Alachua County Community Health Improvement Plan (CHIP) Revised December 2019

This is a revised edition of the 2017-2020 Alachua County Community Health Improvement Plan (CHIP).

Revisions in the CHIP were made after careful review of the goals, objectives, strategies and measures of the 2017 – 2020 CHIP. Revisions in the CHIP are as agreed upon in the Annual CHIP Steering Committee Review Meeting that was held on December 06, 2020

Recommended changes were made based on the following parameters:

- Availability of data to monitor progress – performance measures that had county-level data available were preferred, etc.
 - Availability of resources
 - Community readiness
 - Evident progress
 - Alignment of goals
-

Community Health Improvement Plan Alachua County, Florida

INTRODUCTION

Alachua County has been working towards its vision “A community where everyone can be healthy” since November 2012. For the past four years, this community has reached some of the goals and objectives established in 2012 but many remain unmet. In August 2015, the Community Health Improvement Plan (CHIP) Steering committee agreed to move forward with a new Community Health Assessment (CHA) to guide a new CHIP for Alachua County. The Florida Department of Health in Alachua County partnered with UF Health and engaged the services of WellFlorida Council to complete the CHA. The CHA was published in June of 2016. This document is available on the FDOH-Alachua website -

<http://alachua.floridahealth.gov/files/documents/publications/documents/2016-cha.pdf>

The Vision

The Community Health Improvement Plan (CHIP) Steering Committee’s vision for Alachua County remains the same as in 2012: **A Community Where Everyone Can Be Healthy**

The Process

Alachua County again selected the Mobilizing for Action through Planning and Partnerships (MAPP) process for community planning. MAPP is a nationally recognized model and best practice for completing needs assessments and improvement plans. The MAPP tool was developed by the National Association of County and City Health Officials (NACCHO) in cooperation with the Public Health Practice Program Office at the Centers for Disease Control and Prevention (CDC). NACCHO and the CDC’s vision for implementing MAPP is “Communities achieving improved health and quality of life by mobilizing partnerships and taking strategic action.”

MAPP employs four assessments, which offer critical insight into challenges and opportunities throughout the community.

- The Community Strengths and Themes Assessment provides an understanding of the issues residents feel are important by answering the questions “*What is important to our community?*”, “*How is quality of life perceived in our community?*” and “*What assets do we have that can be used to improve community health?*”
- The Local Public Health System Performance Assessment is a comprehensive assessment of the organizations and entities that contribute to the public’s health. The Local Public Health System Performance Assessment addresses the questions “*What are the activities, competencies, and capacities of our local health system?*” and “*How are Essential Services being provided to our community?*”

- The Community Health Status Assessment identifies priority issues related to community health and quality of life. Questions answered during this phase include *“How healthy are our residents?”* and *“What does the health status of our community look like?”*
- The Forces of Change Assessment focuses on the identification of forces such as legislation, technology and other issues that affect the context in which the community and its public health system operates. This answers the questions *“What is occurring or might occur that affects the health of our community or the local health system?”* and *“What specific threats or opportunities are generated by these occurrences?”*

Each assessment was conducted and described in a written report and the findings of all the assessments were summarized in the Community Health Assessment and the Technical Appendix. The CHA has been designed to work in concert with the Technical Appendix. While the CHA presents data and issues at a higher, more global level for the community, all the data in the CHA that have identified these global health issues for the community are addressed in granular level detail in the Technical Appendix.

The intersecting themes that arose from the CHA include the following

Social Determinants

- Lack of Access to Healthy Foods
- Access to Healthcare Services (including Medical, Dental, and Mental Health/Substance Abuse)
- High Poverty Rate for Adults and Children
- Income Disparity

Health Status Measures

- Overweight/Obesity, Poor Eating Habits and Physical Inactivity fueling Chronic Disease
- Health Outcome Disparities among Race and Ethnicities
- Sexually Transmitted Infections (Chlamydia) Higher in Alachua County compared to Florida
- Higher Rates of Alcohol Abuse compared to Florida
- Lower Life Expectancies regardless of Race or Sex compared to Florida

Healthcare Access and Utilization

- Inappropriate Use of Hospitals Due to Dental Issues
- Inappropriate Use of Hospitals Due to Substance Abuse
- Lack of Access to Primary Care
- Shortage of Mental Health Care Providers
- Shortage of Medicaid Dental Providers (for all ages)

It was interesting to note that these themes were very similar to what Alachua County had focused on for the past four years. On June 27, 2016, the CHIP steering committee came together to define the goals and objectives. Poverty and violence came up as important issues and the group felt they needed to be addressed. They met in small groups and made recommendations by consensus on the goals and objectives. Since there are so many groups/coalitions already working together in many of these areas, the steering committee agreed it would be best to adopt those same objectives. For example, the group wanted to

adopt the Healthiest Weight objectives, the Florida Healthy Baby objectives and several others. Since these groups are comprised of community members and they had already worked to develop the objectives, it made sense to adopt those objectives. Some could not be adopted so they had to be created from scratch. Copies of the CHA and Technical Appendix were used by the groups to assist in their recommendations. They were able to review the data in these documents as they developed their recommendations. All their recommendations were compiled and then a conference call was conducted on August 9, 2016, to review the recommendations. Many email comments were accepted as well. On October 16, 2016, a final email was sent out for review. The goals and objectives were finalized on October 21, 2016.

The overarching goals selected for the Alachua County CHIP are the same as in 2012:

- To ensure access to comprehensive care for all Alachua County residents
- To promote wellness among all Alachua County residents

Engaging the Community

Alachua County has been very fortunate to have an active, informed and passionate community who are always willing to come together to address issues in the community, including health. A diverse group of individuals representing City and County government, the school board, the faith community, hospitals, insurance companies, the homeless population, behavioral healthcare, academia (including dental and health disparities), violence prevention, tobacco policy and prevention, housing authority, family medicine, rural health, public health, public housing and social services all participate in the CHIP steering committee. Many of these same partners have agreed to participate in the implementation plan by conducting the activities described in the work plan. The two main groups who oversee the CHIP implementation are the Safety Net Collaborative and the Healthy Communities group. Both groups were formed as a result of the 2012 CHIP. The Safety Net Collaborative oversees the Access to Care goal and the Healthy Communities group oversees the Community Wellness goal. These groups have been engaged and committed since 2012 and will continue their work with the 2016 CHIP.

About the Plan

The Alachua County Community Health Improvement Plan includes goals and objectives for four years. The goals, objectives and strategies are aligned with the State Health Improvement Plan (SHIP) and Healthy People 2020. The 2017 SHIP is not complete yet but the State has determined seven priority health issues:

1. Behavioral Health (including Mental Illness and Substance Abuse)
2. Chronic Diseases and Conditions (including Cancer and Tobacco-related Illnesses)
3. Healthy Weight, Nutrition and Physical Activity
4. Immunizations
5. Injury, Safety and Violence
6. Maternal and Child Health
7. Sexually Transmitted Diseases (STDs) and Other Infectious Diseases (including Influenza)

The CHIP objectives use quantifiable performance measures, many of which are based on data included in the community health assessment.

Monitoring the CHIP will be done by the CHIP steering committee with support from staff and volunteers at the Florida Department of Health in Alachua County. The Safety Net Collaborative and the Healthy Communities group will also play a role in monitoring the CHIP. The Safety Net Collaborative will oversee the Access to Care goal and objectives and the Healthy Communities group will oversee the Community Wellness goal and objectives. These groups will make recommendations to the CHIP steering committee on an annual basis so the CHIP can be revised as needed. The Alachua County Health Care Advisory Group (an advisory group to the Alachua County Board of County Commissioners) will also be informed on the progress of the CHIP. This group meets six times year and there is a health department position who reports on the status of the CHIP at each meeting. As noted in objective AC1.1.1, a report will be delivered to the Alachua County Board of County Commissioners on an annual basis. All revisions to the CHIP will be posted on the Florida Department of Health in Alachua County website.

The implementation of the CHIP will be conducted by all the agencies and partners listed in the work plan. As stated previously many of these objectives have been adopted from the established groups in the County. This was an efficient way to engage many more subject matter experts in the process and help to create buy-in while preventing duplication of services. Of the twelve goals in the CHIP, seven are adopted from established groups in the community. This also allows the CHIP to function with existing resources since funding specifically for the CHIP is scarce.

At the time of this writing, GNV4ALL is a group working in the community to improve the lives of Alachua County residents. The major focus areas include education, housing and transportation, criminal justice and jobs and families. Making improvements in any of these areas will help to address some of the social determinants of health. More information about GNV4ALL is available at <http://gnv4all.com/>.

ALACHUA COUNTY COMMUNITY HEALTH IMPROVEMENT PLAN GOALS AND OBJECTIVES

GOAL ONE

STRATEGIC GOAL AC: Residents of Alachua County will be able to access comprehensive primary care and preventive services.

Goal AC1: Assess progress in addressing utilization of services and barriers to care.

Strategy AC1.1 Collaboratively assess and report Alachua County's health care resources and needs, including patterns of health care utilization and barriers to care.

Objective AC1.1.1

By December 31, 2017, a semi-annual report will be presented to the CHIP steering committee and an annual report will be presented to the Alachua County Board of County Commissioners.

By December 31, 2020, 8 semi-annual reports will be presented to the CHIP steering committee and four annual reports will be presented to the Alachua County Board of County Commissioners.

Objective AC1.1.2

By December 31, 2017, the CHIP Steering Committee will review indicators of access to care by comparing indicators to plan objectives and modifying and updating the plan if needed.

By December 31, 2020, the CHIP Steering Committee will annually review indicators of access to care by comparing indicators to plan objectives and modifying and updating the plan if needed.

Goal AC2: Improve access to primary care services.

Strategy AC2.1 Increase access to third party coverage and other resources to maintain and expand safety net services and supplies.

Objective AC2.1.1

By December 31, 2017, the three-year rolling rate of avoidable hospitalizations will be $\leq 1202.9/100,000$.

By December 31, 2020, the three-year rolling rate of avoidable hospitalizations will be $\leq 1000/100,000$.

Objective AC2.1.2

By December 31, 2017, the percent of people who report they could not see a doctor at least once in the past year due to cost will be $\leq 18\%$.

By December 31, 2020, the percent of people who report they could not see a doctor at least once in the past year due to cost will be $\leq 12.7\%$.

Objective AC2.1.3

By December 31, 2017, the percent of uninsured children under 19 and $\leq 200\%$ of poverty will be $\leq 16\%$.

By December 31, 2020, the percent of uninsured children under 19 and $\leq 200\%$ of poverty will be $\leq 13\%$.

Goal AC3: Improve access to behavioral health services so all adults, children and families can be active, self-sufficient participants of community life.

Strategy AC3.1 Increase access to substance abuse and mental health services and increase awareness and education regarding behavioral health.

Objective AC3.1.1

By December 31, 2017, 10% of Alachua County residents will have successfully completed training in Mental Health First Aid.

By December 31, 2020, the number of Alachua County residents will have successfully completed training in Mental Health First Aid will increase between 2016 and 2020.

Objective AC3.1.2

By December 31, 2017, develop and implement a Centralized Receiving System.

By December 31, 2020, develop and implement a coordinated system of care to improve access to behavioral health so all adults/children and families can be active, self-sufficient participants in community life.

Goal AC4: Enhance access to preventive and restorative oral health care.

Strategy AC4.1 Implement recommendations of the Oral Health Coalition regarding increasing access to care by expanding the capacity of the safety net.

Objective AC4.1.1

By December 31, 2017, the age-adjusted rate of ER visits for dental problems will be $\leq 100/10,000$.

By December 31, 2020, the age-adjusted rate of ER visits for dental problems will be $\leq 80/10,000$.

Goal AC5: Reduce infant morbidity and mortality.

Strategy AC5.1 Implement programs and policies that encourage avoidance of unintended pregnancy.

Objective AC5.1.1

By December 31, 2017, decrease the percentage of birth intervals less than 18 months from 37.9% to 35.9%.

By December 31, 2020, decrease the percentage of birth intervals less than 18 months from 37.9% to 34.9%

**ALACHUA COUNTY COMMUNITY HEALTH IMPROVEMENT PLAN
GOALS AND OBJECTIVES
GOAL TWO**

STRATEGIC GOAL CW: Promote wellness among all Alachua County residents.

Goal CW1: Increase the percentage of adults and children who are at a healthy weight and advance health equity through healthy places.

Strategy CW1.1 Increase breastfeeding initiation and duration.

Objective CW1.1.1

By December 31, 2017, the number of birthing facilities working toward achieving the 10 Steps to Successful Breastfeeding will be >1.

By December 31, 2020, the number of birthing facilities working toward achieving the 10 Steps to Successful Breastfeeding will be >3.

Strategy CW1.2 Increase the number of Early Care and Education (ECE) Centers implementing best practices related to physical activity and nutrition.

Objective CW1.2.1

By December 31, 2017, the number of ECE Centers recognized for achieving best practices will be > 1.

By December 31, 2020, the number of ECE Centers recognized for achieving best practices will be >6.

Strategy CW1.3 Increase the number of schools and school districts implementing best practices related to physical activity and nutrition.

Objective CW1.3.1

By December 31, 2017, the number of schools recognized through HUSSC: SL (Healthier US School Challenge: Smarter Lunchrooms) will be ≥ 10 .

By December 31, 2020, the number of schools recognized through HUSSC: SL (Healthier US School Challenge: Smarter Lunchrooms) will be ≥ 15 .

Strategy CW1.4 Increase the number of health care settings promoting chronic disease prevention strategies and programs.

Objective CW1.4.1

By December 30, 2017, the number of adults that have ever been told they have high blood pressure will decrease from 29% to 27%.

By December 30, 2020, the number of adults that have ever been told that they have high blood pressure will decrease from 29% to 25%.

Strategy CW1.5 Increase the number of cities and counties working to advance health equity by implementing best practices related to physical activity and nutrition.

Objective CW1.5.1

By December 30, 2017, the number of cities, counties, and municipalities recognized annually as Community Champions will be ≥ 2 .

By December 30, 2020, the number of cities, counties, and municipalities recognized annually as Community Champions will be ≥ 4 .

Goal CW2: Reduce chronic disease morbidity and mortality.

Strategy CW2.1 Partner agencies and organizations will collaborate to support implementation of initiatives that promote healthy behaviors.

Objective CW2.1.1

By December 31, 2017, the number of provider agencies participating in the United Way 211 system will increase by 20%.

By December 31, 2020, the Alachua County Community Resource Guide will be updated annually.

Goal CW3: Reduce illness, disability and death related to tobacco use and substance abuse.

Strategy CW3.1 Prevent youth and young adults from initiating tobacco use.

Objective CW3.1.1

By December 31, 2017, educate six decision makers on the proximity of tobacco retail outlets to K-12 schools in Alachua County.

By December 31, 2020, reduce the number of tobacco retail outlets within 1,000 feet of schools by 35%, from 23 to 15 retail outlets.

Objective CW3.1.2

By December 31, 2017, increase the percentage of public school (K-12 and higher education) campuses in Alachua County with a tobacco-free campus policy to 75%.

By December 31, 2020, increase the percentage of public school (K-12 and higher education) campuses in Alachua County with a tobacco-free campus policy to 100%.

Strategy CW3.2 Promote cessation of tobacco use.

Objective CW3.2.1

By December 31, 2017, at least one employer will offer a cessation program to their employees.

By December 31, 2020, at least four employers will offer a cessation program to their employees.

Strategy CW3.3 Eliminate exposure to secondhand tobacco smoke.

Objective CW3.3.1

By December 31, 2017, increase the number of multiunit housing communities that have smoke-free policies by 5%, from 108 to 113.

By December 31, 2020, increase the number of multiunit housing communities that have smoke-free policies by 5%, from 108 to 130.

Goal CW4: Promote oral health through prevention programs targeting children.

Strategy CW4.1 Improve access to school-based oral health programs for children.

Objective CW4.1.1

By December 31, 2017, the percent of third graders who demonstrate untreated caries will be $\leq 45.7\%$.

By December 31, 2020, the percent of third graders who demonstrate untreated caries will be $\leq 25.1\%$.

Objective CW4.1.2

By December 31, 2017, the percent of third grade students who have sealants on their molars will be $\geq 49.1\%$.

By December 31, 2020, the percent of third grade students who have sealants on their molars will be $\geq 52.1\%$.

Strategy CW4.2 Increase the percent of children in Head Start who receive at least one fluoride varnish application per year.

Objective CW4.2.1

December 31, 2017, increase the percentage of children in Head Start who receive at least one fluoride varnish application per year from 77.1% to at least 80%.

By December 31, 2020, increase the percentage of children in Head Start who receive at least one fluoride varnish application per year from 77.1% to at least 85%.

Goal CW5: Prevent and control infectious disease.

Strategy CW5.1 Prevent disease and disability from influenza.

Objective CW5.1.1

By December 31, 2017, the percent of school children who are immunized against influenza will be $\geq 65\%$.

By December 31, 2020, the percent of school children who are immunized against influenza will be $\geq 70\%$.

Strategy CW5.2 Decrease the rate of Sexually Transmitted Infections.

Objective CW5.2.1

By December 31, 2017, the number of newly diagnosed HIV infections will be ≤ 64 .

By December 31, 2020, the number of newly diagnosed HIV infections will be ≤ 60 .

Objective CW5.2.2

By December 31, 2017, the rate of total early syphilis will be $\leq 30/100,000$.

By December 31, 2020, the rate of total early syphilis will be $\leq 29/100,000$.

Goal CW6: Improve poverty rates.

Strategy CW6.1 Improve graduation rates.

Objective CW6.1.1

By December 31, 2017, the percent of residents who have less than a ninth-grade education will be $\leq 3\%$.

By December 31, 2020, the percent of residents who have less than a ninth-grade education will be $\leq 1\%$.

Objective CW6.1.2

By December 31, 2017, the percent of residents who have attended some high school but has no diploma will be $\leq 5\%$.

By December 31, 2020, the percent of residents who have attended some high school but has no diploma will be $\leq 2\%$. (9th through 12th grade, no diploma)

Goal CW7: Reduce violence.

Strategy CW7.1 Increase awareness and education regarding interpersonal violence prevention.

Objective CW7.1.1

By December 31, 2017, 400 community members who live, work, or volunteer in the Greater Duval neighborhoods or Southwest Area Triangle neighborhoods will have participated in evidence-based violence prevention programming.

By December 31, 2020, 1,200 community members who live, work, or volunteer in the Greater Duval neighborhoods or Southwest Area Triangle neighborhoods will have participated in evidence-based violence prevention programming.

Access to Care Work Plan

STRATEGIC GOAL AC: Residents of Alachua County will be able to access comprehensive primary care and preventive services.

Goal AC1: Assess progress in addressing utilization of services and barriers to care.					
Strategy AC1.1 Collaboratively assess and report Alachua County’s health care resources and needs, including patterns of health care utilization and barriers to care.					
Objective AC1.1.1 By December 31, 2020, a semi-annual report will be presented to the CHIP steering committee and an annual report will be presented to the Alachua County Board of County Commissioners.	Alignment with State and National Objectives				
	SHIP		Healthy People 2020		
	<i>Chronic Diseases and Conditions (including Cancer and Tobacco-related Illnesses)</i>		AHS-6 Reduce the proportion of persons who are unable to obtain or delay in obtaining necessary medical care, dental care, or prescription medicines
