are educated by Sumter-CHD about the United Way 211 guide registration process from zero (2018) to one.	Sumter-CHD PMC/ATF
5	5.1) Promote use of resource guides	A. By June 30, 2019, increase the number of methods used to promote the United Way 211 guide from zero (2018) to three. (print and or online version).	Sumter-CHD Epidemiology
		B. By June 30, 2019, increase the number of Sumter-CHD community partners which are encouraged by Sumter-CHD to update or add information to the United Way 211 guide from zero (2018) to five.	Sumter-CHD Epidemiology

Strategic Issue Area Outline: Chronic and Infectious Diseases

Goal	Strategy	Objective	Responsible
1	1.1) Develop falls prevention program	A. By June 30, 2021, increase the number of home falls risk assessments completed by Sumter-CHD or partners from zero (2018) to least two.	Sumter-CHD PMC/ATF
		B. By June 30, 2021, increase the number of patient falls risk assessments completed by Sumter-CHD or partners from zero (2018) to least two.	Advanced Physical Therapy (APT)
		C. By December 31, 2018, increase the number of media formats used to promote falls prevention from zero (2018) to at least three.	Sumter-CHD PMC/ATF
		D. By June 30, 2019, increase the number of Matter of Balance programs hosted by Sumter-CHD or partners from zero (2018) to at least two.	Sumter-CHD Health Education
		E. By June 30, 2021, increase the number of falls prevention needs assessments conducted with community health care providers & facilities from zero (2018) to at least one.	Sumter-CHD PMC/ATF
		F. By June 30, 2019, increase the number of falls prevention education & outreach presentations delivered to health care providers from one (2018) to at least one.	Sumter-CHD & APT
		G. By June 30, 2019, increase the number of falls prevention education & outreach presentations delivered by Sumter-CHD to community members from zero (2018) to two.	Sumter-CHD Health Education
2	2.1) Develop nutrition education partnership	A. By June 30, 2019, increase the number of nutrition education programs implemented by Sumter-CHD aimed at school-aged children from zero (2018) to one.	Sumter-CHD Health Education
		B. By December 31, 2018, increase the number of Health Wise Prize quiz competition events hosted by Sumter-CHD, which including health equity & nutrition components, from zero (2018) to one.	Sumter-CHD Health Education
		C. By June 30, 2019, increase the number of nutrition educational presentations delivered by Sumter-CHD and aimed at local churches from zero (2018) to one.	Sumter-CHD Health Education
3	3.1) Develop physical activity education partnership	A. By June 30, 2019, increase the number of Sumter-CHD physical activity educational programs aimed at school-aged children from zero (2018) to one.	Sumter-CHD Health Education
		B. By June 30, 2019, increase the number of Sumter-CHD physical activity educational presentations delivered to local churches from zero (2018) to one.	Sumter-CHD Health Education
4	4.1) Conduct community survey	A. By December 31, 2019, increase the number of Sumter-CHD partnerships with local organizations aimed at planning a community health behaviors survey from zero (2018) to one.	Sumter-CHD Epidemiology
		B. By June 30, 2022, increase the number of community health behaviors surveys that are planned, developed, & implemented from zero (2018) to one.	Sumter-CHD Epidemiology
		C. By June 30, 2023, increase the percent of community health behavior results that have been	Sumter-CHD PMC/ATF

		incorporated in the Sumter County CHA from 0% (2018) to 100%.	
		D. By June 30, 2023, increase the number of Sumter-CHD planning meeting aimed at discussing and planning to address local life expectancy disparities from zero (2018) to one.	Sumter-CHD PMC/ATF
5	5.1) Develop social marketing campaign for seatbelt promotion	A. By June 30, 2022, increase the number of local worksites that have partnered with Sumter-CHD to promote seatbelt use among employees from zero (2018) to one.	Sumter-CHD PMC/ATF
		B. By June 30, 2019, increase the number of distributed Sumter-CHD Provider Waiting Room DVDs that include seatbelt promotion to ten (10) health care providers from zero (2018) to ten.	Sumter-CHD PMC/ATF
6	6.1) Enhance tobacco prevention activities	A. By June 30, 2019, increase the percentage of tobacco grant deliverables are completed from 0% (2018) to 100%.	Sumter-CHD Tobacco
		B. By December 31, 2020, increase the number of enacted local policies aimed at reducing health inequities from zero (2018) to one.	Sumter-CHD Tobacco
	7.1) Increase early detection of infectious diseases	A. By August 24, 2020, increase the number of school-based infectious disease testing initiatives from zero (2018) to one.	Sumter-CHD Epidemiology/Nursing
		B. By September 21, 2020, increase the annual change in the number of infectious disease tests completed by Sumter-CHD by 30%, from a baseline of 24% (2018-2019).	Sumter-CHD Epidemiology/Nursing
7	7.2) Improve contact tracing outcomes	A. By December 30, 2020, increase the weekly percentage of COVID-19 cases with reported final outcomes in MERLIN by 90% from the baseline of 13% (2019).	Sumter-CHD Epidemiology
	7.3) Increase availability of Hepatitis C Virus (HCV) treatment	A. By June 30, 2021, increase the number of environmental scans for HCV treatment options in Sumter County from zero (2018) to one.	Sumter-CHD Epidemiology
		B. By December 30, 2021, increase the number of trainings for medical providers on HCV treatment offered in Sumter County from zero (2018) to one.	Sumter-CHD Epidemiology
		C. By December 30, 2023, increase the number of Sumter-CHD plans created to increase access to HCV treatment for Sumter residents from zero (2018) to one	Sumter-CHD Epidemiology
	7.4) Increase the human papillomavirus (HPV) vaccination rate	A. By December 30, 2023, increase the number of local HPV vaccination doses given to those under 18 by 5% from a baseline of 392 (2019).	Sumter-CHD Nursing
		B. By December 30, 2023, increase the number of HPV vaccination resolutions or proclamations passed by a local county or city government from zero (2018) to one.	Sumter-CHD Nursing

Strategic Issue Area Outline: Community Engagement

Goal	Strategy	Objective	Responsible
1	1.1) Promote local health resources	A. By December 15, 2018, increase the number of Healthy Ways, Healthy Days calendars produced by 10% from the baseline of 2100 (2018).	Sumter-CHD ATF/PMC & LSSC
		B. By January 31, 2019, increase the percentage of 2019 Healthy Ways, Healthy Days Calendars distributed from 0% to 100%.	Sumter-CHD ATF/PMC & LSSC
		C. By December 31, 2018, increase the number of locations on the Sumter-CHD website where the United Way 211 guide is available from 0 (2018) to one.	Sumter-CHD IT
		D. By December 31, 2018, complete one annual redesign & update on the Sumter-CHD brochure. Baseline: zero (2018).	Sumter-CHD Health Education
		E. By December 31, 2022, complete one resource mapping project focused on the public health resources available for Sumter county residents. Baseline: zero (2018).	Sumter-CHD PMC/ATF
2	2.1) Develop Community Health Event promotion partnership	A. By June 30, 2023, increase the number of partnerships with community organizations for promotion of community health events from zero (2018) to two.	Sumter-CHD
	2.2) Improve communication amongst MAPP Steering Committee members	A. By June 30, 2023, increase the number of MAPP Steering Committee Newsletters to distributed to committee members from a baseline of zero (2018) to eight.	Sumter-CHD PMC/ATF
		B. By June 30, 2023, increase the number of MAPP Steering Committee meetings hosted from one (2018) to four.	Sumter-CHD PMC/ATF
2.3) Increase the number of cohosted/ cosponsored community events	A. By October 16, 2018, increase the number cosponsored community event with Lake-Sumter State College (LSSC) from zero (2018) to one.	Sumter-CHD PMC/ATF & LSSC	
3	3.1) Increase local awareness of public health	A. By December 31, 2018, conduct one survey to obtain feedback from Sumter-CHD programs & other community organizations on marketing best practices. Baseline: zero (2018)	Sumter-CHD PMC/ATF
		B. By July 1st of each year, increase the number of budgets created for the marketing from zero (2018) to one.	Sumter-CHD PMC/ATF
		C. By December 30, 2020, create one social marketing campaign to educate the community and partners on the function of public health. Baseline: zero (2018)	Sumter-CHD Health Education
		D. By December 30, 2020, publish one social marketing campaign. Baseline: zero (2018)	Sumter-CHD Health Education

Implementation & Evaluation

The Sumter County CHIP will be updated throughout the CHIP planning and implementation cycle. As progress is made new strategies will be added by MAPP Steering committee members. MAPP Steering Sub-committee members will track progress on a monthly or bimonthly basis, as determined appropriate by sub-committee members. Progress will be documented by way of meeting minute and use of the Sumter-CHD Accreditation Deliverable Tracker spreadsheet and dashboard. Every year, a full meeting of the Sumter County MAPP Steering Committee will be hosted by the Sumter MAPP Committee Chair. CHIP Annual Progress Report will be developed by Sumter-CHD staff. The CHIP Annual Progress Report assist in tracking and documenting progress on strategies, partner inputs, status of efforts, outcomes, and successes. In addition, the document will serve as way to revise the CHIP as needed.

The 2018 Sumter CHA CHANGE Survey identified both community assets and policy gaps. This assessment is being used to help guided efforts to establish strategic partnerships with priority neighborhoods and worksites and to build capacity within the community. The CHANGE Survey highlighted the need to strengthen local policies aimed at preventing chronic disease. The CHANGE Survey also highlighted key successes in policy implementation. For example, one best practice that was identified during the CHANGE Surveys was a policy allowing for frequent physical activity breaks in the workplace. Policies like this will be a major focus for the Sumter County MAPP Steering Committee. During implementation of Sumter County's CHIP, partners will work to engage residents in the CHIP process, continue to work towards addressing identified policy gaps, and work to promote policies that have been proven to improve public health. In addition, although there has been substantial progress made locally around program and policy change, Sumter MAPP Committee members will continue to identify additional opportunities to expand upon those successes moving forward.

Alignment Document

Local Goal	Corresponding State & National Goal			
Sumter-CHD Goal	Florida State Health Improvement Plan Goal	Healthy People 2020 Goal	National Prevention Strategy Priority	RWJ County Health Rankings
1.1 Decrease ages 0-5 motor vehicle crash morbidity and mortality rate.	ISV1 Prevent and reduce intentional and unintentional injuries and deaths in Florida.	IVP-16 Increase age-appropriate vehicle restraint system use in children (IVP-16.1, 16.2, and 16.3 Increase age-appropriate vehicle restraint system use in children aged 0 to 12 months, [aged 1 to 3 years, and aged 4 to 7 years]).	Injury and Violence Free Living	Social & Economic Factors: Injury Deaths
1.2 Decrease teen birth rates.		FP-8 Reduce pregnancies among adolescent females.	Reproductive and Sexual Health	Health Behaviors: Teen Birth
1.3 Increase rate of mothers that initiate breastfeeding.	HW1 Improve the food environment and nutrition habits across the lifespan to increase healthy weight.	MICH-21 Increase the proportion of infants who are breastfed.	Reproductive and Sexual Health	
1.4 Increase number of parenting support resources.	BH1 Reduce mental, emotional and behavioral health disorders in children through improved identification and treatment of behavioral health disorders in parents who come in contact with the child welfare system.	EMC-2 Increase the proportion of parents who use positive parenting and communicate with their doctors or other health care professionals about positive parenting.	Mental and Emotional Well-Being	
1.5 Increase access to parenting resources.	CD2 Enhance community health systems to address social determinants of health through Asset-Based Community Development and partnerships.		Mental and Emotional Well-Being
