# 2017-2019 Florida Behavioral Risk Factor Surveillance System (BRFSS)

### Introduction

The Florida Department of Health is pleased to release 2017-2019 Florida Behavioral Risk Factor Surveillance System (BRFSS) county-level data. This surveillance effort would not have been possible without the support of Florida's 67 County Health Departments (CHDs).

The Florida BRFSS is a statewide telephone survey that has been collecting and reporting health behavior data since 1986. This survey is the only source of state-specific, population-based estimates of the prevalence of various health conditions and related risk behaviors among Florida residents aged 18 and older. The purpose of this survey is to gather information regarding personal health and risk behaviors, selected medical conditions and preventive health care practices among Florida adults. Beginning in 2007, the BRFSS has been providing counties with local-level data every three years to estimate the prevalence of personal health behaviors and chronic health conditions that contribute to morbidity and mortality.

County-level surveys were previously conducted in 2002, 2007, 2010, 2013 and 2016. In 2017, the Department began using a three-year rolling rate methodology to provide county-level data. Combining three years of data creates a larger sample size, which decreases data suppression and allows annual reporting of county estimates. Completed surveys from each of the 67 counties were combined across the 2017-2019 survey period in order to produce statistically valid county-level estimates. This new methodology was designed in collaboration with the CHDs to better meet programmatic needs for local-level data.

A total of 54,260 interviews were completed statewide during the 2017-2019 period. 925 adults in Indian River County responded to the BRFSS across these three years.

This report presents survey data on a variety of issues including health status, health care access, lifestyle, chronic illnesses and disease prevention practices. Because BRFSS respondents are randomly selected, measures of prevalence and mean are subject to random sample errors. Measures listed in the data tables include the 95% confidence interval. If the confidence intervals overlap, there is no statistically significant difference in the prevalence rates. However, if the confidence intervals do not overlap, there is a statistically significant difference. The significance of measures with very wide confidence intervals should be interpreted with caution. Measures of prevalence and mean are excluded from the tables for any subpopulation with a sample size less than 30, which would yield statistically unreliable estimates.

The prevalence rates are weighted by the Centers for Disease Control and Prevention to represent all Florida adults. Weighting is a procedure that adjusts for the chance of an adult being selected to complete the survey and for discrepancies between the adults who completed the survey and the overall population of Florida adults. The data were weighted to the respondent's probability of selection by county, as well as age, sex, marital status, race/ethnicity and education level.

## 2017-2019 Florida BRFSS Data Report Table of Contents

#### **GLOSSARY**

# 2017-2019 Florida Behavioral Risk Factor Surveillance System Data Report

Activities of Daily Living Usual activities, such as self-care, work, or recreation.

**Adult** Individual aged 18 years or older.

Angina Most common symptom of coronary artery disease (CAD); chest pain or discomfort that

occurs if an area of the heart muscle does not get enough oxygen-rich blood.

Arthritis Joint inflammation; term used in the public health field to describe more than 100

rheumatic diseases and conditions that affect joints, the tissues which surround the joint, and other connective tissue; pattern, severity, and location of symptoms can vary.

**Asthma** Disease that affects the lungs; causes repeated episodes of wheezing, breathlessness,

chest tightness, and nighttime or early morning coughing.

**Binge Drinking\*** For women, consumption of 4 or more drinks during a single occasion in the past 30

days; for men, consumption of 5 or more drinks during a single occasion in the past 30

days.

**Blood Glucose** Also called blood sugar; refers to the level of glucose, the main sugar the body makes

from the food we eat, that is found in the bloodstream.

Blood Sugar See Blood Glucose

Body Mass Index (BMI) A number calculated from a person's height and weight; provides a reliable indicator of

body fatness for most people; used to screen for weight categories that may lead to

health problems.

Cancer General name for a group of diseases; when cells in a part of the body begin to grow

out of control, forming new, abnormal cells and sometimes invading (growing into) other

tissues.

Chronic Bronchitis A long-term condition in which the airways that carry air to the lungs become inflamed

and produce too much mucus, making it difficult to get air into and out of the lungs.

Chronic Diseases Diseases of long duration and generally slow progression (e.g., heart disease, stroke,

cancer, diabetes); represent the leading causes of mortality worldwide.

Chronic Obstructive Pulmonary Term that refers to a group of diseases that cause airflow blockage and breathing-

related problems, including emphysema and chronic bronchitis.

Coronary Artery Disease (CAD) Most common type of heart disease; occurs when a substance called plaque builds up

on the inner walls of the arteries that supply blood to the heart, called coronary arteries;

most common cause of a heart attack.

Coronary Heart Disease (CHD) See Coronary Artery Disease (CAD)

**Current Smoker\*** Combination of everyday smoker and some days smoker.

**Depressive Disorders** Mental illnesses characterized by a profound and persistent feeling of sadness or

despair and/or a loss of interest in things that once were pleasurable; disturbance in

sleep, appetite, and mental processes are a common accompaniment.

Diabetes General term for diabetes mellitus; disease in which blood glucose levels are above

normal.

**E-Cigarettes**An e-cigarette, also known as an electronic cigarette, is a device that allows a user to

inhale nicotine and other vapors.

**Emphysema** Long-term, progressive disease of the lungs that primarily causes shortness of breath;

tissues necessary to support the physical shape and function of the lungs are

destroyed. See also Chronic Obstructive Pulmonary Disease (COPD).

**Fibromyalgia** A musculoskeletal condition causing widespread muscle and joint pain and fatigue.

Flu Contagious respiratory illness caused by influenza viruses; can cause mild to severe

illness, and at times can lead to death.

#### **GLOSSARY**

# 2017-2019 Florida Behavioral Risk Factor Surveillance System Data Report

Flu Shot Influenza vaccine; an inactivated vaccine (containing killed virus) that is given with a

needle, usually in the arm. The flu vaccine can also be administered as an attenuated

vaccine (containing weakened, live virus) by a spray, mist, or drop in the nose.

Former Smoker Adults who reported smoking at least 100 cigarettes in their lifetimes but reported not

smoking now.

A form of arthritis caused by too much uric acid in the blood that causes pain, stiffness, Gout

and swelling of a joint.

**Health Behavior** An action taken by a person to maintain, attain, or regain good health and to prevent

illness.

**Health Care Coverage** Health insurance, pre-paid plans such as HMO's, government plans such as Medicare.

**Health Care Provider** A person who by education, training, certification, or licensure is qualified to and is

engaged in providing health care to patients (e.g., medical doctor, nurse practitioner,

physician assistant, registered nurse).

**Health Risk Behavior** An action taken by a person that is associated with higher than average rates of

morbidity or mortality (e.g., lack of physical activity, poor nutrition, tobacco use,

excessive alcohol consumption).

**Healthy Weight** Having a body mass index (BMI) ranging from 18.5 to 24.9; BMI is calculated using self-

reported height and weight.

**Heart Attack** Most commonly caused by coronary artery disease (CAD); occurs when a section of the

heart muscle dies or gets damaged because of reduced blood supply.

**Heavy Drinking\*** For women, consumption of more than 1 drink per day on average in the past 30 days;

for men, consumption of more than 2 drinks per day on average in the past 30 days.

Hispanic Adults of Cuban, Mexican, Puerto Rican, South or Central American, or other Spanish

culture or origin, regardless of race; self-reported demographic variable.

HIV Human immunodeficiency virus (HIV) damages a person's body by destroying immune

system cells, which are crucial to helping the body fight diseases; can lead to acquired

immune deficiency syndrome (AIDS).

Influenza See Flu

Also called renal disease; general term for any damage that reduces the functioning of **Kidney Disease** 

the kidney.

Mental Health A state of well-being in which the individual realizes his or her own abilities, can cope

with the normal stresses of life, can work productively and fruitfully, and is able to make

a contribution to his or her community.

Never Smoked\* Adults who reported smoking less than 100 cigarettes in their lifetime.

Non-Hispanic Black Adults not of Hispanic culture or origins reporting membership in only the black race

category; self-reported demographic variable.

**Non-Hispanic White** Adults not of Hispanic culture or origins reporting membership in only the white race

category; self-reported demographic variable.

Having a body mass index (BMI) that is greater than or equal to 30.0; BMI is calculated Obese

using self-reported height and weight.

A condition characterized by being obese. Obesity

Overweight Having a body mass index (BMI) ranging from 25.0 to 29.9; BMI is calculated using self-

reported height and weight.

**Personal Doctor** A health care provider that an adult identifies as their personal health care provider.

**Physical Activity** Any bodily movement produced by the contraction of skeletal muscle that increases

energy expenditure above basal level and that enhances or maintains physical fitness

and overall health and wellness.

Vaccine given with a needle, usually in the arm, to prevent pneumococcal pneumonia. Pneumococcal Vaccination

#### **GLOSSARY**

# 2017-2019 Florida Behavioral Risk Factor Surveillance System Data Report

Pneumonia Infection of the lungs, usually caused by bacteria or viruses, that can cause mild to

severe illness.

Poor Mental Health Adults who report that their mental health, which includes stress, depression, and

problems with emotions, was not good on 14 or more of the previous 30 days.

Poor Physical Health Adults who report that their physical health, which includes physical illness and injury,

was not good on 14 or more of the previous 30 days.

Pre-Diabetes A condition in which an individual's blood sugar is high, but not high enough to be

diagnosed as diabetes.

Race/Ethnicity A measure that combines an adult's ethnicity status (Hispanic/non-Hispanic) and race

status (e.g., white; black; other); self-reported demographic variable.

**Routine Checkup** A general physical exam; does not include exams conducted for a specific injury,

illness, or condition.

**Sedentary\*** Participating in no leisure-time physical activity in the past 30 days.

**Sex** The condition or character of being male or female; self-reported demographic variable.

Smoking Inhalation of the smoke (gases and hydrocarbon vapors) generated by slowly burning

tobacco.

**Stroke** Sometimes called a brain attack; occurs when a clot blocks the blood supply to the brain

or when a blood vessel in the brain bursts.

# 2017-2019 Florida Behavioral Risk Factor Surveillance System Data Report

## **Healthy People 2030 Objectives**

The U.S. Department of Health and Human Services, Office of Disease Prevention and Health Promotion's Healthy People initiative identifies public health priorities that can improve the health and well-being of individuals. Organizations and communities can use Healthy People objectives to help set and measure progress toward benchmarks. The Healthy People 2030 objectives listed in this appendix are directly or indirectly related to the data presented in this report.

## **Alcohol Consumption**

SU-10. Reduce the proportion of people aged 21 years and over who engaged in binge drinking in the past month

#### **Arthritis**

A-02. Reduce the proportion of adults with arthritis whose arthritis limits their activities

#### Cardiovascular Disease

- HDS-01. Improve cardiovascular health in adults
- HDS-02. Reduce coronary heart disease deaths
- HDS-03. Reduce stroke deaths

#### **Cholesterol Awareness**

HDS-06. Reduce cholesterol in adults

## **Diabetes**

- D-01. Reduce the number of diabetes cases diagnosed yearly
- D-06. Increase the proportion of people with diabetes who get formal diabetes education
- D-07. Increase the proportion of adults with diabetes using insulin who monitor their blood sugar daily

#### **Hypertension Awareness & Control**

HDS-05. Increase control of high blood pressure in adults

## **Immunization**

IID-09. Increase the proportion of people who get the flu vaccine every year

## **Kidney Disease**

- CKD-01. Reduce the proportion of adults with chronic kidney disease
- CKD-02. Increase the proportion of adults with chronic kidney disease who know they have it

## **Overweight & Obesity**

NWS-03. Reduce the proportion of adults with obesity

## **Physical Activity**

PA-01. Reduce the proportion of adults who do no physical activity in their free time

# 2017-2019 Florida Behavioral Risk Factor Surveillance System Data Report

# **Healthy People 2030 Objectives**

# **Tobacco Use & Exposure**

- TU-01. Reduce current tobacco use in adults
- TU-02. Reduce current cigarette smoking in adults
- TU-03. Reduce current cigarette, cigar, and pipe smoking in adults
- TU-11. Increase past-year attempts to quit smoking in adults
- TU-14. Increase successful quit attempts in adults who smoke
- TU-15. Increase successful quit attempts in pregnant women who smoke
