PART VI

USE OF RADIONUCLIDES IN THE HEALING ARTS

64E-5.601 License Required.

(1) R10

(3)

- (1) Radioactive materials shall not be manufactured, produced, acquired, received, possessed, prepared, used, or transferred for medical use except as provided in a specific license.
- (2) Any licensee who is licensed for one or more of the medical uses in Rule 64E-5.626, 64E-5.627, 64E-5.630, or 64E-5.632, F.A.C., also is authorized to use radioactive material under a general license in subsection 64E-5.206(8), F.A.C., for specified in vitro uses without filing the certificate required by paragraph 64E-5.206(8)(b), F.A.C., but is subject to the other provisions of subsection 64E-5.206(8), F.A.C.

- (a) Unless prohibited by license condition, a physician in training may receive, possess, acquire, prepare, use, or transfer radioactive materials as provided in these regulations under the supervision of an authorized user as provided in subsections 64E-5.608(1) and 64E-5.608(3), F.A.C.
- (b) Current and active certified radiologic technologists as authorized in Part IV Chapter 468, F.S., may receive, possess, acquire, prepare, use, or transfer radioactive materials as provided in these regulations under the supervision of an authorized user as provided in paragraph 64E-5.607(3)(e) and subsection 64E-5.608(3), F.A.C.
- (c) Unless prohibited by license condition, a medical physicist in training may receive, acquire, prepare, use, possess, or transfer radioactive materials as provided in these regulations under the supervision of an authorized medical physicist as provided in subsections 64E-5.608(2) and 64E-5.608(3), F.A.C.
- (4) Unless authorized by the department, no individual shall manufacture, produce, acquire, receive, possess, prepare, use, or transfer radioactive materials for medical use unless:
 - (a) That individual is listed on the licensee's specific license as an authorized user, authorized medical physicist, or an authorized nuclear pharmacist;
 - (b) Authorized by Rule 64E-5.609, F.A.C.;
 - (c) Authorized by subsection 64E-5.601(2), F.A.C., with approval of the radiation safety committee at medical institutions or by management for licensees that are not medical institutions; or
 - (d) That individual is in training, authorized by subsection 64E-5.601(3), F.A.C., and subpart I of Part VI.

R10	(5)	Provis	sions for the protection of human research subjects are:
R10 R10 R10		(a)	A licensee may conduct research involving human research subjects only if it uses the radioactive materials specified on its license for the uses authorized on its license.
R10 R10 R10 R10 R10 R10 R10 R10		(b)	If the research is conducted, funded, supported, or regulated by another federal agency that has implemented the "Federal Policy for the Protection of Human Subjects (Federal Policy)", as described in 45 CFR Part 46, dated 11/9/2009, which is herein incorporated by reference, and may be accessed at http://www.doh.state.fl.us/environment/radiation/ , or requested in writing from the Department of Health, Bureau of Radiation Control, Bin C21, 4052 Bald Cypress Way, Tallahassee, FL 32399-1741, the licensee shall, before conducting research:
R10 R10 R10			 Obtain review and approval of the research from an "Institutional Review Board (IRB)," as defined and described in the Federal Policy; and
R10 R10			 Obtain "informed consent," as defined and described in the Federal Policy, from the human research subject.
R10 R10 R10 R10 R10 R10		(c)	If the research will not be conducted, funded, supported, or regulated by another federal agency that has implemented the Federal Policy, the licensee shall, before conducting research, apply for and receive a specific amendment to its radioactive materials medical use license. The amendment request must include a written commitment that the licensee will, before conducting research:
R10 R10		1.	Obtain review and approval of the research from an IRB as defined and described in the Federal Policy; and
R10 R10		2.	Obtain "informed consent", as defined and described in the Federal Policy, from the human research subject.
R10 R10		(d)	Nothing in this section relieves licensees from complying with the other requirements in this part.
R10 R10 R10 R10 R10	(6) aking Auth	pharn as spe must issued	prized nuclear pharmacists must be actively licensed as a nuclear nacist by the Department of Health, Division of Medical Quality Assurance ecified in Rule 64B16-28.903, F.A.C., and authorized medical physicists have an active medical physicist license, in the area they are practicing, d by the Department of Health, Division of Medical Quality Assurance.

Law Implemented: 404.022, 404.051(1), (4), (5), (6), (8), (9), (10), (11), 404.061(2), (3), 404.071(1), 404.081, 404.141, F.S. R10 History: New 8-25-91, Amended 5-12-93, Formerly 10D-91.707, Amended 8-6-01, Amended 02-11-10.

R10	64E-5	.6011	Definitions. (Entire section New)
R10	(1)	"Auth	orized medical physicist" means an individual who meets the requirements:
R10		(a)	Specified in subsection 64E-5.656(1) and Rule 64E-5.658, F.A.C.; or
R10		(b)	Is identified as an authorized medical physicist or teletherapy physicist on:
R10 R10			 A specific medical use license issued by the NRC or an agreement state;
R10			2. A medical use permit issued by a NRC master material licensee;
R10 R10			 A permit issued by a NRC or agreement state broad scope medical use licensee; or
R10 R10			 A permit issued by a NRC master material license broad scope medical use permittee.
R10	(2)	"Auth	orized user" means:
R12 R12 R10		(a)	A physician, dentist, or podiatrist who meets the requirements in Rule 64E-5.658 and subsection 64E-5.649(1), 64E-5.660(1), 64E-5.661(1), 64E-5.662(1), 64E-5.652(1), 64E-5.654(1) or 64E-5.655(1), F.A.C.; or
R10		(b)	An individual identified for medical use of radioactive materials on:
R10 R10			 A NRC or agreement state license that authorizes the medical use of radioactive material;
R10 R10			 A permit issued by a NRC master material licensee that is authorized to permit the medical use of radioactive material;
R10 R10 R10			 A permit issued by a NRC or agreement state specific licensee of broad scope that is authorized to permit the medical use of radioactive material; or
R10 R10 R10			 A permit issued by a NRC master material license broad scope permittee that is authorized to permit the medical use of radioactive material.
R10 R10 R10	(3)		hytherapy" means a method of radiation therapy in which sources are used iver a radiation dose by surface, intracavitary, intralumimnal or interstitial eation.
R10 R10 R10	(4)	assen	hytherapy source" means a radioactive source or a manufacturer- nbled source train or a combination of these sources that is designed to er a therapeutic dose within a distance of a few centimeters.

R10 (5) "Diagnostic clinical procedures manual" means a collection of written procedures R10 that describes each method by which the licensee shall perform diagnostic clinical procedures, and provides other instructions and precautions related R10 thereto. Each diagnostic clinical procedure shall be approved by the authorized R10 R10 user and shall include the radiopharmaceutical, dosage, and route of administration. R10 R10 (6) "High dose-rate remote afterloader," as used in this part, means a brachytherapy R10 device that remotely delivers a dose rate in excess of 12 gray (1200 rads) per hour at the point or surface where the dose is prescribed. R10 "Low dose-rate remote afterloader," as used in this part, means a brachytherapy R10 (7) device that remotely delivers a dose rate of less than or equal to 2 gray R10 (200 rads) per hour at the point or surface where the dose is prescribed. R10 R10 (8) "Manual brachytherapy," as used in this part, means a type of brachytherapy in which the brachytherapy sources (e.g., seeds, ribbons) are manually delivered. R10 "Medical use" means the intentional internal or external administration of **R10** (9)R10 radioactive material, or the radiation therefrom, to patients or humans research R10 subjects under the supervision of an authorized user. R10 (10)"Medium dose-rate remote afterloader," as used in this part, means a brachytherapy device that remotely delivers a dose rate of greater than 2 gray R10 (200 rads) per hour, but less than or equal to 12 gray (1200 rads) per hour at the R10 point or surface where the dose is prescribed. R10 R10 (11)"Mobile medical service" means the ability to transport and use radioactive materials for medical use at the client's address. R10 R10 (12)"Output" means the exposure rate, dose rate, or a quantity related in a known R10 manner to these rates from a brachytherapy source or a teletherapy, remote afterloader, or gamma stereotactic radiosurgery unit for a specified set of R10 R10 exposure conditions. R10 (13)"Preceptor" means an individual who provides, directs, or verifies training and R10 experience required for an individual to become an authorized user under Chapter 64E-5, Part VI, F.A.C., an authorized medical physicist, an authorized R10 nuclear pharmacist or a RSO under Chapter 64E-5 Part VI, F.A.C. R10 "Pulsed dose-rate remote afterloader," as used in this part, means a special type R10 (14)R10 of remote afterloading brachytherapy device that uses a single source capable of delivering dose rates in the "high dose-rate" range, provided that the source is: R10 R10 (a) Approximately one-tenth of the activity of typical high dose-rate remote R10 afterloader sources; and R10 (b) Used to simulate the radiobiology of a low dose-rate treatment by inserting the source for a given fraction of each hour. **R10**

R10

license:

R10	(15)	"Radiation Safety Officer" or "RSO" means an individual who:
R10 R10		(a) Meets the requirements in subsection 64E-5.648(1) or paragraph 64E-5.648(3)(a) and Rule 64E-5.658, F.A.C.; or
R10 R10		(b) Is identified as a RSO on a specific medical use license issued by the NRC or an agreement state or a medical use permit issued by a NRC master material licensee.
R10 R10	(16)	"Teletherapy physicist" means an individual identified as the qualified teletherapy physicist on a department license.
R10 R10 R10	(17)	"Therapeutic dosage" means a dosage of unsealed radioactive materials that is intended to deliver a radiation dose to a patient or human research subject for palliative or curative treatment.
R10 R10 R10	(18)	"Therapeutic dose" means a radiation dose delivered from a source containing radioactive materials to a patient or human research subject for palliative or curative treatment.
R10 R10	(19)	"Treatment site" means the anatomical description of the tissue intended to receive a radiation dose, as described in a written directive.
R10 R10 R10	(20)	"Unit dosage" means a dosage prepared for medical use for administration as a single dosage to a patient or human research subject without any further manipulation of the dosage after it is initially prepared.
R10 R10 R12	Law Implemente	hority: 404.051, 404.061. rd: 404.031, 404.061(2), 404.20, 404.22, 404.30 FS. -11-10, Amended 12-26-13
	64E-5	5.602 License Amendments. A licensee shall apply for and receive a license or departmental approval:

amendment or departmental approval:

(1) Before using radioactive material for a method or type of medical use not permitted by the license;

R10	(2)	Before permitting anyone, except a visiting authorized user, visiting authorized
R10		medical physicist, or visiting authorized nuclear pharmacist described in Rule
R10		64E-5.609, F.A.C., to work as an authorized user, authorized nuclear pharmacist,
R10		or authorized medical physicist.
R10	(3)	Before changing a RSO or authorized medical physicist;

- Before ordering or receiving radioactive material in excess of the amount, in a (4) different form, or receiving a different radionuclide than is authorized on the
 - (5) Before adding to or changing the areas of use or address or addresses of use identified in the application or on the license; and

(6) Before changing statements, representations, and procedures which are incorporated into the license.

R10 Rulemaking Authority: 404.022, 404.051, 404.061, 404.071, 404.081, 404.141, F.S. Law Implemented: 404.022, 404.051(1) (4), (5), (6), (8), (9), (10), (11), 404.061(2), (3), 404.071(1), 404.081, 404.141, F.S. R10 History: New 8-25-91, Formerly 10D-91.708, Amended 02-11-10.

R10 **64E-5.603 Notification.** (Entire section Changed) A licensee shall notify the department in writing within 30 days when the licensee changes its mailing address or when an authorized user, RSO, authorized nuclear pharmacist, or authorized medical physicist permanently discontinues performance of their duties under the licensee.

R10 Rulemaking Authority: 404.022, 404.051, 404.061, 404.071, 404.081, 404.141, F.S. Law Implemented: 404.022, 404.051(1), (4), (5), (6), (8), (9), (10), (11), 404.061(2), (3), 404.071(1), 404.081, 404.141, F.S. R10 History: New 8-25-91, Formerly 10D-91.709, Amended August 6, 2001, Amended 02-11-10.

SUBPART A

GENERAL ADMINISTRATIVE REQUIREMENTS

64E-5.604 ALARA Program.

R10

R10

R10

R10

- (1) Each licensee shall develop and implement a written program to maintain radiation doses and releases of radioactive material in effluents to unrestricted areas as low as reasonably achievable as provided in Rule 64E-5.303, F.A.C.
- (2) The management, radiation safety officer, and all authorized users shall participate in the establishment, implementation, and operation of the program as required by these regulations or the radiation safety committee.
- (3) For licensees that are not required to have a radiation safety committee, medical institutions, management and all authorized users shall participate in the program as required by the RSO.
 - (4) The ALARA program shall include an annual review by the radiation safety committee for medical licensees required to have a radiation safety committee, or by management and the RSO for licensees that are not required to have a radiation safety committee. The review shall include summaries of the types, amounts and purposes of radioactive material used; occupational dose reports; and continuing education and training of all personnel who work with or in the vicinity of radioactive material. The purpose of the review is to ensure that individuals make every reasonable effort to maintain occupational doses, doses to the general public, and releases of radioactive material as low as reasonably achievable, taking into account the state of technology and the cost of improvements in relation to benefits.

- (5) The licensee shall retain a current written description of the ALARA program for the duration of the license. The written description shall include:
 - (a) A commitment by management to keep occupational doses as low as reasonably achievable;
 - (b) A requirement that the radiation safety officer annually report to management in writing on the radiation safety program; and
 - (c) Categories of personnel exposure levels that, when exceeded, will initiate investigation by the radiation safety officer of the cause of the exposure and actions taken to reduce the probability of recurrence.
- R10 Rulemaking Authority: 404.022, 404.051, 404.061, 404.071, 404.081, 404.141, F.S. Law Implemented: 404.022, 404.051(1)(4)(5)(6)(8)(9)(10)(11), 404.061(2)(3), 404.071(1), 404.081, 404.141, F.S. R10 History: New 8-25-91, Amended 1-1-94, Formerly 10D-91.710, Amended 02-11-10.

64E-5.605 Radiation Safety Officer.

- R10 (1) A licensee shall appoint a RSO who agrees in writing to be responsible for implementing the radiation safety program. The licensee, through the RSO, shall ensure that radiation safety activities are performed with approved procedures and regulatory requirements in the daily operation of the licensee's radioactive materials program.
 - (2) The radiation safety officer shall promptly investigate and implement corrective actions as necessary regarding:
 - (a) Overexposures;
 - (b) Accidents;
 - (c) Spills;
 - (d) Losses;
 - (e) Thefts;
 - (f) Unauthorized receipts, uses, transfers, and disposals; and
 - (g) Other deviations from approved radiation safety practice. A written report of these investigations and the corrective actions taken shall be given to management.
 - (3) The radiation safety officer shall implement written policies and procedures to:
 - (a) Authorize the purchase of radioactive material;
 - (b) Receive and open packages of radioactive material;
 - (c) Store radioactive material;

- 64E-5
- (d) Keep an inventory record of radioactive material;
- (e) Use radioactive material safely;
- (f) Take emergency action if control of radioactive material is lost;
- (g) Perform periodic radiation surveys;
- (h) Perform checks of survey instruments and other safety equipment;
- (i) Dispose of radioactive material;
- (j) Train personnel who work in or frequent areas where radioactive material is used or stored; and
- (k) Keep a copy of all records and reports required by department regulations, a copy of these regulations, a copy of each licensing request and license including amendments, and the written policies and procedures required by the regulations.
- (4) The radiation safety officer shall approve radiation safety program changes for medical use not at a medical institution with the consent of management prior to sending to the department for licensing action.
- (5) The radiation safety officer shall assist the radiation safety committee for medical use at a medical institution.
- R10 (6) The RSO shall review, sign and date, at least every 3 months the occupational radiation exposure records of all personnel working with radioactive material.
- R10 (7) The licensee shall retain a copy of both authority, duties, and responsibilities of the RSO and a signed copy of each RSO's agreement to be responsible for implementing the radiation safety program for the duration of the license. The records must include the signature of the RSO and licensee management.

R10 Rulemaking Authority: 404.022, 404.051, 404.061, 404.071, 404.081, 404.141, F.S. Law Implemented: 404.022, 404.051(1)(4)(5)(6)(8)(9)(10)(11), 404.061(2)(3), 404.071(1), 404.081, 404.141, F.S. R10 History: New 8-25-91, Formerly 10D-91.711, Amended 02-11-10.

R10	64E-	5.606 Radiation Safety Committee.
R10 R10	(1)	Each license listed below shall establish a radiation safety committee to oversee the use of radioactive materials;
R10		(a) Medical institutions as defined in Rule 64E-5.101, F.A.C.; or
R10		(b) Other licenses authorized for any of the following medical uses:
R10 R10		1. Subsection 64E-5.627(2), F.A.C., and any subsection of Rule 64E-5.632 or 64E-5.634, F.A.C.;
R10 R10		2. Subsection 64E-5.627(3), F.A.C., and any subsection of Rule 64E-5.632 or 64E-5.634, F.A.C.;
R10 R10		3. Subsection 64E-5.627(4), F.A.C., and any subsection of Rule 64E-5.632 or 64E-5.634, F.A.C.;
R10 R10		4. Any subsection of Rule 64E-5.630, F.A.C., and any subsection of Rule 64E-5.632 or 64E-5.634, F.A.C.;
R10		5. Subsections 64E-5.634(1) and 64E-5.634(2), F.A.C.;
R10		6. Subsections 64E-5.634(1) and 64E-5.634(3), F.A.C.; or
R10		7. Subsections 64E-5.634(2) and 64E-5.634(3), F.A.C.
R10 R10 R10 R10 R10 R10 R10	(2)	Membership of the radiation safety committee shall include an authorized user of each type of use permitted by the license, the RSO, a representative of the nursing service, and a representative of management who is neither an authorized user nor a RSO. Other members who are experienced in the assay of radioactive material and protection against radiation, such as an authorized medical physicist or a nuclear medicine technologist employed by or working under contract with the institution may be included as appropriate.
R10 R10 R10	(3)	The committee shall meet at least every 6 months. To establish a quorum and to conduct business, one-half of the committee's membership shall be present, including the RSO, or designee and the management representative, or designee.
R10	(4)	The minutes of each radiation safety committee meeting shall include:
		(a) The date of the meeting;
		(b) Members present;
		(c) Members absent;
		(d) Summary of deliberations and discussions;
		(e) Recommended actions and the numerical results of all ballots; and
		(f) Documentation of any reviews required in Rules 64E-5.604 and

64E-5.606, F.A.C.

64E-5.607 Authority and Responsibilities.

- (1) A licensee shall provide sufficient authority and organizational freedom to the radiation safety officer and the radiation safety committee to:
 - (a) Identify radiation safety problems;
 - (b) Initiate, recommend, or provide solutions; and
 - (c) Require and verify implementation of corrective actions; and
 - (d) Stop unsafe operations.
- (2) A licensee shall establish in writing and keep current the authority, duties, responsibilities, and radiation safety activities of the radiation safety officer and the radiation safety committee.
- (3) Authorized users shall have the following special responsibilities:
 - (a) For written directives;
 - 1. A written directive must be dated and signed by an authorized user before the administration of I-131 as sodium iodide greater than 1.11 megabecquerels (MBq) (30 microcuries ([micro]Ci)), any therapeutic dosage of unsealed radioactive material or any therapeutic dose of radiation from material; or
 - 2. Due to the emergent nature of the patient's condition, a delay in order to provide a written directive would jeopardize the patient's health, an oral directive is acceptable provided:
 - The information contained in the oral directive must be documented as soon as possible in writing in the patient's record; and
 - b. A written directive must be prepared within 48 hours of the oral directive.
 - 3. The written directive must contain the patient or human research subject's name and the following information:
 - a. For any administration of quantities greater than 1.11 MBq
 (30 [micro]Ci) of sodium iodide I-131: the dosage;
 - b. For an administration of a therapeutic dosage of unsealed radioactive material other than sodium iodide I-131: the radioactive drug, dosage, and route of administration;
 - For gamma stereotactic radiosurgery: the total dose, treatment site, and values for the target coordinate settings per treatment for each anatomically distinct treatment site;
 - for teletherapy: the total dose, dose per fraction, number of fractions, and treatment site;

R10 R10

R10 R10 R10		e. For high dose-rate remote afterloading brachytherapy: the radionuclide, treatment site, dose per fraction, number of fractions, and total dose; and
R10		f. For all other brachytherapy;
R10 R10		(I) Before implantation: treatment site, the radionuclide, and dose; and
R10 R10 R10 R10		(II) After implantation but before completion of the procedure: the radionuclide, treatment site, number of sources, and total source strength and exposure time (or the total dose).
R10 R10 R10 R10 R10 R10		A written revision to an existing written directive may be made if the revision is dated and signed by an authorized user before the administration of the dosage of unsealed radioactive material, the brachytherapy dose, high dose remote afterloader dose, the gamma stereotactic radiosurgery dose, the teletherapy dose, or the next fractional dose; or
R10 R10 R10		Due to the emergent nature of the patient's condition, a delay in order to provide a written directive would jeopardize the patient's health, an oral directive is acceptable provided:
R10 R10		 The information contained in the oral directive must be documented as soon as possible in the patient's record; and
R10 R10		 A written directive must be prepared within 48 hours of the oral directive.
	(b)	Review personally the patient's case to assure that the therapeutic radiation procedure is appropriate;
R10 R10 R10	(c)	Review personally the patient's case or develop and implement adequate written procedures to assure that the diagnostic radiation procedure is appropriate.
R10 R10	(d)	Prior to administration, the authorized user must document deviations from the diagnostic clinical procedures manual for each patient.
	(e)	Use radioactive material or direct technologists and physicians in training in using radioactive material;
	(f)	Interpret results of diagnostic procedures; and
	(g)	Review regularly the progress of the patient receiving therapy and modify the originally prescribed dose if needed.
R10 (4)		censee shall retain a copy of the written directives specified in paragraph
R10	64E-5	5.607(3)(a), F.A.C., for three years.

64E-5.608 Supervision. (Entire section Changed)

R10	(1)	Supe	rvision of a physician in training to become an authorized user:
R10 R10 R10 R10		(a)	A licensee who permits the receipt, acquisition, possession, use, preparation, or transfer of radioactive material by a physician in training under the supervision of an authorized user as allowed by paragraph 64E-5.601(3)(a), F.A.C., shall:
R10 R10 R10			1. Instruct the supervised individual in the principles of radiation safety appropriate to that individual's use of radioactive material and in the licensee's written quality management program;
R10 R10 R10			 Review the supervised individual's use of radioactive material, provide reinstruction as needed and review records kept to reflect this use;
R10 R10			3. Require the preparation of radioactive materials use only under the supervision of an authorized user or authorized nuclear pharmacist;
R10 R10			4. Require the authorized user to be immediately available to communicate with the supervised individual; and
R10 R10 R10			 Require that only those individuals specifically designated by the authorized user be permitted to administer radionuclides or radiation to patients.
R10 R10 R10		(b)	A licensee shall require the supervised individual receiving, possessing, acquiring, preparing, using or transferring radioactive material specified in paragraph 64E-5.601(3)(a), F.A.C., to:
R10			1. Follow the instructions of the supervising authorized user;
R10 R10			 Follow the written radiation and quality management program procedures established by the licensee; and
R10 R10			 Comply with these regulations and the license conditions regarding the use of radioactive material.
R10 R10 R10 R10 R10 R10 R10 R10		(c)	The licensee's management or radiation safety committee shall provide written approval prior to any training of a physician to receive, acquire, prepare, possess or use radioactive material under the supervision of an authorized user. After the training has been completed, the licensee shall provide documentation to the supervised individual that the individual received the training and experience required by this section. The licensee shall maintain records that identify physicians currently in training and the physicians who have completed training for 7 years after the last date training was received; and

R10 R10	(2)	Super physic	rvision of an individual in training to become an authorized medical cist:
R10 R10 R10 R10		(a)	A licensee who permits the receipt, preparation, acquisition, possession, use, or transfer of radioactive material to an individual in training under the supervision of an authorized medical physicist as allowed by paragraph 64E-5.601(3)(c), F.A.C., shall:
R10 R10 R10			 Instruct the supervised individual in the principles of radiation safety appropriate to that individual's use of radioactive material and in the licensee's written quality management program;
R10 R10 R10			 Review the supervised individual's use of radioactive material, provide reinstruction as needed and review records kept to reflect this use; and
R10 R10			 Require the authorized medical physicist to be immediately available to communicate with the supervised individual.
R10 R10 R10		(b)	A licensee shall require the supervised individual receiving, acquiring or preparing, possessing, using or transferring radioactive material specified in paragraph 64E-5.601(3)(c), F.A.C., to:
R10 R10			 Follow the instructions of the supervising authorized medical physicist;
R10 R10			2. Follow the written radiation and quality management program procedures established by the licensee; and
R10 R10			 Comply with these regulations and the license conditions regarding the use of radioactive material.
R10 R10 R10 R10 R10 R10 R10 R10		(c)	The licensee's management or radiation safety committee shall provide written approval prior to any individual to receive, possess or use radioactive material under the supervision of an authorized medical physicist. After the training has been completed, the licensee shall provide documentation to the supervised individual that the individual received the training and experience required by this section. The licensee shall maintain records that identify individuals currently in training and the individuals who have completed training for 7 years after the last date training was received.
R10	(3)	A lice	nsee that permits any supervised activities regarding the use of radioactive
R10			rials or radiation from radioactive materials is responsible for the acts and
R10			sions of the supervised individual.

R10 64E-5.609 Visiting Authorized User, Visiting Authorized Medical Physicist, or R10 Visiting RSO. (1) A licensee may permit any visiting authorized user to use licensed material for medical use under the terms of the licensee's license for 60 days each year if: R10 The licensee has a copy of a license issued by the department, the NRC. (a) or an agreement state that identifies the visiting authorized user by name R10 as an authorized user for medical use; and **R10** (b) The visiting authorized user performs only those procedures for which he is specifically authorized by the license described in paragraph 64E-5.609(1)(b), F.A.C., above. R10 (2)For up to 60 days each year, a licensee may permit an authorized medical physicist or an individual qualified under Rules 64E-5.656 and 64E-5.658, F.A.C., R10 to function as a visiting authorized medical physicist as authorized by the license. R10 R10 R10 (3)For up to 60 days each year, a licensee may permit an authorized user or an individual qualified to be a RSO, under Rules 64E-5.648 and 64E-5.658, F.A.C., R10 to function as a visiting RSO and to perform the functions of a RSO, as provided R10 R10 in Rule 64E-5.605 and subsection 64E-5.607(1), F.A.C. (4) R10 A license amendment is not needed to permit a visiting authorized user, visiting authorized medical physicist, or visiting RSO to use licensed material or perform R10 R10 functions in accordance with this section. R10 (5) The visiting authorized user, visiting authorized medical physicist, or visiting RSO R10 shall have the prior written permission of the licensee's management and, if the R10 use or function occurs on behalf of a medical institution, the institution's radiation safety committee. R10 R10 (6)Licensee records shall include a copy of the record described in Rule 64E-5.657, R10 F.A.C., or some other form of documentation that verifies the individual has met R12 the respective training and experience requirements listed in Subpart I. A R10 licensee shall retain copies of the records specified in Rule 64E-5.609, F.A.C., for R10 3 years after the last visit. Rulemaking Authority: 404.051, 404.061, 404.071, 404.081, 404.141, F.S. R10	64E-5 Reports of		lity Management Program and Notifications, Records and nts.
	(1)	maintain a radioactive directed by	cant or licensee under this part, as applicable, shall establish and written quality management program to provide a high confidence that material or radiation from radioactive material will be administered as the authorized user. The quality management program must include cies and procedures to meet the following objectives:
		patie	ept where a delay to provide a written directive would jeopardize the ent's health as specified in paragraphs (b) and (c) of this section, a en directive is prepared prior to administration for the following:
		1.	Any teletherapy radiation dose;
		2.	Any gamma stereotactic radiosurgery radiation dose;
		3.	Any brachytherapy radiation dose;
R10		4.	Any administration of iodine 131 as sodium iodide in quantities greater than 30 microcuries (1.11 megabecquerels);
R10		5.	Any therapeutic administration of a radiopharmaceutical other than iodine 131 as sodium iodide; or

(b) An oral directive is acceptable when a delay to provide a written directive

Any high dose rate remote afterloader radiation dose.

R10

6.

=			64E-5 Florida Administrative Code 64E-5.611
R10			would jeopardize the patient's health because of the emergent nature of the patient's condition. The information contained in the oral directive must be documented immediately in the patient's record and a written directive prepared within 48 hours of the oral directive.
		(c)	An oral revision to an existing written directive is acceptable when a delay to provide a written revision to an existing written directive would jeopardize the patient's health. The oral revision must be documented immediately in the patient's record and a revised written directive must be signed by the authorized user within 48 hours of the oral revision.
R10 R10		(d)	A written directive which changes an existing written directive can be made for any diagnostic or therapeutic procedure if the revision is dated and signed by an authorized user prior to the administration of the radiopharmaceutical dosage, the brachytherapy dose, the gamma stereotactic radiosurgery dose, high dose rate remote afterloader dose, the teletherapy dose, or the next fractional dose.
R10		(e)	The patient's or human research subject's identity is verified by more than one method as the individual named in the written directive prior to administration;
R10 R10 R10		(f)	The final plans of treatment and related dose calculations, manually or computer generated, for brachytherapy, teletherapy, high dose rate remote afterloader, and gamma stereotactic radiosurgery agree with the respective written directives:
R10 R10 R10		(g)	Verify that any computer-generated calculations are correctly transferred into the consoles of therapeutic medical units authorized by Rule 64E-5.634, F.A.C.;
R10		(h)	Each administration agrees with the written directive; and
R10 R10		(i)	Any unintended deviation from the written directive is identified and evaluated and appropriate action is taken.
	(2)		icensee shall develop procedures for and conduct a review of the quality agement program including an evaluation of the following:
		(a)	A representative sample of patient administrations within the review period;
		(b)	All recordable events within the review period; and
R10		(c)	All medical events within the review period to verify compliance with all aspects of the quality management program.
	(3)	cond be m	review of the quality management program specified in (2) above shall be ucted at intervals not to exceed 12 months. A record of each review shall aintained for inspection by the department in an auditable form for 3 years shall include evaluations and findings of the review.

- (4) The licensee shall evaluate each of these reviews to determine the effectiveness of the quality management program and make modifications to meet the objectives in subsection 64E-5.611(1), F.A.C.
- (5) Within 30 days of discovery of each recordable event, the licensee shall:
 - (a) Assemble the relevant facts including the cause;
 - (b) Identify any corrective action required to prevent recurrence;
 - Retain a record in an auditable form for 3 years of the relevant facts and (c) any corrective action taken.
- (6)The licensee shall retain in an auditable form for 3 years each written directive and a record of each administered radiation dose or radiopharmaceutical dosage where a written directive is required by subsection 64E-5.611(1), F.A.C.
- R10 **(7)** Each applicant for a new license shall submit to the department a quality management program as part of the application for a license and implement the program upon issuance of the license by the department.
- R10 (8)Each licensee shall maintain copies of the quality management program for the R10 duration of the license.
- R10 (9)Each licensee shall submit and maintain records and reports of medical events as required by subsections 64E-5.345(4) and (5), F.A.C.
- R10 Rulemaking Authority: 404.022, 404.051, 404.061, 404.071, 404.081, 404.141, F.S. Law Implemented: 404.022, 404.051(1)(4)(5)(6)(8)(9)(10)(11), 404.061(2)(3), 404.071(1), 404.081, 404.141, F.S. R10 History: New 8-25-91, Amended 1-1-94, Formerly 10D-91.717, Amended 02-11-10.

Suppliers. A licensee shall use for medical use only: 64E-5.612

- Radioactive material manufactured, labeled, packaged, and distributed as (1) specified in a license issued by the department or by another agreement state, a licensing state or the U.S. Nuclear Regulatory Commission:
- (2) Generators and reagent kits that have been manufactured, labeled, packaged, and distributed as specified in an approval issued by the U.S. Department of Health and Human Services, Food and Drug Administration unless the kits are not subject to the Federal Food, Drug, and Cosmetics Act and the Public Health Services Act.
- (3)Teletherapy sources manufactured and distributed as specified in a license issued by the department or by another agreement state, a licensing state or the NRC; or
- (4) Sealed sources or devices containing radioactive materials that are either;
 - Manufactured, labeled, packaged, and distributed as specified in a license (a) issued by the department or by another agreement state, a licensing state or the NRC; or
 - Noncommercially transferred from a medical use licensee authorized by (b) Chapter 64E-5, Part VI, F.A.C., or equivalent medical use license issued by another agreement state or the NRC.

SUBPART B GENERAL TECHNICAL REQUIREMENTS

64E-5.613 Quality Control of Diagnostic Instrumentation. Each licensee shall establish written quality control procedures for all equipment used to obtain images or information from radionuclide studies. The procedures shall be recommended by equipment manufacturers or be approved by the department. The licensee shall perform quality control as specified in written procedures and retain a copy of the quality control results for 3 years.

Specific Authority: 404.022, 404.051, 404.061, 404.071, 404.081, 404.141, F.S. Law Implemented: 404.022, 404.051(1)(4)(5)(6)(8)(9)(10)(11), 404.061(2)(3), 404.071(1), 404.081, 404.141, F.S. History: New 8-25-9191, Amended 5-13-93, Formerly 10D-91.719.

- R10 64E-5.614 Possession, Use, Calibration, and Check of Dose Calibrators in the R10 Use of Unsealed Radiopharmaceuticals.
 - (1) A medical use licensee authorized to administer radiopharmaceuticals shall possess a dose calibrator and use it to measure the amount of activity administered to each patient or human research subject.
- R10
 (2) A licensee shall check each dose calibrator before use each day of use, or during an assigned shift for facilities operating continuously, for constancy with a dedicated check source. The check shall be performed on a frequently used setting with a sealed source of not less than 10 microcuries (370 kBq) of radium 226 or 50 microcuries (1.85 MBq) of any other photonemitting radionuclide with a half-life greater than 90 days. A record shall be made of each check, which shall include:
 - (a) The model and serial number of the dose calibrator;
 - (b) The identity and decay corrected activity of the radionuclide contained in the check source;
 - (c) The date of the check;
 - (d) The activity measured;
 - (e) The percent error;
 - (f) The instrument settings; and
 - (g) The name or initials of the individual performing the check.
 - (3) The licensee shall test each dose calibrator for accuracy at the time of installation and at least every 12 months. The test shall be completed by assaying at least two sealed sources containing different radionuclides, the activity of which has been determined by the National Institute of Standards and Technology (NIST) or by the manufacturer who has compared their source to a source calibrated by the NIST. The sources shall have a minimum activity of 10 microcuries (370 kBq) for radium 226 and 50 microcuries (1.85 MBq) for any other photon-emitting radionuclide. At least one of the sources shall have a principal photon energy between 100 kilo-electron volts and 500 kiloelectron volts. A record shall be made of each test, which shall include:

- (a) The model and serial number of the dose calibrator;
- The model and serial number of each source used and the identity of the (b) radionuclide contained in the source and its activity:
- (c) The date of the test;
- (d) The results of the test;
- (e) The instrument settings; and
- **R10** (f) The name of the individual performing this test.
 - (4) The licensee shall test each dose calibrator for linearity at the time of installation and at least every 3 months over the range of use between 10 microcuries (370 kBq) and the highest dosage that will be administered. A record shall be made of each test, which shall include:
 - (a) The model and serial number of the dose calibrator;
 - (b) The calculated activities;
 - The measured activities: (c)
 - (d) The date of the test; and
 - The name of the individual performing this test. (e)
 - (5) The licensee shall test each dose calibrator for geometry dependence at the time of installation over the range of volumes and volume configurations for which it will be used. The licensee shall keep a record of this test for the duration of the use of the dose calibrator. A record shall be made of each test, which shall include:
 - (a) The model and serial number of the dose calibrator;
 - The configuration of the source measured; (b)
 - The activity measured and the instrument setting for each volume (c) measured:
 - (d) The date of the test; and
 - The name of the individual performing this test. (e)
 - A licensee shall correct mathematically dosage readings for any geometry or (6)linearity error that exceeds 10 percent if the dosage is greater than 10 microcuries (370 kBq) and shall repair or replace the dose calibrator if the accuracy or constancy error exceeds 10 percent.

- (7) A licensee shall also perform checks and tests required by Rule 64E-5.614, F.A.C., following adjustment or repair of the dose calibrator.
- (8) A licensee shall retain a record of each check and test required by Rule 64E-5.614, F.A.C., for 3 years.
- R10 (9) A licensee may calibrate instrumentation used in Rule 64E-5.614, F.A.C., using nationally recognized standards or the manufacturer's instructions. The standards or instructions used by the licensee must be available for inspection by the department.
- R10 Rulemaking Authority: 404.051, 404.061, 404.071, 404.081, 404.141, F.S. Law Implemented: 404.022, 404.051(1)(4)(5)(6)(8)(9)(10)(11), 404.061(2)(3), 404.071(1), 404.081, 404.141, F.S. R12 History: New 8-25-91, Formerly 10D-91.720, Amended 2-11-10, 12-26-13.
- R10 **64E-5.615 Use, Calibration and Check of Survey Instruments.** A licensee shall ensure that the survey instruments used to comply with this part have been calibrated before R10 first use, at least every 12 months, and after repair.
- R10 (1) A record shall be made of each calibration, which shall include:
 - (a) A description of the source used;
 - (b) The certified dose rates from the source;
 - (c) The rates indicated by the instrument being calibrated;
 - (d) The correction factors deduced from the calibration data;
- R10 (e) The name of the individual who performed the calibration;
 - (f) The date of calibration.
- R10 (g) The model number and serial number of the instrument being calibrated; and
- R10 (h) The results of the calibration.
 - (2) The licensee shall:
 - (a) Calibrate all required scale readings up to 1,000 millirems (10 mSv) per hour with a radiation source:
 - (b) Calibrate each linear scale instrument at two points located approximately 1/3 and 2/3 of full-scale, calibrate each logarithmic scale instrument at midrange of each decade and at two points of at least one decade, and calibrate each digital instrument at appropriate points; and
- R10 (c) Conspicuously note on the instrument the date of calibration.
 - (3) The licensee shall:

- (a) Consider a point as calibrated if the indicated dose rate differs from the calculated dose rate by not more than 10 percent; and
- (b) Consider a point as calibrated if the indicated dose rate differs from the calculated dose rate by not more than 20 percent and a correction chart or graph is attached conspicuously to the instrument.
- (4) A licensee shall check each survey instrument for proper operation with a dedicated check source before each use. The licensee is not required to keep records of these checks.
- (5) The licensee shall retain a record of each calibration required in subsection 64E-5.615(1), F.A.C., for 3 years.
- (6) The licensee may use persons licensed by the department, the U.S. Nuclear Regulatory Commission, an agreement state, or a licensing state to perform calibrations of survey instruments. Records of calibrations required by subsection 64E-5.615(1), F.A.C., shall be maintained by the licensee.
- (7) A licensee authorized to use radioactive material for uptake, dilution, and excretion studies or sealed sources for diagnostic purposes shall possess a portable radiation survey instrument with a range from 0.1 millirem (1.0 μSv) per hour to at least 1,000 millirem (10 mSv) per hour.
- (8) A licensee authorized to use radioactive material for imaging and localization studies, radiopharmaceutical therapy or implant therapy shall possess portable radiation survey instruments with a range from 0.1 millirem (1.0 μ Sv) per hour to at least 1,000 millirem (10 mSv) per hour.
- (9) A licensee authorized to use radioactive material in Rule 64E-5.634, F.A.C., shall possess a radiation survey instrument as described in subsection (7) or (8), above.
- (10) The licensee shall not use survey instruments if the difference between the indicated exposure rate and the calculated exposure rate is more than 20 percent.
- (11) A licensee may calibrate instrumentation used in Rule 64E-5.615, F.A.C., using nationally recognized standards or the manufacturer's instructions. The standards or instructions used by the licensee must be available for inspection by the department

R10 Rulemaking Authority: 404.051, 404.061 404.081, 404.141, F.S. Law Implemented: 404.022, 404.051(1)(4)(6)(10)(11), 404.061(2)(3), 404.081, 404.141, F.S. R10 History: New 8-2591, Amended 5-15-96, Formerly 10D-91.721, Amended 02-11-10.

R10 History: New 8-25-91, Formerly 10D-91.723, Amended 5-18-98, Amended 02-11-10.

64E-5.618 Requirements for Possession of Sealed Sources and Brachytherapy Sources.

- (1) A licensee who possesses any sealed source or brachytherapy source shall follow the radiation safety and handling instructions supplied by the manufacturer or equivalent instructions approved by the department and shall maintain the instructions for the duration of source use in a legible form and convenient to users.
- (2) A licensee in possession of a sealed source shall assure that:
 - (a) The source is tested for leakage before its first use unless the licensee has a certificate from the supplier indicating that the source was tested within 6 months before transfer to the licensee; and
 - (b) The source is tested for leakage at least every 6 months or at intervals approved by the department, another agreement state, a licensing state or the U.S. Nuclear Regulatory Commission.
 - (c) Leak tests are capable of detecting the presence of 0.005 microcurie (185 Bq) of radioactive material on the test sample, or, in the case of radium, the escape of radon at the rate of 0.001 microcurie (37 Bq) each 24 hours;
 - (d) Test samples are taken from the source or from the surfaces of the device in which the source is mounted or stored on which radioactive contamination might be expected to accumulate; and
 - (e) Teletherapy and other device source samples are taken when the source is in the off position.
 - (f) Leak tests are analyzed by individuals who are licensed by the department, U.S. Nuclear Regulatory Commission, an agreement state or licensing state to perform leak test services.

- (3) A licensee shall retain leak test records for 3 years. The records shall contain the model number and serial number if assigned of each source tested, the identity of each source radionuclide and its estimated activity, the measured activity of each test sample expressed in microcuries (becquerels), the date of the test, and the name of the individual who performed the test analysis.
- (4) If the leak test reveals the presence of 0.005 microcurie (185 Bq) or more of removable contamination, the licensee shall:
 - Immediately withdraw the sealed source from use and cause it to be decontaminated and repaired or to be disposed of in accordance with these regulations; and

- R10 R10 R10
- (b) File a written report with the department within 5 days of receiving the leak test results describing the equipment involved, the test results, the action taken, the model number and serial number or the leaking source if assigned, the radioisotope and its estimated activity, and the date of the test.
- (5) A leak test is not required on the following sources:
 - (a) Sources containing only radioactive material with a half-life of less than 30 days;
 - (b) Sources containing only radioactive material as a gas;
 - (c) Sources containing 100 microcuries (3.7 MBq) or less of beta or photonemitting material or 10 microcuries (370 kBq) or less of alpha-emitting material; and
 - (d) Seeds of iridium 192 encased in nylon ribbon.
- (6) Leak tests are not required on calibration and reference sources stored and not being used. The licensee shall, however, clearly indicate on the inventory records that these sources are for storage only and the date placed in storage. The licensee shall test each such source for leakage before any use or transfer unless it has been tested for leakage within 6 months before the date of use or transfer.
- (7) Leak tests are not required on brachytherapy and teletherapy sources that are listed on a department license for storage only. The licensee shall test each such source for leakage before any use or transfer unless it has been tested for leakage within 6 months before the date of use or transfer.

- R10
 R10
 A licensee who possesses sealed sources or brachytherapy sources, except gamma stereotactic radiosurgery sources, shall conduct a physical inventory of all such sources at intervals not to exceed six months. The licensee shall retain each inventory record for 3 years. The inventory records shall contain the model number of each source and serial number if one has been assigned, the identity of each source radionuclide and its estimated activity, the location of each source, the date of the inventory, and the name of the individual who performed the inventory.
 - (9) A licensee who possesses a sealed source or brachytherapy source shall survey all areas where such sources are stored with a radiation survey instrument at least every 3 months. This does not apply to teletherapy sources in teletherapy units or sealed sources in diagnostic devices.
 - (10) A licensee shall retain a record of each survey required in subsection 64E-5.618(9), F.A.C., for 3 years. The record shall include the date of the survey, a sketch of each area that was surveyed, the measured dose rate at several points in each area expressed in millirems (microsieverts) per hour, the model number and serial number of the survey instrument used to make the survey, and the name of the individual who performed the survey.
- R10 (11) Sealed sources designated as radioactive waste and held for decay in storage as in Rule 64E-5.624, F.A.C., are not required to be leak tested or inventoried as required by this section.
- R10 Rulemaking Authority: 404.022, 404.051, 404.061, 404.071, 404.081, 404.141, F.S. Law Implemented: 404.022, 404.051(1)(4)(5)(6)(8)(9)(10)(11), 404.061(2)(3), 404.071(1), 404.081, 404.141, F.S. R10 History: New 8-25-91, Amended 5-12-93, Formerly 10D-91.724, Amended 02-11-10.

64E-5.619 Syringe Shields and Labels.

- (1) A licensee shall keep syringes that contain radioactive material to be administered in a radiation shield. Each individual who prepares or administers radiopharmaceuticals shall use a syringe radiation shield unless the use of the shield is contraindicated for that patient.
- (2) Unless used immediately, a licensee shall label conspicuously each syringe or syringe radiation shield that contains a syringe with a radiopharmaceutical with the patient's name or the radiopharmaceutical name or its abbreviation and the type of diagnostic study or therapy procedure to be performed.

Specific Authority: 404.051, 404.061, 404.081, 404.141, F.S. Law Implemented: 404.022, 404.051(1)(4)(6)(10)(11), 404.061(2)(3), 404.081, 404.141, F.S. History: New 8-25-91, Amended 5-15-96, Formerly 10D-91.725.

64E-5.620 Vial Shields and Labels. A licensee shall require each individual preparing or handling a vial that contains a radiopharmaceutical to keep the vial in a vial radiation shield and conspicuously label each vial with the radiopharmaceutical name or its abbreviation.

Specific Authority: 404.022, 404.051, 404.061, 404.081, 404.141, F.S. Law Implemented: 404.022, 404.051(1)(4)(6)(10)(11), 404.061(2)(3), 404.081, 404.141, F.S. History: New 8-25-91, Amended <u>5-15-96</u>, Formerly 10D-91.727.

64E-5.621 Surveys for Contamination and Ambient Radiation Dose Rate.

- (1) A licensee shall survey with a radiation survey instrument at the end of each day of use, or during an assigned shift for facilities operating continuously, all areas where radiopharmaceuticals are routinely prepared for use or administered.
- (2) A licensee shall survey all areas where radiopharmaceuticals or radioactive wastes are stored with a radiation survey instrument at least once each week.
- (3) A licensee shall conduct the surveys required by subsections 64E-5.621(1) and (2), F.A.C., with an instrument capable of measuring dose rates as low as 0.1 millirem (1 μSv) per hour.
- (4) A licensee shall establish dose rate action levels for the surveys required by subsections 64E-5.621(1) and (2), F.A.C., and shall require that the individual performing the survey immediately notify the radiation safety officer if a dose rate exceeds an action level.
- (5) A licensee shall perform a wipe survey for removable contamination weekly of all areas where radiopharmaceuticals are routinely prepared for use, administered or stored.
- (6) A licensee shall analyze the wipe surveys required by subsection 64E-5.621(5), F.A.C., with an instrument capable of detecting contamination of 2,000 disintegrations per minute (33.3 Bq) or shall monitor each wipe sample in a low background area with a radiation survey instrument using a probe with a maximum window thickness of 2.0 mg/cm² and a minimum probe diameter of 1.5 inches.
- (7) A licensee shall establish removable contamination action levels for the wipe surveys required by subsection 64E-5.621(5), F.A.C., and shall require that the individual performing the survey immediately notify the radiation safety officer if contamination exceeds action levels.
- (8) A licensee shall retain a record of each survey required by subsection subsections 64E-5.621(1), (2), and (5), F.A.C., for 3 years. The record shall include:
 - (a) The date of the survey;
 - (b) A diagram of each area surveyed;
 - (c) Action levels established for each area;
 - (d) The measured dose rate at several points in each area expressed in millirems (microsieverts) per hour or the removable contamination in each area expressed in disintegrations per minute (becquerels) per 100 square centimeters, or counts per minute if performed with a radiation survey instrument as described in subsection 64E-5.621(6), F.A.C.;
 - (e) The serial number and the model number of the instrument used to make the survey or analyze the samples; and
 - (f) The name of the person who performed the survey.

R10

R10

R10	(9)	The licensee does not need to perform the radiation surveys in subsection
R10		64E-5.621(1) or (2), F.A.C., in areas where patients or human research subjects
R10		are currently confined when such patients or subjects cannot be released under
R10		Rule 54E-5.622, F.A.C.
R10		prity: 404.022, 404.051, 404.061, 404.071, 404.081, 04.141, F.S.

Law Implemented: 404.022, 404.051(1)(4)(5)(6)(8)(9)(10)(11), 404.061(2)(3), 404.071(1), 404.081, 404.141, F.S. R10 History: New 8-25-91, Formerly 10D-91.729, Amended 02-11-10.

R10 64E-5.622 Release of Patients or Human Research Subjects Treated with R10 Radiopharmaceuticals, Implants or Remote Afterloader Units.

- R2 Except as authorized by subsection 64E-5.622(4), F.A.C., a licensee shall not (1) authorize release from confinement for medical care any patient administered a radiopharmaceutical until:
 - The dose rate from the patient is less than 5 millirems (50 µSv) per hour at (a) a distance of 1 meter; or
 - (b) The activity in the patient is less than 30 millicuries (1.11 GBq).
- R2 (2) Except as authorized by subsection 64E-5.622(4), F.A.C., a licensee shall not authorize release from confinement for medical care any patient administered a permanent implant until the dose rate from the patient is less than 5 millirems (50 µSv) per hour at a distance of 1 meter.
 - (3)Immediately after removing the last temporary implant source from a patient, the licensee shall make a radiation survey of the patient with a radiation survey instrument to confirm that all sources have been removed. The licensee shall not release a patient treated by temporary implant from confinement for medical care until all sources have been removed.
 - (4) Licensees and license applicants whose proposed procedures to release individuals who have been administered radiopharmaceuticals or permanent implants containing radioactive material from the control of licensees differ from those specified in subsections (1) and (2), above, must submit their proposed procedures to the department for approval. The procedures must:
 - (a) Demonstrate that the total effective dose equivalent to any other individual from exposure to the released individual is not likely to exceed 500 millirem (5 µSv);
 - Contain a copy of the instructions including written instructions to be given to the released individual, or the individual's parent or guardian, on actions recommended to maintain doses to other individuals as low as is reasonably achievable if the total effective dose equivalent to another individual is likely to exceed 100 millirem (1 µSv). If the dose to a breastfeeding infant or child could exceed 100 millirem (1 µSv) if there were no interruption of breast-feeding, the instructions also shall include:
 - Guidance on the interruption or discontinuance of breast-feeding
 - Information on the consequences of failing to follow the guidance.

 - **64E-5.623 Storage of Volatiles and Gases.** A licensee shall store volatile radiopharmaceuticals and radioactive gases in the shippers' radiation shield and container or an equivalent shield and container. A licensee shall store and use a multidose container in a properly functioning fume hood.

Specific Authority: 404.022, 404.051, 404.061, 404.071, 404.081, 404.141, F.S. Law Implemented: 404.022, 404.051(1)(4)(5)(6)(8)(9)(10)(11), 404.061(2)(3), 404.071(1), 404.081, 404.141, F.S. History: New 8-25-91, Formerly 10D-91.731.

64E-5.624 Decay In Storage.

R10 R10

- (1) A licensee shall hold radioactive material with a physical half life of less than 120 days for decay in storage before disposal as ordinary trash. A licensee is exempt from the requirements of paragraph 64E-5.331(1)(c), F.A.C., of these regulations if:
 - (a) The radioactive material is held for decay a minimum of 10 half-lives;
 - (b) The radioactive material is monitored at the container surface before disposal as ordinary trash and its radioactivity cannot be distinguished from the background radiation level in a low background radiation area with a radiation survey instrument set on its most sensitive scale and with no interposed shielding;
 - (c) All radiation labels are removed or obliterated; and
 - (d) Each generator column is separated and monitored individually with all radiation shielding removed to ensure that its contents have decayed to background radiation levels before disposal.

- (2) The licensee shall retain a record of each disposal for 3 years. The record shall include:
 - (a) The date of the disposal;
 - (b) The date on which the radioactive material was placed in storage;
 - (c) The radionuclides disposed;
 - (d) The model and serial number of the radiation survey instrument used;
 - (e) The background dose rate;
 - (f) The radiation dose rate measured at the surface of each waste container; and
 - (g) The name of the individual who performed the disposal.
- R10 Rulemaking Authority: 404.022, 404.051, 404.061, 404.071, 404.081, 404.141, F.S. Law Implemented: 404.022, 404.051(1)(4)(5)(6)(8)(9)(10)(11), 404.061(2)(3), 404.071(1), 404.081, 404.141, F.S.

64E-5.625 Safety Instructions and Precautions for Liquid Iodine,

- R10 Radiopharmaceutical Therapy, Manual Brachytherapy, Remote Afterloader Units,
- R10 Teletherapy Units, and Gamma Stereotactic Radiosurgery.
- (1) A licensee shall provide oral and written radiation safety instructions to all personnel caring for patients or human research subjects, who cannot be released under Rule 64E-5.622, F.A.C., undergoing radiopharmaceutical therapy or manual brachytherapy. This training shall be provided initially prior to caring for patients and refresher training shall be provided at least every 12 months. The instruction shall describe the licensee's procedures for notification of the RSO and an authorized user in case of the patient's death or medical emergency.
- R10 (2) The instruction for radiopharmaceutical therapy shall be commensurate with the duties of the personnel and describe the procedures for:
 - (a) Patient or human research subject control;
- R10 (b) Visitor control, including;

R10

R10

R10

R10 R10

- 1. Routine visitation to hospitalized individuals in accordance with paragraph 64E-5.312(1)(a), F.A.C.; and
- 2. Visitation authorized in accordance with subsection 63E-5.312(5), F.A.C.
- (c) Contamination control; and
- (d) Waste control.

R10 R10	(3)	The instruction for manual_brachytherapy shall be commensurate with the duties of the personnel and describe:
		(a) Size and appearance of the brachytherapy sources;
R10		(b) Safe handling and shielding instructions;
R10		(c) Procedures for patient or human research subject control; and
R10		(d) Procedures for visitor control, including;
R10 R10		1. Routine visitation to hospitalized individuals in accordance with paragraph 64E-5.312(1)(a), F.A.C.; and
R10 R10		 Visitation authorized in accordance with paragraph 64E-5.312(5), F.A.C.
R10 R10 R10	(4)	A licensee shall provide instruction for remote afterloader units, teletherapy units, and gamma stereotactic radiosurgery units as described in Rule 64E-5.636, F.A.C.
R10	<mark>(5)</mark>	A licensee shall keep a record of individuals receiving instruction required by subsections (1), (2), (3), and (4) above, which includes a list of topics covered, the date of instruction, and the name of the individual who gave the instruction. Such record shall be maintained for inspection by the department for 3 years.
R10 R10 R10	(6)	A licensee shall take the following safety precautions for each patient or human research subject receiving manual brachytherapy or radiopharmaceutical therapy who cannot be released under Rule 64E-5.622, F.A.C.
R10		(a) Post the patient's or human research subject's door with a "Caution: Radioactive Material" sign and note on the door or on the patient's chart where and how long visitors may stay in the patient's room.
R10		(b) Measure promptly, after administration of the dosage, the dose rates in contiguous restricted and unrestricted areas with a radiation measurement survey instrument to demonstrate compliance with the requirements of Rule 64E-5.312, F.A.C. Retain for 3 years a record of each survey that includes the time and date of the survey, a plan of the area or list of points surveyed, the measured dose rate at several points expressed in millirems per hour, the instrument used to make the survey, and the initials of the individual who made the survey.
R10		(c) Provide the patient with radiation safety guidance before authorizing release of the patient that will help to keep radiation dose to household members and the public as low as reasonably achievable.
R10		(d) Notify the RSO and an authorized user immediately if the patient dies or has a medical emergency.

64E-5.633 Manual Brachytherapy Sources Inventory and Surveys.

- (1) The licensee shall maintain accountability at all times for all manual brachytherapy sources in storage or use.
 - (a) As soon as possible each time brachytherapy sources are returned to an area of storage from an area of use, the licensee shall immediately count or otherwise verify the number returned to ensure that all sources taken from the storage area have been returned; and
 - (b) As soon as possible after removing the sources from a patient or a human research subject, the licensee shall immediately count or otherwise verify the number of sources and return them to a secure storage area.
- (2) A licensee shall make a record of the use of manual brachytherapy sources which includes:
 - (a) For temporary implants;
 - 1. The number and activity of sources removed from storage, the room number of use and patient's name, the time and date the sources were removed from storage, the number and activity of sources in storage after the removal, and the name of the individual who removed the sources from storage; and
 - 2. The number and activity of sources returned to storage, the room number of use and patient's name, the time and date the sources were returned to storage, the number and activity of sources in storage after the return, and the name of the individual who returned the sources to storage.
 - (b) For permanent implants;
 - 1. The number and activity of sources removed from storage, the room number of use and patient's name, the time and date the sources were removed from storage, the number and activity of sources in storage after the removal, and the name of the individual who removed the sources from storage;
 - The number and activity of sources returned to storage, the room number of use and patient's name, the time and date the sources were returned to storage, the number and activity of sources in storage after the return, and the name of the individual who returned the sources to storage; and
 - 3. The number and activity of sources permanently implanted in the patient or human research subject.
- (3) Immediately after implanting sources in a patient or human research subject and immediately after removal of sources from a patient or human research subject, the licensee shall make a radiation survey of the patient or human research subject and the area of use to confirm that no sources have been misplaced. The licensee shall make a record of each survey. This record shall contain the date and results of the survey, the survey instrument used and the name of the individual who performed the survey.
- (4) A licensee shall maintain the records required in 64E-5.633(2) and (3) for 3 years.

R10 64E-5.635 Installation, Adjustment, Maintenance and Repair Restrictions. (Entire section Changed) R10 (1) Only a person specifically licensed by the NRC or an agreement state shall R10 install, maintain, adjust, or repair a remote afterloader unit, teletherapy unit, or gamma stereotactic radiosurgery unit that involves work on the source(s) R10 R10 shielding, the source(s) driving unit, or other electronic or mechanical component that could expose the source(s), reduce the shielding around the source(s), or R10 R10 compromise the radiation safety of the unit or the source(s). (2) R10 Except for low dose-rate remote afterloader units, only a person specifically R10 licensed by the NRC or an agreement state shall install, replace, relocate, or remove a sealed source or source contained in other remote afterloader units. R10 R10 teletherapy units, or gamma stereotactic radiosurgery units. R10 (3)For a low dose-rate remote afterloader unit, only a person specifically licensed by the NRC or an agreement state or an authorized medical physicist shall install, R10 replace, relocate, or remove a sealed source(s) contained in the unit. R10 (4) R10 A licensee shall retain a record of the installation, maintenance, adjustment, and R10 repair of remote afterloader units, teletherapy units, and gamma stereotactic radiosurgery units for 3 years. For each installation, maintenance, adjustment R10 and repair, the record must include the date, description of the service, and R10 R10 name(s) of the individual(s) who performed the work. R10 Rulemaking Authority: 404.022, 404.051, 404.061, 404.071, 404.081, 404.141, F.S. Law Implemented: 404.022, 404.051(1)(4)(5)(6)(8)(9)(10)(11), 404.061(2)(3), 404.071(1), 404.081, 404.141, F.S. R10 History: New 8-25-91, Formerly 10D-91.752, Amended 02-11-10. Safety Procedures and Instructions for Remote Afterloader Units, R10 R10 Teletherapy Units, and Gamma Stereotactic Radiosurgery Units. (Entire section Changed) R10 Listed below are the safety and instruction requirements for a licensee:; (1) R10 (a) Secure the unit, the console, the console keys, and the treatment room when not in use or unattended; R10 R10 Permit only individuals approved by the authorized user, RSO, or (b) authorized medical physicist to be present in the treatment room during R10

(d) Develop, implement, and maintain written procedures for responding to an abnormal situation when the operator is unable to place the source(s) in the shielded position, or remove the patient or human research subject from the radiation field with controls from outside the treatment room. These procedures must include the following:

Prevent dual operation of more than one radiation producing device in a

treatment with the source(s);

treatment room if applicable; and

R10 R10		 Instructions for responding to equipment failures and the names of the individuals responsible for implementing corrective actions;
R10 R10		 The process for restricting access to and posting of the treatment area to minimize the risk of inadvertent exposure; and
R10 R10 R10		 The names and telephone numbers of the authorized users, the authorized medical physicist, and the RSO to be contacted if the unit or console operates abnormally.
R10 R10	(2)	A copy of the procedures required by paragraph 64E-5.636(1)(d), F.A.C., of this section must be physically located at the unit console.
R10 R10	(3)	A licensee shall post instructions at the unit console to inform the operator of the following:
R10 R10		(a) The location of the procedures required by paragraph (4)(a) of this section; and
R10 R10 R10		(b) The names and telephone numbers of the authorized users, the authorized medical physicist, and the RSO to be contacted if the unit or console operates abnormally.
R10 R10 R10	(4)	A licensee shall provide instruction, initially and at least annually, to all individuals who operate the unit, as appropriate to the individual's assigned duties, in the following:
R10 R10		(a) The procedures identified in paragraph 64E-5.636(1)(d), F.A.C., of this section; and
R10		(b) The operating procedures for the unit.
R10 R10 R10	(5)	A licensee shall ensure that operators, authorized medical physicists, and authorized users participate in drills of the emergency procedures, initially and at least annually.
R10 R10 R10 R10 R10	(6)	A licensee shall retain a record of individuals receiving instruction required by paragraph 64E-5.636(4), F.A.C., of this section. These records shall be maintained for 3 years and must include the list of topics covered, the date of the instruction, the name(s) of the attendee(s) and the name(s) of the individual(s) who provided the instruction.
R10 R10 R10 R10	(7)	A licensee shall retain a copy of the procedures required by paragraphs 64E-5.636(1)(d) and 64E-5.636(4)(b), F.A.C., until the licensee no longer possesses the remote afterloader, teletherapy unit or gamma stereotactic radiosurgery unit.

64E-5.636

R10 R10	64E-5 and Gamma		Safety Precautions for Remote Afterloader Units, Teletherapy Units, eotactic Radiosurgery Units (Entire section Changed)
R10	(1)		ensee shall control access to the treatment room by a door at each entrance.
R10	(2)		ensee shall equip each entrance to the treatment room with an electrical ock system that shall:
R10		(a)	Prevent the operator from initiating the treatment cycle unless each treatment room entrance door is closed;
R10		(b)	Cause the source(s) to be shielded when an entrance door is opened; and
R10 R10 R10		(c)	Prevent the source(s) from being exposed following an interlock interruption until all treatment room entrance doors are closed and the source(s) on-off control is reset at the console.
R10 R10 R10	(3)	throu	ensee shall require any individual entering the treatment room to assure, igh the use of appropriate radiation monitors, that radiation levels have ned to ambient levels.
R10 R10 R10 R10	(4)	each obse	ept for low-dose remote afterloader units, a licensee shall construct or equip treatment room with viewing and intercom systems to permit continuous rvation of the patient or the human research subject from the treatment ole during irradiation.
R10 R10 R10	(5)	resea	icensed activities where sources are placed within the patient's or human arch subject's body, a licensee shall only conduct treatments which allow for ditious removal of a decoupled or jammed source.
R10 R10	(6)		dition to the requirements specified in paragraphs 64E-5.637(1) through (5), C., of this section, a licensee shall:
R10 R10		(a)	For medium dose-rate and pulsed dose-rate remote afterloader units, require:
R10 R10 R10 R10 R10			An authorized medical physicist and either, an authorized user or a physician, under the supervision of an authorized user, who have been trained in the operation and emergency response for the unit, to be physically present during the initiation of all patient treatments involving the unit; and
R10 R10 R10 R10 R10			2. An authorized medical physicist and either, an authorized user or an individual under, the supervision of an authorized user, who have been trained to remove the source applicator(s) in the event of an emergency involving the unit, to be immediately available during continuation of all patient treatments involving the unit.

R10 (b) For high dose-rate remote afterloader units, require: R10 1. An authorized user and an authorized medical physicist to be physically present during the initiation of all patient treatments R10 R10 involving the unit; and **R10** 2. An authorized medical physicist and either, an authorized user or a R10 physician, under the supervision of an authorized user, who have been trained in the operation and emergency response for the unit, R10 to be physically present during continuation of all patient treatments R10 involving the unit. R10 R10 (c) For gamma stereotactic radiosurgery units, require an authorized user and R10 an authorized medical physicist to be physically present throughout all R10 patient treatments involving the unit. R10 (d) Notify the RSO, or his/her designee, and an authorized user as soon as R10 possible if the patient or human research subject has a medical emergency or dies. R10 R10 (7) A licensee shall have applicable emergency response equipment available near each treatment room in order to respond to a source remaining in the unshielded R10 R10 position or lodged within the patient following completion of the treatment. R10 Rulemaking Authority: 404.022, 404.051, 404.061, 404.071, 404.081, 404.141, F.S. Law Implemented: 404.022, 404.051(1)(4)(5)(6)(8)(9)(10)(11), 404.061(2)(3), 404.071(1), 404.081, 404.141, F.S. R10 History: New 8-25-91, Formerly 10D-91.755, Amended 02-11-10. **Radiation Monitoring Devices.** 64E-5.638 R10 (1) A licensee shall have a permanent radiation monitor in each teletherapy, medium or high dose rate remote afterloader, or gamma stereotactic radiosurgery room R10 R10 capable of continuously monitoring radiation levels. (2) Each radiation monitor shall be capable of providing visible notice of a teletherapy unit, medium or high dose rate remote afterloader unit, or gamma R10 stereotactic radiosurgery unit malfunction that results in an exposed or partially **R10** exposed source. The visible indicator of high radiation levels shall be observable by an individual entering the teletherapy, medium or high dose rate remote R10 afterloader, or gamma stereotactic radiosurgery room. **R10** (3)Each radiation monitor shall be equipped with a backup power supply separate from the power supply to the teletherapy unit, medium or high dose rate remote R10 **R10** afterloader unit, or gamma stereotactic radiosurgery unit. This backup power supply may be a battery system. (4) Each radiation monitor shall be checked daily with a dedicated check source for proper operation before the teletherapy unit, medium or high dose rate remote R10 afterloader unit, or gamma stereotactic radiosurgery unit is used. **R10**

- (5) A licensee shall maintain a record of the check required by subsection 64E-5.638(4), F.A.C., for 3 years. The record shall include the date of the check, notation what the monitor indicates when its detector is and is not exposed to the source, and the initials of the individual who performed the check.
- (6) If a radiation monitor is inoperable, the licensee shall require any individual entering the teletherapy, medium or high dose rate remote afterloader, or gamma stereotactic radiosurgery room to use a radiation survey instrument or audible alarm personal dosimeter to monitor for any malfunction of the source exposure mechanism that may result in an exposed or partially exposed source. The radiation survey instrument or dosimeter shall be checked with a dedicated check source for proper operation at the beginning of each day of use. The licensee shall keep a record as described in subsection 64E-5.638(5), F.A.C.
 - (7) A licensee shall promptly repair or replace the radiation monitor if it is inoperable.
- R10 Rulemaking Authority: 404.022, 404.051, 404.061, 404.071, 404.081, 404.141, F.S. Law Implemented: 404.022, 404.051(1)(4)(5)(6)(8)(9)(10)(11), 404.061(2)(3), 404.071(1), 404.081, 404.141, F.S. R10 History: New 8-25-91, Formerly 10D-91.757, Amended 02-11-10.
- R10 **64E-5.639 Viewing Systems.** A licensee shall construct or equip each teletherapy, medium or high dose rate remote afterloader, or gamma stereotactic radiosurgery room to permit continuous observation of the patient, or human research subject from the teletherapy unit console during irradiation.
- R10 Rulemaking Authority: 404.022, 404.051, 404.061, 404.071, 404.081, 404.141, F.S. Law Implemented: 404.022, 404.051(1)(4)(5)(6)(8)(9)(10)(11), 404.061(2)(3), 404.071(1), 404.081, 404.141, F.S. R10 History: New 8-25-91, Formerly 10D-91.758, Amended 02-11-10.
- R10 64E-5.640 Dosimetry Equipment Used With Remote Afterloading Units, R10 Teletherapy Units, or Gamma Stereotactic Radiosurgery Units.
- R10 (1) Except for low dose-rate remote afterloader source output or where the activity is determined by the manufacturer, a licensee shall have a dosimetry system available for use calibrated by paragraph (a) or (b) below.
 - (a) The system must have been calibrated using a system or source traceable to the NIST and published protocols accepted by nationally recognized bodies; or by a calibration laboratory accredited by the AAPM. The calibration must have been performed within the previous 2 years and after any servicing that may have affected system calibration.
 - (b) The system shall have been calibrated within the previous 4 years and shall have been intercompared 18 to 30 months after the calibration at an intercomparison meeting with another dosimetry system that has been calibrated within the previous 2 years by the NIST or by a calibration laboratory accredited by the AAPM. The intercomparison meeting shall be sanctioned by a calibration laboratory or radiologic physics center accredited by the AAPM. The calibration factor of the licensee's system shall not have changed by more than 2 percent. The licensee shall not use the intercomparison result to change the calibration factor. When intercomparing dosimetry systems to be used for calibrating sealed sources for therapeutic units, the licensee shall use a comparable unit with beam attenuators or collimators, as applicable, and sources of the same radionuclide as the source used at the licensee's facility.

- (2) The licensee shall have available for use a dosimetry system for spot-check measurements. The spot-check system shall be the same system used to meet the requirement in 64E-5.640(1), or shall be a system that has been compared with a system that has been calibrated as provided in subsection 64E-5.640(1), F.A.C. This comparison shall have been performed within the previous year and after each servicing that may have affected system calibration.
- (3) The licensee shall maintain a record of each calibration, intercomparison, and comparison for the duration of the license. For each calibration, intercomparison, or comparison, the record shall include:
- R10
- (a) The date, the manufacturer's name, model numbers and serial numbers of the instruments that were calibrated, intercompared, or compared as required by subsections 64E-5.640(1) and (2), F.A.C.;
- (b) The correction factors that were determined;
- (c) The names of the individuals who performed the calibration, intercomparison, or comparison; and
- R10 Rulemaking Authority: 404.022, 404.051, 404.061, 404.071, 404.081, 404.141, F.S. Law Implemented: 404.022, 404.051(1)(4)(5)(6)(8)(9)(10)(11), 404.061(2)(3), 404.071(1), 404.081, 404.141, F.S. R10 History: New 8-25-91, Formerly 10D-91.759, Amended 02-11-10.

R10 64E-5.641 Full Calibration Measurements on Teletherapy Units.

- (1) A licensee authorized to use a teletherapy unit for medical use shall perform full calibration measurements on each teletherapy unit:
 - (a) Before the first medical use of the unit;
 - (b) Before medical use whenever spot-check measurements indicate that the output differs by more than 5 percent from the output obtained at the last full calibration corrected mathematically for radioactive decay;
 - (c) Before medical use following replacement of the source or following reinstallation of the teletherapy unit in a new location;
 - (d) Before medical use following any repair of the teletherapy unit that includes removal of the source or major repair of the components associated with the source exposure assembly; and
 - (e) At least every 12 months.
- (2) Full calibration measurements shall include the determination of:
 - (a) The output within 3 percent for the range of field sizes and for the distance or range of distances used for medical use;
 - (b) The coincidence of the radiation field and the field indicated by the light beam localizing device;
 - (c) The uniformity of the radiation field and its dependence on the orientation of the useful beam:

- (d) Timer constancy and linearity over the range of use;
- (e) On-off error; and
- (f) The accuracy of all distance measuring and localization devices in medical use.
- (3) A licensee shall use the dosimetry system described in Rule 64E-5.640, F.A.C., to measure the output for one set of exposure conditions. The remaining radiation measurements required in paragraph 64E-5.641(2)(a), F.A.C., may be made using a dosimetry system that indicates relative dose rates.
- (4) A licensee shall make full calibration measurements required by subsection 64E-5.641(1), F.A.C., using the manufacturer's published protocols, published protocols as accepted by nationally recognized bodies or equivalent procedures that have been submitted to the department. An example of a nationally recognized body is the American Association of Physicists in Medicine.
- (5) A licensee shall correct mathematically the outputs determined in paragraph 64E-5.641(2)(a), F.A.C., for physical decay monthly for cobalt 60 and at least every 6 months for cesium 137.
- (6) Full calibration measurements required by subsection 64E-5.641(1), F.A.C., and physical decay corrections required by 64E-5.641(5) shall be performed by the authorized medical physicist.
- (7) A licensee shall maintain a record of each calibration of each teletherapy unit for three years. The record shall include:
 - (a) The date of the calibration;
 - (b) The manufacturer's name, model number, and serial number for both the teletherapy unit and the source;
 - (c) The model numbers and serial numbers of the instruments used to calibrate the teletherapy unit;
 - (d) The results and an assessment of the full calibration to include the following:
 - The tables that describe the output of the unit over the range of field sizes and for the range of distances used in radiation therapy;
 - A determination of the coincidence of the radiation field and the field indicated by the light beam localizing device;
 - The measured timer accuracy for a typical treatment time;
 - The calculated on-off error;
 - The estimated accuracy of each distance measuring or localization device; and
 - 6. The signature of the authorized medical physicist.

R10 Periodic Spot-Checks of Teletherapy Units. 64E-5.642
 - (1) A licensee authorized to use teletherapy units for medical use shall perform output spot-checks on each teletherapy unit at least every month.
 - (2) Spot-checks shall include the determination of:
 - (a) Timer constancy and timer linearity over the range of use;
 - (b) On-off error;
 - (c) The coincidence of the radiation field and the field indicated by the light beam localizing device:
 - (d) The accuracy of all distance measuring and localization devices used for medical use:
 - (e) The output for one typical set of operating conditions; and
 - (f) The difference between the measurement made in paragraph 64E-5.642(2)(e), F.A.C., and the anticipated output, expressed as a percentage of the anticipated output, which is the value obtained at the last full calibration corrected mathematically for physical decay.
 - (3) A licensee shall use the dosimetry system described in Rule 64E-5.640, F.A.C., to make the spot-check required in paragraph 64E-5.642(2)(e), F.A.C.
 - (4) A licensee shall perform spot-checks required by subsection 64E-5.642(1), R10 F.A.C., following procedures established by the authorized medical physicist.
 - R10 (5) A licensee shall have the authorized medical physicist review the results of each output spot-check within 15 days and promptly notify the licensee in writing of the results of each output spot-check. The licensee shall keep a copy of each written notification for 3 years.

;				
R10 R10	(6)	A licensee authorized to use a teletherapy unit for medical use shall perform safety spot-checks of each teletherapy facility monthly and after each source installation.		
	(7)	Safety spot-checks shall assure proper operation of:		
		(a) Electrical interlocks at each teletherapy room entrance;		
		(b) Electrical or mechanical stops installed to limit use of the primary beam of radiation, restriction of source housing angulation or elevation, carriage or stand travel, and operation of the beam on-off mechanism;		
R10		(c) Source exposure indicator lights on the teletherapy unit, on the control console, and in the facility;		
R10		(d) Viewing and intercom_systems;		
		(e) Treatment room doors from inside and outside the treatment room; and		
		(f) Electrically assisted treatment room doors with the teletherapy unit electrical power turned off.		
R10 R10 R10	(8)	If the results of the checks required in subsection 64E-5.642(7), F.A.C., of this section indicate the malfunction of any system, a licensee shall lock the control console in the off position and not use the unit.		
	(9)	A licensee shall promptly repair any system identified in subsection 64E-5.642(7), F.A.C. that is not operating properly. The teletherapy unit shall not be used until all repairs are completed.		
R10 R10	(10)	A licensee shall maintain a record of each spot-check required by 64E-5.642(1) and (6) for 3 years and a copy of the procedures required by subsection 64E-5.641(4), F.A.C., until the licensee no longer possesses the teletherapy unit. The record shall include:		
		(a) The date of the spot-check;		

- (b) The manufacturer's name, model number, and serial number for both the teletherapy unit and source;
- (c) The manufacturer's name, model number and serial number of the instrument used to measure the output of the teletherapy unit;
- (d) The timer linearity and constancy;
- (e) The calculated on-off error;
- (f) A determination of the coincidence of the radiation field and the field indicated by the light beam localizing device;
- (g) The determined accuracy of each distance measuring or localization device;

(h) The difference between the anticipated output and the measured output; (i) Notations indicating the operability of each entrance door electrical interlock, each electrical or mechanical stop, each beam condition indicator light, the viewing system and doors; and R10 The name of the individual who performed the periodic spot-check and the (j) signature of the authorized medical physicist who reviewed the record of R10 R10 the spot check. R10 Rulemaking Authority: 404.022, 404.051, 404.061, 404.071, 404.081, 404.141, F.S. Law Implemented: 404.022, 404.051(1)(4)(5)(6)(8)(9)(10)(11), 404.061(2)(3), 404.071(1), 404.081, 404.141, F.S. R10 64E-5.6423 Additional Technical Requirements for Mobile Remote Afterloader Units. (Entire section New) R10 (1) A licensee providing mobile remote afterloader service for medical use shall **R10** perform the following: **R10** Check survey instruments before medical use at each address of use or (a) **R10** on each day of use, whichever is more frequent; and R10 (b) Account for all sources before departure from a client's address of use. R10 In addition to the periodic spot-checks required by Rule 64E-5.6421, F.A.C., a (2) licensee authorized to use mobile afterloaders for medical use shall perform R10 checks on each remote afterloader unit before use at each address of use. At a **R10** R10 minimum, checks must be made to verify the operation of the following: **R10** (a) Electrical interlocks on treatment area access points; R10 (b) Source exposure indicator lights on the remote afterloader unit, on the R10 control console, and in the facility: Viewing and intercom systems; R10 (c) R10 (d) Applicators, source transfer tubes, and transfer tube-applicator interfaces; **R10** Radiation monitors used to indicate room exposures; (e) R10 (f) Source positioning (accuracy); and **R10** (g) Radiation monitors used to indicate whether the source has returned to a R10 safe shielded position. R10 (3)In addition to the requirements for checks in subsection 64E-5.6423(2), F.A.C., a licensee shall ensure overall proper operation of the remote afterloader unit by R10 conducting a simulated cycle of treatment before use at each address of use. R10 **R10** (4) If the results of the checks required in subsection 64E-5.6423(2), F.A.C., indicate the malfunction of any system, a licensee shall lock the control console in the off R10 R10 position and not use the unit except as may be necessary to repair, replace, or R10 check the malfunctioning system. R10 (5) The licensee shall keep a copy of each check for mobile remote afterloader unit required by subsection 64E-5.6423(2), F.A.C., for three years. The records shall R10 include: R10 R10 (a) The date of the check; **R10** (b) The manufacturer's name, model number, and serial number of the R10 remote afterloader unit; R10 (c) Notations accounting for all sources before the licensee departs from a R10 facility;

- Florida Administrative Code 64E-5 64E-5.643 R10 Notations indicating the operability of each entrance door electrical (d) R10 interlock, radiation monitors, source exposure indicator lights, viewing and intercom system, applicators, source transfer tubes, and transfer tube R10 applicator interfaces, and source positioning accuracy; and R10 R10 (e) The signature of the individual who performed the check. R10 Rulemaking Authority: 404.022, 404.051, 404.061, 404.071, 404.081, 404.141 FS.. R10 History: New 02-11-10. 64E-5.643 Radiation Surveys for Teletherapy Facilities. (1) The licensee shall perform radiation surveys with an operable radiation survey instrument calibrated as provided in Rule 64E-5.615, F.A.C., before medical use, R2 after each installation of a teletherapy source; following repairs to the source(s) R12 driving unit, or other electronic or mechanical component that could expose the R12 source(s), reduce shielding around the source(s), or compromise the radiation R12 safety of the unit or the source(s); and after making any change for which an R12 amendment is required by Rule 64E-5.636, F.A.C. The maximum and average radiation levels levels from the surface of the R12 (a) main source(s) safe with the source(s) in the shielded position do not R12 exceed the levels stated in the Sealed Source and Device Registry. R12 (b) With the teletherapy source in the on position with the largest clinically available treatment field and with a scattering phantom in the primary beam of radiation, radiation levels in restricted areas shall be unlikely to cause any occupationally exposed individuals to receive a dose in excess R2 of the limits specified in Rule 64E-5.304, F.A.C.; and radiation dose rates R2 of any individual member of the public in unrestricted areas shall not R2
 - (2) If the results of the surveys required in subsection 64E-5.643(1), F.A.C., indicate any radiation levels in excess of the limits specified, the licensee shall lock the control in the off position and shall not use the unit:

exceed the limits specified in paragraph 64E-5.312(1)(c), F.A.C.

- (a) Except to repair, replace, or test the teletherapy unit, the teletherapy unit shielding, or the treatment room shielding; or
- (b) Until the licensee has received a specific exemption from the department.
- (3) A licensee shall maintain a record of the radiation measurements made following installation of a source for the duration of the license. The record shall include:
 - (a) The date of the measurements;

R2

- (b) The reason the survey is required;
- (c) The manufacturer's name, model number and serial number of the teletherapy unit, the source, and the instrument used to measure radiation levels;

R10 64E-5.644 Radiation Surveys for Remote Afterloader and Gamma Stereotactic R10 Radiosurgery Facilities. (Entire section Changed)

- R10 (1) The licensee shall perform radiation surveys with an operable radiation survey instrument calibrated as provided in Rule 64E-5.615, F.A.C., to ensure that the maximum radiation levels and average radiation levels from the surface of the main source safe with the source(s) in the shielded position do not exceed the levels stated in the Sealed Source and Device Registry.
- R10 (2) The licensee shall make the survey specified in subsection 64E-5.644(1), F.A.C., at the installation of a new source and following repairs to the source(s) shielding, the source(s) driving unit, or other electronic or mechanical component that could expose the source, reduce the shielding around the source(s), or compromise the radiation safety of the unit or the source(s).
- R10 (3) A licensee shall retain a record of the radiation surveys required by subsection 64E-5.644(1), F.A.C., for the duration of the license. These records shall include: R10
 - (a) The date of the measurements;
 - (b) The manufacturer's name, model number and serial number of the treatment unit, source, and instrument used to measure radiation levels;
 - (c) Each dose rate measured around the source while the unit is in the off position and the average of all measurements; and
- R10 (d) The signature of the RSO or authorized medical physicist who performed the test.

R10 Rulemaking Authority: 404.022, 404.051, 404.061, 404.071, 404.081, 404.141, F.S. Law Implemented: 404.022, 404.051(1)(4)(5)(6)(8)(9)(10)(11), 404.061(2)(3), 404.071(1), 404.081, 404.141, F.S. R10 History: New 8-25-91, Formerly 10D-91.763, Amended 02-11-10.

	64E-5	5.645 Remote Afterloader, Gamma Stereotactic and Teletherapy Therapy-
Relate	ed Cor	mputer Systems. The licensee shall perform acceptance testing on the
		anning system of high, medium, low, pulsed dose-rate remote afterloaders,
		eotactic, and teletherapy therapy-related computer systems in accordance with
		otocols accepted by nationally recognized bodies. An example of a nationally
_		oody is the American Association of Physicists in Medicine. At a minimum, the
accep	tance t	testing must include, as applicable, verification of the following:
	(4)	-
	(1)	The source-specific input parameters required by the dose calculation algorithm;
	(2)	The accuracy of dose, dwell time, and treatment time calculations at
	(2)	representative points;
		representative points,
	(3)	The accuracy of isodose plots and graphic displays;
	(0)	grapino disensas y er resistas prete arra grapino diseptaye,
	(4)	The accuracy of the software used to determine sealed source positions from
		radiographic images; and
	(5)	The accuracy of electronic transfer of the treatment delivery parameters to the
		treatment delivery unit from the treatment planning system.

64E-5.646 Reports of Teletherapy Surveys, Checks, Tests, and Measurements. A licensee shall furnish a copy of the records required in Rules 64E-5.643, 64E-5.644, and 64E-5.645, F.A.C., and the output from the teletherapy source expressed as rads (grays) per hour at 1 meter from the source as determined during the full calibration required in Rule 64E-5.641, F.A.C., to the department within 30 days following completion of the action that initiated the record requirement.

Specific Authority: 404.022, 404.051, 404.061, 404.071, 404.081, 404.141, F.S. Law Implemented: 404.022, 404.051(1)(4)(5)(6)(8)(9)(10)(11), 404.061(2)(3), 404.071(1), 404.081, 404.141, F.S. History: New 8-25-91, Formerly 10D-91.765.

R10 **64E-5.647** Five Year Inspection for Teletherapy and Gamma Stereotactic R10 Radiosurgery Units.

- R10 (1) A licensee shall have each teletherapy unit and gamma stereotactic radiosurgery unit fully inspected and serviced during source replacement or at least every 5 years, whichever comes first, to assure proper functioning of the source exposure mechanism.
 - (2) This inspection and servicing shall only be performed by persons specifically licensed to do so by the department, an agreement state, or the U.S. Nuclear Regulatory Commission.

- 64E-5
- A licensee shall maintain a record of the inspection and servicing for the duration (3)of the license. The record shall contain:
 - (a) The inspector's name;
- R10 (b) The inspector's radioactive materials license number;
 - The date of inspection; (c)
 - The manufacturer's name and model number and serial number for both (d) the treatment unit and source;
 - (e) A list of components inspected;
 - (f) A list of components serviced and the type of service;
 - (g) A list of components replaced; and
 - (h) The signature of the inspector.
- R10 Rulemaking Authority: 404.022, 404.051, 404.061, 404.071, 404.081, 404.141, F.S.

SUBPART I TRAINING AND EXPERIENCE REQUIREMENTS

Is certified by a specialty board whose certification process has been recognized

Training for a Radiation Safety Officer. Except as provided in Rule R10 64E-5.657, F.A.C., the licensee shall require the RSO as provided in Rule 64E-5.605, F.A.C., to be an individual who: (Entire section Changed)

` ,		
R10	by the NRC	or an agreement state and who meets the requirements in
R10	subsections	64E-5.648(4) and (5), F.A.C., of this section. (The names of board
R10	certifications	which have been recognized by the NRC or an agreement state will
R10	be posted or	the NRC's Web page at http://www.nrc.gov/materials/miau/med-
R10	use-toolkit/sp	pec-board-cert.html.) To have its certification process recognized, a
R10	•	ard shall require all candidates for certification to:
	,	
R10	(a)	 Hold a bachelor's or graduate degree from an accredited
R10		college or university in physical science or engineering or biological
R10		science with a minimum of 20 college credits in physical science;
R10	2.	Have 5 or more years of professional experience in health physics
R10		(graduate training may be substituted for no more than 2 years of
R10		the required experience) including at least 3 years in applied health

physics; and

3. Pass an examination administered by diplomates of the specialty board, which evaluates knowledge and competence in radiation physics and instrumentation, radiation protection, mathematics pertaining to the use and measurement of radioactivity, radiation biology, and radiation dosimetry; or

:			
R10 R10 R10		(b)	 Hold a master's or doctor's degree in physics, medical physics, other physical science, engineering, or applied mathematics from an accredited college or university;
R10 R10			 Have 2 years of full-time practical training and/or supervised experience in medical physics either:
R10 R10 R10			a. Under the supervision of a medical physicist who is certified in medical physics by a specialty board recognized by the NRC or an agreement state; or
R10 R10 R10 R10			b. In clinical nuclear medicine facilities providing diagnostic or therapeutic services under the direction of physicians who meet the requirements for authorized users in Rule 64E-5.657, 64E-4.650 or 64E-5.660, F.A.C.;
R10 R10 R10 R10			 Pass an examination, administered by diplomates of the specialty board, that assesses knowledge and competence in clinical diagnostic radiological or nuclear medicine physics and in radiation safety; or
R10	(2)	Have	completed a structured educational program consisting of both:
R10		(a)	200 hours of classroom and laboratory training in the following areas:
R10			1. Radiation physics and instrumentation;
R10			2. Radiation protection;
R10			 Mathematics pertaining to the use and measurement of radioactivity;
R10			4. Radiation biology; and
R10			5. Radiation dosimetry.
R10 R10 R10 R10		(b)	One year of full-time radiation safety experience under the supervision of the individual identified as the RSO on a NRC or agreement state license or permit issued by a NRC master material licensee that authorizes similar type(s) of use(s) of radioactive material involving the following:
R10			1. Shipping, receiving, and performing related radiation surveys;
R10 R10 R10			 Using and performing checks for proper operation of instruments used to determine the activity of dosages, survey meters, and instruments used to measure radionuclides;
R10			Securing and controlling radioactive material;
R10 R10			 Using administrative controls to avoid mistakes in the administration of radioactive material;

64E-5.648

R10		 Using procedures to prevent or minimize radioactive contamination and using proper decontamination procedures;
R10		6. Using emergency procedures to control radioactive material; and
R10		Disposing of radioactive material; or
R10 R10 R10 R10 R10 R10 R10	(3)	(a) Is a medical physicist who has been certified by a specialty board whose certification process has been recognized by the NRC or an agreement state under subsection 64E-5.656(1), F.A.C., and has experience in radiation safety for similar types of use of radioactive material for which the licensee is seeking the approval of the individual as RSO and who meets the requirements in subsections 64E-5.648(4) and (5), F.A.C., of this section; or
R10 R10 R10 R10		(b) Is an authorized user, authorized medical physicist, or authorized nuclear pharmacist identified on the licensee's license and has experience with the radiation safety aspects of similar types of use of radioactive material for which the individual has RSO responsibilities; and
1110		
R10 R10 R10 R10 R10 R10 R10 R10 R10	(4)	Have obtained written attestation, signed by a preceptor RSO, or residency program director who represents a consensus of residency program faculties (as long as at least one member of the residency program faculty is an authorized individual in the same category as designated by the applicant seeking authorized status) who meets the requirements in subsection 64E-5.648(5) and in subparagraphs 64E-5.648(1)(a)1., and 64E-5.648(1)(a)2., or 64E-5.648(1)(b)1., and 64E-5.648(1)(b)2., or subsection 64E-5.648(2) or paragraph 64E-5.648(3)(a), F.A.C., of this section, and has demonstrated the ability to function independently as a RSO to fulfill the radiation safety related duties for a medical use licensee; and
R10 R10 R10 R10 R10 R10 R10 R10 R10 R10	(5)	Have obtained written attestation, signed by a preceptor RSO, or residency program director who represents a consensus of residency program faculties (as long as at least one member of the residency program faculty is an authorized individual in the same category as designated by the applicant seeking authorized status) who meets the requirements in subsection 64E-5.648(5) and in subparagraphs 64E-5.648(1)(a)1., and 64E-5.648(1)(a)2., or 64E-5.648(1)(b)1., and 64E-5.648(1)(b)2., or subsection 64E-5.648(2) or paragraph 64E-5.648(3)(a), F.A.C., of this section, and has demonstrated the ability to function independently as a RSO to fulfill the radiation safety related

R10 64E-5.659 Training for an Authorized Nuclear Pharmacist. Except as provided in Rule

R10 64E-5.657, F.A.C., the licensee shall require the authorized nuclear pharmacist to:

(Entire section New) R10 (1) Be certified by a specialty board whose certification process has been recognized by the NRC or an agreement state and who meets the requirements R10 in paragraph 64E-5.659(2)(b), F.A.C., of this section. (The names of board R10 R10 certifications which have been recognized by the NRC or an agreement state will R10 be posted on the NRC's Web page at http://www.nrc.gov/materials/miau/meduse-toolkit/spec-board-cert.html.) To have its certification process recognized, a R10 specialty board shall require all candidates for certification to: R10 R10 Have graduated from a pharmacy program accredited by the American (a) Council on Pharmaceutical Education (ACPE) or have passed the Foreign R10 Pharmacy Graduate Examination Committee (FPGEC) examination; R10 (b) Hold a current, active license to practice pharmacy; R10 Provide evidence of having acquired at least 4000 hours of R10 (c) training/experience in nuclear pharmacy practice. Academic training may R10 be substituted for no more than 2000 hours of the required training and R10 experience; and R10 R10 (d) Pass an examination in nuclear pharmacy administered by diplomats of the specialty board, that assess knowledge and competency in R10 procurement, compounding, quality assurance, dispensing, distribution, R10 health and safety, radiation safety, provision of information and R10 consultation, monitoring patient outcomes, research and development; or R10 R10 (2) Have completed 700 hours in a structured educational program R10 consisting of both: R10 1. 200 hours of classroom and laboratory training in the following R10 areas: R10 a. Radiation physics and instrumentation; R10 b. Radiation protection; R10 C. Mathematics pertaining to the use and measurement of radioactivity: R10 R10 d. Chemistry of radioactive material for medical use; and **R10** Radiation biology; and e.

R10	2.	Supervised practical experience in a nuclear pharmacy involving:
R10 R10		 Shipping, receiving, and performing related radiation surveys;
R10 R10 R10 R10		 Using and performing checks for proper operation of instruments used to determine the activity of dosages, survey meters, and, if appropriate, instruments used to measure alpha or beta-emitting radionuclides;
R10 R10		 Calculating, assaying, and safely preparing dosages for patients or human research subjects;
R10 R10		 Using administrative controls to avoid medical events in the administration of radioactive material; and
R10 R10 R10		e. Using procedures to prevent or minimize radioactive contamination and using proper decontamination procedures; and
R10 R10 R10 R10 R10 R10 R10 R10	or a reprogramment of the programment of the progra	obtained written attestation, signed by a preceptor authorized user esidency program director who represents a consensus of residency am faculties (as long as at least one member of the residency am faculty is an authorized individual in the same category nated by the applicant seeking authorized status) who meets the ements in paragraphs 64E-5.659(1)(a), 64E-5.659(1)(b) and .659(1)(c) or 64E-5.659(2)(a), F.A.C., of this section and have natrated the ability to function independently as an authorized ar pharmacist to fulfill the radiation safety related duties for a medical censee.
R10 R10 R10	Law Implemented 404.022, 404.05	4.051, 404.061, 404.071, 404.081, 404.141 FS. 51(1), (4), (5), (6), (8), (9), (10), (11), 404.061(2), (3), 404.071(1), 404.081, 404.141 FS.

64E-5.659

R10 64E-5.660 Training for Use of Unsealed Radioactive Material for Which a Written R10 Directive Is Required in Rule 64E-5.626, 64E-5.627 or 64E-5.630, F.A.C. Except as R10 provided in Rule 64E-5.657, F.A.C., the licensee shall require the authorized user of unsealed R10 radioactive materials specified in Rule 64E-5.626, 64E-5.627 or 64E-5.630, F.A.C., which R10 require a written directive to: (Entire section New) R10 (1) Be certified by a medical specialty board whose certification process has been R10 recognized by the NRC or an agreement state and who meets the requirements R10 in sub-subparagraphs 64E-5.660(2)(a)2.g. and paragraph 64E-5.660(2)(b), F.A.C., of this section. (Specialty boards whose certification processes have R10 been recognized by the NRC or an agreement state will be posted on the NRC's R10 Web page at http://www.nrc.gov/materials/miau/med-use-toolkit/spec-board-R10 cert.html.) To be recognized, a specialty board shall require all candidates for R10 certification to: R10 R10 Successfully complete residency training in a radiation therapy or nuclear (a) medicine training program or a program in a related medical specialty. R10 These residency training programs must include 700 hours of training and R10 experience as described in subparagraph 64E-5.660(2)(a)1. through sub-R10 subparagraph 64E-5.660(2)(a)2.e., F.A.C., of this section. Eligible training R10 R10 programs must be approved by the Residency Review Committee of the Accreditation Council for Graduate Medical Education, the Royal College R10 of Physicians and Surgeons of Canada, or the Committee on Post-R10 Graduate Training of the American Osteopathic Association; and R10 (b) Pass an examination, administered by diplomats of the specialty board, which tests knowledge and competence in radiation safety, radionuclide R10 handling, quality assurance, and clinical use of unsealed radioactive R10 material for which a written directive is required; or R10 R10 (2) Have completed 700 hours of training and experience, including a (a) minimum of 200 hours of classroom and laboratory training, in basic R10 radionuclide handling techniques applicable to the medical use of R10 unsealed radioactive material requiring a written directive. The training R10 and experience must include the following: R10 R10 1. Classroom and laboratory training in the following areas: R10 a. Radiation physics and instrumentation; R10 b. Radiation protection; R10 C. Mathematics pertaining to the use and measurement of R10 radioactivity; R10 d. Chemistry of radioactive material for medical use; and **R10** e. Radiation biology; and
