3088	Frederick Adams for Wyndham Preserve Pool 2343 Blue Grouse Lane Sanford, FL	Seminole	454.1.1.1 FBC: The filtration system for swimming pools shall be capable of meeting all other requirements of these rules while providing a flow rate of at least 1 gpm (0.06 L/s) for each living unit at transient facilities and ¾ gpm (0.04 L/s) at nontransient facilities.  454.1.1.1 FBC: For the purpose of determining minimum pool size only, the pool turnover period used cannot be less than 3 hours.  454.1.6.5.3.2FBC: Recessed automatic surface skimmers. Recessed automatic surface skimmers may be utilized when the pool water surface area is 1,000 square feet (93 m2) or less excluding offset stairs and swimouts and the width of the pool is not over 20 feet (6096 mm).  454.1.6.5.3.2.2FBC: Location. Prevailing wind direction and the pool outline shall be considered by the designer in the selection of skimmer locations. The location of skimmers shall be such that the interference of adjacent inlets and skimmers is minimized.

3096 Cont	Altis at Wiregrass 28878 Golden Vista Blvd Wesley Chapel, FL 33543	Pasco	454.1.6.5.8FBC: Flow velocity. Main drain systems and surface overflow systems which discharge to collector tanks shall be sized with a maximum flow velocity of 3-feet per second (914 mm/s).  454.1.6.5.17FBC: Water features such as waterfalls or fountains in pools may use up to 20 percent of the return water from the filter system, however all waters used in the feature shall not be counted toward attaining the designed turnover rate. Return piping system shall be designed and capable of handling the additional feature flow when the feature is turned off.  454.1.6.5.5.3 FBC: Filter tanks and elements. The D.Etype filter tank and elements. The D.Etype filter tank and elements shall be installed such that the recirculation flow draw down does not expose the elements to the atmosphere whenever only the main drain valve is open or only the surface overflow gutter system valve is open.
