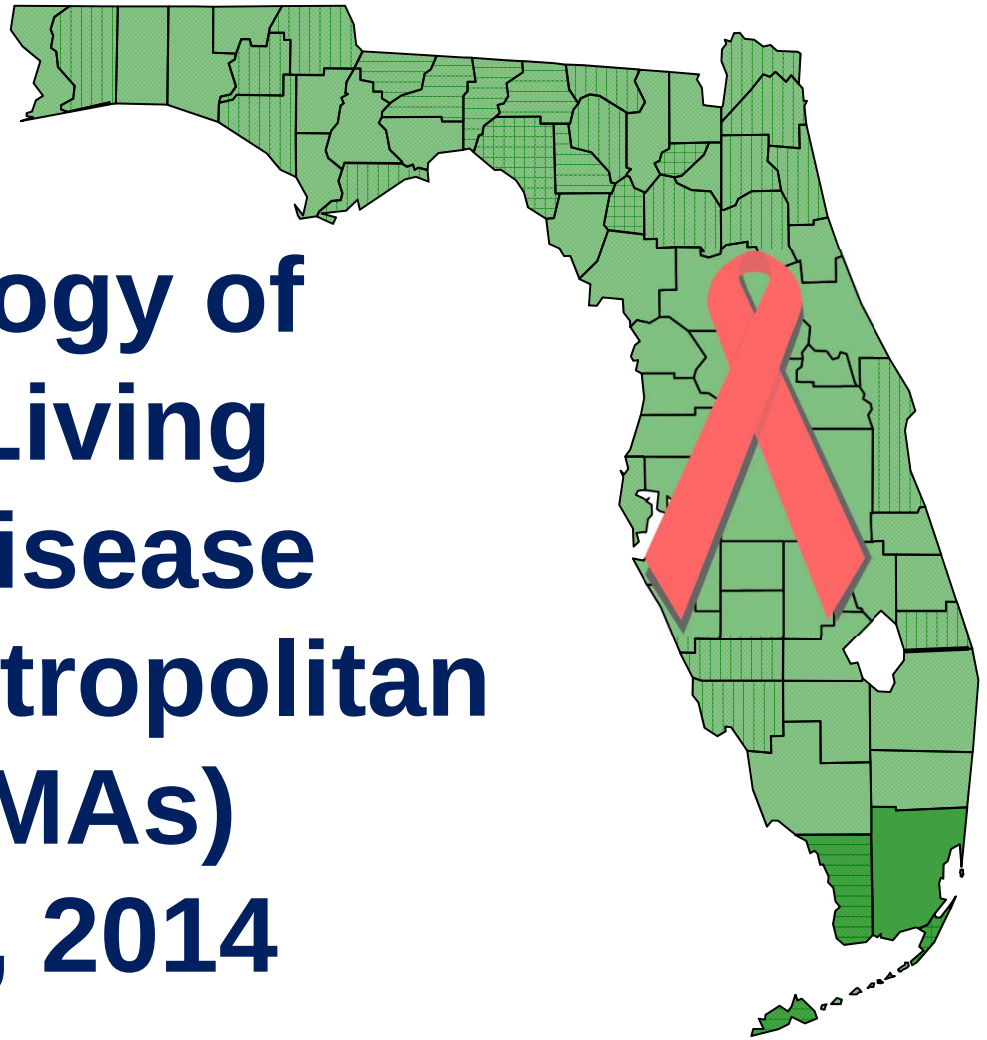
To protect, promote and improve the health of all people in Florida through integrated state, county, and community efforts.



Epidemiology of Persons Living with HIV Disease by Eligible Metropolitan Areas (EMAs) in Florida, 2014

Florida Department of Health

HIV/AIDS Section

Division of Disease Control and Health Protection

Living (Prevalence) Data as of 06/30/2015

Created: 12/04/14

Revision: 05/26/16

Cases Living with HIV Disease

- Data in these slides represent cases living with HIV Disease, also referred to Persons Living with HIV/AIDS (PLWHAs), who were reported through the most recent calendar year. Living data are also referred as prevalence cases.
- HIV prevalence data are generated later in the year, usually in July, when most of the "expected" death data are complete.
- Adult cases represent ages 13 and older, pediatric cases are those under the age of 13. For data by year, the age is by age of diagnosis. For living data, the age is by current age at the end of the most recent calendar year, regardless of age at diagnosis.
- Unless otherwise noted, whites are non-Hispanic and blacks are non-Hispanic.
- Total statewide data will include Department of Correction Cases (DOC) unless otherwise noted. County data will exclude DOC cases.

Eligible Metropolitan Areas

EMA	COUNTY
Jacksonville	Clay, Duval, Nassau, St. Johns
Orlando	Lake, Orange, Osceola, Seminole
Tampa-St. Petersburg	Hernando, Hillsborough, Pasco, Pinellas
W. Palm Beach	Palm Beach
