Revised ranking system from previous years to rank on rate of TB cases per county rather than solely on number of cases per county. Please note that counties with identical rates were ranked based on number of cases. Counties with N/A listed as their county ranking score were unable to be ranked due to lack of cases for 2016.

Source: TB Control Section as per 03-17-2017

\*2016 population data acquired from Florida's Community Health Assessment Resource Tool Set (CHARTS) is provisional as of 03-17-2017.

\*The number of TB cases shown for 2016 is final, but the 2016 rate is provisional and will become final when 2016 population data are finalized.
