HEALTH OFFICIALS ISSUE RABIES ALERT

~Rabies alert for a portion of Fort Lauderdale, Florida~

For Immediate Release

Date: March 1, 2021

Contact: Todd Templin (954) 290-0810 ttemplin@boardroompr.com

Fort Lauderdale – The Florida Department of Health in Broward County (DOH-Broward) issued a rabies alert for a portion of Fort Lauderdale, Florida. This is in response to a racoon that tested positive on March 1, 2021.

All residents and visitors in Broward County should be aware that rabies is present in the wild animal population and domestic animals are at risk if not vaccinated. The public is asked to maintain a heightened awareness that rabies is active in Broward County. Alerts are designed to increase awareness to the public. Please be aware that rabies can also occur outside the alert area.

This rabies alert is for 60 days. The alert includes the following boundaries in Broward County:

- S.W. 9th Street to the North
- I-95 to the West
- South Fork of the New River to the East
- South Fork of the New River to the South

An animal with rabies could infect domestic animals that have not been vaccinated against rabies. All domestic animals should be vaccinated against rabies and all wildlife contact should be avoided, particularly raccoons, bats, foxes, skunks, otters, bobcats, and coyotes. Rabies is a disease of the nervous system and is fatal to warm blooded animals and humans. The only preventive measure for human exposure to rabies is rabies specific immune globulin and rabies immunization. Rabies prophylaxis started soon after the exposure will protect an exposed person from the disease.

Residents and visitors are advised to take the following precautions:

- Keep rabies vaccinations up to date for all pets and at-risk livestock.
- Do not allow your pets to run free. Follow leash laws by keeping pets and livestock secured on your property. If your pet or livestock are bitten by a wild animal, seek veterinary assistance for the animal immediately and contact Animal Control Services for your jurisdiction.
- Support animal control in efforts to reduce feral and stray animal populations.
- Spay or neuter your pets to help reduce the number of unwanted pets that may not be properly cared for or regularly vaccinated.
- **Do not** handle, feed, or unintentionally attract wild animals with outdoor food sources such as uncovered trash or litter.

- **Never** adopt wild animals or bring them into your home.
- Teach children **never** to handle unfamiliar animals, wild or domestic, even if they appear friendly.
- Prevent bats from entering living quarters or occupied spaces in homes, churches, schools, and other similar areas, where they might come in contact with people and pets.
- Persons who have been bitten or scratched by wild or domestic animals should seek medical attention and report the injury to the DOH- Broward at 954-467-4700.
