We now have a [new website](https://vendor.floridawic.biz/)* that is available to use to upload new UPCs for consideration to be added to our WIC Approved Product List (APL) file. It was designed so that store owners, employees, manufacturers, or wholesalers could have a way to upload products with images without going through the hassle of filling out paperwork.

This new site requires the user to Register with an email address, and associate themselves with a store or company. Once the email address has been confirmed, the user can use the site to upload products and UPCs. This can be done using a computer, smart phone (both iOS and Android), as well as tablets or iPads.
