

Jeb Bush  
Governor

John O. Agwunobi, M.D., M.B.A., M.P.H.  
Secretary

**INTEROFFICE MEMORANDUM**

**INFORMATION**  
HSES 05-007

**DATE:** April 4, 2005

**TO:** Environmental Health and Engineering Directors

**THROUGH:** Lisa Conti, D.V.M., M.P.H., Dipl. ACVPM/CEHP, Director  
Division of Environmental Health

**FROM:** Gerald R. Briggs, Chief  
Bureau of Onsite Sewage Programs

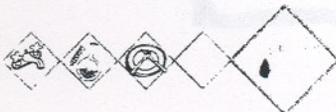

**SUBJECT:** Withdrawal of Consolidated Utilities Stop Sale for "Micro-Blaze"

**INFORMATION ONLY**

The department has executed a settlement agreement with Consolidated Utilities and agreed to withdraw the "Stop Sale" notice issued on January 8, 2002 regarding the product Micro-Blaze. A copy of the Settlement Agreement is attached for your information. Consolidated Utilities has agreed to limit the application rate of the product to 2 ounces per 1000 gallon septic tank. By limiting the rate in this manner, the product will comply with the state's additive laws. Please note that Micro-Blaze Emergency Spill Control and Bio-Con are the same products.

Questions on this memorandum should be directed to Sonia Cruz at (407) 317-7325 or Suncom 344-7325.

# Bio-Con

## MAYPORT FORMULA

Bio-Con is a non-toxic formulation of biological activators and selected non-pathogenic microbes, which digest fats, oils and grease, protein, starches and odors caused by organic waste. When applied to a hydrocarbon spill, it will disperse the spill on contact, inert the spill so that it is non-flammable, leave no slippery residue when washed down and will bioremediate the spill in place.

### USES:

1. For on-site sewage systems (septic tanks) apply 2 ounces only, per 1000 gallon septic tank.
2. Clean-up any hydrocarbon-based spill on highways, railroads, shop floors, barges or pipelines.
3. Clean-up heavy equipment, motor blocks, oil/fuel spills on driveways and parking lots.

### Directions:

1. Apply in a 3% to 6% solution with an eductor for total surface coverage of spill.
2. Can be pre-mixed in a 3% to 6% solution in booster tanks for long-term ready-to-use setup. Microbes will not activate until exposed to contamination. Product is non-corrosive.
3. Use 1 qt. Of Bio-Con with 2 gallons of water in a 2 1/2 gallon water-type extinguisher with an aspirating nozzle for small hydrocarbon spills. Thoroughly apply to spill. Covers 100 sq. ft.

**CAUTION:** Keep out of reach of children. Do not take internally.  
Avoid contact with eyes. Wash thoroughly.
