### **Interim Process to Qualify Children for Enrollment In the Children's Medical Services Plan**

Children with chronic and serious conditions may choose to enroll in the Children's Medical Services specialty plan (CMS plan). To qualify for enrollment in the CMS plan, the child's physician must submit a letter to the Agency for Health Care Administration attesting that the child's current diagnosis is one of the qualifying chronic and serious conditions listed below.

This is a time-limited process that will end once the Department of Health promulgates a rule specifying how children can qualify for the CMS plan.

The instructions for the physician's attestation are on the Agency for Health Care Administration's Medicaid Web pages for [Recipient Support](#) and [Provider Services](#).
