The Cause: Radon

Radon is a colorless, odorless, tasteless, naturally occurring radioactive gas that comes from the soil. Radon seeps into homes from the ground, collects inside the home, and then is inhaled by the residents. The U.S. Surgeon General states that it is the leading cause of lung cancer among non-smokers in the United States. Testing for radon is the only way to detect the level of radon present inside the home.

The Goal: Raise Awareness

By raising awareness of the harmful effects of radon, the number of homes with high levels of radon can decrease. This contest is designed to raise awareness about radon testing and mitigation, and to inform the public of the dangers of long-term exposure to elevated indoor radon gas.

The Participation: Far-reaching

Schools from all 50 states, U.S. territories, tribal nations, and the Department of Defense (DoD) are encouraged to participate in the national radon poster contest. Judges will select winners and runners-up in each state, territory, tribal nation, and DoD Schools. The winning posters will then be entered into the national contest.

Contest Calendar

- 2018 Contest opens September 1, 2017 and closes November 1, 2017
- Judging will occur by November 20, 2017
- State will submit winner to CRCPD by November 30, 2017
- National winners notified by December 31, 2017
- Winners will be notified of Award Ceremony date

Choose from the following Poster Topics:

- What is radon?
- Where does radon come from?
- How does radon get into our homes?
- Radon can cause lung cancer.
- Test your home for radon, save a life.

Judging Criteria:

- Content accuracy on radon
- Visual communication of topic
- Easily reproduced (large letters, good contrast)
- Originality
- No grammatical and/or typographical errors
