In order to change your password, you must supply your existing password.

Below this field, you must supply your new desired password, twice.

Because this system contains Protected Health Information, you must supply a 'strong' password that is no shorter than 8 characters, and contain a combination of lower and uppercase letters, one number, and at least one special character, such as an exclamation point.

Search For Patient

© Copyright 2013 - 2014 by Five Points Technology Group. All Rights Reserved.

Clicking "Patient Search" will navigate you to the Search tool.

To perform a Search, you must supply the First and Last Names of the person you wish to search for, and also their Date of Birth.

Click Search For Patient when you have supplied this information.

Since the Registry deals in Protected Health Information, it does not allow 'wildcard' searches. You must supply all three items – there will be no searches for "Partial Matches".

If the person was found, you'll be shown two blocks of information – the top part of the page is if we found a **Patient** matching the name/dob you supplied

Below this, you will either see that the Patient is or is not Authorized to Possess,

Below that, we also show you if this person is the Legal Representative for any Patient, and what they may or may not be authorized to possess.
