

Association of Emergency Medical Service Providers

November 17, 2015

Dave Dyal, President, called meeting to order at 1009 AM.

Self-introductions (sign in sheet attached) of all present.

The EMSTARS data has had several changes over the past few months but is moving forward in its ease of use for providers and, in particular, the long awaited portion of data reports. Validation of data using the “Safety Pad” is still not ready and further information should be forthcoming.

Projected legislation to include changes to COPCNs and their corresponding county ordinances; 64J-1 will be sent to all providers before the end of the year; a public hearing workshop will also be noticed to all to garner additional/less changes for this document.

In particular, concerns for ambulance standards and the costs involved for new units being built and any retrofits as GSA guidelines are in the process of “sun setting” leaving unclear direction for builders to follow on future ambulances.

Due to time constraints, meeting ended with some brief interjections of business from providers around the state.

Meeting adjourned at 1045 AM

Respectfully submitted,
Cheryl Rashkin, Secretary

Association of Emergency Medical Service Providers

Attendance at 11/11/15 AEMSP meeting:

Dave Dyal	Stuart Fire Rescue
