Houston, Texas 77269-1171

Dear Mr. Evans:

This letter is to acknowledge receipt of the information concerning the products " **SEPTIKOS** and **BiNutrix™**" for statewide use in Florida. No product sold in the state for use in onsite sewage treatment and disposal systems may contain any substance in concentrations or amounts that would interfere with or prevent the successful operation of such system, or that would cause discharges from such systems to violate applicable water quality standards, section 381.0065(4)(m), Florida Statutes.

The staff has reviewed the information provided in the MSDS, 96-hr LC₅₀ toxicity test results, and laboratory results on volatile organic compounds for the product. The department has determined that the products, " **SEPTIKOS™** and **BiNutrix™**", are in compliance with s. 381.0065(4)(m), F.S. and has no objection to the use of the products in accordance with manufacturer's specifications. Please be advised that all rules pertaining to the use of the products shall be observed and that there shall be no advertising of the products as state approved.

Be advised that the department is not a testing agency and that this determination reflects only a review of the information submitted by you for compliance with Florida Statutes and Florida Administrative Code. The product evaluation does not investigate the validity of performance claims by manufacturers. For this reason, departmental acceptance must not be interpreted as certifying effectiveness, endorsing or recommending use of an additive. The Florida Department of Health also does not assume liability for any promise, guarantee or expectation from purchasing or using an additive. The department reserves the right to withdraw acceptance if product formulation or ingredients are modified after product evaluation by the department or subsequently found not to be in compliance with rule.

This letter of product compliance is limited to Department of Health jurisdictional circumstances as defined in Chapter 64E-6, Florida Administrative Code and Chapter 381.0065, Florida Statutes.

If we may be of further assistance or should you have any additional questions regarding this letter, please call Dr. Sonia Cruz at (407) 317-7325.

Sincerely,

A handwritten signature in cursive script that reads "Bill Melton for".

Gerald Briggs, Chief
Bureau of Onsite Sewage Programs

Instructions: Simply flush a full scoop (1 cup) of Septikos down the toilet nearest the septic tank. If you are just beginning treatment, apply one scoop of product per 500 gallons of tank capacity every two weeks for the first two months. After this initial treatment, use just one scoop per month for septic systems with tanks up to 1,000 gallons. For larger systems, use two scoops. This bag contains six 1/2-pound scoops of product.

This product is safe, easy to use, and effective for existing problems and preventative maintenance. It contains no harsh chemicals or toxic ingredients and is applied by flushing about a cup of the powdery product into the system (a scoop is in the bag). Unlike most of our competitors' products, you'll find no fillers in Septikos.

Septikos works by providing essential nutrients to microbes that already exist in septic systems. (This product does not actually contain microbes or enzymes). Septikos supports the microbes that keep septic systems functioning properly. A special coating makes Septikos stick with oily and greasy wastes, so the nutrients are always present exactly where they are needed. Healthy microbes also reproduce faster, which means there will be more microbes to work on clogging systems.

Septikos™ cures some of the worst problems that plague owners of septic systems. It eliminates nasty odors, relieves slow drainage and system backup, keeps wet spots from forming, puts an end to frequent pumpouts, and keeps systems within regulatory specifications.

Septikos is safe for the environment, nontoxic, nontoxic, genotoxic, noncarcinogenic, nonexplosive, nonflammable. It is effective, economical and simple. It will not harm equipment, pipes or fixtures. Store in a cool, dry place. First aid: Avoid contact with eyes and do not take internally. Upon contact with eyes, flush with water immediately for a minimum of 15 minutes. If redness or irritation continues, contact a physician. Avoid breathing dust.
