

Florida Arbovirus Surveillance Week 6: February 3 – 9, 2013

Arbovirus surveillance in Florida includes endemic mosquito-borne viruses West Nile virus (WNV), Eastern equine encephalitis virus (EEEV), St. Louis encephalitis virus (SLEV), and Highlands J virus (HJV) and exotic viruses such as dengue virus (DENV) and California encephalitis group viruses (CEV). Malaria, a non-viral mosquito-borne disease is also included. During the period of February 3-9, 2013 the following arboviral activity was recorded in Florida:

All non-human arbovirus activity for 2012 has been accounted for. From this report on only 2013 data will be captured with the exception of '2012/2013 Human Case Summary'. 2012 data will be summarized in the upcoming Annual Report.

DENV activity: No cases of locally acquired dengue were reported this week. No locally acquired dengue cases have been reported in 2013.

EEEV activity: No human case of EEEV infection was reported this week. No sentinel chickens tested positive for antibodies to EEEV this week. No horse cases of EEEV infection were reported this week. In 2013, positive samples from one human, one equine, and one sentinel chicken have been received from two counties.

WNV activity: No human cases of WNV infection were reported this week. No horse cases of WNV infection were reported this week. One sentinel chicken tested positive this week in Citrus County for antibodies to WNV. In 2013, positive samples from five sentinel chickens have been received from two counties.

SLEV activity: No sentinel chickens tested positive for antibodies to SLEV this week. In 2013, no positive samples have been received.

HJV activity: No sentinel chickens tested positive for antibodies to HJV this week. In 2013, no positive samples have been received.

Advisories/Alerts: Miami-Dade County is currently under mosquito-borne illness alert. Levy County is currently under a mosquito-borne illness advisory. No other counties are currently under mosquito-borne illness advisory or alert.

2012/2013 Human Case Summary*

EEEV Infection Acquired in Florida: One human case of EEEV infection with onset in January was reported in 2013 in a Levy County resident.

Imported Dengue:

2012: One hundred and fifty-four cases of dengue with onset in 2012 have been reported in individuals with travel history to a dengue endemic country in the two weeks prior to onset. Countries of origin were Colombia, Cuba (30), Dominican Republic (19), Ecuador (4), El Salvador (2), Ghana, Guatemala, Guyana (2), Haiti (20), Honduras, India, Jamaica (27), Mexico (2), Nicaragua (2),

Panama, Philippines (2), Portugal, Puerto Rico (27), Sri Lanka, St. Vincent, Suriname, Trinidad (4), Turks & Caicos, Venezuela and Virgin Islands. Counties reporting cases were Brevard (4), Broward (24), Collier, Duval (2), Flagler, Hillsborough (8), Lee (3), Marion, Miami-Dade (59), Okaloosa, Orange (19), Osceola (5), Palm Beach (9), Pasco, Pinellas (4), Polk, Sarasota (2), Seminole (4), St. Johns, St. Lucie, and Volusia (3). Twelve of the cases were reported in non-Florida residents.

2013: Ten cases of dengue with onset in 2013 have been reported in individuals with travel history to a dengue endemic country in the two weeks prior to onset. Countries of origin were: The Caribbean, Columbia, Dominican Republic (2), Jamaica, Philippines, Puerto Rico (3), and Saint Martin. Counties reporting cases were: Broward, Clay, Lee, Miami-Dade (3), Orange (3), and Palm Beach. Two of the cases were reported in non-Florida residents.

In 2012, Seventy-seven of the one hundred and fifty-four cases of dengue reported in Florida have been serotyped by PCR. In 2013, five of the ten cases of dengue reported in Florida have been serotyped by PCR. Additional serotyping and strain typing are being conducted.

	# of cases per serotype - 2012	# of cases per serotype - 2013
DENV-1	46	2
DENV-2	6	0
DENV-3	1	1
DENV-4	24	2
	77	5

Imported Malaria - 2012: Sixty-five imported cases of malaria with onset in 2012 have been reported. Countries of origin were: Afghanistan (2), Cameroon, Central African Republic, Colombia, Congo, Costa Rica, Ethiopia (2), Ghana (6), Guyana (4), Haiti (11), Honduras (3), India (2), Ivory Coast (3), Kenya, Liberia (3), Nigeria (10), Pakistan, Peru, Sierra Leone (2), South Africa, Sub Saharan Africa, Sudan, Togo, Uganda, Zambia, and multiple or unspecified African countries (3). Counties reporting cases were: Alachua (2), Brevard, Broward (9), Charlotte, Duval (8), Escambia, Hillsborough (7), Lake (2), Leon, Manatee, Marion, Martin, Miami-Dade (9), Orange (6), Osceola (2), Palm Beach (6), Pinellas (3), Polk, Seminole, and Volusia (2). Seven of the cases were reported in non-Florida residents.

Imported Malaria - 2013: Five cases of malaria with onset in 2013 have been reported. Countries of origin were: Guinea, Guyana, Haiti (2), and Sierra Leone. County reporting case was: Hillsborough and Miami-Dade (4).

Veterinary Cases

No horses were reported as testing positive this week.

Sentinel Chickens

The table below is for the reporting of confirmatory laboratory results from this week. Some of the samples were collected at earlier dates. The date of collection is recorded for samples collected on that day along with the total number of positives and the corresponding seroconversion rate for the week the sample was collected.

One sentinel chicken tested positive this week in Citrus County for antibodies to WNV.

County	Collection Date	Seroconversion Rates (%)				Collection Week	County Totals
		SLEV	WNV	EEEV	HJV		YTD
Citrus	1/28/2013		1.41			1 WNV	2 WNV

Sentinel Seroconversions to EEEV in Florida, 2012-2013

Sentinel Seroconversions to WNV in Florida, 2012-2013

Dead Birds

The Fish and Wildlife Conservation Commission (FWC) collects reports of dead birds, which can be an indication of arbovirus circulation in an area. This week, 8 reports representing 12 dead birds, including 3 raptors and 1 dove were received from 8 counties.

In 2013, 35 reports representing a total of 40 dead birds (0 crows, 0 jays, 10 raptors, 2 dove) were received from 19 of Florida's 67 counties. Please note that FWC collects reports of birds that have died from a variety of causes, not only arboviruses. Dead birds should be reported to www.myfwc.com/bird/

2013

County	Total Dead Birds	Crows	Jays	Raptors	Dove
Brevard	2	0	0	0	0
Broward	1	0	0	0	0
Collier	1	0	0	1	0
Hillsborough	1	0	0	0	1
Orange	2	0	0	0	0
Pasco	2	0	0	2	0
Putnam	2	0	0	0	0
St. Johns	1	0	0	0	0

Maps

2013 Arbovirus Activity by County

County	Arbovirus Activity
Citrus	WNV: 2 sentinels (1/21, 1/28)
Levy	EEEV : 1 human (January) ; 1 horse (1/7)
Walton	EEEV : 1 sentinel (1/7) WNV : 3 sentinels (1/7)

*Case tallies included in the weekly Florida arbovirus surveillance report include confirmed and probable cases for EEE, WNV infection, SLE, dengue, and malaria. In addition, dengue and malaria tallies may also include suspect cases. Case definitions being used in Florida are consistent with national criteria provided by the Council of State and Territorial Epidemiologists (CSTE) and may be viewed at:
http://www.doh.state.fl.us/Disease_ctrl/epi/surv/CaseDefinitions/2012CaseDef_FINAL.pdf
 Case tallies reported by CDC do not include suspect cases and cases are reported by patient state of residence rather than where the exposure occurred.

Data is provided by county health departments, Department of Health Laboratories, Department of Agriculture and Consumer Services, mosquito control agencies, Florida Fish and Wildlife Conservation Commission, medical providers and veterinarians. Equine cases are provided by the Department of Agriculture and Consumer Services.
