

Florida Onsite Sewage Nitrogen Reduction Strategies Project

FDOH Contract CORCL

Objective:

To develop nitrogen reduction strategies for onsite sewage treatment and disposal systems (OSTDS) in Florida

Study Areas:

- A* Development and pilot testing of passive nitrogen reduction systems (PNRS)
- B* Field testing of full-scale nitrogen reduction systems to determine performance and cost
- C* Assessment of the fate and transport of nitrogen from OSTDS in soil and groundwater
- D* Development of decision support tools for OSTDS planning and nitrogen reduction
