

The Bureau of Emergency Medical Services (EMS) will no longer provide a list of labs for required alcohol and/or drug screens. It will be the responsibility of the licensee to locate a lab and have the lab approved by the Department. Criteria for approval would consist of ensuring that the lab has an alcohol and/or drug screening policy, will accept the final order as the request to screen the licensee accordingly, and will provide the results to the Compliance Officer on behalf of the Bureau of EMO. Please contact your Compliance Officer if you have any questions concerning this matter.
