**FLORIDA DEPARTMENT OF HEALTH AND ORLANDO HEALTH  
PROVIDE UPDATE ON MERS-CoV IN FLORIDA**

*~Patient discharged from the hospital~*

**Tallahassee** – The first patient in Florida with Middle East Respiratory Syndrome Coronavirus (MERS-CoV) infection has been discharged from the hospital in Orange County. The patient has now tested negative for MERS-CoV and has recovered from the virus. All health care workers and household contacts who had contact with the patient were tested for MERS-CoV and all of those results have come back negative. There is no broad risk of MERS-CoV infection for the general public, and no threat to those traveling to the Orlando area.

The Florida Department of Health continues to work closely with Dr. P. Phillips Hospital and the Centers for Disease Control and Prevention (CDC) to ensure appropriate follow up, and to protect the health of all residents and visitors in Florida. Surveillance, contact investigation and testing continue, following standard public health protocols.

The information line for the public at the Florida Department of Health in Orange County is 407-858-1490. Information from the CDC for the public is available by calling 800-232-4636.
