2010 Pinellas County, Florida CPPW BRFSS Data Report

Introduction

The Florida Department of Health is pleased to release the 2010 Pinellas County, Florida Communities Putting Prevention to Work (CPPW) Behavioral Risk Factor Surveillance System (BRFSS) Data Report. In 2010, 3,101 Pinellas County adults, aged 18 years or older, completed the CPPW BRFSS survey. This survey was developed in collaboration with national, state, and local representatives to better meet the needs of programs, researchers, and community planners by providing estimates of prevalence of personal health behaviors that contribute to morbidity and mortality among adults in Pinellas County.

The 2010 CPPW BRFSS survey collected data on a variety of issues related to health status, healthcare access, lifestyle, chronic illnesses, and disease prevention practices. These data can be used to: (1) determine priority health issues and identify populations at highest risk for illness, disability, and death; (2) plan and evaluate prevention programs; (3) educate the community and policy makers about disease prevention; and (4) support community policies that promote health and prevent disease.

This report examines county level estimates for leading health indicators, each of which is presented by sex, race/ethnicity, age, education, income, and marital status. The 2010 CPPW BRFSS survey data are adjusted, or “weighted”, so that the resulting estimates can be generalized to all Pinellas County adults aged 18 years or older.

The weighting methodology for the 2010 CPPW BRFSS data is iterative proportional fitting, or “raking”. Raking is a commonly used estimation procedure where estimates are controlled to population totals or control totals. These estimates are adjusted by one demographic variable at a time until all variables have been adjusted. The procedure continues in a repetitive process until all group proportions in the sample approach those of the population. Raking variables for the 2010 CPPW BRFSS include age, sex, race/ethnicity, telephone source, education, marital status, and renter/owner status. Raking is used to mitigate the various sources of survey error such as under-coverage and nonresponse. A process called weight trimming is also being used and refers to increasing the value of extremely low weights and decreasing the value of extremely high weights to reduce their impact on the variance of the estimates.

Since CPPW BRFSS respondents are randomly selected, measures of prevalence, reported as percentages, are subject to random sampling errors; therefore, each measure listed in the data tables includes the 95% confidence interval. Measures of prevalence have been excluded from the tables for any subpopulation with a sample size less than 30, which would yield statistically unreliable estimates.

Using the confidence intervals, comparisons can be made between subpopulations within a measure (e.g., general level of health of males compared to females). If the confidence intervals overlap, there is no statistically significant difference in the prevalence rates. However, if the confidence intervals do not overlap, there is a statistically significant difference. For example, if 13.0%-15.7% of males and 10.5%-12.7% of females report their general level of health as fair or poor, it is appropriate to state that the prevalence of adults reporting their general level of health as fair or poor was significantly higher in males than females. If a measure’s confidence interval is wide, data should be interpreted with caution.

If any assistance is needed with data interpretation or survey methodology and for more information about the CPPW BRFSS, please contact the Bureau of Epidemiology's Chronic Disease Section at (850) 245-4401 or by e-mail at ChronicDisease@doh.state.fl.us. Glossary

Active	Descriptive category for physical activity level of adults; defined as performing 150 to 300 minutes (or vigorous equivalent minutes) of leisure-time aerobic physical activity per week in the past 30 days.
Adult	Individual aged 18 years or older.
Aerobic Physical Activity	Also called endurance activity; improves cardiorespiratory fitness; activity in which the body's large muscles move in a rhythmic manner for a sustained period of time (e.g., walking, running, swimming, bicycling).
Age	The length of time that one has existed; duration of life by years; self-reported demographic variable.
Angina	Most common symptom of coronary artery disease (CAD); chest pain or discomfort that occurs if an area of the heart muscle does not get enough oxygen-rich blood.
Body Mass Index (BMI)	Number calculated from a person's height and weight; provides a reliable indicator of body fatness for most people; used to screen for weight categories that may lead to health problems.
Calorie	Also called kilocalories (kcal) or kilogram calories; a measure of the amount of energy derived from food.
Cancer	General name for a group of more than 100 diseases; when cells in a part of the body begin to grow out of control, forming new, abnormal cells and sometimes invading or growing into other tissues.
Chronic Diseases	Diseases of long duration and generally slow progression (e.g., heart disease, stroke, cancer, diabetes); represent the leading causes of mortality worldwide.
Community Outreach Activity	See Health Promotion Activity.
Coronary Artery Disease (CAD)	Most common type of heart disease; occurs when a substance called plaque builds up on the inner walls of the arteries that supply blood to the heart, called coronary arteries; most common cause of a heart attack.
Coronary Heart Disease (CHD)	See Coronary Artery Disease (CAD).
Current Smoker	Combination of everyday smoker and some day smoker.

2010 Pinellas County, Florida CPPW BRFSS Data Report

Glossary

Daily Fruit Consumption Recommendation	≥ 2 servings of fruit per day.
Daily Vegetable Consumption Recommendation	≥ 3 servings of vegetables per day.
Depressed	The manifestation of depression, a common mental disorder that presents with low mood, loss of interest or pleasure, feelings of guilt or low self-worth, disturbed sleep or appetite, low energy, and poor concentration.
Diabetes	General term for diabetes mellitus; disease in which the blood glucose levels are above normal due to either the pancreas not producing enough insulin (Type-1 diabetes) or the body not using its own insulin as well as it should (Type-2 diabetes).
Energy Imbalance	The result of energy intake being higher than energy expenditure; most commonly caused by overeating or a sedentary lifestyle; leads to an increased risk of weight gain, overweight, and obesity.
Environmental Attributes	Components of the physical or built environment (e.g., presence of sidewalks, availability of public recreation facilities and transportation, controlled intersections, safety from crime).
Environmental Tobacco Smoke	See Secondhand Smoke.
Everday Smoker	Adults who reported smoking at least 100 cigarettes in their lifetime and reported smoking every day now.
Exercise	See Physical Activity.
Farmers' Market	Consists of individual vendors, mostly farmers, who set up booths, tables, or stands, outdoors or indoors, to sell fresh, usually locally grown, and sometimes organic, produce.
Farm-to-institution Program	Program that provides locally grown fruits and vegetables to schools, worksites, hospitals, or other community institutions.
Fidgety	Restless; impatient; uneasy; nervously and excessively fussy.
Food Stamps Program	Includes a food stamp card or voucher, or cash grants from the state for food.

2010 Pinellas County, Florida CPPW BRFSS Data Report

Glossary

Former Smoker	Adults who reported smoking at least 100 cigarettes in their lifetime but reported not smoking now.
Health Behavior	An action taken by a person to maintain, attain, or regain good health and to prevent illness.
Health Promotion Activity	An educational activity, program or effort directed at a targeted population to improve, maintain, and safeguard the health of that segment of society (e.g., health fair, health screening, seminar).
Health Risk Behavior	An action taken by a person that is associated with higher than average rates of morbidity or mortality (e.g., lack of physical activity, poor nutrition, tobacco use, excessive alcohol consumption).
Healthcare Coverage	Example: health insurance, pre-paid plans such as HMO's, government plans such as Medicare.
Healthcare Provider	A person who by education, training, certification, or licensure is qualified to and is engaged in providing healthcare to patients (e.g., medical doctor, nurse practitioner, physician assistant, registered nurse).
Healthy Foods	Examples: fresh fruits and vegetables, whole grain foods, low fat options.
Healthy Weight	Having a body mass index (BMI) ranging from 18.5 to 24.9; BMI is calculated using self-reported height and weight.
Heart Attack	Most commonly caused by coronary artery disease (CAD); occurs when a section of the heart muscle dies or gets damaged because of reduced blood supply.
Highly Active	Descriptive category for physical activity level of adults; defined as performing more than 300 minutes (or vigorous equivalent minutes) of leisure-time aerobic physical activity per week in the past 30 days.
Hispanic	Adults of Cuban, Mexican, Puerto Rican, South or Central American, or other Spanish culture or origin, regardless of race; self-reported demographic variable.
Hopeless	Without hope; despairing.
Insufficiently Active	Descriptive category for physical activity level of adults; defined as performing 1 to 149 minutes (or vigorous equivalent minutes) of leisure-time aerobic physical activity per week in the past 30 days.

2010 Pinellas County, Florida CPPW BRFSS Data Report

Glossary

Intensity	Refers to how much work is being performed or the magnitude of the effort required to perform an activity.
Leisure-time Physical Activity	Refers to physical activity or exercise performed outside of one's regular job.
Mainstream Smoke	Smoke that is exhaled from a smoker.
Mental Health	A state of well-being in which the individual realizes his or her own abilities, can cope with the normal stresses of life, can work productively and fruitfully, and is able to make a contribution to his or her community.
MET	Metabolic Equivalent Task; term used to represent the intensity of an aerobic activity.
Moderate-intensity Aerobic Activity	Also see relative intensity; if $60\% \text{VO}_2\text{max} \geq$ activity MET value.
Modifiable	Capable of being modified in form or character or strength.
Muscle Strengthening Physical Activity	Also called strength training, resistance training, or muscular strength and endurance exercises; activities that increase skeletal muscle strength, power, endurance, and mass (e.g., yoga, pilates, tai-chi, weight-lifting).
Myocardial Infarction	See Heart Attack.
Nervous	Unnaturally or acutely uneasy or apprehensive.
Never Smoked	Adults who reported smoking less than 100 cigarettes in their lifetime.
Non-Hispanic Black	Adults not of Hispanic culture or origins reporting membership in only the Black race category; self-reported demographic variable.
Non-Hispanic White	Adults not of Hispanic culture or origins reporting membership in only the White race category; self-reported demographic variable.
Non-smoker	Combination of former smoker and never smoked.

2010 Pinellas County, Florida CPPW BRFSS Data Report

Glossary

Obese	Having a body mass index (BMI) that is greater than or equal to 30.0; BMI is calculated using self-reported height and weight.
Obesity	A condition characterized by being obese.
Overweight	Having a body mass index (BMI) ranging from 25.0 to 29.9; BMI is calculated using self-reported height and weight.
Overweight or Obese	Having a body mass index (BMI) that is greater than or equal to 25.0; BMI is calculated using self-reported height and weight.
Personal Healthcare Provider	A healthcare provider that an adult identifies as their personal healthcare provider.
Physical Activity	Any bodily movement produced by the contraction of skeletal muscle that increases energy expenditure above a basal level and that enhances or maintains physical fitness and overall health and wellness.
Race/Ethnicity	A measure that combines an adult's ethnicity status (e.g., Hispanic, non-Hispanic) and race status (e.g., white, black, other); self-reported demographic variable.
Regular Soda/Pop	Any soda/pop that contains sugar; does not include diet soda/pop.
Relative Intensity	Method for calculating activity intensity; takes into account or adjusts for an adult's exercise capacity; for aerobic exercise, expressed as a percent of an adult's aerobic capacity (VO ₂ max), which is sex and age specific, in relation to the MET value of an aerobic activity.
Restless	Characterized by or showing inability to remain at rest; inquiet or uneasy, perpetually agitated.
Routine Check-up	A general physical exam; does not include exams conducted for a specific injury, illness, or condition.
Secondhand Smoke	A mixture of gases and fine particles that includes more than 7,000 chemicals, including hundreds that are toxic and about 70 that can cause cancer; comprised of sidestream smoke and mainstream smoke.
Sedentary	Not participating in any leisure-time physical activity.

2010 Pinellas County, Florida CPPW BRFSS Data Report

Glossary

Sex	The condition or character of being male or female; self-reported demographic variable.
Sidestream Smoke	Smoke that comes from the end of a lighted tobacco product.
Smoker Status	A measure that sorts adults into four categories of smoking: everyday smoker, someday smoker, former smoker, never smoked.
Smoking	Inhalation of the smoke, comprised of gases and hydrocarbon vapors, generated by slowly burning tobacco.
Someday Smoker	Adults who reported smoking at least 100 cigarettes in their lifetime and reported smoking some days now.
Stroke	Sometimes called a brain attack; occurs when a clot blocks the blood supply to the brain or when a blood vessel in the brain bursts.
Sugar-sweetened Beverage	A beverage or drink with sugar, in any form, added (e.g., Kool-aid, lemonade, sweet tea, sports or energy drinks); does not include 100% fruit juice, diet drinks, or artificially sweetened beverages.
Telephone Quitline	Free telephone-based service that connects people who smoke cigarettes with someone who can help them quit.
Vigorous-intensity Aerobic Activity	Also see relative intensity; if $60\% \text{VO}_2\text{max} < \text{activity MET value}$.
Weekly Leisure-time Aerobic Physical Activity Recommendation	≥ 150 minutes per week of moderate-intensity aerobic activities, OR ≥ 75 minutes per week of vigorous-intensity aerobic activities, OR ≥ 150 minutes per week of an equivalent combination of moderate- and vigorous-intensity aerobic activities performed for at least 10 minutes at a time.
Weekly Leisure-time Muscle Strengthening Physical Activity Recommendation	≥ 2 days per week, working all major muscle groups (i.e. legs, hips, back, abdomen, chest, shoulders, and arms).
WIC Program	Women, Infants, and Children Program; federal grant program that provides supplemental nutritious foods, nutrition education and counseling, and screening and referrals to other health, welfare, and social services to populations that are low-income, nutritionally at-risk.

2010 Pinellas County, Florida CPPW BRFSS Data Report

Glossary

Worksite Wellness Program

Refers to a coordinated and comprehensive set of strategies which include programs, policies, benefits, environmental supports, and links to the surrounding community designed to meet the health and safety needs of all employees.

Worthless

Without worth; of no use, importance, or value.

Communities Putting Prevention to Work
