# **Botulism**, Wound

 $\sim$ 

Paper case report form required

No Merlin extended data

Merlin disease code: 00513 Botulism, Wound

Specimens (food or clinical) must be sent to the Bureau of Public Health Laboratories and must be cleared through the Bureau of Epidemiology (850) 245-4401.

This condition has been identified as a potential bioterrorism agent by the CDC.

# Clinical criteria for case classification

An illness resulting from toxin produced by *Clostridium botulinum* that has infected a wound. Common symptoms are diplopia, blurred vision, and bulbar weakness. Symmetric paralysis may progress rapidly.

# Laboratory criteria for case classification

Either of the following:

- Detection of botulinum toxin in serum
- **Or** isolation of *Clostridium botulinum* from wound.

#### Epidemiological criteria for case classification

A person with both of the following:

- No suspected exposure to contaminated food
- And either of the following:
  - A history of a fresh, contaminated wound during the 2 weeks before onset of symptoms
  - **Or** a history of injection drug use within the 2 weeks before onset of symptoms.

### **Case classification**

#### Confirmed:

A clinically compatible illness in a person with laboratory criteria and epidemiological criteria

#### Probable:

A clinically compatible illness in a person who epidemiological criteria.

### Criteria to distinguish a new case from previous reports

Not applicable.

### Comments

Note that this is one of the few diseases in which an epi-linked case without laboratory confirmation is considered confirmed.

Heptavalent botulinum antitoxin is available through the Bureau of Epidemiology at (850) 245-4401, 24 hours per day.
