Lynne Babchuck, LCSW

CAP Assessment Distributed on March 22, 2016

CAP Assessment of South Bay Correctional Facility

I. Overview

On June 18-19, 2014, the Correctional Medical Authority (CMA) conducted an on-site physical and mental health survey of South Bay Correctional Facility (SBCF). The survey report was distributed on July 2, 2014. In August of 2014, SBCF submitted and the CMA approved, the institutional corrective action plan (CAP) which outlined the efforts to be undertaken to address the findings of the June 2014 survey. These efforts included in-service training and the monitoring of applicable medical records for a period of no less than ninety days.

On November 7, 2014, CMA staff requested access to monitoring documents to assist in determining if an on-site or off-site assessment should be conducted. Based on the documents provided, CMA staff conducted an off-site CAP assessment on December 15, 2014 to evaluate the effectiveness of corrective actions taken by institutional staff. The CAP closure files revealed sufficient evidence to determine that 10 of 10 physical health findings and 3 of 4 mental health findings were corrected.

On March 10, 2015 the CMA again requested access to monitoring documents. Based on the documents provided, CMA staff conducted an off-site CAP assessment on March 26, 2015 to evaluate the effectiveness of corrective actions taken by institutional staff. The CAP closure file revealed that that 0 of 1 mental health findings were corrected.

On July 8, 2015, the CMA again requested access to monitoring documents. Based on the documents provided, CMA staff conducted an off-site CAP assessment on July 27, 2015 to evaluate the effectiveness of corrective actions taken by institutional staff. The CAP closure file revealed that that 0 of 1 mental health findings were corrected.

On November 2, 2015, the CMA again requested access to monitoring documents. Based on the documents provided, CMA staff conducted an off-site CAP assessment on November 24, 2015 to evaluate the effectiveness of corrective actions taken by institutional staff. The CAP closure file revealed that that 0 of 1 mental health findings were corrected.

On February 25, 2016, the CMA again requested access to monitoring documents. Based on the documents provided, CMA staff conducted an off-site CAP assessment on March 14, 2016 to evaluate the effectiveness of corrective actions taken by institutional staff. Items II and III below describe the outcome of the CMA's evaluation of the institution's efforts to address the survey findings.

II. Physical Health Assessment Summary

All physical health findings closed during the first CAP assessment.

III. Mental Health Assessment Summary

The CAP closure files revealed evidence to determine that 1 of 1 mental health findings were corrected. All mental health findings are closed.

Finding	CAP Evaluation Outcome
<p><u>OUTPATIENT MENTAL HEALTH SERVICES</u></p> <p>MH-3: In 5 of 12 applicable records (15 reviewed), current psychotropic medications prescribed at the sending institution were not continued prior to the inmate's appointment with the psychiatrist at SBCF.</p>	<p>MH-3 CLOSED</p> <p>Adequate evidence of in-service training and documentation of correction were provided to close MH-3.</p>

IV. Conclusion

All physical and mental health findings are closed. All outstanding issues related to the CMA survey of SBCF are adequately resolved and no further action is required.
