Dr. Peter A. Vandenberg
Osprey Biotechnics
1833-A 57th Street
Sarasota, Florida 34243

Dear Dr. Vandenberg:

This letter is to acknowledge receipt of the information concerning the products **BioOne®** (BioChoiceES™, Petrox, SeptiMax, and TrapMax) for statewide use in Florida. No product sold in the state for use in onsite sewage treatment and disposal systems may contain any substance in concentrations or amounts that would interfere with or prevent the successful operation of such system, or that would cause discharges from such systems to violate applicable water quality standards, section 381.0065(4)(m), Florida Statutes.

The staff has reviewed the information provided in the 96-hr LC₅₀ toxicity test results and laboratory results on volatile organic compounds for the reformulated products. The department has determined the products to be in compliance with s. 381.0065(4)(m), F.S. and has no objection to the use of the reformulated products in accordance with manufacturer's specifications. Please be advised that all rules pertaining to the use of the products shall be observed and that there shall be no advertising of the products as state approved.

Be advised that the department is not a testing agency and that this determination reflects only a review of the information submitted by you for compliance with Florida Statutes and Florida Administrative Code. The product evaluation does not investigate the validity of performance claims by manufacturers. For this reason, departmental acceptance must not be interpreted as certifying effectiveness, endorsing or recommending use of an additive. The Florida Department of Health also does not assume liability for any promise, guarantee or expectation from purchasing or using an additive. The department reserves the right to withdraw acceptance if product formulation or ingredients are modified after product evaluation by the department or subsequently found not to be in compliance with rule.

This letter of product compliance is limited to Department of Health jurisdictional circumstances as defined in Chapter 64E-6, Florida Administrative Code and Chapter 381.0065, Florida Statutes. If we may be of further assistance or should you have any additional questions regarding this letter, please call Dr. Sonia Cruz at (407) 317-7325.

Sincerely,

A handwritten signature in black ink, appearing to read "Gerald R. Briggs".

Sarasota, FL 34243

Dear Dr. Vandenberg:

This letter is to acknowledge receipt of the information concerning the products "**Odorless Liquid Bacterial Additive, LBA and Munox GT® Bio Drain Cleaner**" for statewide use in Florida. No product sold in the state for use in onsite sewage treatment and disposal systems may contain any substance in concentrations or amounts that would interfere with or prevent the successful operation of such system, or that would cause discharges from such systems to violate applicable water quality standards, section 381.0065(4)(m), Florida Statutes.

The staff has reviewed the information and verified that the additional products have the same formulation as the authorized "BioOne®". Since the department had determined in a previous evaluation that reformulated BioOne® was in compliance with section 381.0065(4)(m), F.S. and that the new labeled products have the same formulation and will be used at the same application rate as the reformulated BioOne® product, the department has no objection to the use of "**Odorless Liquid Bacterial Additive, LBA and Munox GT® Bio Drain Cleaner**" in accordance with manufacturer's specifications.

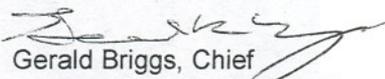

Please be advised that all rules pertaining to the use of the products shall be observed and that there shall be no advertising of the products as state approved. Be advised that the department is not a testing agency and that this determination reflects only a review of the information submitted by you for compliance with Florida Statutes and Florida Administrative Code. The product evaluation does not investigate the validity of performance claims by manufacturers. For this reason, departmental acceptance must not be interpreted as certifying effectiveness, endorsing or recommending use of an additive.

The Florida Department of Health also does not assume liability for any promise, guarantee or expectation from purchasing or using an additive. The department reserves the right to withdraw acceptance if product formulation or ingredients are modified after product evaluation by the department or subsequently found not to be in compliance with rule.

This letter of product compliance is limited to Department of Health jurisdictional circumstances as defined in Chapter 64E-6, Florida Administrative Code and Chapter 381.0065, Florida Statutes.

If we may be of further assistance or should you have any additional questions regarding this letter, please call Dr. Sonia Cruz at (407) 317-7325.

Sincerely,

Gerald Briggs, Chief

BIO One

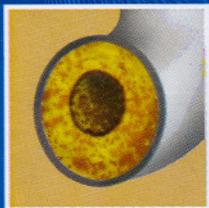

Formulated in
partnership with:

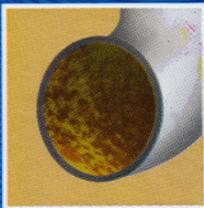

**ENVIRONMENTALLY
FRIENDLY**

**BIOLOGICAL DRAIN AND
SEPTIC SYSTEM TREATMENT**

BIO One®

BEFORE

AFTER

**Keeps Drain
Lines and
Septic Systems
Flowing**

Net Contents: 64 fl. oz. (½ gal.) 1.9 l

DIRECTIONS FOR USE

RESIDENTIAL

Preventive Maintenance: Apply 1/2 capful per month directly into each drain.

Slow Drains: Apply 1/2 capful per day directly into drain for 5 consecutive days or until drain flows freely.

Septic Systems: Flush 1/2 gallon down the toilet immediately after pumping. Add 1 capful per month directly into drain to maintain system.

COMMERCIAL

Preventive Maintenance: Apply 1 capful per week directly into each drain.

Slow Drains: Apply 1 capful per day directly into drain for 5 consecutive days or until drain flows freely.

Grease Traps: Apply 1 gallon per month directly into grease trap.

For best results, apply BioOne® during times of minimal water usage.
