Re: Pro-Pump/HC

Dear Mr. Dent:

In response to your letter of July 15, 2004 indicating that the product " Pro-Pump HC " has the same bio-formulation as the product "Microbe-Lift/Pro-Pump", we have no objection to the use of the products as equivalents and "Pro-Pump/HC" is allowed for continued use in onsite sewage treatment and disposal systems in Florida under the same recommended usage concentrations as for the products "Microbe-Lift/Pro-Pump". Please be advised that the original evaluation of the products " Microbe-Lift/Pro-Pump" was based on a recommended usage concentration of 5 ppm as indicated in the original toxicity report submitted with date 4-16-93. We also acknowledge your correction on the cultures consortium that was submitted in error and amend the file information of the microbial content for "Pro-Pump/HC" as the same information on file for Microbe-Lift (June 26, 2000). Under these conditions the products are in compliance with applicable water quality standards as referenced in 64E-6.0151, F.A.C.

This determination is limited to Department of Health jurisdictional circumstances as defined in Chapter 64E-6, F.A.C. and Chapter 381.0065, F. S. If we may be of further assistance or should you have any additional questions regarding this letter, please call Dr. Sonia Cruz at (407) 317-7325.

Sincerely,

  
Gerald Briggs, Chief  
Bureau of Onsite Sewage Programs

Division of Environmental Health, Bureau of Onsite Sewage Programs  
4052 Bald Cypress Way, Bin #A08, Tallahassee, Florida 32399-1713
