</table>
New HIV cases are defined as the number of new HIV infection cases diagnosed during the period. HIV data include those cases that have converted to AIDS. HIV cases cannot be added with AIDS cases. The percent change is calculated as the change over the combined five year period.

Rates are calculated per 100,000 population.

MSM includes MSM and MSM/IDU
Male IDU includes IDU and MSM/IDU
WCBA = Women of Child Bearing Age

</table>
New HIV cases are defined as the number of new HIV infection cases diagnosed during the period specified, data as of 06/30/2016. HIV data include those cases that have converted to AIDS. HIV cases cannot be added with AIDS cases to get combined totals since the categories are not mutually exclusive.

</table>
New AIDS cases are defined as the number of new AIDS cases diagnosed during the period specified. HIV data include those cases that have converted to AIDS. HIV cases cannot be added with AIDS cases to get combined totals. The percent change is calculated as the change over the combined five year period. Rates are calculated per 100,000 population.

MSM includes MSM and MSM/IDU
Male IDU includes IDU and MSM/IDU
WCBA = Women of Child Bearing Age

</tbody>
</table>
New AIDS cases are defined as the number of new AIDS cases diagnosed during the period specified, data as of 06/30/2016. HIV data include those cases that have converted to AIDS. HIV cases cannot be added with AIDS cases to get combined totals since the categories are not mutually exclusive.

Persons Living with HIV/AIDS (PLWHA) is defined as the number of persons living with HIV disease. Persons Living with HIV not AIDS (PLWH) is defined as the number of persons living with HIV (not AIDS). Persons Living with AIDS (PLWA) is defined as the number of persons living with AIDS in this area. The percent change is calculated as the change over the combined three year period.

MSM includes MSM and MSM/IDU
Male IDU includes IDU and MSM/IDU
WCBA = Women of Child Bearing Age
