Use the following guidance to order the vaccines that best suit the needs for VFC Program-eligible children and provide coverage of children in the highest at-risk age cohorts.

Based on information from the CDC, our understanding is that all presentations of influenza vaccine offered through the VFC Program will be quadrivalent formulation for VFC Program-eligible children 36 months through 18 years of age.

- 0.25 ml-preserved-free – 6 to 35 months\*
- 0.50 ml-preserved-free – 36 months through 18 years\*
- FluMist® (live, intranasal) – 2 through 18 years (preservative-free)\*
- Multi-dose vial\*\* – age recommendations vary by brand availability\*

The VFC Program will make every effort to accommodate your request given availability of the vaccine.

\*\*Vaccine contains Thimerosal as a preservative.
