### INTEROFFICE MEMORANDUM

**DATE:** May 19, 2008

**TO:** County Health Department Directors/Administrators

**FROM:** Jean L. Kline, R.N., B.S.N., M.P.H.  
Deputy Secretary for Health – Public Health Programs  
State Public Health Nursing Director

**SUBJECT:** Kindergarten and Seventh Grade Immunization Status Report 2007 - 2008

#### FOR INFORMATION ONLY

---

Each October, all public and private schools with a kindergarten and/or seventh-grade class are required to submit reports indicating the immunization status of their kindergarten and/or seventh grade students. This information is compiled and sent to the Bureau of Immunization for tabulation. Attachments 1 through 4 are summaries of kindergarten data, and attachments 5 through 7 represent seventh grade data for the 2007-2008 school year. This information was submitted by 3,130 schools with 218,088 kindergarten students enrolled and 2,129 schools with 222,422 seventh grade students enrolled.

#### Purpose:

- To assist in elimination of diphtheria, hepatitis B, pertussis (whooping cough), polio, measles, mumps, rubella, tetanus, and varicella disease in Florida by increasing school children's immunization levels.
- To ensure the enforcement of section 1003.22 (previously 232.032), *Florida Statutes*, *Florida School Immunization Law*, and Chapter 64D-3, *Florida Administrative Code*, regarding immunization.
- To identify those counties needing assistance in raising their immunization coverage levels in kindergarten and seventh grade to at least 95%.

#### Results – Kindergarten:

Statewide, 93.6% of kindergarten students were reported as receiving all immunizations required for school entry/attendance:

- Five doses of diphtheria, tetanus, pertussis (DTaP) vaccine;
- Four doses of polio vaccine;
- Two doses of measles, and one dose each of mumps and rubella vaccines (preferably as two MMR);
- Three doses of hepatitis B; and one dose of varicella.

Students with exemptions from immunization accounted for 6.2% of the total kindergarten population, as reflected in the following:

- 1,362 religious exemptions, or 0.6%;
- 499 permanent medical exemptions, or 0.2%;
- 4,238 30-day exemptions, or 1.9%; and
- 7,610 temporary medical exemptions, or 3.5%.

Forty of the 67 counties, or 59.7%, reported that 95% or more of public and private students had received all required immunizations.

- While the total number of students with inadequate documentation of immunizations reflects an overall reduction of 0.17%, it is still important to point out that Section 1003.22(10a), *Florida Statutes*, does not allow students without proper documentation to attend school. This year, 31 counties reported a total of 270 students, or 0.12%, with inadequate documentation of immunizations. These schools are in violation of the state law, and these students should be excluded from school until adequate documentation is provided.

#### Results – Seventh Grade:

Statewide, 94.4% of seventh grade students were reported as receiving all immunizations required for school attendance, including but not limited to:

- Completion of the hepatitis B series;
- Two doses of measles (preferably MMR); and
- Tetanus-diphtheria booster (Td).

The rate of students admitted to school without adequate documentation of their immunizations reflects an overall decrease of 1.9% for the school year 2007-2008. This decrease indicates that only 493 students were admitted in public and private schools this year with incomplete documentation. In the school year 2006-2007, there were 4,611 students out of compliance with incomplete immunizations.

Students with exemptions from immunization accounted for 5.3% of the total seventh grade population, as reflected in the following:

- 925 religious exemptions, or 0.4%;
- 454 permanent medical exemptions, or 0.2%;
- 1,731 30-day exemptions, or 0.8%; and
- 8,717 temporary medical exemptions, or 3.9%.

The number of temporary exemptions could be significantly reduced if all healthcare providers implemented the Recommended Childhood Immunization Schedule, United States, 2008, approved by the Centers for Disease Control and Prevention's (CDC) Advisory Committee on Immunization Practices, the American Academy of Pediatrics, and the American Academy of Family Physicians, and implemented clinical practices outlined in the Standards for Pediatric

County Health Department Directors/Administrators  
Page Three  
May 19, 2008

Immunization Practices. A copy of the schedule can be found on the CDC's website at: <http://www.cdc.gov/mmwr/PDF/wk/mm5701-Immunization.pdf>. We encourage county health departments to work with local community partners to promote implementation.

The school health nurse, or authorized public or non-public school official, is responsible for follow-up of children with temporary medical exemptions or 30-day exemptions, to ensure children complete the immunization series. In addition, cooperative efforts between the school health nurse and school administration to update electronic submission of immunization data will benefit both the health and education system. Using a reminder system to recall students still needing immunizations has been shown to increase completion of the hepatitis B series.

High immunization coverage rates are a result of cooperative efforts by dedicated school and county health department officials. These efforts protect Florida's children from vaccine-preventable diseases. The Bureau of Immunization supports your local efforts to improve immunization coverage and is available to assist in any effort to reduce the threat of vaccine-preventable diseases to our children's lives.

If you have any questions or concerns, you may call Mrs. Mayra S. Lacén in the Bureau of Immunization at (850) 245-4342, extension 2389.

\*Prior to the 1984/85 school year, kindergarten and first grade are combined.

\*\*Beginning 1984/85, column includes only 30-day temporaries.

\*\*\* Survey conducted by the Immunization Program during Jan-Feb (161 schools in 66 counties.)

\*\*\*\* Since 1971/72 school year, the Immunization Program has required each public school to submit an annual report for all kindergarten and first grade students. After the 1983/84 school year, only kindergarten immunization levels were measured.

+Includes medical (temporary medical and permanent medical) and religious exemptions (where noted).

++Before 1977/78 school year, 4 DTP, 3 polio and measles and rubella required. In 1977/78 mumps added. In 1987/88, 1 DTP and 1 polio added.

+++In 1993/94 a second measles, MR, or MMR added.

++++In 1998/99 hepatitis B series added.

+++++ In 2001/02 varicella added.

\*+ In 2002/03 National shortage of DTaP increased the number of temporary exemptions
