

# Immunization Access for All Children

## What is the Vaccines for Children Program?

### Never Miss an Opportunity to Vaccinate

The VFC Program distributes vaccines for eligible patients to ensure all children receive their recommended vaccinations regardless of cost.

Children 18 years or younger are VFC-eligible if they meet any of the following criteria:

- Enrolled in Medicaid
- Have no health insurance or insurance that does not cover immunizations
- Are American Indian or Alaskan Native

### Provide Comprehensive Care

By participating in the VFC Program, you can provide complete care for all your patients.

### VFC Participation Guidelines

You continue to vaccinate eligible children following normal practice guidelines. You do not have to accept a child into your practice based solely on VFC eligibility.

Practice guidelines include:

- VFC eligibility screening at each immunization visit
- Providing vaccines free of charge to VFC-eligible children
- Practice and document correct vaccines storage and handling

### Enroll Today

Enrolling in VFC has never been easier. Please email [FloridaVFC@FLHealth.gov](mailto:FloridaVFC@FLHealth.gov) and you be contacted by a VFC representative.
