1

Objective

To give a clear understanding of the regulations governing the onsite sewage treatment and disposal program in Florida. In addition, to give an overview of certain regulations, policies and agreements with other State agencies.

2

The 2009 Florida Statutes

Title 381 Chapter 381
PUBLIC HEALTH: GENERAL PROVISIONS

381.0065 Onsite sewage treatment and disposal systems; regulation...

LEGISLATIVE INTENT—It is the intent of the Legislature that where a publicly owned or investor-owned sewerage system is not available, the department shall issue permits for the construction, installation, modification, abandonment, or repair of onsite sewage treatment and disposal systems under conditions as described in this section and rules adopted under this section. It is further the intent of the Legislature that the installation and use of onsite sewage treatment and disposal systems not adversely affect the public health or significantly degrade the ground-water or surface water.

DEFINITIONS—As used in ss. 381.0065-381.0067, the term:

(a) "available," as applied to a publicly owned or investor-owned sewerage system, means that the publicly owned or investor-owned sewerage system is capable of being connected to the plumbing of an establishment or residence. It is under a Department of Environmental Protection moratorium, and has adequate permitted capacity to accept the sewage to be generated by the establishment or residence; and:

1. For a residential subdivision lot, a single-family residence, or an establishment, any of which has an estimated sewage flow of 1,000 gallons per day or less, a gravity sewer line to maintain gravity flow from the property's drain to the sewer line, or a low pressure or vacuum sewage collection line in those areas approved for low pressure or vacuum sewage collection, exists in a public easement or right-of-way that abuts the property line of the lot, residence, or establishment.
2. For an establishment with an estimated sewage flow exceeding 1,000 gallons per day, a sewer line, force main, or lift station exists in a public easement or right-of-way that abuts the property of the establishment or is within 50 feet of the property line of the establishment as accessed via existing rights-of-way or easements.
3. For proposed residential subdivisions with more than 50 lots, for proposed commercial subdivisions with more than 5 lots, and for areas zoned or used for an industrial or manufacturing

VI. Chapter K: ONSITE SEWAGE TREATMENT AND DISPOSAL

A. Objective

The objective of the onsite sewage treatment and disposal program is to provide for safe and sanitary treatment and disposal of domestic and commercial sewage waste and sewage in areas not served by public sewerage systems. The goal of the program is to protect public health, by the elimination of the potential for the spread of infectious disease from improperly built or maintained onsite sewage treatment and disposal systems, and the protection of ground and surface water from onsite sewage treatment and disposal systems discharge.

B. Narrative Description

1. Large areas of the state are not served by public centralized sewer systems, and depend on onsite sewage treatment and disposal systems (OSTDS). If properly designed, installed, and managed, OSTDS are an effective option for protecting the public health and the environment. Included in the definition of OSTDS in s. 381.0065(2)(x), FS, are systems "that contain a standard subsurface, fitted, or mound drainfield system; an aerobic treatment unit; a graywater system tank; a laundry wastewater system tank; a septic tank; a grease interceptor; a pump tank; a solids or effluent pump; a waterless, incinerating, or organic waste-composting toilet; or a sanitary privy that is installed or proposed to be installed beyond the building sewer".
2. Where sewer is not available based on the definition in s. 381.0065(2), FS, the department has jurisdiction for domestic sewage flows of 10,000 gallons per day or less, and commercial sewage flows of 5,000 gallons per day or less. An Interagency Agreement, between the department and the DEP, delineates responsibilities and coordination between the departments regarding the regulation of OSTDS. If flows are not combined into a single onsite system, a facility may have up to 10,000 gallons per day domestic flow, and 5,000 gallons per day commercial flow. A copy of the agreement is available on the onsite sewage programs web page: www.MyFloridaEH.com/onsite, and in Appendix K of this manual.
3. The County Health Departments (CHDs) conduct the operational aspects of this program. Services provided by the CHDs include operation plan review, site evaluation, system construction permitting, inspection, consultation, enforcement, and other activities which are intended to ensure that OSTDS are properly designed, installed, and managed. CHDs monitor the operation and maintenance of OSTDS by investigating complaints and conducting sanitary surveys where requested or warranted. CHDs also issue operating permits for the purpose of managing onsite sewage systems, to include systems in industrial manufacturing areas or equivalent use, systems servicing facilities producing commercial sewage waste, and facilities that are served by systems that utilize aerobic treatment units or performance-based treatment systems. The OSTDS industry is regulated by the inspection and permitting of onsite sewage treatment and disposal systems, septage disposal services, stabilization facilities, land

Suwannee/Aucilla Rivers

381.0065(4)(t), FS

- Floodways of Suwannee/Aucilla River
- Drainfield shall not be subject to flooding
- Based on 10 yr. flood elevation
 - Exceptions: if subdivided prior to 1/17/1990 (all must be met)
 - Lot minimum 1/2 acre
 - Bottom of DF at least 36" above 2-yr flood elevation
 - Installation of either: a waterless, incinerating, or composting toilet/gray-water system, ATU and DF or N reducing system approved by State Health Office
- Fill and mounding – not permitted if in regulatory floodway of the Suwannee or Aucilla River

Roof Run-off

- Mostly known as “guttering”
- Guttering shall not be required if system is not within 5 feet from the drip line of a residence (tank not included)
- The intent is to protect the drainfield, shoulders and slopes from the drainage impact of buildings
- Downspouts shall be directed away from drainfield
- 381.0065(4)(s)

“In the siting of onsite sewage treatment and disposal systems, including drainfields, shoulders, and slopes, guttering shall not be required on single-family residential dwelling units for systems located greater than 5 feet from the roof drip line of the house. If guttering is used on residential dwelling units, the downspouts shall be directed away from the drainfield”. Section 381.0065(4)(s), Florida Statutes

11

Rights to Hearings

- Provide “Notice of Rights” with construction permit
- Substantial interest is affected
- Right to Petition for Administrative Hearing pursuant to 120.569 and 120.57
- Send to Agency Clerk in Tallahassee
- Mediation is not available
- See Handout “Notice of Rights”

NOTICE OF RIGHTS

A party whose substantial interest is affected by this order may petition for an administrative hearing pursuant to sections 120.569 and 120.57, Florida Statutes. Such proceedings are governed by Rule 28-106, Florida Administrative Code. A petition for administrative hearing must be in writing and must be received by the Agency Clerk for the Department, within twenty-one (21) days from the receipt of this order. The address of the Agency Clerk is 4052 Bald Cypress Way, BIN # A02, Tallahassee, Florida 32399-1703. The Agency Clerk's facsimile number is 850-410-1448.

Mediation is not available as an alternative remedy.

Your failure to submit a petition for hearing within 21 days from receipt of this order will constitute a waiver of your right to an administrative hearing, and this order shall become a “final order”.

Should this order become a final order, a party who is adversely affected by it is entitled to judicial review pursuant to Section 120.68, Florida Statutes. Review proceedings are governed by the Florida Rules of Appellate Procedure. Such proceedings may be commenced by filing one copy of a Notice of Appeal with the Agency Clerk of the Department of Health and a second copy, accompanied by the filing fees required by law, with the Court of Appeal in the appropriate District Court. The notice must be filed within 30 days of rendition of the final order.

12

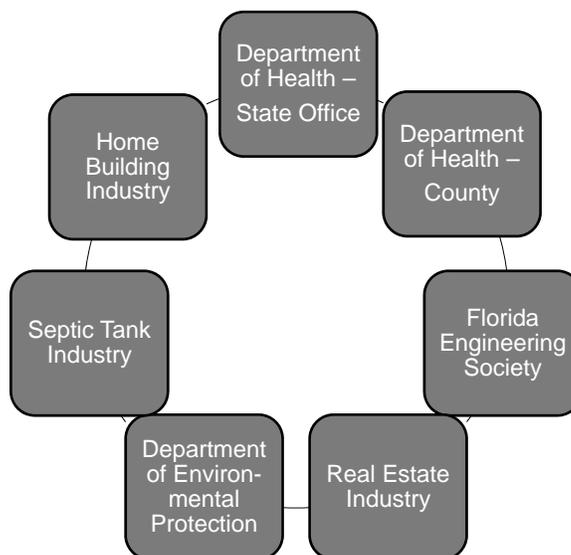

Variations

- Application of Construction Permit is denied when provisions of 64E-6, F.A.C. and Section 381.0065, FS can not be met.
- Right to Apply for a Variance
- Granted for Hardship Cases (not caused by applicant)
- Variance Application Submitted to CHD and reviewed (Form DH4057)
- Variance sent to SHO to Review and Schedule for Meeting
- Schedule for Variance Meeting (monthly)
- Variance Review and Advisory Committee
- Variance Approved, Denied or Tabled
- Construction Permit Issued based on Variance
- 381.0065(4)(h), FS

RE: Application Denial and Notice of Right to Administrative Proceedings.
Application Document No: AP1095365
1708 Aurora Rd, Melbourne, FL
Lot: Block A Subdivision: Carlton Steward Gardens, Replat Block A
Parcel ID: 27-37-17-30-0000A.0-0004.00

Dear Monica Gomez:

This will acknowledge receipt of an application and plans for an onsite sewage treatment and disposal system construction permit dated March 8, 2013 for a permit to maintain use of an existing septic system located on the above referenced property.

You are hereby notified that your application is denied because the proposal described does not meet the requirements of section 381.0065 Florida Statutes, or Chapter 64E-6 Florida Administrative Code. Specifically the proposal has the following violations.

Code Citation	Letter Detail	Code Citation Description
Chapter 64E-6.001(4)d FAC	Proposing to increase the sewage flow into an existing septic system while a change in sewage characteristics has been made and the system is not in compliance with current rule.	Any system which is used to treat and dispose of commercial wastewater shall be brought into full compliance with the provisions and requirements of current rules when any change in sewage flow or characteristics is made.
Chapter 64E-6.001(4)g FAC	Proposing to exceed the design capacity of an existing system without any system upgrade.	Where the current structure exceeds the design capacity of the existing system, the system shall not be allowed for use with any addition.
64E-6.005(2) F.A.C.	Proposing to maintain use of an existing septic system that is within 5' of a foundation.	Systems shall not be located under building or within 5 feet of building foundations,....

March 18, 2013

As an application that has been denied a permit, you have the right to request a variance or hearing to appeal the department's action. Requests for a variance or hearing must be made to this office in writing no later than 21 days from the receipt of this letter. Mediation pursuant to S.120.573, Florida Statutes, is not available to resolve this dispute.

Your lot may qualify for a performance based treatment system under Part IV, Chapter 64E-6, Florida Administrative Code. You should consult with a professional engineer registered in Florida for further information on performance based systems.

If you have any questions on this matter, please call our office at 321-633-2100 extension 52312.

Sincerely,

Sean Flynn
Environmental Specialist III

NOTICE TO POTENTIAL VARIANCE APPLICANTS

If pursuing a variance application, please note that the following information is taken from the section of Florida Statutes dealing with variance applications for onsite sewage treatment and disposal systems. To find the Florida Statutes on the internet, please go to <http://www.leg.state.fl.us/Statutes/index.cfm>. Scroll down and click on "Title XXXIX." Find and click on "Chapter 381." Find and click on "381.0065." The citation to look for is Chapter 381.0065(4)(h)1., Florida Statutes.

The department may grant variances in hardship cases which may be less restrictive than the provisions specified in this section. A variance may not be granted under this section until the department is satisfied that:

- a. The hardship was not caused intentionally by the action of the applicant;
- b. No reasonable alternative, taking into consideration factors such as cost, exists for the treatment of the sewage; and
- c. The discharge from the onsite sewage treatment and disposal system will not adversely affect the health of the applicant or the public or significantly degrade the groundwater or surface waters.

Where soil conditions, water table elevation, and setback provisions are determined by the department to be satisfactory, special consideration must be given to those lots platted before 1972.

While the final authority to grant or deny variances rests solely with the Department of Health, variance applications are reviewed by a State Variance Review and Advisory Committee. The committee meets once a month in a predetermined location in Florida. You are invited to attend, at your own expense, or send someone to represent you. The committee will evaluate your request during the meeting, and will make a recommendation on the disposition of your application to the department. Please note there are specific requirements and deadlines for variance applications. Please call your local county health department representative for information on how to file for a variance request.

STANDARDS FOR ONSITE SEWAGE TREATMENT AND DISPOSAL SYSTEMS
Authority: Chapter 201, Florida Statutes
Chapter 64E-6, Florida Administrative Code

Variance Application Number
Onsite Sewage Office Use Only

Follow the instructions on the back of this form for assembling your application for variance. Eight (8) copies of this form and supporting documentation must be submitted with the required fee to your local county health department. Your application must be received by the local county health department and the complete application received by the Bureau of Onsite Sewage Treatment in Tallahassee no later than the 15th of the month to be placed on the agenda for the next monthly meeting of the variance review and advisory committee. If the 15th falls on a week-end or legal holiday, the deadline for receipt will be the next regular working day. If the variance request involves setbacks from wells or surface waters, the separation of the drainfield from the estimated wet season high water table, or the authorized sewage flow of the property, the county health department shall post a sign on the property giving notice of the application for variance.

VARIANCE REQUEST INFORMATION
A variance may not be granted under section 381.0065, F.S. until the department is satisfied the following conditions have been met. Address each item explaining how your variance request satisfies the statutory conditions for a variance. Attach a separate sheet if necessary.
1. Please explain how your variance request satisfies the statutory requirement that the hardship was not caused intentionally by the action of the applicant. Applicant is not the owner of said building and current septic system has been tested and came back clear with no problems. Previous tenant had a bad odor with hair sink and pipe was another hair style shop and no problem with getting clearance from health dept. The building is older and was installed with septic accordingly.
2. Please explain how your variance request satisfies the statutory requirement that no reasonable alternative, taking into consideration factors such as cost, exists for the treatment of the sewage. The current septic system has been tested by former septic and checked with no problems. To replace the current system would be over \$2000 a cost the owner would have to pay to replace a system that is functioning fine is a costly expense on a struggling business with a lot of overhead.
3. Please explain how your variance request satisfies the statutory requirement that the discharge from the onsite sewage treatment and disposal system will not adversely affect the health of the applicant or the public or significantly degrade the groundwater or surface waters. The current consumption for five units 1704 and 1708 including a color unit is low and has been for several years.

I attest the above information is true. I acknowledge that in the submission of this variance request, I hereby authorize department employees to enter onto my property to conduct inspection activities and to possess any portion of this variance request.

Chapter 64E-6.001(4) FAC
Chapter 64E-6.001(4)g FAC
Chapter 64E-6.009(2) F.A.C.
REASON REQUIREMENTS IN THE SECTION CANNOT BE MET
"Any system which is used to treat and dispose of commercial wastewater shall be brought into full compliance with the provisions and requirements of current code with any change in sewage flow or characteristics. The applicant is proposing to increase the sewage flow into an existing septic system with a change in sewage characteristics has been made and the system is not in compliance with current code."
"Where the current flowrate exceeds the design capacity of the existing system, the system shall not be allowed for use with any addition. The applicant is proposing to exceed the design capacity of an existing system without any system upgrade."
"Systems shall not be located under buildings or within 5 feet of building foundation." The applicant is proposing to maintain use of the existing septic system although the existing septic tank is 18' from a building foundation (a 7.5% deviation from minimum code requirements).

SITE INFORMATION (Attach a completed site evaluation form)
Connection distance from property to sanitary sewer is >1500 feet/wires.
Lots in the vicinity of the subject property are generally:
Buildings on this property are:
Proposed property use is:
Are there known OSTDS failures in the area?
Let is posted with a sign in accordance with the instructions on the back of this form.

Comments from the county health department (attach additional sheets if necessary) As proposed, the applicant is seeking to maintain the existing septic system in its current configuration and size and request department approval to operate the proposed nail salon with 2 pedicure stations and 2 nail stations in addition to the existing two 1000 sq ft retail point shop. Estimated flows for the three units using Table 1 are 480GPD. The remainder of the units on the property are serviced by separate septic systems. Although stated by the applicant, no documentation has been provided or discovered which shows the department had previously approved a hair salon at the unit occupied by the nail salon. Authorized sewage flows for the property are 2300GPD, estimated sewage flows for the entire building using Table 1 (including the nail salon and offices) are 1205GPD with the remainder of the building being calculated as office use with the exception of five station hair salon. There are no known conflicting issues with the other units in use and the existing proposal. The existing septic system was certified on February 27, 2013 and consists of a 800 gallon septic tank and 275 ft. drainfield. Under current rule a minimum 1200gal septic tank and an 800 sq ft drainfield would be required. Due to building appearance and the location of the septic system it appears that at some point an addition was made to the rear of the building which now encroaches on the septic system. The septic tank is located 18' off the rear of the building.

Signature of Environmental Health Director or designee: Melina Burke Title Environmental Health Manager Date April 12, 2013

NOTICE
1. Procedures leading to the submission of this variance request must be in accordance with Chapter 120, Florida Statutes.
2. This completed application must be received by the Department of Health, Onsite Sewage Office in Tallahassee no later than the 15th of the month to be placed on the agenda for the next monthly meeting of the variance review and advisory committee. If the 15th falls on a weekend or legal holiday, the deadline for receipt will be the next regular working day.
3. If the variance request involves setbacks from wells or surface waters, the separation of the drainfield from the estimated wet season high water table, or the authorized sewage flow of the property, the county health department shall post a sign on the property.

RE: Variance Request for an Onsite Sewage Treatment and Disposal System
Variance Application # 1, County Health Department Reference #AP-
Parcel Number: 74-26-34-77-00000.0-0016.01
variance from Section: 381.006(4)(g)2, FS, 64E-6.005(2), FAC

Dear Mr. _____:

The Variance Review and Advisory Committee for the Onsite Sewage Treatment and Disposal Program has recommended provisional approval of your application for variance in the case of the above referenced property. After reviewing your request and considering the committee's recommendation, I have approved your request for variance subject to the following requirement:

Should the onsite sewage treatment and disposal system fail to function in a sanitary manner, the system shall be replaced with an ANSI/NSF International Class I aerobic treatment unit discharging to a drip irrigation system.

This variance, as approved, applies only to those sections of the law or rules referenced above and in no way exempts compliance with other state and local regulations.

If you have any questions please call Ed Williams, Bureau of Onsite Sewage Programs, at (850) 245-4070.

Sincerely,

Gerald R. Briggs, Chief
Bureau of Onsite Sewage Programs

Sewer Availability

- 1. For a residential subdivision lot, a single-family residence, or an establishment, any of which has an estimated sewage flow of 1,000 gallons per day or less, a gravity sewer line to maintain gravity flow from the property's drain to the sewer line, or a low pressure or vacuum sewage collection line in those areas approved for low pressure or vacuum sewage collection, exists in a public easement or right-of-way that abuts the property line of the lot, residence, or establishment.
- 2. For an establishment with an estimated sewage flow exceeding 1,000 gallons per day, a sewer line, force main, or lift station exists in a public easement or right-of-way that abuts the property of the establishment or is within 50 feet of the property line of the establishment as accessed via existing rights-of-way or easements.
- 3. For proposed residential subdivisions with more than 50 lots, for proposed commercial subdivisions with more than 5 lots, and for areas zoned or used for an industrial or manufacturing purpose or its equivalent, a sewerage system exists within one-fourth mile of the development as measured and accessed via existing easements or rights-of-way.
- 4. For repairs or modifications within areas zoned or used for an industrial or manufacturing purpose or its equivalent, a sewerage system exists within 500 feet of an establishment's or residence's sewer stub-out as measured and accessed via existing rights-of-way or easements.

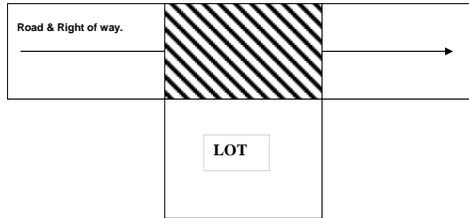

381.0065(2), Florida Statutes

22

Sewer Availability

For a single family residence with flow < 1000 gpd, sewer would be considered "available" if a gravity or low pressure line exists in the shaded area.

- Flow < 1000 gpd. There is no limit to the width of the easement abutting the property - if the sewer line is in shaded area - even if that area is 100 feet wide and sewer is on the far edge - it's available.
- Variance provisions do not apply to sewer availability
- But the utility can waive connection.

Interagency Agreement Between DEP and DOH

FOR ONSITE SEWAGE TREATMENT AND DISPOSAL SYSTEMS

September 10, 2001

An agreement between the two agencies that outlines how the agencies interact together on issues regarding jurisdictional flow limits, industrial/manufacturing zones and equivalents, septage treatment facilities, variances and more.

Sewage		

26

Interagency Coordination Regarding Regulated Establishments

- Ensure coordination between agencies
- DOH, DACS, DBPR, APD, ACHA, DCF
- Licensing agency conducts inspections
- For new facility, remodeling upgrade, change in business operation
- Food Establishments, Group Care, Institutions
- Memo 12-004

27

DOH Responsibilities

Prior to licensing DOH regulated Food Service/Institutional/and Group Care Facilities that depends on a water supply system regulated by Chapter 64E-8, F.A.C. and/or an onsite sewage disposal system regulated by Chapter 64E-6, F.A.C., DOH staff will verify requisite approvals from their office for the following:

1. New facilities.
2. Existing facilities increasing the number of beds/residents/seating, food preparation area, etc.
3. Existing facilities undergoing extensive remodeling that may impact the septic system.
4. For a change in ownership, a commercial sewage waste operating permit may be required. See section below.

Note: DOH should ensure that a routing procedure is in place so the staff responsible for the facility inspections are coordinating with the onsite sewage and onsite well sections of the county health department.

28

DBPR Responsibilities

Prior to licensing an establishment that depends on a water supply system regulated by Chapter 64E-8, F.A.C. and/or onsite sewage disposal system regulated by Chapter 64E-6, F.A.C., approval is required from the CHD for the following:

- New public food service establishments requiring plan review.
- Existing public food service establishments requiring plan review due to remodeling or conversion.
- Existing public food service establishments with onsite water systems and/or septic tank systems that do not require plan review but request an increase in seating.
- Existing public food service establishments with onsite water systems and/ or septic tank systems the do not require plan review but undergo significant change in operations (e.g., switch from single-service to multiuse tableware).

**INTERAGENCY COORDINATION OF REGULATED ESTABLISHMENTS - DOH/DACS/DBPR/DCF/AHCA/APD
EVALUATION OF ONSITE SEWAGE (SEPTIC) AND WATER SUPPLY CAPACITY**

This evaluation is to ensure certain regulated facilities/businesses are evaluated for adequate water and sewage services before opening or expanding operations. If the facility/business is on a DOH regulated onsite well or onsite septic system, completion of this evaluation will facilitate and expedite the approval process. Please return to the appropriate licensing agency when complete.

Section 1 - EVALUATION REQUEST FOR LICENSING AGENCY

New (new building or structure)
 Expansion / Remodeling (increase in seating/residents/other)
 Change in Occupancy/Tenancy

DBPR
 DACS
 DCF
 AHCA

 License Number: _____

Contact Person: _____ Phone: _____ FAX: _____

Comments: _____

ESTABLISHMENT INFORMATION

Establishment Name: _____ Type of Establishment: _____
 Address: _____ Contact Person / Phone#: _____
 City: _____ County: _____ Zip: _____

Section 2 - WATER

The above named facility/business uses the following water supply (choose one type), and complete evaluation:

Municipal/Public Water System Name of Supplier: _____
 Onsite Well System Permit Number: _____

Establishment served by a 64E-8, F.A.C. Limited Use Public Water System, DOH Regulated
 Establishment served by a Florida Safe Water Drinking Act (DEP or DOH) regulated public water system

SYSTEM EVALUATION RESULT: (this section below normally only completed by DOH if on a DOH water system)

Approved Comments: _____
 Denied (see comments)

Name & Title (Printed): _____ County Health Department/DEPI/Utility
 Signature: _____ Date: _____
 Address: _____ Phone: _____

Section 3 - WASTEWATER

The above named facility/business uses the following wastewater disposal system (choose one type), and complete evaluation:

Municipal/Public Sewer Name of Supplier: _____
 Septic System (Onsite Waste-water) Permit Number: _____

SYSTEM EVALUATION RESULT: (this section below normally only completed by DOH if on a septic system)

Approved
 Single-Service Utensils Only
 Number of Residents/Students _____
 Denied (see comments)
 Number of Seats Permitted _____
 Hours of Operation
 Other Conditions (see comments) _____
 Food Service Yes _____ No _____

Name & Title (Printed): _____ County Health Department/DOH/Utility
 Signature: _____ Date: _____
 Address: _____ Phone: _____

Florida Department of Health/Bureau of Onsite Sewage Programs - March 2012

30

Operating Permits

- Not To Be Confused With Construction Permit
- Allows Business or System to Operate
- Facilities and Service Companies
- Issued On An Annual/Biannual Basis
- Inspections – CHD/Maintenance Entity
- Managed System

31

Operating Permits

Facility Operating Permits	Service Company Operating Permits
IM	Maintenance Entities
COM	Manufactures
ATU	Disposal Services
PBTS	Treatment Facility
	Temporary Service
	Agricultural Land Use
