

Mission:

To protect, promote & improve the health of all people in Florida through integrated state, county & community efforts.

Ron DeSantis
Governor

Scott A. Rivkees, MD
State Surgeon General

Vision: To be the **Healthiest State** in the Nation

MEMORANDUM

DATE: September 14, 2020
TO: County Health Department Health Officers
FROM: Amy C. Rigger, BSN, RN, Administrator
Immunization Section *Amy C. Rigger*
SUBJECT: Immunization Assessments Ranking Report for 2019–20

INFORMATION ONLY

The Bureau of Epidemiology's Immunization Section compiled the results from four previously published immunization assessments into one easy-to-read report. Those previously published assessments are the Kindergarten and Seventh Grade Immunization Status Report 2019–20, Vaccine Accountability Report January 1, 2019–December 31, 2019 (Cumulative), Assessment of County Health Department Immunization Coverage Levels in 2-Year-Old Children (2020), and the Survey of Immunization Levels in 2-Year-Old Children (2019).

The results of the individual assessments were ranked by county, from the county with the highest percentage achieved to the lowest. For each assessment, counties listed above the double underline have met or exceeded the state goal for that assessment. Counties listed below have not.

Please contact the Immunization Section field staff representative for your county if you have questions regarding, or want copies of, the previously published assessments included in this report. For further assistance, please contact our survey and assessment consultant, Ms. Amy Wilson, at 850-901-6806.

Abbreviations: WSEUF = Wasted, Spoiled, Expired, and Unaccounted For; CHD = County Health Department

*Counties listed above the double underline met or exceeded the state goal for that assessment.

¹Percent of kindergarten students fully immunized per section 1003.22, Florida Statutes and Florida Administrative Code Rule 64D-3.046.

²Not applicable, because non-county specific school districts (lab schools) are not ranked.

³Percent of seventh grade students fully immunized per section 1003.22 and Rule 64D-3.046.

⁴Percent of specific *Vaccines For Children Program* vaccine **not** WSEUF.

⁵The denominator for ranking is 38 (not 67) because 29 CHDs were not included in the assessment, as the total number of 2-year-old children in their immunization home was ≤10.

⁶Not applicable, because counties with ≤10 2-year-old children with a CHD as their immunization home are not included in the assessment.

⁷Percent of 2-year-old children whose parents rely on a Florida CHD as their child's immunization home, who completed the 4:3:1:3:3:1:4 vaccine series by age 24 months. 4:3:1:3:3:1:4 = vaccine series of four or more doses of diphtheria, tetanus toxoids, and acellular pertussis (DTAP) vaccine; three or more doses of poliovirus vaccine (IPV); one or more doses of measles, mumps, and rubella (MMR) vaccine; three or four doses (depending upon product type) of *Haemophilus influenzae* type b conjugate (Hib) vaccine; three or more doses of hepatitis B (HepB) vaccine; one or more doses of varicella vaccine (or physician documented disease history), and four or more doses of pneumococcal conjugate (PCV) vaccine.

⁸The denominator for ranking is 24 (not 67) because 43 counties are not individually ranked, but grouped together.

⁹Not applicable, because this survey provides county-level percentages for the 24 counties with consistently higher annual birth counts.

¹⁰Percent of 2-year-old children (in this random sample survey) who completed the 4:3:1:3:3:1:4 measure by age 24 months.

¹¹Statewide results are weighted by the number of births in each county. County results are not weighted.

Abbreviations: WSEUF = Wasted, Spoiled, Expired, and Unaccounted For; CHD = County Health Department

¹Percent of kindergarten students fully immunized per section 1003.22, Florida Statutes and Florida Administrative Code Rule 64D-3.046.

²Not applicable, because non-county specific school districts (lab schools) are not ranked.

³Percent of seventh grade students fully immunized per section 1003.22 and Rule 64D-3.046.

⁴Percent of specific *Vaccines For Children Program* vaccine **not** WSEUF.

⁵The denominator for ranking is 38 (not 67) because 29 CHDs were not included in the assessment, as the total number of 2-year-old children in their immunization home was ≤10.

⁶Not applicable, because counties with ≤10 2-year-old children with a CHD as their immunization home are not included in the assessment.

⁷Percent of 2-year-old children whose parents rely on a Florida CHD as their child's immunization home, who completed the 4:3:1:3:3:1:4 vaccine series by age 24 months. 4:3:1:3:3:1:4 = vaccine series of four or more doses of diphtheria, tetanus toxoids, and acellular pertussis (DTAP) vaccine; three or more doses of poliovirus vaccine (IPV); one or more doses of measles, mumps, and rubella (MMR) vaccine; three or four doses (depending upon product type) of *Haemophilus influenzae* type b conjugate (Hib) vaccine; three or more doses of hepatitis B (HepB) vaccine; one or more doses of varicella vaccine (or physician documented disease history), and four or more doses of pneumococcal conjugate (PCV) vaccine.

⁸The denominator for ranking is 24 (not 67) because 43 counties are not individually ranked, but grouped together.

⁹Not applicable, because this survey provides county-level percentages for the 24 counties with consistently higher annual birth counts.

¹⁰Percent of 2-year-old children (in this random sample survey) who completed the 4:3:1:3:3:1:4 measure by age 24 months.

¹¹Statewide results are weighted by the number of births in each county. County results are not weighted.

Abbreviations: WSEUF = Wasted, Spoiled, Expired, and Unaccounted For; CHD = County Health Department

*Counties listed above the double underline met or exceeded the state goal for that assessment.

¹Percent of kindergarten students fully immunized per section 1003.22, Florida Statutes and Florida Administrative Code Rule 64D-3.046.

²Not applicable, because non-county specific school districts (lab schools) are not ranked.

³Percent of seventh grade students fully immunized per section 1003.22 and Rule 64D-3.046.

⁴Percent of specific *Vaccines For Children Program* vaccine **not** WSEUF.

⁵The denominator for ranking is 38 (not 67) because 29 CHDs were not included in the assessment, as the total number of 2-year-old children in their immunization home was ≤10.

⁶Not applicable, because counties with ≤10 2-year-old children with a CHD as their immunization home are not included in the assessment.

⁷Percent of 2-year-old children whose parents rely on a Florida CHD as their child's immunization home, who completed the 4:3:1:3:3:1:4 vaccine series by age 24 months. 4:3:1:3:3:1:4 = vaccine series of four or more doses of diphtheria, tetanus toxoids, and acellular pertussis (DTAP) vaccine; three or more doses of poliovirus vaccine (IPV); one or more doses of measles, mumps, and rubella (MMR) vaccine; three or four doses (depending upon product type) of *Haemophilus influenzae* type b conjugate (Hib) vaccine; three or more doses of hepatitis B (HepB) vaccine; one or more doses of varicella vaccine (or physician documented disease history), and four or more doses of pneumococcal conjugate (PCV) vaccine.

⁸The denominator for ranking is 24 (not 67) because 43 counties are not individually ranked, but grouped together.

⁹Not applicable, because this survey provides county-level percentages for the 24 counties with consistently higher annual birth counts.

¹⁰Percent of 2-year-old children (in this random sample survey) who completed the 4:3:1:3:3:1:4 measure by age 24 months.

¹¹Statewide results are weighted by the number of births in each county. County results are not weighted.

Abbreviations: WSEUF = Wasted, Spoiled, Expired, and Unaccounted For; CHD = County Health Department

¹Percent of kindergarten students fully immunized per section 1003.22, Florida Statutes and Florida Administrative Code Rule 64D-3.046.

²Not applicable, because non-county specific school districts (lab schools) are not ranked.

³Percent of seventh grade students fully immunized per section 1003.22 and Rule 64D-3.046.

⁴Percent of specific *Vaccines For Children Program* vaccine **not** WSEUF.

⁵The denominator for ranking is 38 (not 67) because 29 CHDs were not included in the assessment, as the total number of 2-year-old children in their immunization home was ≤10.

⁶Not applicable, because counties with ≤10 2-year-old children with a CHD as their immunization home are not included in the assessment.

⁷Percent of 2-year-old children whose parents rely on a Florida CHD as their child's immunization home, who completed the 4:3:1:3:3:1:4 vaccine series by age 24 months. 4:3:1:3:3:1:4 = vaccine series of four or more doses of diphtheria, tetanus toxoids, and acellular pertussis (DTAP) vaccine; three or more doses of poliovirus vaccine (IPV); one or more doses of measles, mumps, and rubella (MMR) vaccine; three or four doses (depending upon product type) of *Haemophilus influenzae* type b conjugate (Hib) vaccine; three or more doses of hepatitis B (HepB) vaccine; one or more doses of varicella vaccine (or physician documented disease history), and four or more doses of pneumococcal conjugate (PCV) vaccine.

⁸The denominator for ranking is 24 (not 67) because 43 counties are not individually ranked, but grouped together.

⁹Not applicable, because this survey provides county-level percentages for the 24 counties with consistently higher annual birth counts.

¹⁰Percent of 2-year-old children (in this random sample survey) who completed the 4:3:1:3:3:1:4 measure by age 24 months.

¹¹Statewide results are weighted by the number of births in each county. County results are not weighted.
