Request for Declaratory Statement covered under 28-105 FAC.

Regarding drug pedigrees covered in part by Chapter 499 and section 64F-12.012(3) FAC

The rules cause much non-creative clerical work and waste much paper which will impact the environment.
Much of the time is spent retyping identical information from one set of forms on to an identical set of forms. This is mostly done on a manual basis. No new information is created.

I request that you permit me to use the method as shown on the exhibits.

Exhibit A....this is copy of electronic pedigree transmitted from wholesaler #1 (Amerisourcebergen) to wholesaler #2 (Medpoint).

Exhibit B...this is copy of electronic pedigree transmitted from Medpoint to Medical Arts. Copy of exhibit A is also sent.

Exhibit C...this is final pedigree from Medical Arts to final customer. A copy of exhibit A is also sent to final customer Labels C-1 and C-2 provide all information required on pedigree and are a great saver of natural resources.
