

Data Entry for BDI 2 and Functional Status Evaluation Scores

Test Codes for the overall **BDI 2** subtests:

B2MO – Motor
B2CM - Communication
B2PS - Personal/Social
B2AD – Adaptive
B2CO – Cognitive

Functional Status Codes for subtests:

FSCG - Cognitive
FSFM - Fine motor
FSGM - Gross motor
FSAD - Adaptive (self-help)
FSCM - Communication
FSSE - Social

All of the Domains have more than one subtest; for example Motor: (gross, fine, and perceptual motor) please take the average of the scores: for example: 18 months gross motor + 19 fine motor + 23 perceptual motor = 20 months average over all score for **Functional Status Age Equivalency**... (See the example)

For Children that are under 24 months of age and born 36 or more weeks prematurely you will need to enter both the **Chronological age scores** and the **Adjusted age scores** for the BDI 2! (or other Standardized tests)

You would enter this information in the *TYPE category.... SS for Chronological and SSA for Adjusted Age

*Date: (mm/dd/yy)

06/26/07

*Recipient:

1,child

*Test:

B2CO

Score:

87

*Type

SSA,Standard Score (adj. for prematurity)

*Provider:
