

# Hepatitis A Surveillance

January 1, 2018–November 7, 2020

From January 1, 2018 through November 7, 2020, 4,862 hepatitis A cases were reported.

The number of reported hepatitis A cases more than doubled from 2016 to 2017 and nearly doubled again in 2018 after remaining relatively stable in previous years. Case counts in 2019 saw an over 500% increase from 2018.

Counties that reported a hepatitis A case last week are outlined in black. Since January 1, 2018, 98% of cases have likely been acquired locally in Florida.

The graph below represents hepatitis A cases by week from December 29, 2019 to November 7, 2020. There were 8 hepatitis A cases reported last week.

The graph below represents hepatitis A cases by month from January 1, 2018 to November 7, 2020. Case counts in weeks prior to the public health emergency declaration are shown in light red, while case counts in weeks since are shown in red.

# Hepatitis A Vaccination Surveillance

January 1, 2019–November 7, 2020

From November 1, 2020 to November 7, 2020, county health departments (CHDs) administered 197 (23%) of the total 870 first doses of hepatitis A vaccine administered to adults age 18 years and older, as recorded in Florida SHOTS.

In 2019 CHDs have administered 163,201 vaccinations and non-CHDs have administered 224,044 vaccinations for a total of 387,245 vaccinations. Vaccinations given before the public health emergency declaration are shown in lighter colors than those given after. Since declaration of the PHE, CHDs have administered 97,565 and non-CHDs have administered 131,486 vaccinations.
