

Hepatitis A Surveillance

January 1, 2018–February 27, 2021

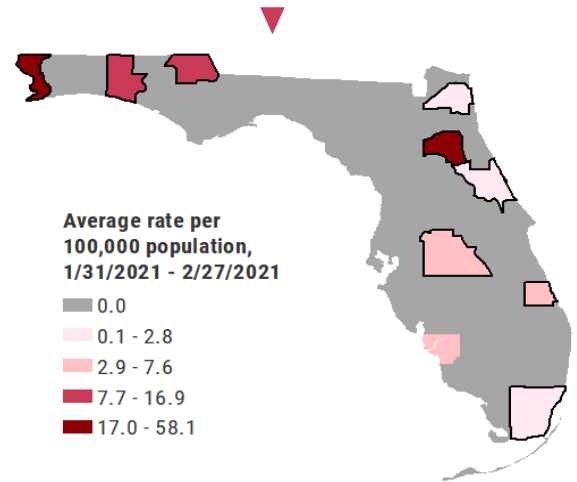

From January 1, 2018 through February 27, 2021, 5,024 hepatitis A cases were reported.

The number of reported hepatitis A cases more than doubled from 2016 to 2017 and nearly doubled again in 2018 after remaining relatively stable in previous years. Case counts in 2019 saw an over 500% increase from 2018.

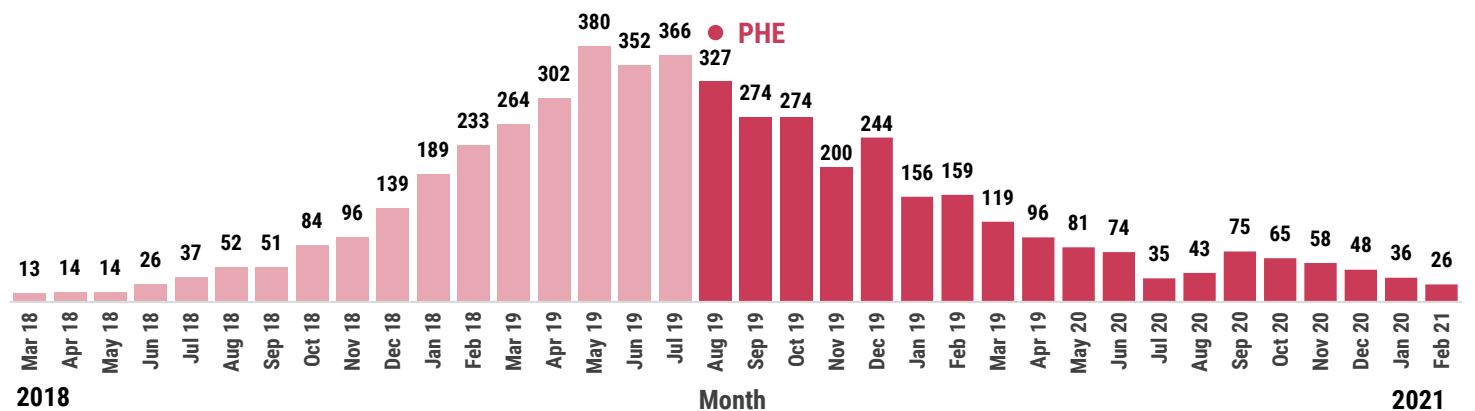

Counties that reported hepatitis A cases in the past two weeks are outlined in black. Since January 1, 2018, 98% of cases have likely been acquired locally in Florida.

The graph below represents hepatitis A cases by week from December 29, 2019 to February 27, 2021. There were 11 hepatitis A cases reported in the past two weeks.

The graph below represents hepatitis A cases by month from March 1, 2018 to February 27, 2021. Case counts in weeks prior to the public health emergency declaration are shown in light red, while case counts in weeks since are shown in red.

*Public health emergency (PHE) issued August 1, 2019

Hepatitis A Vaccination Surveillance

January 1, 2019–February 27, 2021

From February 14, 2021 to February 27, 2021, county health departments (CHDs) administered 187 (17%) of the total 1,101 first doses of hepatitis A vaccine administered to adults age 18 years and older, as recorded in Florida SHOTS.

Since 2019 CHDs have administered 165,263 vaccinations and non-CHDs have administered 232,204 vaccinations for a total of 397,467 vaccinations. Vaccinations given before the public health emergency declaration are shown in lighter colors than those given after. Since declaration of the PHE, CHDs have administered 99,646 and non-CHDs have administered 139,680 vaccinations.
