

2021 - 2023 Community Health Improvement Plan

Manatee County

Approved on December 10, 2020

Prepared by the Manatee Healthcare Alliance
with support by the Florida Department of Health in Manatee County

Celebrating 100 years of public health in Manatee County

Our History

The **Florida Department of Health in Manatee County** was created by the Manatee County Commission in 1921 with a health officer, a nurse, and a clerk. The administrative office was on the second floor of the courthouse, the clinic was in the basement, and local physicians served as the public health officer. In 1947, the health department became affiliated with the Florida State Board of Health and Dr. William L. Wright became the full-time health officer, initially sharing his time with Sarasota.

Our Directors

William L. Wright, MD, 1947-1952

John S. Neill, MD, 1952-1958

Fredrick K. Allen, MD, 1959-1963

George Dame, MD, 1963-1970

Sam T. Simpson, MD, 1971-1976

John Ambrusko, MD, 1977-1989

Gladys Branic, MD, MPH, DSW, 1989-2009

Jennifer Bencie, MD, MSA, 2010-Present

Values

Innovation

We search for creative solutions and manage resources wisely.

Collaboration

We use teamwork to achieve common goals and solve problems.

Accountability

We perform with integrity and respect.

Responsiveness

We achieve our mission by serving our customers and engaging our partners.

Excellence

We promote quality outcomes through learning and continuous performance improvement.

Mission

To protect, promote & improve the health of all people in Florida through integrated state, county, & community efforts.

Vision

To be the *Healthiest State* in the Nation.

INTRODUCTION

A community health improvement plan (CHIP) is a long-term effort to address issues identified by the community health assessment process with participation of a broad set of community partners (Public Health Accreditation Board, 2013). A successful CHIP will help community partners plan activities, set priorities, and take action together to make meaningful improvements in community health.

The 2021-2023 Manatee County CHIP is a result of the 2021-2023 Community Health Assessment (CHA), prepared by the Manatee Healthcare Alliance and facilitated by the Florida Department of Health in Manatee County and the Health Council of West Central Florida. The CHA and CHIP were developed following the Mobilizing for Action through Planning and Partnerships strategic planning framework (National Association of County and City Health Officials, 2013), which is an intensely community-driven process. The resulting CHIP would not have been possible without the many community partners who participated in the process.

The purpose of this document is to identify strategic health issues and objectives for Manatee County for 2021 to 2023. This document will also illustrate why these issues are important to the community. The chart below shows the four CHIP subcommittees, purpose statements and six strategic issues elected by community partners based on results of the 2021-2023 Manatee CHA.

Manatee County Profile

Manatee County is Florida's 14th most densely populated county and is a coastal community offering an attractive lifestyle for residents and visitors alike. Manatee's beautiful parks and beaches are assets to the community and facilitate numerous opportunities for physical activity, socialization and recreation. Centerstone, Manatee Memorial Hospital, Blake Medical Center, Lakewood Ranch Medical Center, MCR Health, Turning Points, The Multicultural Health Institute, LECOM, United Way Suncoast, Drug Free Manatee, North River Prevention Partners, Manatee Medical Society are some resources that contribute to the health of Manatee County residents and visitors. Compared to state and national averages, Manatee County's population is rapidly growing, has more residents over 55 years of age,

and has fewer residents from racial and ethnic minorities. Healthcare, education, manufacturing, and hospitality are important sources of employment. The community has seen favorable developments in recent years, including rising high school graduation as well as falling violent crime and unemployment rates. Financial hardship, violent crime, and poverty pose continuing challenges and disproportionately affect some sectors of the community. The COVID-19 pandemic has had broad and deep impacts during this CHA/CHIP cycle. In many ways, the full impact of the pandemic is not yet realized and will take time to be understood in the foreseeable future. The pandemic has an impact on the direct health of the community as a communicable disease, as well as the social determinants of health including economic stability, social and community context, neighborhood and environment, healthcare and health access, and education. Manatee County celebrates the following achievements and community assets as discussed throughout the CHA's Community Themes and Strengths Assessments.

1. Grant was awarded to pilot a coordinated care system where home visiting agencies worked to ensure that they were not duplicating efforts and reaching different families and address all those in need.
2. Remote Area Medical (RAM) is a program that visits sites globally and nation-wide, and for the last few years has visited Manatee County. In a two-day effort, medical professionals volunteered and provided free healthcare.
3. Recent teacher salary increases.
4. Manatee County Healthcare Advisory Board is working with the social service delivery models to expand primary care and reduce emergency room visits.
5. Approximately four years ago there was a task force to implement school-based health centers; the first was at Southeast High School and a second was implemented at an elementary school. This was a successful partnership between Manatee Rural Health and the Manatee County School District.
6. The Healthy Teens Coalition of Manatee County works with peer educators/mentors to help fellow youth lead healthier happier lives. The peer educators/mentors go through a minimum of six weeks of extensive training. The Coalition has been a vital part of reducing the high rate of teen pregnancies in Manatee County and continues to address this issue and others important to the health of youth.
7. Programing has led to an increased survival rate in drug overdoses.
8. Students from LECOM are engaged in offering free services to Manatee County residents. Third year dental students offer a dental clinic for underserved/underinsured children. Medical students work with Turning Points, and pharmacy students assist EMS in ride-along to help identify the impact of medications.
9. The Manatee Chamber of Commerce is an award-winning Chamber and is heavily invested in all areas of health in the community.

A list of community assets and resources identified during the CHA-CHIP process is outlined below:

Business/Industry

Accommodation and Food Service
Administration and Support Services
Advanced Manufacturing

Finally, each CHIP subcommittee identified assets and resources as part of the action planning process (see *Resources* under each goal in the CHIP Workplans).

Manatee Healthcare Alliance

In Manatee County, a solid foundation for collaborative community health assessment and improvement planning was established in 2010, with the formation of a community coalition of professionals and residents with an interest in health care. The Manatee Healthcare Alliance, Inc. (MHCA) is a non-profit organization with the mission: *Promoting and ensuring the health and well-being of Manatee County residents through fostering collaboration and partnerships, ensuring access to healthcare and promoting healthy behaviors.*

The organizational structure of the MHCA includes a Board of Directors and standing CHIP subcommittees dedicated to strategic priorities.

In 2010, the MHCA initiated a collaborative process of community health assessment with a summit devoted to a review of county health data and visioning. The aim was to identify and prioritize key health challenges. This process was repeated in annual State of the County data reviews in 2011, 2012, 2013, and 2014. In late 2014, the Prevention and Wellness Committee accepted responsibility for steering a new community health assessment of Manatee County in 2015, with emphasis on community engagement. In April 2016, the MHCA presented the 2015-2020 CHIP to the community partners to address the strategic issues identified. In November 2019, the MHCA began the CHA process to inform the 2021-2023 CHIP. This process was halted in February 2020 as COVID-19 threatened the health of the community. In September 2020, the Health Council of West Central Florida (HCWCF) was engaged to facilitate the process. In October 2020, the MHCA Steering Committee reconvened to complete the CHA and CHIP. The CHA was published in December 2020. On December 10, 2020 the MHCA met to discuss prioritization, to identify the strategic issues and start implementation of the CHIP. Four CHIP subcommittees were established: Youth Development, Healthy Living, Communicable Diseases and Behavioral Health.

Due to the COVID-19 pandemic, CHIP subcommittees continued to meet via Zoom to finalize the workplans and to begin implementing the activities. Each CHIP subcommittee was assigned to address the strategic issues, which included goals, objectives, activities, short-term and long-term outcomes for each strategic issue.

Each CHIP subcommittee is charged with reporting progress at the monthly MHCA meetings to ensure ongoing communications with MHCA partners on the progress of the CHIP objectives. In addition, a new Manatee County Community Dashboard has been created to host the CHA, CHIP and updates, using the mySidewalks platform.

The MHCA holds annual CHIP reviews, with the most recent in November 2019. The annual update process is utilized as an opportunity to review progress toward achievement of each objective. CHIP subcommittee leaders provide monthly updates and quarterly reports on progress and as needed propose revisions to goals, strategies, objectives, and activities for each of the strategic Issues. The MHCA serves as the guiding force for the 2021-2023 CHA/CHIP development.

Manatee Healthcare Alliance Membership List

Alitz	Paige	Florida Department of Health in Manatee County
Allen	Tarah	Manatee County School District
Almodovar	Evelyn	Healthy Teens Coalition of Manatee County

Whitfield	Charles	Centerstone
Whitmore	Carol	Manatee County Government
Wilhoit	Skip	Manatee County School District
Wolf	Abby	Florida Department of Health in Manatee County

DESCRIPTION OF CHA/CHIP/MAPP PROCESS

A community health assessment (CHA) is a systematic examination of the current health status in the community, factors contributing to poor health outcomes in a community, and identification of key resources available to address needs. The process includes comprehensive data collection and analysis and focuses on the broad system of services and organizations that contribute to the improvement of community health. The CHA is developed through a collaborative process and serves

as a basis to identify priority issues and develop strategies to address those needs in measurable ways through the development of a community health improvement plan (CHIP).

The Florida Department of Health in Manatee County (DOH-Manatee) facilitates the CHA process every three to five years. The CHA process begins about 18 months before the end of the previous CHIP in order to insure an informed and seamless transition between the plans. The previous process was conducted in 2015 and the resulting plan covered a five-year period. This CHA/CHIP will cover a three-year period from 2021-2023, to better respond to a rapidly changing landscape and to allow for coordination with the community health needs assessment planning effort conducted by non-profit hospital in the county. CHIP subcommittee Chairs will present workplan progress monthly to the MHCA during the meetings. Every November, an annual report will be submitted by each CHIP subcommittee to assess progress. The Robert Wood Johnson Foundation's County Health Rankings produces a summary of the health of the county providing an additional opportunity to evaluate the advancement of the CHIP. As emerging issues arise, they are addressed at a monthly MHCA meeting and added to the CHIP. An example of this is the Hepatitis A outbreak in Florida during 2019 and 2020.

Mobilizing For Action Through Planning And Partnerships

The DOH-Manatee utilized the **National Association of County and City Health Officials (NACCHO)** Mobilizing for Action through Planning and Partnerships (MAPP) model to steer its 2021-2023 Community Health Assessment (CHA) and Community Health Improvement Plan (CHIP). NACCHO is a Washington, DC based organization representing 2,800 local public health departments in the county. These city, county, metropolitan, district, and tribal departments work to protect and promote health and well-being for all people in their communities by coordinating programs and services that make it easier for people to be healthy and safe from public health emergencies. The MAPP model is a community-driven strategic planning process for improving community health, and its framework helps communities to apply strategic thinking to prioritize public health issues and identify resources to address them. The MAPP process defines a series of six sequential phases. Phases 1 to 3 guide the CHA process and Phases 4 to 6 guide the CHIP process.

COMMUNITY HEALTH ASSESSMENT OVERVIEW

Phase 1: Organize for Success & Partnership Development

The first phase of the CHA/CHIP involves two critical and interrelated activities: organizing the planning process and developing the planning partnership. The purpose of this phase is to structure a planning process that builds commitment, engages participants as active partners, uses participants' time well, and results in a plan that can be realistically implemented.

The Steering Committee made up of six community partners was re-started to guide and assist with community engagement that includes representation from residents, key stakeholders and other representatives of the local public health system. The committee had begun the process and released a community survey when COVID-19 struck. Attention and resources were shifted to respond to the pandemic and for several months work on the CHA/CHIP was suspended. The Steering Committee with assistance from the Health Council of West Central Florida and in conjunction with staff from DOH-Manatee continued the work on completing the CHA/CHIP process.

Phase 2: Visioning

Visioning, the second phase, guides the community through a collaborative, creative process that leads to a shared community vision and common values.

Vision and values statements provide focus, purpose, and direction to the CHA/CHIP so that participants collectively achieve a shared vision for the future. A shared community vision provides an overarching goal for the community - a statement of what the ideal future looks like. Values are the fundamental principles and beliefs that guide a community-driven planning process.

Because visioning is done at the beginning of the CHA/CHIP, it offers a useful mechanism for convening the community and building enthusiasm for the process, setting the stage for planning, and providing a common framework throughout subsequent phases.

An extensive visioning process was undertaken for the 2015 CHA/CHIP. For the 2021-2023 CHA/CHIP, the Manatee Healthcare Alliance met on November 21, 2019 and finalized the new vision statement: *To be the Healthiest County in Florida.*

Phase 3: The Four Assessments

The Community Themes and Strengths (CTS) Assessment evaluates community members' thoughts, experiences, opinions, and concerns. It answers questions such as:

- How is quality of life perceived in the community?
- What is important to the community?
- What assets does the community have to improve community health?

For the CHA, three primary data collection efforts were undertaken to assess themes and strengths- a community survey, key informant interviews and focus groups with under-represented populations from the survey and key informant activities.

Local Public Health System (LPHS) Assessment

The primary purpose of the Local Public Health System Assessment (LPHSA) is to promote continuous improvement that will result in positive outcomes for system performance according to the 10 Essential Services of Public Health.

Local public health departments and their system partners use the results of the LPHSA as a tool to:

- Better understand current system functioning and performances.
- Identify and prioritize areas of strength, weakness and opportunities for improvement.
- Articulate the value that quality improvement initiatives will bring to the public health system.
- Develop an initial workplan with specific quality improvement strategies to achieve goals.
- Take action toward achieving performance and quality improvement in one or more targeted areas.
- Reassess the progress of improvement efforts at regular intervals.

Participants were asked to rate the activity level for each of the 10 Essential Services. A total of 32 people representing 14 partners in the Manatee local public health system participated.

Optimal (76%-100%)	Greater than 75% of the activity described within the question is met
Significant (51%-75%)	Greater than 50% but no more than 75% of the activity described within the question is met
Moderate (25%-50%)	Greater than 25% but no more than 50% of the activity described within the question is met
Minimal (1%-25%)	Greater than 25% but no more than 25% of the activity described within the question is met
No activity (0%)	Absolutely no activity Don't Know-Unaware of these activities

Forces of Change (FoC) Assessment

The Forces of Change Assessment identifies forces that may affect a community, and the opportunities and threats associated with these forces. It answers the questions: *What is occurring or might occur that affects the health of the community or the local public health system? What specific threats or opportunities are generated by these occurrences?*

The Forces of Change Assessment was held on November 5, 2020. Invitations were sent in advance to 70 people representing a wide variety of constituencies. Twenty-nine people, representing 18 distinct organizations including local government, education, non-profit sector, health care, and concerned

citizens, participated in a virtual meeting facilitated by the Health Council of West Central Florida. The impact of both COVID-19 and a national election with unknown outcome was woven through the discussion of many of the forces. Other common themes included racial and ethnic disparities in education, employment, income, access to care and health status; and the need for a proactive, long-term approach to funding so progress made is not lost.

Community Themes and Strengths (CTS) Assessment

The Community Themes and Strengths Assessment identifies assets in the community and issues that are important to community members. It answers the questions: *What is important to the community? How is quality of life perceived in the community? What assets does the community have that can be used to improve community health?*

Key informant interviews were selected as a method to gather information about community perspectives as part of the Community Themes and Strengths Assessment informing the CHA. The Manatee Healthcare Alliance and the DOH-Manatee staff developed a list of 20 potential community representatives and the Health Council of West Central Florida staff scheduled and conducted 15 interviews between October 12, 2020 and November 4, 2020 via Zoom. Interviews lasted from 20 minutes to 90 minutes and were recorded to enable staff to review to ensure accuracy in the reporting process. Recordings were deleted upon the completion of the report.

A **community survey** was developed by the MHCA and it was open from September 28, 2020 to November 9, 2020. MHCA was provided with links to English and Spanish versions of the survey and an infographic with links for social media and QR-codes for distribution to the community. E-mails were also sent to community partners to distribute the surveys to their clients and partners. The surveys were posted on DOH-Manatee's website for public access.

A total of 809 participants completed the survey in English and 11 in Spanish. Most respondents were White, Non-Hispanic Females in the age group of 46-65 living in a two-person household with an annual income of at least \$100,000 a year.

Virtual **focus groups** were conducted to further inform the CTS Assessment. Typically focus groups take place with groups of individuals with similar characteristics meeting face-to-face allowing for conversations to emerge organically with the guidance of a qualified facilitator. By meeting in-person, body language becomes part of the experience and facilitators can more effectively lead the discussion. In the best interest of the participants and facilitators with respect to the continued threat of COVID-19 and recommended social distancing practices, it was determined that the focus groups would take place through video conferencing.

Seniors, youth and young adults were selected as the target audiences for the focus groups and participants were recruited for the three groups through the Healthy Teens Coalition of Manatee County, Manatee YMCA and Meals on Wheels PLUS of Manatee/Daybreak Adult Day Center.

Community Health Status (CHS) Assessment

The Community Health Status Assessment provides quantitative data on the community's health condition. It answers the questions: *How healthy is the community? What does the health status of the community look like?*

Demographic, health outcomes and health factors data were collected from multiple secondary data sources and presented in the CHA.

COMMUNITY HEALTH IMPROVEMENT PLAN OVERVIEW

Phase 4: Identifying Strategic issues

Once the CHA was complete in December 2020, the next step was to prioritize which issues the Manatee Healthcare Alliance would include in the CHIP. The prioritization process started to take place through Phase Four of the MAPP process.

The CHA reveals challenges and opportunities from each assessment that are utilized to identify and select strategic issues. This information is combined into a master list where all challenges and opportunities are aligned, establishing a comprehensive list of strategic issues. Typically, this takes a full day of stakeholders meeting together to carefully dissect each issue and to determine root causes and the capacity to address the issues. Due to the delayed start as a result of the COVID-19 pandemic, the Health Council of West Central Florida (HCWF) utilized the Hanlon Method to efficiently prioritize strategic issues and complete Phase Four of the MAPP process. The Hanlon Method efficiently quantifies strategic issues measuring their capacity, feasibility and effectiveness.

Phase Four of the MAPP process is conducted through four steps:

- Step 1: Determining the Method to Complete this Phase
- Step 2: Present Summary of All Four Assessments
- Step 3: Brainstorm Potential Strategic Issues
- Step 4: Synthesize and Prioritize Strategic Issues

In order to accomplish steps 1, 2, and 3, the HCWCF synthesized the data from the CHA into a table (Appendix A), identifying the crosswalks of all health outcomes and factors mentioned throughout each assessment. Issues were further condensed into broad topics and listed in a table as a health factor and/or a health outcome according to each assessment. Once again, related topics were further combined and color-coded allowing for a visual and quantifiable list of top ten health issues to prioritize using the Hanlon method, including:

- | | |
|-------------------------------|--|
| 1. Obesity/Nutrition/Diabetes | 6. Disparities/Discrimination/Population |
| 2. Mental Health | 7. Oral/Dental Health |
| 3. Substance Abuse | 8. Pandemic/COVID-19 |
| 4. Access/Affordability | 9. Youth Development |
| 5. Crime/Traffic/Safety | 10. Seniors |

Upon the completion of the Hanlon Method, participants developed a deeper understanding of the issues facing the community and critical details needed to prioritize which issues to address in the CHIP. Following a review of the results, participants identified their choices for the top three strategic issues. This was conducted through a polling feature on the Zoom virtual meeting platform to rank the issues to pursue in the CHIP and complete step 4 of the MAPP process.

Hanlon/Pearl Method

The Hanlon Method is a research-based proven method for setting community priorities using the Basic Priority Rating System (BPR). It was developed by Rollins School of Public Health at Emory University in Atlanta and the Association of Schools of Public Health. It is a part of “Setting Health Priorities” from the Assessment Protocol for Excellence in Public Health (APEX-PH) program. The system mathematically accounts for A-the size of the problem, B-the seriousness of the problem and C-the availability of effective solutions. The method produces a quantifiable result for comparison allowing for the removal of bias in prioritizing issues.

$$\text{BPR}=(\text{A}+2\text{B}) \times \text{C}$$

Component A: Size of the Problem		Component B: Seriousness of the Problem		Component C: Effectiveness of Evidence Based Intervention	
% of Population Affected by Problem	Size “Rating”	How Serious Problem is Considered?	Seriousness Rating	Availability / Effectiveness of Evidence-Based Interventions to Reduce or Eliminate the Problem	Effectiveness “Rating”
25% or more	9 or 10	Very Serious	9 or 10	Very Effective (80-100%)	9 or 10
10% - 24.9%	7 or 8	Serious	6, 7 or 8	Relatively Effective (60-80%)	7 or 8
1% - 9.9%	5 or 6	Moderately Serious	3, 4 or 5	Effective (40-60%)	5 or 6
.1% - .9%	3 or 4	Not Serious	0, 1 or 2	Moderately Ineffective (20-40%)	3 or 4
.01% - .09%	1 or 2			Relatively Ineffective (5-20%)	1 or 2
< .01%	0			Almost Entirely Ineffective (Less than 5%)	0

The issues were weighted using the PEARL factors indicated in the table below. Each of the questions within the factors that received a “yes” were assigned a point to be consider with the BPR for prioritization.

Propriety	(1) Is the problem one that falls within the overall scope of operation, and (2) is it consistent with mission statement?
Economic Feasibility	(1) Does it make economic sense to address the problem? (2) Are there economic consequences as a result of the problem NOT being addressed?
Acceptability	Will the community and/or target population accept a program to address the problem?
Resources	Are, or should, resources be available to address the problem?
Legality	Do current laws allow, favor or prohibit interventions to address the problem?

Prioritization Session

In advance of the prioritization meeting, participants received the CHA in its entirety along with additional documents summarizing the common themes. The top 10 issues were identified through the common themes and data specific to each issue was summarized for participants to utilize through the prioritization work (Appendix B). Participants were divided into breakout groups of 7-8 per group to apply the Hanlon Method to 2-3 issues per group. Each breakout group presented their results to the full group. Following the report out, participants completed a poll indicating their top three choices to prioritize in the CHIP. The results were shared instantly, and workgroups were formed to continue the process. Each work group discussed the data from the CHA process that is most pertinent to the issue to develop goals, strategies and measures for the CHIP.

Determination of Top Issues and Subcommittees

Following the report out, participants completed another poll indicating their top choices to prioritize in the CHIP. Again, the results were shared instantly, and workgroups were formed to continue the discussion. Each work group discussed the data from the CHA process that is most pertinent to the issue to develop goals, strategies and measures for the CHIP. The top issues selected were: Obesity/Nutrition/Diabetes, Mental Health, Pandemic/COVID-19 and Youth Development. To address each of the issues, **four CHIP subcommittees** were formed: **Communicable Diseases, Healthy Living, Youth Development, and Behavioral Health.**

Phase 5: Formulate Goals & Objectives

This phase involves specifying goals for each of the strategic issues identified in the previous phase. Starting in December 2020, each CHIP subcommittee met through Zoom and began with a deep dive into the data specific to the issue they were addressing. Through the development of goals, and objectives, CHIP subcommittees focused on health equity and access to health and social services. The CHIP subcommittees considered issues such as health equity and access to care when developing goals and objectives.

To formulate goals and strategies, the Alliance defines health as the state of complete physical, mental and social well-being. Health also has the goal of preventing disease and prolonging life. The health of a community is determined by various social, economic and environmental factors. Higher levels of

education, access to healthy food option, clean air, safe and clean neighborhoods and opportunities for physical activity positively influence health behaviors. The improvement of health behaviors leads to a more productive workforce and lower health care expenditures. A healthy community is one in which all groups of the community work together and collaborate to prevent disease and make healthy living options accessible. A healthy community promotes healthy living to bring the greatest health benefits to the greatest number of people. A healthy community works together to reduce health gaps caused by various social, economic and environmental factors.

In December 2020, the CHIP implementation process started and the meetings to develop goals and objectives began with the selection of a chair, co-chair and a liaison from the DOH-Manatee to support the implementation of the plan. The HCWCF facilitated the meetings and reviewed the highlights from the previous month's data review. Strategic issues were formed along with a purpose statement to guide the work of the CHIP subcommittees. Over the course of the next few weeks, CHIP subcommittees continued working and implementing their goals and objectives by reviewing data, considering assets and opportunities identified in the CHA and updates from CHIP subcommittee members. Between meetings, CHIP subcommittee members received notes and updated workplans.

PHASE 6: ACTION CYCLE

Strategic Issue Summary

The following section illustrates each strategic issue identified along with the data from the CHA pertinent to the particular issue as it was considered in the development of the workplans. Many of the issues are interrelated but goals, objectives and activities were tailored to the needs of the community based on the data indicated.

Communicable Diseases

Strategic Issue: How do we reduce communicable diseases in Manatee County?

- The COVID-19 pandemic has had broad and deep impacts during this CHA/CHIP cycle. It is impossible to quantify all the effects at this point in time since the pandemic is ongoing. There are references throughout this Community Health Assessment report of impacts on social indicators of health, mental health and drug use and they are provided to frame issues that will continue for the foreseeable future and will ultimately impact the health of Manatee County residents.
- It is also apparent that the pandemic not only rose to a high level of importance in the assessments, but also help to increase awareness of health disparities in the county. In November 2020, the Manatee County Commission declared racism as a public health crisis, opening the door for more significant and coordinated work around issues of equity and health disparities.
- COVID-19 and natural disasters have increased focus on the need to develop better policies and strategies to meet the needs of these populations to address, mitigate and prevent poor health outcomes.
- The young adults focus group discussed the impact the COVID-19 pandemic has placed on mental health by increasing anxiety.
- COVID-19 has also resulted in the delay of health screenings such as colonoscopies, mammograms and routine blood work due to fears of contracting the virus in a medical setting

even for those with insurance. Elective surgeries have also been postponed and at times there have been shortages of ICU beds.

- People with employer-sponsored health insurance may have lost coverage as a result of layoffs and business closings since the beginning of the COVID-19 pandemic.
- From January 1, 2018 through October 24, 2020, 4,838 Hepatitis A cases were reported in Florida. The first declaration of a public health emergency for Hepatitis A was made August 1, 2019 and has been redeclared four times, with the most recent declaration being in March of 2020. Manatee County had a spike in cases in 2019 to 138 cases as opposed to 3 cases in 2018. The COVID-19 pandemic is affecting health care seeking behavior, which may be impacting the diagnosis and reporting of Hepatitis A cases. Although there are only 3 cases reported between January 1 and June 13, 2020 in Manatee County, there is concern that cases are going undiagnosed and that another outbreak may occur.
- Manatee County has higher rates of both early and infectious syphilis than per county average, nearest local health department and Florida.
- Manatee County rates for gonorrhea, chlamydia and bacterial STDs are higher than peer counties and nearest local health department, but lower than Florida.
- According to the CDC, during the 2019 season Florida has the fifth lowest percentage for children and third lowest for adults receiving annual flu vaccine at 55% for children and 38% for adults. Hepatitis C is declining in Manatee County and is rising in Florida. As of the 2016-18 period, Manatee County's rate is below that of Florida. Manatee County's rate is also below the nearest local health department but is higher than the peer county average.
- Manatee County has higher rates of tuberculosis cases than the per county average and the nearest local health department.
- The source of data on STI's, TB and hepatitis is Merlin, Florida's web-based reportable disease surveillance system- via FLHealthCHARTS.
- The source of data on COVID-19 is Florida Department of Health, Division of Disease Control and Protection.

Behavioral Health

Strategic Issue: How can we improve behavioral health in Manatee County?

- Hospitalization rates for mental disorders among Manatee County residents between 65 and 74 years old were higher than Florida in 2018.
- Suicide rates in Manatee County are higher than Florida and peer county average, and lower than the nearest local health department.
- In 2019, suicide death rates in Manatee County were highest in the 75 and older age cohort, with the second highest rates in the 45-54 age cohort.
- At least seven out of the fifteen key informant participants highlighted mental health as one of the top issues in Manatee County.
- A key informant shared the perspective that those with mental health and/or substance abuse challenges struggle more than others and that these issues often lead to homelessness.
- One of the participants highlighted the pressures facing mothers, especially single moms as the sole care provider for infants and children. This is exacerbated in underserved communities and as pressures compound, mother's mental health is not sufficiently addressed. They are high risk for impaired access to food, formula, diapers and other basic needs.
- Manatee County had higher death rates from alcohol-suspected motor vehicle crashes than Florida, peer counties or the nearest local health department.

- The U.S. Department of Health and Human Services (HHS) has designated Health Professional Shortage Areas (HPSAs) and Manatee County as a Mental Health Professional Shortage Area.
- When comparing data from the first six months of 2020 with same period of 2019 fatal overdoses from all drugs increased 8.8% in Manatee County and opioid overdoses remained the same. Non-fatal overdoses from all drugs increased 23.7% and non-fatal opioid overdoses increased by 34.6%.

Healthy Living

Strategic Issue 1: How can we improve nutrition and physical activity in order to reduce obesity in Manatee County?

- Obesity rates are very high in minority populations; whites seem to be doing better Food deserts, no sidewalks in some neighborhoods so walking is dangerous, fast food consumption. Opportunities include recreation offerings improving in some areas, community gardens, strategies to increase participation in WIC and Supplemental Nutrition Assistance Program (SNAP).
- Manatee County has higher rates of obesity in mothers at time pregnancy occurs, than Florida.
- Black adults in Manatee County have higher rates of being sedentary than Blacks in Florida, as well as Whites and Hispanics in Manatee County and Florida.
- Females are more likely to report being sedentary than males in both Manatee County and Florida.
- Manatee County has higher rates of overweight adults overall and among non-Hispanic Whites than Florida. Blacks and Hispanics, Manatee County has higher rates of obesity than Florida.
- The County Health Rankings identified adult obesity as an area to explore in the 2020 Manatee County profile.

Strategic Issue 2: How can we improve diabetes outcomes in Manatee County?

- Diabetes death rates in Manatee County are lower than Florida but are increasing over time. Manatee County has lower diabetes death rates than the peer county average, but higher rates than the nearest local health department.
- Blacks and Hispanics have higher death rates than Whites, are more likely to be hospitalized, have an ER visit related to diabetes and higher rates of amputation of a lower extremity than Whites.
- Manatee County has lower rate of amputation of lower extremity attributable to diabetes than Florida, the trend is increasing overall. However, Blacks and Hispanics have a higher rate of amputation of a lower extremity than Whites.

Youth Development

Strategic Issue: How do we improve youth development?

- Teens and young adults agreed that mental health, substance abuse and obesity/nutrition, and sexually transmitted infections (STIs) as the most critical health issues in Manatee County.
- In discussing mental health, a focus group participant explained their observation of parents taking their stress out on their children creating a cycle of poor mental health.

- Existing mental illness among adolescents may be exacerbated by the pandemic, and with school closures, they do not have the same access to key mental health services. Additionally, substance use is a concern among adolescents as they may use substances to cope.
- The Forces of Change identified threats including increasing STI rates, comprehensive sexual and reproductive health information lacking, vaping.
- Youth Vaping in 2020, 25.6% of Florida high school students reported current use of electronic vaping – a 63% increase compared to 2017. Only about 4% of adults in Florida were using Electronic Nicotine Delivery Systems (ENDS).
- A key informant shared that youth crime has been increasing even before the onset of the pandemic and specifically mentioned youth shootings.
- In 2018:
 - 9.7% of students in Manatee County, ages 11-17, in the past year, did something to purposely hurt themselves without wanting to die.
 - It was estimated that 3,246 youth 9-17 were seriously emotionally disturbed.
 - 22.2% of students ages 11-17, who in the past year, felt sad or hopeless for two or more weeks in a row and stopped doing usual activities.
 - 4.4% of students ages 11-17, who did not go to school because they felt they would be unsafe at school or on their way to school in the past 30 4.4% days.
- Disconnected youth are at an increased risk of violent behavior, smoking, alcohol consumption and marijuana use, and may have emotional deficits and less cognitive and academic skills than their peers who are working and/or in school.
 - There are higher rates of disconnection among Black and Hispanic youth in Manatee County.
- Manatee County rates of students who have ever used smokeless tobacco (chewing tobacco, snuff, or dip), among all middle and high school students have remained in the 30 to 32% range from 2014 to 2020 and are lower than rate in Florida, but higher than peer counties or nearest local health department.
- Exposure to second-hand smoke was reported by over 61% of youth in both Florida and Manatee County.
- Manatee students have reported higher rates of trying to lose weight than students in Florida over the last decade.
- Among youth, Manatee County Hispanics and males have higher rates of obesity than Hispanics and males in Florida. Overall, Manatee County has lower rates of youth obesity when compared with Florida, and higher rates than the peer county average and the nearest local health department.

Strategy Map

The Strategy Map not only provides the purpose, strategic issues, goals and objectives specific to each committee, but the alignment with the state of Florida’s State Health Improvement Plan and the national Healthy People 2030 goals.

Communicable Diseases

Healthy People 2030 national health targets include:

- Reduce the rate of hepatitis A to 0.4 cases per 100,000. Manatee County’s current rate of 0.7 does not meet the national target.

- Reduce the rate of hepatitis B-acute to 0.9 cases per 100,000. Manatee County’s current rate of 2.5 does not meet the national target.

Florida State Health Improvement Plan Alignment:

- Increase access to immunizations for infants and pregnant women.
- Increase access to immunizations for vaccine preventable diseases in children and teens.
- Reduce syphilis in Florida.
- Reduce new HIV infections in Florida through a coordinated response across public health systems partners.
- Demonstrate readiness for existing and emerging infectious disease threats.

<p>Purpose: To focus on the communicable diseases that are a high priority in Manatee County and to address the social determinants of health, health equity and health disparities.</p>
<p>Strategic Issue: How do we reduce communicable diseases in Manatee County?</p>
<p>Goal 1: By October 2021, to increase Manatee Healthcare Alliance's awareness of the knowledge, skills and access of Manatee County residents in order to effectively minimize communicable diseases in Manatee County.</p>
<p>SMART Objectives:</p> <ul style="list-style-type: none"> A. By October 2021, determine and obtain information necessary to assess the rates, knowledge, skills beliefs and perceptions of Manatee County residents regarding testing, treatment, and prevention of communicable diseases. <p>Hepatitis A rate per 100,000 cases: Baseline 0.7, November 2020 Target 0.4 by December 2023</p> <p>Hepatitis B rate per 100,000 cases: Baseline 2.5, November 2020 Target 0.9 by December 2023</p>
<p>Goal 2: Increase culturally and linguistically sensitive communication of communicable disease education, access and affordability regarding testing, transmission, treatment and vaccination, by 2022. (Health equity)</p>
<p>SMART Objectives:</p> <ul style="list-style-type: none"> A. Design and implement culturally and linguistically (Health Equity) sensitive outreach to educate communities about prevention, testing, treatment and access regarding communicable diseases by October 2022. B. Establish and support systems that enable clinicians to comprehensively test, treat, and educate, specific to community needs, by 2023. <p>Hepatitis A rate per 100,000 cases: Baseline 0.7, November 2020 Target 0.4 by December 2023</p> <p>Hepatitis B rate per 100,000 cases: Baseline 2.5, November 2020 Target 0.9 by December 2023</p>

Behavioral Health

Healthy People 2030 national health targets include:

- Reduce unintentional injury deaths to 43.2 deaths per 100,000. Manatee County's current rate of 66.3 does not meet the national target.
- Reducing the suicide rate to 12.8 per 100,000 population. Manatee County's current rate of 15.9 does not meet the national target.
- Reducing drug overdose deaths to 20.7 per 100,000 population. Manatee County's current rate of 32 does not meet the national target.
- Reduce the death rate of from alcohol- suspected motor vehicle crashes to 28.3 per 100,000 population.

Florida State Health Improvement Plan Alignment:

- Reduce mental, emotional, and behavioral health disorders in children through improved identification and treatment of behavioral health disorders in parents who come in contact with the child welfare system.
- Decrease the number of newborns experiencing neonatal abstinence syndrome.
- Reduce the number of opioid overdose deaths among individuals with opioid use disorders.
- Reduce the number of deaths by suicide in Florida.

Purpose: To improve behavioral health outcomes in Manatee County.

Strategic Issue: How can we improve behavioral health in Manatee County?

Goal 1: Improve behavioral health outcomes for Manatee County residents by 2023.

SMART Objectives:

- A. Increase availability and communication of culturally, linguistically and developmentally appropriate behavioral health and substance use/abuse treatment services by October 2021. (Health Equity)
 - Objective will address children, adolescents, adults and seniors.
- B. Provide education to Manatee County residents regarding access to culturally, linguistically and developmentally appropriate health services by October 2022. (Health Equity)
 - Objective will address children, adolescents, adults and seniors.

Reducing unintentional injury deaths per 100,000:

Baseline: 66.3, November 2020

Target: 43.2 by December 2023

Reducing suicide rate per 100,000: unintentional injury deaths per 100,000

Baseline: 15.9, November 2020

Target: 12.8 by December 2023

Reducing drug overdose deaths per 100,000

Baseline: 32, November 2020

Target: 20.7 by December 2023

Reducing death rate from alcohol-suspected motor vehicle crashes per 100,000:

Baseline: 15.9, November 2020 Target: 5.3 by December 2023
Goal 2: Increase awareness of the number of individuals readmitted for substance abuse treatment by 2023.
SMART Objectives: A. By 2023, distribute a report that will act as a call to action to address the use and abuse of harmful substances.
Reducing drug overdose deaths per 100,000 Baseline: 32, November 2020 Target: 20.7 by December 2023

Healthy Living

Healthy People 2030 national health targets include:

- Increasing the proportion of women who had a healthy weight before pregnancy to 47.1 percent. Manatee County’s current rate of 40.1 does not meet the national target. Manatee County has lower rates of mothers who initiate breastfeeding among Whites, Blacks and Hispanics when compared with Florida. Blacks in Manatee County have the lowest rates of all groups.
- Healthy People 2030 has established a variety of indicators for diabetes prevention, treatment and outcomes using data sets not currently accessible.

Florida State Health Improvement Plan Alignment:

- Improve the food environment and nutrition habits across the lifespan to increase healthy weight.
- Improve access to and participation in physical activity opportunities across the lifespan to increase healthy weight.

Purpose: To address obesity, nutrition and diabetes in Manatee County.
Strategic Issue 1: How can we improve nutrition and physical activity in order to reduce obesity in Manatee County?
Goal 1: Improve access to healthy food and increase physical activity participation by 2023.
SMART Objectives: A. Increase participation in gyms, community centers, and parks, and recreation offerings especially in neighborhoods/zip codes with high rates of overweight/obesity (Health Equity). <ul style="list-style-type: none"> • Zip codes/Areas include: Palmetto (34222), Ellenton (34208), downtown Bradenton (34208 and 34205). B. By December 2023, 2-5 new Early Care and Education Centers (ECEs) will have implemented Coordinated Approach to Child Health (CATCH) or Nutrition and Physical Activity Self Assessment for Child Care (NAPSACC) to improve their nutrition and physical activity standards.

<p>Increasing proportion of women who had a healthy weight before pregnancy: Baseline: 40.1% November 2020 Target: 47.1% by December 2023</p>
<p>Goal 2: Increase access to healthy food and nutrition education by 2023. (Health Equity).</p>
<p>SMART Objectives:</p> <ul style="list-style-type: none"> A. By 2023, increase participation in UF/IFAS Extension Family Nutrition Program to SNAP-eligible recipients by 10% from baseline of 2,124 participants (Health Equity). B. By 2023, increase participation in Community Gardens and/or Garden Education by 10% from a baseline of 500 participants.
<p>Increasing proportion of women who had a healthy weight before pregnancy: Baseline: 40.1% November 2020 Target: 47.1% by December 2023</p>
<p>Goal 3: Increase breastfeeding rates in Manatee County by 2023.</p>
<p>SMART Objectives:</p> <ul style="list-style-type: none"> A. By 2023, promote the recognition of breastfeeding-friendly workplaces and provide technical assistance to 10 new workplaces (2 Black-owned) to achieve Breastfeeding Friendly Workplaces Award by November 2023. (Health Equity) <ul style="list-style-type: none"> • Defined by the Census Bureau as business with African American owners holding at least a 51% stake in the business. B. By 2023, increase the percentage of mothers who initiate breastfeeding in Manatee County from 83.3% to 84% (based on 3-year rolling rates).
<p>Increasing percentage of Black mothers who initiate breastfeeding: Baseline: 83.3% November 2020 Target: 84% by December 2023</p>
<p>Strategic Issue 2: How can we improve diabetes outcomes in Manatee County?</p>
<p>Goal 1: Increase access to diabetes medication, testing and treatment and support by 2023.</p>
<p>SMART Objectives:</p> <ul style="list-style-type: none"> A. Develop a referral system for patients with diabetes to gain access to necessary services and medical care by October 2022. B. Work with partners such as the Manatee Medical Society to have two endocrinologists based and practicing in Manatee County by October 2023.
<p>Reduce diabetes death rate per 100,000: Baseline: 15.3, November 2020 Target: 11.4 by December 2023</p>

Youth Development

Healthy People 2030 national health targets include:

- Reduce death from suicide to 12.8 deaths per 100,000 population. Manatee County's current rate of 15.9 does not yet meet the national target.
- Reduce pregnancies among adolescent females to 31.4 births per 1,000 females. Manatee County's current rate of 22.5 meets the national target. While this goal has been met, the rate is still higher than the state, peer county average and nearest local health department.

Florida State Health Improvement Plan Alignment:

- Reduce mental, emotional, and behavioral health disorders in children through improved identification and treatment of behavioral health disorders in parents who come in contact with the child welfare system.

Purpose: To improve the physical, social/emotional and mental health of youth in Manatee County.
Strategic Issue: How do we improve youth development?
Goal 1: Improve physical, social/emotional health outcomes for youth by increasing the delivery of age and developmentally appropriate education and support, by 2023.
SMART Objectives: <ul style="list-style-type: none">A. To improve physical, social/emotional health outcomes for youth by providing age and developmentally appropriate education and support, by 2023.B. Improve the knowledge, skills and behaviors of parents/caregivers to support healthy behaviors for youth, by 2023.
Reduce teen deaths from suicide per 100,000 Baseline: 15.9, November 2020 Target: 12.8 by December 2023
Reduce pregnancies among adolescent females per 1,000: Baseline: 31.4, November 2020 Target: 22.5 by December 2023
Goal 2: Improve access and reduce barriers to physical and mental health services for youth, by 2023.
SMART Objectives: <ul style="list-style-type: none">A. Increase awareness and access to the school-based health clinics in Manatee County by 2023. By increasing access to School Based Health Center (SBHC) and keeping track of current measures this will support need for future SBHCs in School District of Manatee County (SDMC).
Reduce teen deaths from suicide per 100,000 Baseline: 15.9, November 2020 Target: 12.8 by December 2023
Reduce pregnancies among adolescent females per 1,000: Baseline: 31.4, November 2020 Target: 22.5 by December 2023

CHIP WORKPLANS

The following workplans denote the specific details regarding, what, who, when and how the strategic issues will be addressed. Goals, objectives, activities, measures and action teams indicated by the workplans facilitate consistent and meaningful implementation of the CHIP. CHIP subcommittee Chairs will present their progress to the MHCA on a monthly basis and conduct an in-depth annual review in November each year.

Communicable Diseases				
Chair: Victoria Kasdan	Co-Chair: Ron Gottlieb	DOH Liaison: Carla McGill		Monthly Meetings: Third Tuesdays of the month
The Chair should make sure the goals are being achieved and should report back and present to the Manatee Healthcare Alliance monthly.	The Co-chair steps in as back-up if the Chair is not available.	The DOH liaison is responsible for collecting meeting notes from the CHIP subcommittee; ensuring that either the Chair/Co-Chair is presenting updates, progress and any requests at monthly MHCA meetings.		
Subcommittee Members: Victoria Kasdan (Mission Made Possible), Bill Colgate (MCR Health), Carol Whitmore (Manatee County Commissioner), Ron Gottlieb (community member), Ruth Harenchar (League of Women Voters Manatee), Belisa Marochi (DOH-Manatee), Keilah Schmidt (DOH-Manatee), Edwin Hernandez (DOH-Manatee), Eddie Rosa (DOH-Manatee), James Crutchfield (Manatee County EMS), Paige Alitz (DOH-Manatee), Carla McGill (DOH-Manatee), JoOni J-Abnar (The Multicultural Health Institute), Megan Lucas (Manatee Memorial Hospital), Michelle Slawinski (DOH-Manatee).				
Purpose: To focus on the communicable diseases that are a high priority in Manatee County and to address the social determinants of health, health equity and health disparities.				
Strategic Issue 1: How do we reduce communicable diseases in Manatee County?				
Goal 1: By October 2021, to increase Manatee Healthcare Alliance's awareness of the knowledge, skills and access of Manatee County residents in order to effectively minimize communicable diseases in Manatee County.				
Resources: FLHealthCHARTS Data, FL Community Health Workers (CHW) Coalition.				
SMART Objectives	Activities	Progress	Measure	Action Team
A. By October 2021, determine and obtain information necessary to assess the rates,	1.A.1 Determine and obtain quantitative and qualitative data necessary to address purpose by April 2021.		Spreadsheet with data needs, sources, etc. List of questions/needs.	FL Department of Health (state), FL Department of

<p>knowledge, skills beliefs and perceptions of Manatee County residents regarding testing, treatment, and prevention of communicable diseases.</p> <p>Hepatitis A rate per 100,000 cases: Baseline: 0.7, 2020 Target: 0.4 by December 2023</p> <p>Hepatitis B rate per 100,000 cases: Baseline: 2.5, 2020 Target: 0.9 by December 2023</p>	1.A.2 Identify organizations/key partners to (CBOs, Community Health Workers, lay leaders) to reach out and learn about more about qualitative data needs by May 2021.		<p>List/spreadsheet of priority populations/neighborhoods/disparate groups along with specific resources. Survey/focus group/key informant interview tool. Report of assessments.</p>	<p>Health in Manatee County, Manatee County Government, MCR Health, The Multicultural Health Institute, Mission Made Possible, Manatee Memorial Hospital, Manatee County EMS</p>
	1.A.3 Determine populations/communities to further assess knowledge, skills, beliefs, and perceptions regarding testing, treatment, and prevention of communicable diseases by July 2021.			
	1.A.4 Identify questions to address through survey with community members, CBOs and Community Health Workers by August 2021.			
	1.A.5 Research and address policies limiting necessary data to address goal by September 2021.			
	1.A.6 Conduct survey and present results by October 2021.			
<p>Goal 2: Increase culturally and linguistically sensitive communication of communicable disease education, access and affordability regarding testing, transmission, treatment and vaccination, by 2022. (Health equity)</p>				
<p>Resources: GCAHEC's trainings.</p>				

SMART Objectives	Activities	Progress	Measures	Action Team
<p>A. Design and implement culturally and linguistically (Health Equity) sensitive outreach to educate communities about prevention, testing, treatment and access regarding communicable diseases by October 2022.</p> <p>Hepatitis A rate per 100,000 cases: Baseline: 0.7, November 2020 Target: 0.4 by December 2023</p> <p>Hepatitis B rate per 100,000 cases: Baseline: 2.5, November 2020 Target: 0.9 by December 2023</p>	2.A.1 Analyze and prioritize results of community survey to indicate topics to cover, priority populations, communication methods, by December 2021.		<p>Defined program outline, resources/materials, list individuals, implementing (CHWs, Health Educators, lay leaders, organizations with social media), program/initiative developed, evaluation plan and tools, participant list, # of individuals reached, #dates/#hours (if applicable), evaluation report.</p>	<p>DOH-Manatee, MCR Health, Mission Made Possible, The Multicultural Health Institute, League of Women Voters Manatee, Manatee Memorial Hospital, Manatee County Government, Manatee County EMS</p>
	2.A.2 Identify existing resources pertaining to topics covered by January 2022.			
	2.A.3 Determine who is and how they are going to outreach and recruit as appropriate by February 2022.			
	2.A.4 Create campaign to promote education and resources by May 2022.			
	2.A.5 Design evaluation plan and tools by June 2022.			
	2.A.6 Recruit participants (if necessary) by July 2022.			
	2.A.7 Implementation of campaign by September 2022.			
	2.A.8 Complete evaluation of campaign by October 2022.			
B. Establish and support systems that enable clinicians to comprehensively test, treat, and educate,	2.B.1 Capture existing systems/protocols, policies and expectations of clinical professionals to address prevention, testing and		Inventory of existing systems/protocols and expectations of clinical professionals, list of gaps and barriers to communication related to inventory, prioritization of gaps/barriers,	DOH Manatee, MCR Health, Mission Made Possible, The Multicultural

	<p>1.B.9 Evaluate resources content and impact by October 2022.</p>			

Goal 2: Increase awareness of the High Need High Utilizers (HNHU) among opioid users that will act as a call to action by 2023.

Resources: DOH Florida Epidemic Intelligence Service Opioid Fellow

SMART Objectives	Activities	Progress	Measures	Action Team
<p>A. By 2023, develop and distribute a report based on High Need High Utilizer (HNHU) among opioid users that will act as a call to action.</p> <p>Reducing drug overdose deaths per 100,000:</p>	<p>2.A.1 Identify neighboring counties that have conducted similar analysis and review by March 2021.</p>		<p>Report criteria, report developed, report distribution/reach, and policy recommendations.</p>	<p>DOH-Manatee, Centerstone, Drug Free Manatee, Manatee County EMS, Manatee Memorial Hospital, Manatee County Sheriff's Office, EMSTARS</p>
	<p>2.A.2 Identify stakeholders and determine their involvement by April 2021.</p>			
	<p>2.A.3 Draft a project proposal to include purpose of project and pertinent variables for analysis,</p>			

Baseline: 32, November 2020 Target: 20.7 by December 2023	and agreement processes by August 2021.			
	2.A.4 Collect, compile and clean data from key stakeholders by February 2022.			
	2.A.5 Analyze data, draft findings and submit report for review by June 2022.			
	2.A.6 Distribute final report and other publishable pieces, and present on findings by July 2022 and ongoing.			
	2.A.7 Research and develop policy recommendations to improve outcomes related to the use and abuse of harmful substances in Manatee County and construct a policy brief addressing these findings by October 2022.			

Healthy Living			
Chair: Ruth Harenchar	Co-chair: Molly White	DOH Liaison: Anastasia Peele	Monthly Meetings: Third Thursdays of the month
The Chair should make sure the goals are being achieved and should report back to the Manatee Healthcare Alliance every month.	The Co-chair steps in as back-up if the Chair is not available.	The DOH liaison is responsible for collecting meeting notes from the CHIP subcommittee; ensuring that either the Chair/Co-Chair is presenting updates, progress and any requests at monthly MHCA meetings.	
Subcommittee Members: Bill Colgate (MCR Health), Shelly Smith (DOH-Manatee), Belisa Marochi (DOH-Manatee), Anastasia Peele (DOH- Manatee), Lindsay Taylor (DOH-Manatee), Carla McGill (DOH-Manatee), Tima Midyette (DOH-Manatee), Kathleen Houseweart (We Care Manatee), John Pappa (DOH-Manatee), Ruth Harenchar (League of Women Voters Manatee), Tara Gage (UF/IFAS Extension Family Nutrition Program), Emily Grant (UF/IFAS Extension Family Nutrition Program), Melissa Rosenburg Ehrmann (DOH-Manatee), Amanda Wagner (American Heart Association), JoOni J-Abnar (The Multicultural Health Institute), Molly White (Manatee County Parks)			

and Natural Resources), Amy Farrington (Manatee Chamber of Commerce), Bryan Lipps (Meals on Wheels PLUS of Manatee), Jamie Rusnak (Manatee YMCA).

Purpose: To address obesity, nutrition and diabetes in Manatee County.

Strategic Issue 1: How can we improve nutrition and physical activity in order to reduce obesity in Manatee County?

Goal 1: Improve access to healthy food and increase physical activity participation by 2023.

Resources: Parks and Natural Resources, Manatee YMCA, Medicare supporting gym membership cost, Manatee County Government, Manasota Food Action Council, Bradenton Farmers Market, Coordinated Approach to Child Health (CATCH), Nutrition and Physical Activity Self Assessment for Child Care (NAPSACC), Healthiest Weight Florida.

SMART Objectives	Activities	Progress	Measures	Action Team
<p>A. Increase participation in gyms, community centers, and parks, and recreation offerings especially in neighborhoods/zip codes with high rates of overweight/obesity (Health Equity).</p> <p>Zip codes/Areas include: Palmetto (34222), Ellenton (34208), downtown Bradenton (34208 and 34205).</p> <p>Increasing proportion of women who had a healthy weight before pregnancy: Baseline: 40.1% November 2020 Target: 47.1% by December 2023</p> <p>Reduce diabetes death rate per 100,000:</p>	1.A.1 Create a spreadsheet of opportunities/calendars, schedules to be physically active and cost/membership/location, etc., in zip codes with high rates of overweight/obesity by April 2021.		<p>Spreadsheet, tracking of spreadsheet/calendar shared through community, survey/# of community members engaged, prioritization of barriers, plan designed to address barriers, tracking of outreach and implementation, attendance in classes/programs and parks.</p>	<p>Manatee County Government Parks and Natural Resources, UF IFAS (Family Nutrition Program), DOH-Manatee, The Multicultural Health Institute, Manatee Chamber of Commerce, American Heart Association, Manatee YMCA</p>
	1.A.2 Publish spreadsheet as a resource for the community by June 2021.			
	1.A.3 Determine barriers to participation in activities on the list are by October 2021.			
	1.A.4 Find out barriers through community engagement and consultation (survey, community leaders, etc.) by October 2021.			
	1.A.5 Prioritize findings and gather resources by December 2021.			
	1.A.6 Implement outreach plan by January 2022.			
	1.A.7 Evaluate outreach efforts by June 2022.			

Baseline: 15.3, November 2020 Target: 11.4 by December 2023	1.A.8 Update resources and continue outreach efforts by September 2022.			
B. By December 2023, 2 to 5 new Early Care and Education Centers (ECEs) will have implemented CATCH or NAPSACC to improve their nutrition and physical activity standards. Increasing proportion of women who had a healthy weight before pregnancy: Baseline: 40.1% November 2020 Target: 47.1% by December 2023 Increasing percentage of Black mothers who initiate breastfeeding: Baseline: 83.3% November 2020 Target: 84% by December 2023 Reduce diabetes death rate per 100,000: Baseline: 15.3 November 2020 Target: 11.4 by December 2023	1.B.1 Identify all ECEs in Manatee County that are not currently using CATCH or NAPSACC by October 2021.		# of ECEs, # of ECEs using CATCH or NAPSACC, resources disseminated, population reached, implementation status of CATCH or NAPSACC.	UF IFAS (Family Nutrition Program), Early Learning Coalition of Manatee County, DOH-Manatee, The Multicultural Health Institute
	1.B.2 Disseminate resources and education on physical activity and nutrition to 25% of ECEs not using CATCH or NAPSACC by August 2022.			
	1.B.3 Provide technical assistance to 2 to 5 ECEs to implement CATCH or NAPSACC by December 2023.			
Goal 2: Increase access to healthy food and nutrition education by 2023 (Health Equity).				
Resources: UF/IFAS Extension Family Nutrition Program (FNP), Fresh Access Bucks-Receive double the fresh produce at participating SNAP farmers markets- Realize Bradenton, Justice Map, Census Supplemental Nutrition Assistance Program (SNAP) data.				
SMART Objectives	Activities	Progress	Measures	Action Team

<p>A. By 2023, Increase participation in UF/IFAS Extension Family Nutrition Program (FNP) to SNAP-eligible recipients by 10% from baseline of 2,124 participants (Health Equity).</p> <p>Increasing proportion of women who had a healthy weight before pregnancy: Baseline: 40.1% November 2020 Target: 47.1% by December 2023</p> <p>Reduce diabetes death rate per 100,000: Baseline: 15.3, November 2020 Target: 11.4 by December 2023</p>	2.A.1 Collect resources about UF/IFAS Extension Family Nutrition Program (FNP) by June 2021.		<p>Toolkit, zip code % of SNAP eligibility per, list of partners in zip codes, % of population receiving materials.</p>	<p>Manatee County Government Parks and Natural Resources, UF IFAS (Family Nutrition Program), DOH-Manatee, The Multicultural Health Institute, Manatee Chamber of Commerce, American Heart Association</p>
	2.A.2 Identify zip codes with limited resource families by October 2021.			
	2.A.3 Identify community partners within the identified zip codes for assistance in promoting UF/IFAS FNP by December 2021.			
	2.A.4 Track quarterly growth of program participants in years 2 and 3 to achieve 10% growth year over year by December 2023. <ul style="list-style-type: none"> 10% growth by 2022, as baseline and 15% growth by 2023. 			
<p>B. By 2023, Increase participation in Community Gardens and/or Garden Education by 10% from a baseline of 500 participants.</p> <p>Increasing proportion of women who had a healthy weight before pregnancy: Baseline: 40.1% November 2020 Target: 47.1% by December 2023</p>	2.B.1 Develop informative and recruitment collateral to share with community partners by June 30, 2021.		<p>Number of plots used number of memberships.</p>	<p>Manatee County Government Parks and Natural Resources, UF IFAS FNP, DOH-Manatee, The Multicultural Health Institute, Manatee Chamber of Commerce, American Heart Association</p>
	2.B.2 Disseminate collateral to community partners by September 2021.			
	2.B.3 Track quarterly participation and retention in community gardens through December 2023.			
	2.B.4 Track quarterly participation in UF/IFAS Extension Manatee County Online gardening events to			

Reduce diabetes death rate per 100,000: Baseline: 15.3, November 2020 Target: 11.4 by December 2023	achieve at least 20% growth in classes per month in year 3 by December 2023.			
Goal 3: Increase breastfeeding rates in Manatee County by 2023.				
Resources: Breastfeeding friendly workplaces, WIC, Mothers of Manatee Memorial Hospital (MOMM's Place).				
SMART Objectives	Activities	Progress	Measures	Action Team
<p>A. By 2023, promote the recognition of breastfeeding-friendly workplaces and provide technical assistance to 10 new workplaces (2 Black-owned) to achieve Breastfeeding Friendly Workplaces Award by November 2023. (Health Equity)</p> <ul style="list-style-type: none"> Defined by the Census Bureau as business with African American owners holding at least a 51% stake in the business. <p>Increasing percentage of Black mothers who initiate breastfeeding: Baseline: 83.3% November 2020 Target: 84% by December 2023</p>	3.A.1 Identify existing resources for the promotion of Breastfeeding Friendly Workplaces by March 2021.		DOH Manatee WIC Breastfeeding Data Quarterly, FLHealthCHARTS data, number of partners, number of workplaces, number of materials distributed, number of individuals reached.	Healthiest Weight Florida, Manasota Black Chamber of Commerce, DOH-Manatee WIC, MCR Health, Florida Healthy Babies, Manatee Chamber of Commerce, The Multicultural Health Institute
	3.A.2 Design additional resources needed to promote Breastfeeding Friendly Workplaces by May 2021.			
	3.A.3 Develop outreach plan to promote Breastfeeding Friendly Workplaces by July 2021.			
	3.A.4 Implement outreach campaign with workplaces for Breastfeeding Awareness Month Campaign in August 2021 (annually 2022, 2023).			
	3.A.5 Implement outreach plan to promote Breastfeeding Friendly Workplaces by September 2021.			
	3.A.6 Provide technical assistance to 5 workplaces (1 of 5 Black-owned) to achieve the Breastfeeding Friendly			

	Workplaces Award by January 2022. <ul style="list-style-type: none"> Additional 5 sites (1 of 5 Black-owned by 2023). 			
<p>B. By December 2023, increase the percentage of mothers who initiate breastfeeding in Manatee County from 83.3% in November 2020 to 84% (based on 3-year rolling rates).</p> <p>Increasing percentage of Black mothers who initiate breastfeeding: Baseline: 83.3% November 2020 Target: 84% by December 2023</p>	3.B.1 Engage partners in Manatee County that reach prenatal women by March 2021.			
	3.B.2 Collect resources for the promotion of breastfeeding for prenatal women by May 2021.			
	3.B.3 Design outreach plan to promote consistent messages around the benefits of breastfeeding to prenatal women by June 2021.			
	3.B.4 Establish an evaluation plan for outreach by July 2021.			
	3.B.5 Implement outreach campaign with partners reaching prenatal women for Breastfeeding Awareness Month Campaign in August 2021 (annually 2022, 2023).			
	3.B.6 Implement outreach plan by September 2021.			
	3.B.7 Evaluate effectiveness of outreach by January 2022 and ongoing.			

Strategic Issue 2: How can we improve diabetes outcomes in Manatee County?

Goal 1: Increase access to diabetes medication, testing and treatment and support by 2023.

Resources: Manatee County Medical Society, Insulin program with Diabetes Self Management Program (DSMP), Mobile Medical Units.

SMART Objectives	Activities	Progress	Measures	Action Team
<p>A. Develop a referral system for patients with diabetes to gain access to necessary services and medical care by October 2022.</p> <p>Reduce diabetes death rate per 100,000: Baseline: 15.3, November 2020 Target: 11.4 by December 2023</p>	1.A.1 Identify diabetes services and telehealth options by October 2021.		List of diabetes services, providers and medical professionals, referral process.	DOH-Manatee, MCR Health, Manatee Memorial, American Heart Diabetes
	1.A.2 Develop referral process by October 2021.			
	1.A.3 Train diabetes service providers, and medical professionals on referral sources by October 2021.			
	1.A.4 Outreach to diabetes patients to promote awareness and use of referral process by January 2022.			
	1.A.5 Evaluate referral process and outreach efforts by March 2022.			
	1.A.6 Review referral process and resources content by May 2022.			
<p>B. Work with partners such as the Manatee Medical Society to have two endocrinologists based and practicing in Manatee County by October 2023.</p>	1.B.1 Research and define the need for additional endocrinologists by April 2021.			MCR Health, DOH-Manatee Memorial Hospital, Manatee Medical Society

<p>Reduce diabetes death rate per 100,000: Baseline: 15.3, November 2020 Target: 11.4 by December 2023</p>	<p>1.B.2 Approach Manatee Medical Society or other partner organizations with evidence of need for Endocrinologists by June 2021.</p>			
	<p>1.B.3 Determine capacity of partner organizations and Manatee Medical Society to employ two Endocrinologists by August 2021.</p>			
	<p>1.B.4 Address barriers of partner organizations to employ two Endocrinologists by November 2021.</p>			
	<p>1.B.5 Develop recruitment plan for two Endocrinologists by December 2021.</p>			
	<p>1.B.6 Implement recruitment plan by February 2022.</p>			
	<p>1.B.7 Recruit and onboard one Endocrinologist by April 2022.</p>			
	<p>1.B.8 Recruit and onboard additional Endocrinologist by April 2023.</p>			

Youth Development			
Chair: Skip Wilhoit	Co-Chair: Gemma Clayson	DOH Liaison: Kristin Caulley	Monthly Meetings: Second Wednesdays of the month
The Chair should make sure the goals are being achieved and should report back every month.	The Co-chair steps in as back-up if the Chair is not available.	The DOH liaison is responsible for collecting meeting notes from the CHIP subcommittee; ensuring that either the Chair/Co-Chair is presenting updates, progress and any requests at monthly MHCA meetings.	
<p>Subcommittee Members: Skip Wilhoit (Manatee County School District), Evelyn Almodovar (Healthy Teens Coalition of Manatee County), Mary Ann Legler (Healthy Teens Coalition of Manatee County), Ally Bergmann (North River Prevention Partners), Bill Colgate (MCR Health), Ansley Mora (Gulfcoast South AHEC), Belisa Marochi (DOH-Manatee), Kristin Caulley (DOH-Manatee), Gemma Clayson (Centerstone), Carol Peters (DOH-Manatee), Kelly Benford (Parenting Matters), Lisa Davis (Family Resources INC), Kim Ross (Whole Child Manatee), Renita Houston (Children's Home Society), Heather Keegan (Manatee County School District), Jodi O'Meara (Manatee County School District), Catherine Rees (DOH-Manatee).</p>			
<p>Purpose: To improve the physical, social/emotional and mental health of youth in Manatee County.</p>			
<p>Strategic Issue: How do we improve youth development?</p>			
<p>Goal: 1: To improve physical, social/emotional health outcomes for youth by increasing the delivery of age and developmentally appropriate education and support, by 2023.</p>			
<p>Resources: Sample programs:</p> <p>Sexual Health - Healthy Teens summer and after school programming, School District of Manatee County TeenAge Pregnancy Program (TAPP) program, school nurses, Insight Counseling.</p> <p>Substance Abuse & Vaping - AHEC's Youth Vaping Cessation Program, Centerstone, Drug-Free Manatee, The Healthy Teens Coalition Teen Health Educators, Youth In Action, Centerstone delivery of Too Good For Drugs II, Health Department/School District vaping Intervention course.</p> <p>Mental Health - Centerstone on-campus counseling services, School District threat assessment process, Healthy Teens Coalition Teen Health Educators.</p> <p>Social-Emotional Learning - The School District of Manatee County's implementation of Character Strong, SNAP program (Family Resources), Healthy Teens Coalition Teen Health Educators.</p> <p>DOH-Manatee - School Health monthly/yearly report.</p> <p>Resources - Grant for Health Relationships, Manatee Educational television, media partner, social media, Parent Teach Organizations (PTOs), School Advisory Committee, Parenting Matters, Hanley Institute, Manatee County School District: videos and workshop</p>			

materials for families and care-givers to increase child wellness in diversity/inclusion, empathy, critical thinking, communication, problem solving, peer relations through the Sanford Harmony National University System, Forty Carrots Family Center, SNAP program, Family Network on Disabilities, Trauma Leadership Core Grant.

SMART Objectives	Activities	Progress	Measures	Action Team:
<p>A. Improve physical, social/emotional health outcomes for youth by providing age and developmentally appropriate education and support, by 2023.</p> <p>Reduce teen deaths from suicide per 100,000 Baseline: 15.9, November 2020 Target: 12.8 by December 2023</p> <p>Reduce pregnancies among adolescent females per 1,000: Baseline: 31.4, November 2020 Target: 22.5 by December 2023</p>	<p>1.A.1 Develop an inventory of health education reaching Manatee County youth by end of March of 2021. Data will include:</p> <ul style="list-style-type: none"> • Number of students or classrooms reached. • Subtopics covered under each of the 4 topics. • Partner program delivering each topic. 		<p>Spreadsheet of health education programs reaching Manatee County Youth, topics included and participation numbers, biannual data reporting from each partner organization on number of students served in each program and topic area, monthly progress reports from each partner organization.</p>	<p>Sexual Health - Healthy Teens Coalition of Manatee Substance Abuse & Vaping - AHEC & Drug-Free Manatee, North River Prevention Partners, Healthy Teens Coalition Teen Health Educators Mental Health - Centerstone, School District of Manatee County, Healthy Teens Coalition Teen Health Educators Social-Emotional Learning - The School District of Manatee County, Healthy Teens Coalition Teen Health Educators</p>
	<p>1.A.2 Determine what is needed to expand program reach in each area by June of 2021.</p>

	1.B.4 Design evaluation of opportunities by December 2021.			
	1.B.5 Recruit parents/caregivers for participation by January 2022 and ongoing.			
	1.B.6 Implement and evaluate by May 2022 and ongoing.			

Goal 2: Improve access and reduce barriers to physical and mental health services for youth, by 2023.

Resources: Manatee County Schools, Schools Based Health Center Task Force, National School based Health Alliance, Manatee County Rural Health Services (community health partner).

SMART Objective	Activities	Progress	Measures	Action Team
<p>A. Increase awareness and access to the school-based health clinics in Manatee County by 2023. By increasing access</p>	2.A.1 Identify and prioritize barriers to access and awareness of school-based health clinics by May 2021.		<p>Number of students with return signed consents to access services, number of students with consents on file will be seen for medical appointment, number of students with a consent on file will have utilized counseling/medical services,</p>	<p>Manatee County Schools, MCR Health, Healthy Teens Manatee</p>
	2.A.2 Identify opportunities to address barriers for students and families to access school-based health clinic by June 2021.			
	2.A.3 Develop outreach to address barriers to of students and families to			

<p>to School Based Health Centers (SBHC) and keeping track of current measures this will support need for future SBHC's in School District Manatee County (SDMC).</p> <p>Reduce teen deaths from suicide per 100,000 Baseline: 15.9, November 2020 Target: 12.8 by December 2023</p> <p>Reduce pregnancies among adolescent females per 1,000: Baseline: 31.4, November 2020 Target: 22.5 by December 2023</p>	accessing school-based health clinic by August 2021.		<p>number of suspensions, high school graduation rate per school based-health center school, number of dental visits, number of vision visits.</p>
	2.A.4 Evaluate outreach efforts by January 2022 and ongoing.		
	2.A.5 Participate in the ongoing efforts to establish additional school-based health centers in Manatee County March 2021 and ongoing.		
	<p>2.A.6 Contribute to the determination of services offered as part of the school base health centers by October 2023. Services may include the following:</p> <ul style="list-style-type: none"> a. Annual Well Child Exams/Sports Physicals. b. Immunizations. c. Some labs/tests done on campus/others sent to LabCorp. d. Annual Risk Assessment which includes education/discussion on alcohol, tobacco, drugs and sexual health. e. Sick Visits f. Counseling Services g. Vision Bus h. Dental Bus 		

The four CHIP subcommittees are responsible for implementing the plan activities and demonstrating progress to the MHCA monthly. In addition, action team members have been added to support each goal and objective as needed. In an annual report completed each November, the MHCA will evaluate progress and complete an annual report.

Following the MAPP process to create a community health assessment and improvement plan includes a diverse group of Manatee County community members - anyone who works, learns, lives, and plays in the community. “Community members have expertise about what works well in their community, what issues affect their ability to live healthy lives, and resources in the community that they can use to improve health” (NACCHO 2013, MAPP Handbook, p. 8). Community members play a key role in understanding priority health issues and using this plan to improve the health of the community.

Community Residents

- Volunteer to help groups that support the strategic health issues identified in this county.
- Stay informed on the top health issues in the community and speak with community leaders about these issues.

Faith-based Groups

- Connect your organization or individual members with specific activities they can support in the CHIP Scorecard (i.e., community gardens, promoting breastfeeding among moms).

Healthcare Workers

- Share this plan with your colleagues and staff.
- Participate in a strategic issue or specific activities that require professionals (i.e., cultural and linguistically appropriate services).
- Understand the barriers related to priority health issues and help create solutions for removing them.
- Refer patients to resources or education in alignment with the identified health priorities.

Educators

- Share this plan with your colleagues, staff, and parents.
- Promote activities and resources among students and faculty (i.e., school based-health clinics).
- Provide knowledge and expertise about the school system to Youth Committee members.

Public Health Professionals & Non-Profit Organizations

- Support the Community Scorecard with education, facilitation, direction, knowledge or specific activities.
- Combine efforts for greater impact when a strategic issue aligns with your organization’s mission or vision.

Government Officials

- Understand the priority health issues and barriers to good health in the community.

- Mobilize community leaders to support policy or program changes that advance the health of the community.

In October 2020, a new online interactive dashboard using the mySidewalks platform was launched at the Manatee Healthcare Alliance meeting. The Manatee County Community Dashboard is an interactive site that allows everyone access to Manatee County health information on one platform and provides a comprehensive understanding of our community's health issues.

The Dashboard delivers a new level of intelligence and transparency to the health of our community by turning health data into actionable information. The dashboard is designed to be mobile-friendly, and anyone can access and learn from the data. It allows a story to be told using visualizations, including maps, charts, tables, and more. The data visualizations can be instantly applied to a report, to a dashboard, or even a grant application. This feature is what led the Manatee Healthcare Alliance to choose mySidewalks. Users have the freedom to choose how their data is visualized and make it relevant for any audience. For example, if you are writing a grant, you can export graphs. The dashboard can also be used by a business or by a member of the community if they want to learn more about the health of our community.

The sidebar provides an outline of the pages within the dashboard. The information is organized across the lifespan, from birth to end of life. For instance, healthy beginnings contain data from 0 to five years old, healthy learners has data for those K-12, then healthy adults, and healthy aging for areas regarding seniors and older adults. Healthy beginnings, healthy learners, healthy adults and healthy aging data are also organized by social and environmental factors, behavioral factors, and health outcomes. It contains more than 100 data insights into the social, economic and environmental factors of our community, allowing us to discover how to best address health issues within Manatee County and meet the needs of our constituents.

The Manatee County Community Dashboard is a new tool that will support communication and use of the Manatee Community Health Assessment and Community Health Improvement Plan.

Source: Florida Department of Health, Bureau of Vital Statistics

- More/better coordination between law enforcement and service providers
- Public education and stigma reduction needed
- Expand health access in schools, for example the existing school health clinics
- Include social workers and mental health providers
- Mobile mental health response
- Expand provider networks, including mental health providers
 - a. Increase Medicaid plan options
 - b. Identify incentives for providers
 - c. Simplify Medicaid billing
 - d. Increase residency positions for both primary care and psychiatry
- Establish a community based mobile behavioral health model in order to improve flexibility and reach
- Seniors expressed a very positive mental health status, and several went on to share that they live with their adult children who take very good care of them
- Young adults discussed the impact the COVID-19 pandemic has placed on mental health by increasing anxiety
- One of the teens described a correlation between mental health, substance abuse, and obesity. In discussing mental health, a participant explained their observation of parents taking their stress out on their children creating a cycle of poor mental health

Indicator	Count	Rate

- Educate community about the ability to turn in drugs to the Sherriff's department safely without facing any charges
- Enforce prohibition of sales of tobacco and vaping supplies to minors
- Ban alcohol sales at public events. Ban all tobacco use in public
- Smoking cessation classes needed
- Drug court to divert addicts away from criminal system.
- More education and awareness for prescription drug abuse
- Law enforcement to prevent illegal drugs from entering the County
- More treatment providers, expand continuum of care
- Need affordable treatment
- Invest in prevention
- Stigma reduction
- Focus on healthy family education that includes treatment of mental illness and financial wellbeing courses to ensure that children are not being abused at home and feeding a cycle that leads to unsafe behaviors and addiction

200% FPL	34.7	30.9
Between 138 and 400% FPL	24.2	22.3
<= 400% FPL	27.6	25.3

Figure Adults with Health Insurance, Manatee County and Florida 2014-2018

US Bureau of the Census, American Community Survey, Table S2701.

Manatee County Indigent Care Program Number Covered vs. Eligible, by Fiscal Year

Source: Manatee County Government, Neighborhood Services Department

- In 2019 it was estimated that 28.4 % of Manatee County population lives within .5 mile of park compared with 45.2% for Florida.
- 4.9% of households in Manatee County have no vehicle available

- Collaborate between organizations, programs and systems
 - Coordinate services to reduce duplication of efforts
- Develop affordable housing to support infrastructure
- Expand health access in schools, for example the existing school health clinics
 - Include social workers and mental health providers
- Eliminate transportation as a barrier by establishing a transportation network for safe walking and biking
- Advocate for Medicaid expansion
- Employ “Zero Initiative” approach to reduce homelessness
- Take services to the community members to eliminate barriers
 - Increase access and provide multiple services at once like food distribution, childcare, housing assistance, job placement, etc.
- Affordability of care and insurance is the most cited need
- Cultivate public/private partnerships where private entities are immersed in the community and have established trust and can elevate resources more efficiently
- Community based mobile behavioral health model in order to improve flexibility and reach
- Solutions to enable small businesses to afford to offer medical coverage to employees

5) Crime/Traffic/Safety

County Health Rankings considers violent crime to be an area to explore in Manatee County.

Force	Threat	Opportunity
Crime	<ul style="list-style-type: none"> Domestic abuse, sexual abuse and child marriage. May be more hidden during pandemic Racial inequities in prosecution and sentencing 	<ul style="list-style-type: none"> Task force to look at inequities Training community on domestic violence, human trafficking and child abuse

- Change to DUI Laws (should not be a 2nd Degree Misdemeanor Office w/ a \$120 bond). Stricter laws on 2nd offenses
- Stricter driving regulations and no driving of Seniors who can't hear, can't see, can't turn to see, etc.
- Minority populations often struggle with trusting law enforcement with respect to how their race is perceived and the realities of their immigration status
- Educate community about the ability to turn in drugs to the Sherriff's department safely without facing any charges
- Beautification of higher crime areas

6) Disparities/Discrimination/Population

Force	Threat	Opportunity
Racial, Ethnic and Economic Disparities	<ul style="list-style-type: none"> • Social unrest • Lower graduation rates among minorities leading to lower earning capacity later • Inequity in juvenile justice system • Lower wages for minorities 	<ul style="list-style-type: none"> • Develop and implement community-based and employer education on social and economic disparities and how to improve opportunities for all • Develop county-wide initiative to look for solutions • Identify specific interventions that can address inequities and implement programs that have shown success
Component A: Size of the Problem	Component B: Seriousness of the Problem	Component C: Effectiveness of Intervention

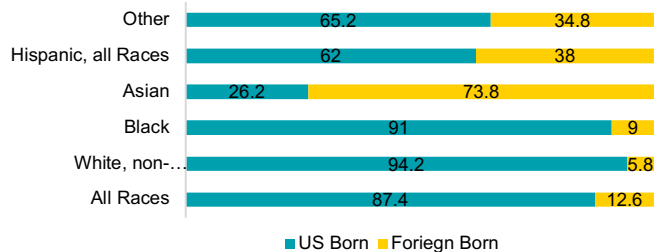

% of Population Affected by Problem

2020 population estimate of **413,253**, **Manatee County** is the 14th most densely populated county in Florida out of 67 counties

Manatee County Population Projections 2020-2040

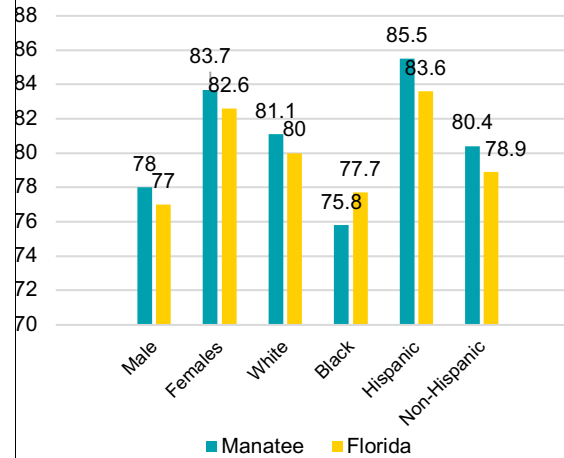

Nativity by Race and Ethnicity Manatee County 5-year estimates by %, 2018

How Serious Problem is Considered?

Life Expectancy Manatee County and Florida, Three-year Rolling Rate 2017-2019

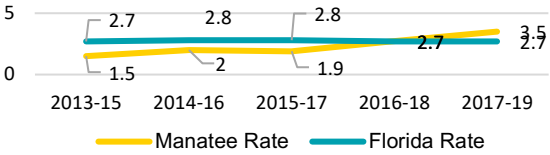

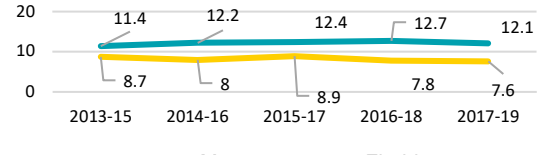

- Blacks have higher rates of death from cancer, diabetes, heart disease and HIV/AIDS than other races or Hispanic/Latinos of any race.
- Whites have higher death rates from CLRD and stroke than other races or Hispanic/Latinos of any race.
- Blacks also have higher number of years of potential life lost than other races, but men overall have the highest number of years of potential life lost.
- Infant mortality rate for black infants is 3.9 points higher in Manatee County than the entire state.

Effectiveness of Available Interventions to Reduce or Eliminate the Problem

- Many disparities are missed or not addressed with current system. Ask those impacted, ask those outside of traditional systems
- Florida Healthy Babies: A statewide collaborative to positively influence social determinants of health and reduce racial disparities in infant mortality
- Disparities existing in specific areas of the county, like Palmetto (34222), Ellenton (34208), and downtown Bradenton (34208) and 34205
- Minority groups need a better structure in place like education and decent wages
- Despite schools assisting in distribution of food, there are many challenges, especially for people of color, to maintain healthy diets
- Need for community dialog around equity issues
- Need to have more diversity at decision-making level
- Address discrimination and disparities with LGBTQIA for example, insurance exclusions in County insurance
- Focus on disparities between Blacks and whites, low-income and high income

- Housing, health care, and jobs with livable wages to address equity needs
- Awareness of cultural differences and to not be judgmental over differences

7) Oral/Dental Health

Component A: Size of the Problem	Component B: Seriousness of the Problem	Component C: Effectiveness of Intervention																																				
<p>% of Population Affected by Problem</p> <p>In 2016 35% of adults in Manatee County did not visit a dentist or dental clinic in the past year</p>	<p>How Serious Problem is Considered?</p> <p>Age-adjusted Oral Cancer Death Rates, 3-year Rolling Rate per 100,000 Population, Manatee County and Florida, 2013-2019</p>  <table border="1"> <caption>Age-adjusted Oral Cancer Death Rates (per 100,000)</caption> <thead> <tr> <th>Year</th> <th>Manatee Rate</th> <th>Florida Rate</th> </tr> </thead> <tbody> <tr> <td>2013-15</td> <td>1.5</td> <td>2.7</td> </tr> <tr> <td>2014-16</td> <td>2</td> <td>2.8</td> </tr> <tr> <td>2015-17</td> <td>1.9</td> <td>2.8</td> </tr> <tr> <td>2016-18</td> <td>2.7</td> <td>2.7</td> </tr> <tr> <td>2017-19</td> <td>3.5</td> <td>2.7</td> </tr> </tbody> </table> <p>Preventable Hospitalizations from Dental Conditions, Rate per 100,000 Population under 65, 3-year Rolling Rate, Manatee County and Florida, 2013-2019</p>  <table border="1"> <caption>Preventable Hospitalizations from Dental Conditions (per 100,000)</caption> <thead> <tr> <th>Year</th> <th>Manatee Rate</th> <th>Florida Rate</th> </tr> </thead> <tbody> <tr> <td>2013-15</td> <td>8.7</td> <td>11.4</td> </tr> <tr> <td>2014-16</td> <td>8</td> <td>12.2</td> </tr> <tr> <td>2015-17</td> <td>8.9</td> <td>12.4</td> </tr> <tr> <td>2016-18</td> <td>7.8</td> <td>12.7</td> </tr> <tr> <td>2017-19</td> <td>7.6</td> <td>12.1</td> </tr> </tbody> </table>	Year	Manatee Rate	Florida Rate	2013-15	1.5	2.7	2014-16	2	2.8	2015-17	1.9	2.8	2016-18	2.7	2.7	2017-19	3.5	2.7	Year	Manatee Rate	Florida Rate	2013-15	8.7	11.4	2014-16	8	12.2	2015-17	8.9	12.4	2016-18	7.8	12.7	2017-19	7.6	12.1	<p>Effectiveness of Available Interventions to Reduce or Eliminate the Problem</p> <ul style="list-style-type: none"> • Oral health is underutilized due to cost, fear and lack of insurance • Improve access to dental care • Access to affordable pediatric dental care • Third year LECOM dental students do a dental clinic for underserved/underinsured children • In focus groups, when asked about oral health, only one of the senior participants said that they regularly see a dentist. Two of the participants share that they wear dentures and as a result, assumed dental care was not necessary • Legislature has taken up the issue of licensing dental therapists in Florida which could expand care options • Turning point medical and dental clinic • The Healthy People 2030 national health target is to increase the percent of persons served by community water systems with optimally

- As a result of COVID-19, unemployment reached 11.8% in May of 2020, 9.5% in July 2020, and 6.3% in August 2020
- COVID-19 has also resulted in the delay of health screenings such as colonoscopies, mammograms and routine blood work due to fears of contracting the virus in a medical setting even for those with insurance
- People with employer -sponsored health insurance may have lost coverage as a result of lay-offs and business closings
- Mask mandate
- Find better ways to educate people about the facts
- Testing needs to be accessible and free
- Resources needed to address mental health impact of COVID
- Need consistent messaging and policies and enforcement of regulations
- Plan for vaccine deployment should be shared
- Expanded public health screenings for infectious diseases (STD's, HIV, COVID, etc.)
- Changing home environment where kids are home due to COVID-19 and have too much time on their hands
- Impact COVID-19 has placed on the pressures of women both at home and in the workplace.
- Impact the COVID-19 pandemic has placed on mental health by increasing anxiety

		<ul style="list-style-type: none"> • COVID-19 created challenges for senior nutrition programs. • COVID-19 has compounded issues of social isolation
--	--	--

9) Youth development

Force	Threat	Opportunity
Youth Development	<ul style="list-style-type: none"> • STI rates increasing • Comprehensive sexual and reproductive health information lacking • Vaping increasing among youth • Services still needed for families that are not fluent English speakers, despite reduction in number of English language learners in school district 	<ul style="list-style-type: none"> • Millage increases to support schools and Children’s services fund • SWAT (Students working against tobacco) • AHEC smoking cessation classes • Access to pre-K and head start in the county • Increasing recreational opportunities

Component A: Size of the Problem	Component B: Seriousness of the Problem	Component C: Effectiveness of Intervention
% of Population Affected by Problem	How Serious Problem is Considered?	Effectiveness of Available Interventions to Reduce or Eliminate the Problem

Comparison Sexually Transmitted Diseases Summary, 3-year Rolling Average, 2017-2019

Chlamydia	4834	425.2	504.2
Bacterial STDs	7074	622.2	716.8

% of students who have ever used smokeless tobacco (chewing tobacco, snuff, or dip) among all middle and high school students

	2014	2016	2018	2020
Manatee	31.7	30.5	32.1	30.9
Florida	30.7	32.8	33.1	32.5

Age Cohort	Cause of Death in Rank Order
Under 1 year	Perinatal Condition, Congenital Malformation, Unintentional Injury
1 to 4 years	Unintentional Injury, Congenital Malformation
5-14 years	Unintentional Injury, Heart Disease, CLRD
15-24 years	Unintentional Injury, Homicide, Suicide

Leading Causes of Death by Age, 2019

Indicator	Count / Percent
Estimated Seriously Emotionally Disturbed Youth Ages 9-17**	3,246
Children in Schools Grades K-12 With Emotional/Behavioral Disability	146
% of students, ages 11-17, who in the past year, did something to purposely hurt themselves without wanting to die***	9.7%
% of students, ages 11-17, who in the past year, felt sad or hopeless for two or more weeks in a row and stopped doing usual activities***	22.2%
% of students, ages 11-17, who did not go to school because they felt they would be unsafe at school or on their way to school in the past 30 days***	4.4%

- Invest in early childhood education/childcare
- Have a variety of educational options including vocational, community college, universities, certificate programs to improve job opportunities for residents
- Health education on wide variety of topics, in K-12
- On-the-job training programs
- Sex education in schools should be comprehensive and not be abstinence only
- Quality childcare as well as education
- challenges teens encounter in accessing care due to hours of operation and transportation
- teens cannot access sexual health services in school-based health clinics
- Healthy Teens Coalition of Manatee

10) Seniors

2018 population estimates for individuals age 65 and older in Manatee County was 102,252 which represents approximately 27% of the population.

Component A: Size of the Problem

% of Population Affected by Problem

Figure Percent Population age 65+ by Race and Ethnicity, Manatee and Florida, 2018

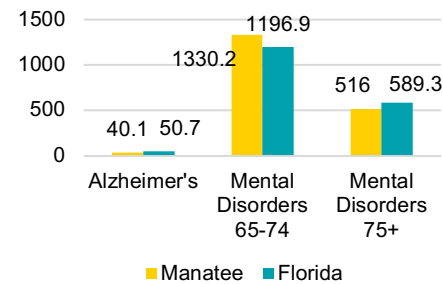

Health and Healthcare Availability, 2016

	% Manatee	% Florida
Reported good, very good or excellent health status 65+	76	75.7
Reported fair or poor health status 65+	24	24.3
Meet aerobic activity recommendations 65+	55.4	45.7
Meet muscle strengthening recommendations 65+	44.2	31
Current smoker 65+	5.4	8.4
Engage in heavy or binge drinking 65+	10.9	8.7
Overweight 65+	48.6	39.7
Obese 65+	23.7	25.8
Have a personal doctor 65+	94.4	93.2
Could not see a doctor due to cost 65+	3.5	5.2
Received a flu shot in past year 65+	57.5	57.4
Ever received a pneumonia vaccine 65+	73.4	65.6
Visited a dentist or dental clinic in past	70.8	68.4

Component B: Seriousness of the Problem

How Serious Problem is Considered?

Hospitalization Rates per 100,000 Population for Mental Disorders and Alzheimer's Disease, Manatee County and Florida, 2018

People Age 65+ Below Poverty

	Manatee	Florida
50% of Poverty	2.9	3.5
75% of Poverty	4.2	6.1
100% of Poverty	7.1	10.3
125% of Poverty	11	15.3
150% of Poverty	15.1	20.6
175% of Poverty	19.9	25.8

Component C: Effectiveness of Intervention

Effectiveness of Available Interventions to Reduce or Eliminate the Problem

- The seniors focus group agreed that diabetes, orthopedics (need for providers), mental health and osteoporosis as their top health concerns
- Establish a senior center, including activities for seniors in addition to support services like housing assistance, healthcare access, support for utilities, etc.
- Seniors on a fixed income experience greater challenges in accessing the care they need
- Transportation is especially difficult for seniors due to mobility issues
- Need for services for lower income seniors
- Better communication about available services
- Support for caregivers
- Promote available services and there are so many seniors living alone or who need professional help. Most seniors cannot afford the assisted living we have here and thus are stuck at home or living off

year 65+			185% of Poverty	21.7	27.8	<p>relatives that are neither trained nor mentally capable of taking care of their elderly loved ones</p> <ul style="list-style-type: none"> • Outreach services for mental health and citizens that need assistance doing everyday activities which become more difficult with aging • More affordable housing (for limited-income seniors) • Improved options for seniors needing long-term care including in-home/community
Permanent tooth removed because of tooth decay or gum disease 65+	69.5	70.2	200% of Poverty	24.4	30.8	
Ever told they have a depressive disorder 65+	13	11.8	300% of Poverty	43.8	49.4	
Poor physical health on 14 days or more of the last 30 days 65+	22.2	16.1	400% of Poverty	58	63.2	
Poor mental health on 14 days or more of the last 30 days 65+	11.8	7.3	500% of Poverty	68.6	73.2	
Limited activities due to physical, mental or emotional problem 65+	33.9	27.1	500% or more of Poverty	31.4	26.8	

With sincere appreciation to the
Manatee Healthcare Alliance
for their continued leadership,
collaboration and engagement to make
Manatee the healthiest county in Florida.
