2016 Florida Behavioral Risk Factor Surveillance System (BRFSS) Data Report

Florida Department of Health
Division of Community Health Promotion
Public Health Research Section
Epidemiology and Statistics

Introduction

The Florida Department of Health is pleased to release the 2016 Florida Behavioral Risk Factor Surveillance System (BRFSS) state and county data. This surveillance effort would not have been possible without the support of Florida's 67 County Health Departments (CHDs).

The Florida BRFSS is a statewide telephone survey that has been collecting and reporting health behavior data since 1986. This survey is the only source of state-specific, population-based estimates of the prevalence of various health conditions and related risk behaviors among Florida residents aged 18 and older. The purpose of this survey is to gather information regarding personal health and risk behaviors, selected medical conditions, and preventive health care practices among Florida adults.

The 2016 BRFSS was the fifth county-level survey to be conducted in Florida. It was previously conducted in 2002, 2007, 2010, and 2013. The 2016 county-level survey was developed in collaboration with state and local representatives and better designed to meet the needs of CHD programs by offering options to add county developed questions and increase sample sizes. Almost 37,000 interviews were completed statewide during the 2016 calendar year, with a target sample size of 500 completed surveys in each county.

Okeechobee County had 31,867 adult residents and 473 adults responded to the 2016 county-level BRFSS survey.

The 2016 BRFSS provides counties and the state with a rich data source to estimate the prevalence of personal health behaviors that contribute to morbidity and mortality among adults in Florida. This report presents the survey data on a variety of issues including health status, health care access, lifestyle, chronic illnesses, and disease prevention practice.

Because BRFSS respondents are randomly selected, measures of prevalence and mean are subject to random sample errors. Each measure listed in the data tables includes the 95% confidence interval. If the confidence intervals overlap, there is no statistically significant difference in the prevalence rates. However, if the confidence intervals do not overlap, there is a statistically significant difference. The significance of measures with very wide confidence intervals should be interpreted with caution. Measures of prevalence and mean are excluded from the tables for any subpopulation with a sample size less than 30, which would yield statistically unreliable estimates.

The prevalence rates are adjusted, or "weighted," by the Centers for Disease Control and Prevention to represent all Florida adults. Weighting is a procedure that adjusts for the chance of an adult being selected to complete the survey and for discrepancies between the adults who completed the survey and the overall population of Florida adults. The data were weighted to the respondent's probability of selection by county, as well as age, sex, marital status, race/ethnicity, and education level.

Due to a change in weighting methodology and the inclusion of cellular telephone responses starting in 2011, data from 2016 may not be comparable to data collected before 2011.

If any assistance is needed with interpretation or survey methods, please contact the Florida Department of Health, Public Health Research Section at (850) 245-4585.

2016 Florida BRFSS Data Report Table of Contents

Health Status	
Arthritis	1
Asthma	2

A1C Medical test that sums up how much glucose has been sticking to the

hemoglobin molecule in the bloodstream during the past 3 - 4 months;

in general, an A1C of 7% or less is recommended.

Activities of Daily Living

Usual activities, such as self-care, work, or recreation.

Adult Individual aged 18 years or older.

Aerobic Recommendations Performance of at least 150 minutes of moderate aerobic activity or 75

minutes of vigorous aerobic activity per week in the past 30 days.

Angina Most common symptom of coronary artery disease (CAD); chest pain or

discomfort that occurs if an area of the heart muscle does not get

enough oxygen-rich blood.

Arthritis Joint inflammation; term used in the public health field to describe more

than 100 rheumatic diseases and conditions that affect joints, the tissues which surround the joint, and other connective tissue; pattern, severity,

and location of symptoms can vary.

Asthma Disease that affects the lungs; causes repeated episodes of wheezing,

breathlessness, chest tightness, and nighttime or early morning

coughing.

Binge Drinking For women, consumption of 4 or more drinks during a single occasion;

for men, consumption of 5 or more drinks during a single occasion.

Blood Glucose Also called blood sugar; refers to the level of glucose, the main sugar

the body makes from the food we eat, that is found in the bloodstream; the state of low blood glucose is known as hypoglycemia (< 70) and the state of high blood glucose is known as hyperglycemia (>130 before

meals; >180 one to two hours after the start of a meal).

Blood Pressure The force of the blood against the artery walls; two levels of blood

pressure measured, the highest, or systolic, occurs when the heart pumps blood into the blood vessels, and the lowest, or diastolic, occurs

when the heart rests.

Blood Stool Test A test that may use a special kit at home to determine whether the stool

contains blood.

Blood Sugar See Blood Glucose

Body Mass Index (BMI) Body Mass Index (BMI) is a number calculated from a person's height

and weight; provides a reliable indicator of body fatness for most people; used to screen for weight categories that may lead to health problems.

Cancer General name for a group of more than 100 diseases; when cells in a

part of the body begin to grow out of control, forming new, abnormal

cells and sometimes invading (growing into) other tissues.

Cholesterol A substance the body uses to produce hormones, vitamin D, and food-

digesting acids.

Chronic Bronchitis A long-term condition in which the airways that carry air to the lungs

become inflamed and produce too much mucus, making it difficult to get

air into and out of the lungs.

Chronic Diseases Diseases of long duration and generally slow progression (e.g., heart

disease; stroke; cancer; diabetes); represent the leading causes of

mortality worldwide.

Chronic Obstructive Pulmonary Disease (COPD To

Term that refers to a group of diseases that cause airflow blockage and

breathing-related problems, including emphysema and chronic bronchitis.

Coronary Heart Disease (CHD) See Coronary Artery Disease (CAD)

Current Smoker Combination of every day smoker and some day smoker.

GLOSSARY

Depressive DisordersMental illnesses characterized by a profound and persistent feeling of

sadness or despair and/or a loss of interest in things that once were pleasurable; disturbance in sleep, appetite, and mental processes are a

common accompaniment.

Diabetes General term for diabetes mellitus; disease in which the blood glucose

levels are above normal due to either the pancreas not producing enough insulin (Type-1 diabetes) or the body not using its own insulin as

well as it should (Type-2 diabetes).

Emphysema Long-term, progressive disease of the lungs that primarily causes

shortness of breath; tissues necessary to support the physical shape and function of the lungs are destroyed; destruction of lung tissue around smaller sacs, called alveoli, makes these air sacs unable to hold their functional shape upon exhalation. See also Chronic Obstructive

Pulmonary Disease (COPD)

Every day Smoker Adults who reported smoking at least 100 cigarettes in their lifetime and

reported smoking everyday now.

Exercise See Physical Activity

Fibromyalgia A musculoskeletal condition causing widespread muscle and joint pain

and fatigue.

Flu Contagious respiratory illness caused by influenza viruses; can cause

mild to severe illness, and at times can lead to death. Some people, such as older people, young children, and people with certain health

conditions, are at high risk for serious flu complications.

Flu Shot Influenza vaccine; an inactivated vaccine (containing killed virus) that is

given with a needle, usually in the arm; approved for use in individuals older than 6 months, including healthy people and people with chronic medical conditions. The flu vaccine can also be administered by a spray, mist, or drop in the nose called FluMist™; approved for use in healthy

individuals between 2 and 49 years old.

Former Smoker Adults who reported smoking at least 100 cigarettes in their lifetime but

reported not smoking now.

Good Mental Health Adults who reported poor mental health on 13 or less days out of the

past 30 days.

Good Physical Health Adults who reported poor physical health on 13 or less days out of the

past 30 days.

Gout A form of arthritis caused by too much uric acid in the blood that causes

pain, stiffness, and swelling of a joint.

Health Behavior An action taken by a person to maintain, attain, or regain good health

and to prevent illness.

Health Care Coverage Example: health insurance, pre-paid plans such as HMO's, government

plans such as Medicare.

Health Care Provider A person who by education, training, certification, or licensure is qualified

to and is engaged in providing health care to patients (e.g., medical doctor; nurse practitioner; physician assistant; registered nurse).

Health Risk Behavior

An action taken by a person that is associated with higher than average

rates of morbidity or mortality (e.g., lack of physical activity; poor

nutrition; tobacco use; excessive alcohol consumption).

Healthy Weight Having a body mass index (BMI) ranging from 18.5 to 24.9; BMI is

calculated using self-reported height and weight.

GLOSSARY

Heart Attack Most commonly caused by coronary artery disease (CAD); occurs when

a section of the heart muscle dies or gets damaged because of reduced

blood supply.

Heavy Drinking For women, consumption of more than 1 drink per day on average; for

men, consumption of more than 2 drinks per day on average.

High Blood Cholesterol Condition where there is too much cholesterol in the blood; increases

the risk of coronary heart disease, heart attack, or angina.

High Blood Pressure Condition where the blood circulates through the arteries with too much

force; tires the heart, harms the arteries, and increases the risk of heart attack, stroke, and kidney problems; a systolic measurement of 140 mmHg or higher OR a diastolic measurement of 90 mmHg or higher.

Hispanic Adults of Cuban, Mexican, Puerto Rican, South or Central American, or

other Spanish culture or origin, regardless of race; self-reported

demographic variable.

HIV Human immunodeficiency virus (HIV) damages a person's body by

destroying specific blood cells, called CD4+ T-cells, which are crucial to helping the body fight diseases; can lead to acquired immune deficiency

syndrome (AIDS).

Hypertension See High Blood Pressure

Hysterectomy An operation to remove the uterus (womb) in women.

Inactive No leisure-time physical activity, performance of aerobic activity for less

than 10 minutes at a time, or performance of only non-aerobic activities.

Influenza See Flu

Insufficiently Active Performance of less than 150 minutes of moderate aerobic activity or 75

minutes of vigorous aerobic activity per week in the past 30 days.

Kidney Disease Also called renal disease; general term for any damage that reduces the

functioning of the kidney.

Lupus A chronic inflammatory disease resulting from an attack by the body's

own immune system.

Mammogram Mammography is the process of using low-energy X-rays to examine the

human breast; this test is ordered to detect tumors and differentiate

between benign and malignant disease.

Mental Health A state of well-being in which the individual realizes his or her own

abilities, can cope with the normal stresses of life, can work productively and fruitfully, and is able to make a contribution to his or her community.

Muscle Strengthening Recommendations Performance of muscle-strengthening activities, such as activities using

body weight, weight machines, free weights, or elastic bands, at least

two times per week in the past 30 days.

Never SmokedAdults who reported smoking less than 100 cigarettes in their lifetime.

Non-Hispanic Black Adults not of Hispanic culture or origins reporting membership in only the

Black race category; self-reported demographic variable.

Non-Hispanic White Adults not of Hispanic culture or origins reporting membership in only the

White race category; self-reported demographic variable.

Non-smoker Combination of former smoker and never smoked.

Obese Having a body mass index (BMI) that is greater than or equal to 30.0;

BMI is calculated using self-reported height and weight.

Obesity A condition characterized by being obese.

GLOSSARY

Overweight Having a body mass index (BMI) ranging from 25.0 to 29.9; BMI is

calculated using self-reported height and weight.

Overweight or Obese Having a body mass index (BMI) that is greater than or equal to 25.0;

BMI is calculated using self-reported height and weight.

Pap Test A cervical cancer screening test in which surface cells from the cervix

are examined for cancer or pre-cancer characteristics.

Personal Doctor A health care provider that an adult identifies as their personal health

care provider.

Pneumonia Infection of the lungs, usually caused by bacteria or viruses, that can

cause mild to severe illness in people of all ages; signs can include coughing, fever, fatigue, nausea, vomiting, rapid breathing or shortness of breath, chills, or chest pain. Certain people are more likely to become ill with pneumonia (e.g., children aged 5 years or younger, adults aged 65 years or older; adults with disabilities, HIV/AIDS, or who smoke

cigarettes).

Pneumonia Vaccination Pneumococcal vaccine; vaccine given with a needle, usually in the arm;

23-valent pneumococcal polysaccharide vaccine (PPSV23) approved for use in adults 65 years or older as well as in adults 19-64 years who have specific underlying conditions (e.g., immune deficiency, asthma, COPD).

Race/Ethnicity A measure that combines an adult's ethnicity status (Hispanic/non-

Hispanic) and race status (e.g., white; black; other); self-reported

demographic variable.

Routine Checkup A general physical exam; does not include exams conducted for a

specific injury, illness, or condition.

Sedentary Participating in no leisure-time physical activity in the past 30 days.

Sex The condition or character of being male or female; self-reported

demographic variable.

Sigmoidoscopy/Colonoscopy Exams in which a tube is inserted in the rectum to view the colon for

signs of cancer or other health problems.

Smoking Inhalation of the smoke (gases and hydrocarbon vapors) generated by

slowly burning tobacco.

Some Day Smoking Adults who reported smoking at least 100 cigarettes in their lifetime and

reported smoking some days now.

Stroke Sometimes called a brain attack; occurs when a clot blocks the blood

supply to the brain or when a blood vessel in the brain bursts.

Tetanus A bacterial infection that affects the central nervous system and can

result in painful muscle spasms, stiff jaw, and potentially death.

Tetanus ShotTetanus vaccine; vaccine given with a needle, usually in the shoulder

muscle; a booster tetanus vaccine should be received every ten years.

Healthy People 2020 Objectives

Alcohol Consumption

- SA-14. Reduce the proportion of persons engaging in binge drinking of alcoholic beverages
- SA-15. Reduce the proportion of adults who drank excessively in the previous 30 days

Arthritis

- AOCBC-2. Reduce the proportion of adults with doctor-diagnosed arthritis who experience a limitation in activity due to arthritis or joint symptoms
- AOCBC-9. Increase the proportion of adults with chronic joint symptoms who have seen a health care provider for their symptoms
- AOCBC-11. Reduce hip fractures among older adults

Asthma

- RD-6. Increase the proportion of persons with current asthma who receive formal patient education
- RD-7. Increase the proportion of persons with current asthma who receive appropriate asthma care according to National Asthma Education and Prevention Program (NAEPP) guidelines

Cancer Screening

- C-15. Increase the proportion of women who receive a cervical cancer screening based on the most recent guidelines
- C-16. Increase the proportion of adults who receive a colorectal cancer screening based on the most recent guidelines
- C-17. Increase the proportion of women who receive a breast cancer screening based on the most recent guidelines

Cardiovascular Disease

- HDS-1. (Developmental) Increase overall cardiovascular health in the U.S. population
- HDS-2. Reduce coronary heart disease deaths
- HDS-3. Reduce stroke deaths
- HDS-4. Increase the proportion of adults who have had their blood pressure measured within the preceding two years and can state whether their blood pressure was normal or high
- HDS-5. Reduce the proportion of persons in the population with hypertension
- HDS-11. Increase the proportion of adults with hypertension who are taking the prescribed medications to lower their blood pressure
- HDS-12. Increase the proportion of adults with hypertension whose blood pressure is under control
- HDS-13. Increase the proportion of adults with elevated LDL cholesterol who have been advised by a health care provider regarding cholesterol-lowering management including lifestyle changes and, if indicated, medication

Healthy People 2020 Objectives

Diabetes

- D-1. Reduce the annual number of new cases of diagnosed diabetes in the population
- D-5. Improve glycemic control among the population with diagnosed diabetes
- D-8. Increase the proportion of persons with diagnosed diabetes who have at least an annual dental examination
- D-9. Increase the proportion of adults with diabetes who have at least an annual foot examination
- D-10. Increase the proportion of adults with diabetes who have an annual dilated eye examination
- D-11. Increase the proportion of adults with diabetes who have a glycosylated hemoglobin (A1C) measurement at least twice a year
- D-13. Increase the proportion of adults with diabetes who perform self-blood glucose-monitoring at least once daily
- D-14. Increase the proportion of persons with diagnosed diabetes who receive formal diabetes education
- V-5.2. Reduce visual impairment due to diabetic retinopathy

Disability

DH-17. Increase the proportion of adults with disabilities who report sufficient social and emotional support

Exercise

- PA-1. Reduce the proportion of adults who engage in no leisure-time physical activity
- PA-2. Increase the proportion of adults who meet current Federal physical activity guidelines for aerobic physical activity and for muscle-strengthening activity

Family Planning

FP-1. Increase the proportion of pregnancies that are intended

Healthcare Access

- AHS-1. Increase the proportion of persons with health insurance
- AHS-3. Increase the proportion of persons with a usual primary care provider
- AHS-6. Reduce the proportion of individuals who are unable to obtain or delay in obtaining necessary medical care, dental care, or prescription medicines

HIV/AIDS

HIV-14. Increase the proportion of adolescents and adults who have been tested for HIV in the past 12 months

Healthy People 2020 Objectives

Immunization

- IID-1. Reduce, eliminate, or maintain elimination of cases of vaccine-preventable diseases
- IID-12. Increase the percentage of children and adults who are vaccinated annually against seasonal influenza
- IID-12.7. Increase the percentage of noninstitutionalized adults aged 65 years and older who are vaccinated against seasonal influenza
- IID-13. Increase the percentage of adults who are vaccinated against pneumococcal disease
- IID-13.1. Increase the percentage of noninstitutionalized adults aged 65 years and older who are vaccinated against pneumococcal disease

Injury Prevention

OA-11. Reduce the rate of emergency department visits due to falls among older adults

Oral Health

- OH-4. Reduce the proportion of adults who have ever had a permanent tooth extracted because of dental caries or periodontal disease
- OH-7. Increase the proportion of children, adolescents, and adults who used the oral health care system in the past year

Overweight & Obesity

- NWS-8. Increase the proportion of adults who are at a healthy weight
- NWS-9. Reduce the proportion of adults who are obese

Sleep

SH-4. Increase the proportion of adults who get sufficient sleep

Substance Abuse

SA-19. Reduce the past-year nonmedical use of prescription drugs

Tobacco Use & Exposure

- TU-1. Reduce tobacco use by adults
- TU-4. Increase smoking cessation attempts by adult smokers
- TU-5. Increase recent smoking cessation success by adult smokers
- TU-6. Increase smoking cessation during pregnancy

The Healthy People 2020 objectives listed in this appendix are directly or indirectly related to the data presented in this report.
