

Instructions for Assembling the Table Top Soda Display

Material Needed:

- 10 - 3" test tubes with caps (aqua tubes from a florist work well) or 10 sugar packets
- Display board with easel
- Velcro rounds
- 10 tsp table salt or sugar (salt might be a better choice to avoid bugs)
- Scotch tape

Instructions:

1. Remove caps from tubes
2. Fill each tube with 1 teaspoon salt or sugar
3. Place tape over the tube opening (so salt/sugar won't spill)
4. Put caps back on tubes
5. Place the 10 tubes on each display using Velcro rounds
6. Or use sugar packets and attach to display using Velcro rounds.
