

December 9, 2002

Mr. Jack Serafin  
Lakepointe Environmental Group, Inc.  
5001 Southwest Orchid Bay Drive  
Palm City, FL 34990

Dear Mr. Serafin:

This letter is to acknowledge receipt of the additional information concerning the product "**BYO-GON, PX 109**" for statewide use in Florida. No product sold in the state for use in onsite sewage treatment and disposal systems may contain any substance in concentrations or amounts that would interfere with or prevent the successful operation of such system, or that would cause discharges from such systems to violate applicable water quality standards, section 381.0065(4)(m), Florida Statutes.

The staff has reviewed the information provided in the 96-hr LC<sub>50</sub> toxicity test results, the application rate, and new laboratory results on volatile organic compounds for the product. The department has determined that the product, **BYO-GON, PX 109**, to be in compliance with s. 381.0065(4)(m), F.S. and has no objection to the use of the product in accordance with the manufacturer's recommended application rate of one-tablespoon (14.8 ml) during first week followed by a weekly dosage of one-teaspoon (5 ml). Please be advised that all rules pertaining to the use of the products shall be observed and that there shall be no advertising of the product as state approved.

Be advised that the department is not a testing agency and that this determination reflects only a review of the information submitted by you for compliance with Florida Statutes and Florida Administrative Code. The product evaluation does not investigate the validity of performance claims by manufacturers. For this reason, departmental acceptance must not be interpreted as certifying effectiveness, endorsing or recommending use of an additive. The Florida Department of Health also does not assume liability for any promise, guarantee or expectation from purchasing or using an additive. The department reserves the right to withdraw acceptance if product formulation or ingredients are modified after product evaluation by the department or subsequently found not to be in compliance with rule.

This letter of product compliance is limited to Department of Health jurisdictional circumstances as defined in Chapter 64E-6, Florida Administrative Code and Chapter 381.0065, Florida Statutes.

If we may be of further assistance or should you have any additional questions regarding this letter, please call Dr. Sonia Cruz at (407) 317-7325.

Sincerely,

Gerald Briggs, Chief

**APPLICATIONS, DOSAGES,  
STORAGE AND HANDLING:**

BYO-GON sold in these small containers are primarily for Recreational Vehicles and Home Septic Systems. The recommended dose for a recreational vehicle is two capsules, or about ONE-HALF OUNCE per forty gallons, to be used in sanitary and gray water tanks. Other additives are not needed nor recommended. For a home septic system use ONE TABLESPOON week one, followed by ONE TEASPOON every week thereafter, simply flushed down a toilet. For odor elimination, use one or two ounce per five gallons of water.

BYO-GON should be stored between 50 and 90 degrees Fahrenheit. The container lid must be tightly replaced after dispensing and product should never be poured back. Shake container occasionally.

# BYO - GON

PX - 109

U.S. Patent No. 4,666,806

A CONCENTRATED, 100% ORGANIC, BIODEGRADABLE PRODUCT  
USED TO STIMULATE THE METABOLISM OF BACTERIA

SAFE, NON-TOXIC, NON-FLAMMABLE, NON-CORROSIVE

Distributed by: LAKEPOINTE ENVIRONMENTAL  
GROUP, INC.

**DESCRIPTION AND FUNCTION  
OF THE PRODUCT**

BYO-GON is a non-toxic, non-flammable, non-corrosive, 100% organic, biodegradable safe product. No mask, gloves, or special handling is needed. BYO-GON is a special extract of selected plant materials formulated by a patented process. It's purpose is to release a newly discovered substance. This product reinvigorates existing bacteria which may be functioning sluggishly due to oxidants, poisons, extremes of temperature or age. It is packaged in a neutral, nonactive state and becomes activated by mixing with water. No additional bacteria or enzymes are needed for its effective use.

BYO-GON eliminates the build up of grease, significantly reduces odor, breaks down organic wastes, reduces bacteria count, settleable solids and BOD.
