

## TIMELINE OF SAMPLING ACTIVITIES

Date	Action
September 6, 2018	DEP contacts DOH and the Florida State Fire College with certified sampling results they collected from the College.
September 9, 2018	Supplies of bottled water were made available by the DEP's Water Supply Restoration Program on September 9, 2018. The Fire College will continue to have access to an alternative water supply until water quality has been restored.
September 10, 2018	Additional planning conference calls were held to refine sampling plans. Participants included multiple personnel from the Fire College, Florida Department of Financial Services (DFS), DOH employees from the Central Office and local county health department, and DEP.
September 12, 2018	DOH staff visit the Fire College cafeteria to further inform the kitchen manager and staff and ensure that an alternative water source was being used for food preparation.
September 13, 2018	The Fire College informs its faculty, students and stakeholders of initial sampling results and provided information from DEP and DOH prior to the scheduled open house.
September 13, 2018	DOH ordered sampling kits to conduct sampling of drinking water wells.
September 28, 2018	DOH received sampling kits that were ordered from the lab to sample drinking water wells. Because the study of PFOS and PFOA are still new, special kits have to be ordered from a lab that has equipment capable of analyzing PFAS.
October 2 - 3, 2018	DOH conducts sampling from drinking water wells in the area.
October 16, 2018	Open House scheduled with DEP and Fire College. Rescheduled due to Hurricane Michael.
Ongoing	DOH and DEP remain in constant communication with the Fire College to ensure faculty and students remain informed and continue to have access to an alternative drinking water supply until water quality is restored through the modification of the existing well and installation of a filtration system.
November 2, 2018	The certified results for the first round of sampling that occurred in the first week of October were given to the Department on November 2, 2018.
November 5, 2018	Letters were delivered in person to residents whose drinking water wells had results above the Health Advisory level.
December 4, 2018	Open house was held with DEP and the Fire College to allow staff and trainees to learn more about the ongoing groundwater study.
December 4 – present	An additional 24 wells have been sampled with pending results. To date, DOH has made contact with nearly 90 people regarding sampling. This includes collecting 40 samples from 37 properties and attempting to arrange sampling for an additional 46. DOH and DEP will continue to sample areas of concern, educate the public and work on long-term mitigation strategies.
