Jeb Bush  
Governor

John O. Agwunobi, M.D., M.B.A.  
Secretary

March 18, 2003

Mr. Donald Stewart  
Unique Manufacturing and Marketing, Inc.  
5778 Lamar St.  
Arvada, CO. 80002

Dear Mr. Stewart:

This letter is to acknowledge receipt of the information concerning the products "**Hungri-Bac and Unique Septic System Digester**" for statewide use in Florida. No product sold in the state for use in onsite sewage treatment and disposal systems may contain any substance in concentrations or amounts that would interfere with or prevent the successful operation of such system, or that would cause discharges from such systems to violate applicable water quality standards, section 381.0065(4)(m), Florida Statutes.

The staff has reviewed the information provided in the MSDS, 96-hr LC<sub>50</sub> toxicity test results, and laboratory results on volatile organic compounds for the products. The department has determined that the products, "**Hungri-Bac and Unique Septic System Digester**", are in compliance with s. 381.0065(4)(m), F.S. and has no objection to the use of the products in accordance with manufacturer's specifications. Please be advised that all rules pertaining to the use of the products shall be observed and that there shall be no advertising of the products as state approved.

Be advised that the department is not a testing agency and that this determination reflects only a review of the information submitted by you for compliance with Florida Statutes and Florida Administrative Code. The product evaluation does not investigate the validity of performance claims by manufacturers. For this reason, departmental acceptance must not be interpreted as certifying effectiveness, endorsing or recommending use of an additive. The Florida Department of Health also does not assume liability for any promise, guarantee or expectation from purchasing or using an additive. The department reserves the right to withdraw acceptance if product formulation or ingredients are modified after product evaluation by the department or subsequently found not to be in compliance with rule.

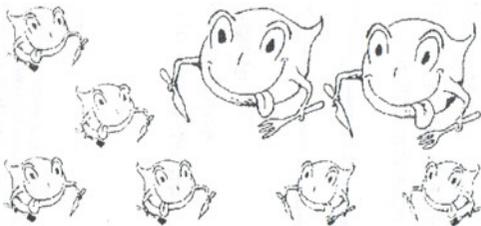

This letter of product compliance is limited to Department of Health jurisdictional circumstances as defined in Chapter 64E-6, Florida Administrative Code and Chapter 381.0065, Florida Statutes.

If we may be of further assistance or should you have any additional questions regarding this letter, please call Dr. Sonia Cruz at (407) 317-7325.

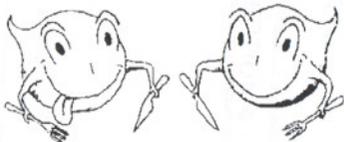

Sincerely,

  
Gerald Briggs, Chief  
Bureau of Onsite Sewage Programs

# HUNGRI-BAC

HUNGRI-BAC

## SEPTIC SYSTEM BACTERIA Professional Strength

### CONCENTRATED

Approximately 65 Billion  
Hungry Bacteria Per Quart.

Starved for Your Grease and Garbage.

for use in:

SEPTIC TANKS

SEPTIC FIELDS

CESS POOLS

LAGOONS

GREASE TRAPS

WILL NOT FREEZE

CONTENTS: ONE QUART (32 fl. oz.)

## HUNGRI-BAC

### JUMP STARTS THE NATURAL PROCESS.

Working with nature to eliminate the organic waste in the septic system and septic field. Organic waste consists of grease, garbage, toilet paper and organic material that you may put into your septic system. When you use too many antibacterial soaps, drain openers, laundry soaps or bleaches, you may shock (slow down) the bacterial action in your septic system. When this happens you need to add HUNGRI-BAC to renew your septic system. When the septic system is pumped out, you should add HUNGRI-BAC to restart your septic system.

Often when you have extra guests in your home, resulting in extra showers, laundry and dishwashings. The septic tank might overflow into the septic field taking grease and paper with it. This clogs up the septic field and the ground will not absorb the water and the field might overflow. HUNGRI-BAC is loaded with additional enzymes that eat the grease and paper, making the septic field work like new. We put approximately 65 BILLION bacteria into each quart bottle of HUNGRI-BAC. This is up to 100 times more bacteria than most popular brands. Our bacteria work in hours and days, not in weeks and months.

Hungri-Bac has bacteria that produce 7 strains of enzymes:

**Protease** enzyme catabolizes ("breaks down") protein

**Amylase** enzyme breaks down starch and carbohydrate

**Lipase** enzyme breaks down fat and grease

**Xylanase** enzyme breaks down plant material

**Cellulase** enzyme breaks down cellulose

**Esterase** enzyme breaks down fat

**Urease** enzyme breaks down urea

Plus additional enzymes to jump start the bacteria. Our bacteria are Non-Pathogenic (not harmful to man or animal).

**CAUTION:** Wash hands thoroughly after each use. Do not allow contact with eyes, open cuts or sores. KEEP OUT OF REACH OF CHILDREN.

### DIRECTIONS:

#### SEPTIC TANKS:

**INITIAL TREATMENT:** For new systems use 4 oz. for each 1500 gallons of capacity. Mix into 2 gallons of warm water and flush through toilet furthest from tank. **RE-TREATMENT:** Each month use 2 oz. per 1000 gallons of capacity. Apply as above.

#### SEPTIC FIELDS:

Treat with 1 quart (32 oz.) Hungri-Bac for small fields, 2 quarts for large fields. Mix with 1 gallon warm water, pour directly into septic tank if possible, or into drain nearest tank and run warm water for 5 to 10 minutes letting septic tank overflow into septic field.

#### CESS POOLS:

Treat same as septic tanks.

#### LAGOONS:

10,000 to 100,000 Gallons 1 quart to begin and 1 quart each week.

#### GREASE TRAPS:

If your grease trap is up to 500 gallons you should put 4 ounces of Hungri-Bac into 1 quart of warm water and pour into the drain nearest the grease trap. Repeat twice a week. The best way to apply the product into the grease trap is through a metering system. To do this you should put 2 quarts of Hungri-Bac into a 5 gallon bucket. Fill the bucket with warm water and mix well. This will last 1 month if you dispense 2 ounces every 2 hours.
