Tallahassee, FL

Participants in this public workshop should be aware that these proceedings are being recorded and that an audio file of the meeting will be posted to the Electrolysis Council's website.

9:30 a.m.

Call to Order – Rules Workshop

I. Opening Comments

The key purpose of the workshop is to hear public comment on the Board of Medicine's directive to take a broader look at distinguishing licensure pathways for those who want to use primarily laser equipment versus those who want to use an epilator and laser equipment.

II. Public Comment

The Electrolysis Council would like to hear public comment on the above topic. This includes but is not limited to public comment on the questions below.

Whether the current 320 hour training requirement in Rule 64B8-53.002, F.A.C., is necessary for electrologists who primarily want to use laser equipment?

For electrologists who primarily want to use laser equipment, what training requirements should be put in place?

What training is needed when an electrologist uses a type of laser equipment that he or she has not used before?

III. Concluding Comments
