Technical Appendix

The Technical Appendix for the *Alachua County Health Needs Assessment* presents detailed descriptions of the activities completed during the assessment including a comprehensive listing of all data tables and research protocol used in the development of this report.

Notes

Note on Crude Versus Age-Adjusted Mortality Rates

The needs assessment and the technical appendix present both the crude and age-adjusted death rates (AADR). Crude rates are merely the actual number of deaths for a given cause for a desired population divided by total number in the desired population and then multiplied by 100,000 to get the rate per 100,000 population, while AADR represent crude rates adjusted to standardize the population distribution effects on the rate.

Although useful for certain purposes, the crude death rate as a comparative measure has a major shortcoming: it is a function of the age distribution of the population at risk. For example, the population at risk in one county may be primarily elderly persons ages 65 and older while the population at risk in another county may be primarily of persons ages 40 to 50. Crude rates are recommended when a summary measure is needed and it is not necessary or desirable to adjust for other factors.

The frequency with which health events occur is almost always related to age. In fact, the relationship of age to risk often dwarfs other important risk factors. For example, acute respiratory infections are more common in children of school age because of their immunologic susceptibility and exposure to other children in schools. Chronic conditions, such as arthritis and atherosclerosis, occur more frequently in older adults because of a variety of physiologic consequences of aging. Mortality rates tend to increase after the age of 40.

Because the occurrence of many health conditions is related to age, the most common adjustment for public health data is age adjustment. The age-adjustment process removes differences in the age composition of two or more populations to allow comparisons between these populations independent of their age structure.

The age-adjusted death rate is a summary measure that eliminates the effect of the underlying age distribution of the population. The result is a figure that represents the theoretical risk of mortality for a population, if the population had an age distribution identical to that of a standard population. For example, a county's age-adjusted death rate is the weighted average of the age-specific death rates observed in that county, with the weights derived from the age distribution in an external population standard, such as the U.S. population.

Age-adjustment then allows for the comparison of two distinct populations (for example, Alachua County versus Florida) which most likely have differing age distributions. The age effects are in essence removed from the rates and the age-adjusted death rate then no longer reflects the actual death rate but is an indicator rate that can be used for relative comparisons.

In the past, the National Center for Health Statistics (NCHS) age-adjusted rates using the US 1940 standard population. Other agencies used the US 1970 Standard. Beginning with 1999 data, federal agencies began age-adjusting to the US 2000 Standard Million Population.

Note on Zip Codes

For tables with zip codes listed, the post office box zip codes are included with the main zip codes. To provide the most accurate data summary for the county, for each data element presented by zip code, the total sum of the zip code data is presented as well as the overall county totals. Post office zip codes: 32602, 32613 and 32627 are included with 32601(East Gainesville). Post office zip code 32604 is included with 32603(Central Gainesville). Zip code 32635 is included with 32605(North Central Gainesville). Zip code 32614 is included with 32608(Southwest Gainesville). Zip codes 32610 and 32612 are included with 32611(University of Florida). In Alachua zip code 32615, 32616 and 32658 are included. Hawthorne zip code 32640 also includes 32622, 32654 and 32662 zip codes. In High Springs zip code 32643, zip code 32655 is included.

When data is presented by zip codes for deaths and births, a five year rate is calculated due to the small numbers by zip code. Some Hispanic data was not available by zip code or else the numbers were too small to separate out.

Demographic and Socioeconomic Profile

Demographic and socioeconomic profile data are presented at the county level and state level for each indicator. Zip Code level data are presented where available.

Population Data Tables

Table TA-1. Total Population and Projected Populations, Alachua County and Florida, 2000-2030.

	Year	Alachua County	Florida
Population	2000 Census	217,955	15,982,378
	2008 Estimate	252,388	18,807,219
	2015 Projections	270,176	20,055,865
	2020 Projections	286,096	21,417,450
	2030 Projections	316,329	23,979,032
Percent Change from 2000 Census	To 2008 Estimate	15.8	17.7
	To 2015 Projections	24.0	25.5
	To 2020 Projections	31.3	34.0
	To 2030 Projections	45.1	50.0
Percent Change from 2008 Estimate	To 2015 Projections	7.0	6.6
	To 2020 Projections	13.4	13.9
	To 2030 Projections	25.3	27.5

Florida	19,021,613	415,647	2.2	57,798	13.9	0.3

NA: Zip Code was not available during the 2000 Census.

* Student Population percents were calculated from the group quarter Population from the 2000 Census. This percent was then calculated against the 2009 group Population to determine what number were students. Then a percent of the students were calculated against the total 2009 Population.

Zip Code 32611 is the Zip Code for the University of Florida. It also includes 32610 and 32612.

** This percent is from the 2000 Census.

Florida	1,283,648	44,162	5,917,879	21.7	0.7
Under 19 years of age, All Income Levels					
Alachua County	8,448	1,962	48,692	17.3	4.0
Florida	804,667	68,144	4,259,503	18.9	1.6

This data is also displayed in the Health Care Access and Utilization Section of the report.

¹ A margin of error (MOE) is the difference between an estimate and its upper or lower confidence bounds. Confidence bounds can be created by adding a margin of error to the estimate (for an upper bound) and subtracting the margin of error from the estimate (for a lower bound). All published margins of error for the Small Area Health Insurance Estimates program are based on a 90 percent confidence level.

² The number in a demographic group is the number of people in the poverty universe in that age, sex, and race/Hispanic origin group.

BRFSS Data Tables

Table TA-74. Selected BRFSS Indicators for Alachua County and Florida, 2002 and 2007.

Indicator	Alachua County	Florida	2002 County Measure
Air Quality			
Percentage of adults who reduced or changed outdoor activity because the air quality was bad	27.4	19.2	NA
Alcohol Consumption			
Percentage of adults who engage in heavy or binge drinking	21.5	16.2	26.6
Antibiotic Resistance			
Percentage of adults who have heard of antibiotic resistant infections	69.1	58.3	NA
Arthritis			
Percentage of adults who have been told they have some form of arthritis	18.7	24.3	NA
Percentage of adults who are limited in any way in any usual activities because of arthritis or chronic joint symptoms	11.3	12.5	NA
Percentage of adults who had symptoms of pain, aching, or stiffness in or around a joint	35.9	37.2	NA
Asthma			
Percentage of adults who currently have asthma	6.9	6.2	6.5
Cancer Screening			
Percentage of women 40 years of age and older who received a mammogram in the past year	70.8	64.9	67.8
Percentage of women 18 years of age and older who had a clinical breast exam in the past year	72.8	65.0	NA
Percentage of women 18 years of age and older who received a Pap test in the past year	70.5	64.8	73.3
Percentage of men 50 years of age and older who received a PSA test in the past two years	63.9	72.3	NA
Percentage of men 50 years of age and older who received a digital rectal exam in the past year	56.0	56.3	NA
Percentage of adults 50 years of age and older who received a blood stool test in the past year	21.1	21.2	22.6
Percentage of adults 50 years of age and older who received a sigmoidoscopy or colonoscopy in the past five years	54.6	53.7	45.2
Cardiovascular Disease			
Percentage of adults who have ever had a stroke	2.8	3.1	NA
Percentage of adults who have ever had a heart attack, angina, or coronary heart disease	7.0	9.3	NA
Cholesterol Awareness			
Percentage of adults who had their cholesterol checked in the past five years	76.5	78.5	69.6
Percentage of adults who have diagnosed high blood cholesterol	26.8	37.3	28.9
Dental Care			
Percentage of adults who could not see a dentist in the past year because of cost	22.9	19.2	NA

NA: Data not available in 2002.

Table TA-74 Cont. Selected BRFSS Indicators for Alachua County and Florida, 2002 and 2007.

Indicator	Alachua County	Florida	2002 County Measure
Diabetes			
Percentage of adults with diagnosed diabetes	6.3	8.7	5.1
Percentage of adults with diabetes who self-monitor blood glucose at least once a day on average	73.8	65.7	NA
Percentage of adults with diabetes who had two A1C tests in the past year	72.4	71.2	NA
Percentage of adults with diabetes who had an annual foot exam	87.5	75.6	NA
Percentage of adults with diabetes who had an annual eye exam	77.3	77.4	NA
Percentage of adults with diabetes who ever had diabetes self-management education	42.6	51.4	NA
Average age at which diabetes was diagnosed	42.3	50.9	NA
Disability			
Percentage of adults who are limited in any way in any usual activities because of physical, mental or emotional problems	18.0	17.8	NA
Percentage of adults who use special equipment because of a health problem	5.9	7.1	NA
Folic Acid			
Percentage of adults who take a multivitamin	58.8	58.5	NA
Percentage of women under age 45 who take a multivitamin	54.9	56.4	NA
Gastrointestinal Disease			
Percentage of adults who had diarrhea in the past 30 days	15.0	14.1	NA
Percentage of adults who had diarrhea in the past 30 days and who visited a doctor	1.5	2.4	NA
Health Care Access & Coverage			
Percentage of adults with any type of health care insurance coverage	86.9	81.4	76.9
Percentage of adults who have a personal doctor	73.3	77.1	71.1
Percentage of adults who could not see a doctor at least once in the past year due to cost	11.6	15.1	NA
Percentage of adults who had a medical checkup in the past year	69.0	74.6	NA
Health Status & Quality of Life			
Percentage of adults with good to excellent overall health	89.8	83.4	89.0
Percentage of adults who are "very satisfied" or "satisfied" with their lives	96.0	94.2	NA
Percentage of adults who always or usually receive the social and emotional support they need	78.8	77.9	NA
Percentage of adults with good physical health	91.9	88.8	NA
Percentage of adults with good mental health	89.8	90.3	NA
Average number of days where poor mental or physical health interfered with activities of daily living in the past 30 days	2.3	4.5	NA
Average number of unhealthy physical days in the past 30 days	3.1	3.6	NA
Average number of unhealthy mental days in the past 30 days	3.1	3.3	NA
HIV/AIDS			
Percentage of adults less than 65 years of age who have been tested for HIV	45.2	49.1	43.0
Hypertension Awareness and Control			
Percentage of adults with diagnosed hypertension	22.2	28.2	19.6
Percentage of adults with hypertension who engage in blood pressure control measures	96.8	96.4	NA
Percentage of adults with hypertension who were advised by a health care provider to engage in control measures	97.5	95.5	NA

NA: Data not available in 2002.

Table TA-74 Cont. Selected BRFSS Indicators for Alachua County and Florida, 2002 and 2007.

Indicator	Alachua County	Florida	2002 County Measure
Immunization			
Percentage of adults in high-risk groups who received a flu shot in the past year	51.6	44.6	NA
Percentage of adults in high-risk groups who have ever received a pneumonia vaccination	34.6	37.0	NA
Percentage of adults who received a flu shot in the past year	31.4	32.7	23.5
Percentage of adults age 65 and older who received a flu shot in the past year	68.6	64.6	59.9
Percentage of adults who have ever received a pneumonia vaccination	22.6	25.9	14.3
Percentage of adults age 65 and older who have ever received a pneumonia vaccination	67.3	63.0	52.6
Percentage of adults who were at risk and who have received a hepatitis B vaccination	NA	43.8	NA
Overweight & Obesity			
Percentage of adults who are overweight	37.8	38.0	36.1
Percentage of adults who are obese	25.4	24.1	14.7
Percentage of adults who are overweight or obese	63.3	62.1	50.7
Percentage of adults whose body weight increased by five pounds or more in the past year	23.7	22.4	NA
Percentage of adults whose body weight decreased by five pounds or more in the past year	22.2	23.0	NA
Physical Activity & Nutrition			
Percentage of adults who are sedentary	17.2	25.4	16.9
Percentage of adults who are inactive at work	62.5	64.5	68.6
Percentage of adults who consume at least five servings of fruits and vegetables a day	29.2	26.2	27
Percentage of adults who meet moderate physical activity requirements	39.2	34.6	36.8
Percentage of adults who meet vigorous physical activity requirements	31.3	26.0	28.1
Percentage of adults who had an unwanted sexual experience in the past 12 months	10.0	6.7	NA
Tobacco Use & Exposure			
Percentage of adults who are current smokers	15.5	19.3	18.8
Percentage of adults who are former smokers	22.8	26.2	21.9
Percentage of adults who have ever smoked	61.7	54.5	59.3
Percentage of non-smoking adults who were exposed to secondhand smoke in the past seven days	16.4	14.9	NA
Percentage of adult current smokers who tried to quit smoking at least once in the past year	61.1	53.2	57.7

Florida	18,830,449	8,593,067	2,864,356	152.11

* ED Visits are classified into four categories using the NYU Algorithm: (1) Non Emergent, (2) Emergent/primary care treatable, (3) Emergent/emergency department care required but preventable/avoidable, (4) Emergent/emergency department care required, not preventable/avoidable. Therefore, the first three were combined to create the total number of avoidable ED visits.

Focus Group Screening Tool

[WellFlorida Staff]: I would just like to ask you a few questions now. This will help me see which group you fit into. Is that alright?

[WellFlorida Staff]: Do you live in Alachua county?

[WellFlorida Staff]: What is your permanent physical address in Alachua county?

[WellFlorida Staff]: Are you enrolled in CHOICES health services program? (prompt-offered by the Alachua County Board of Commissioners)

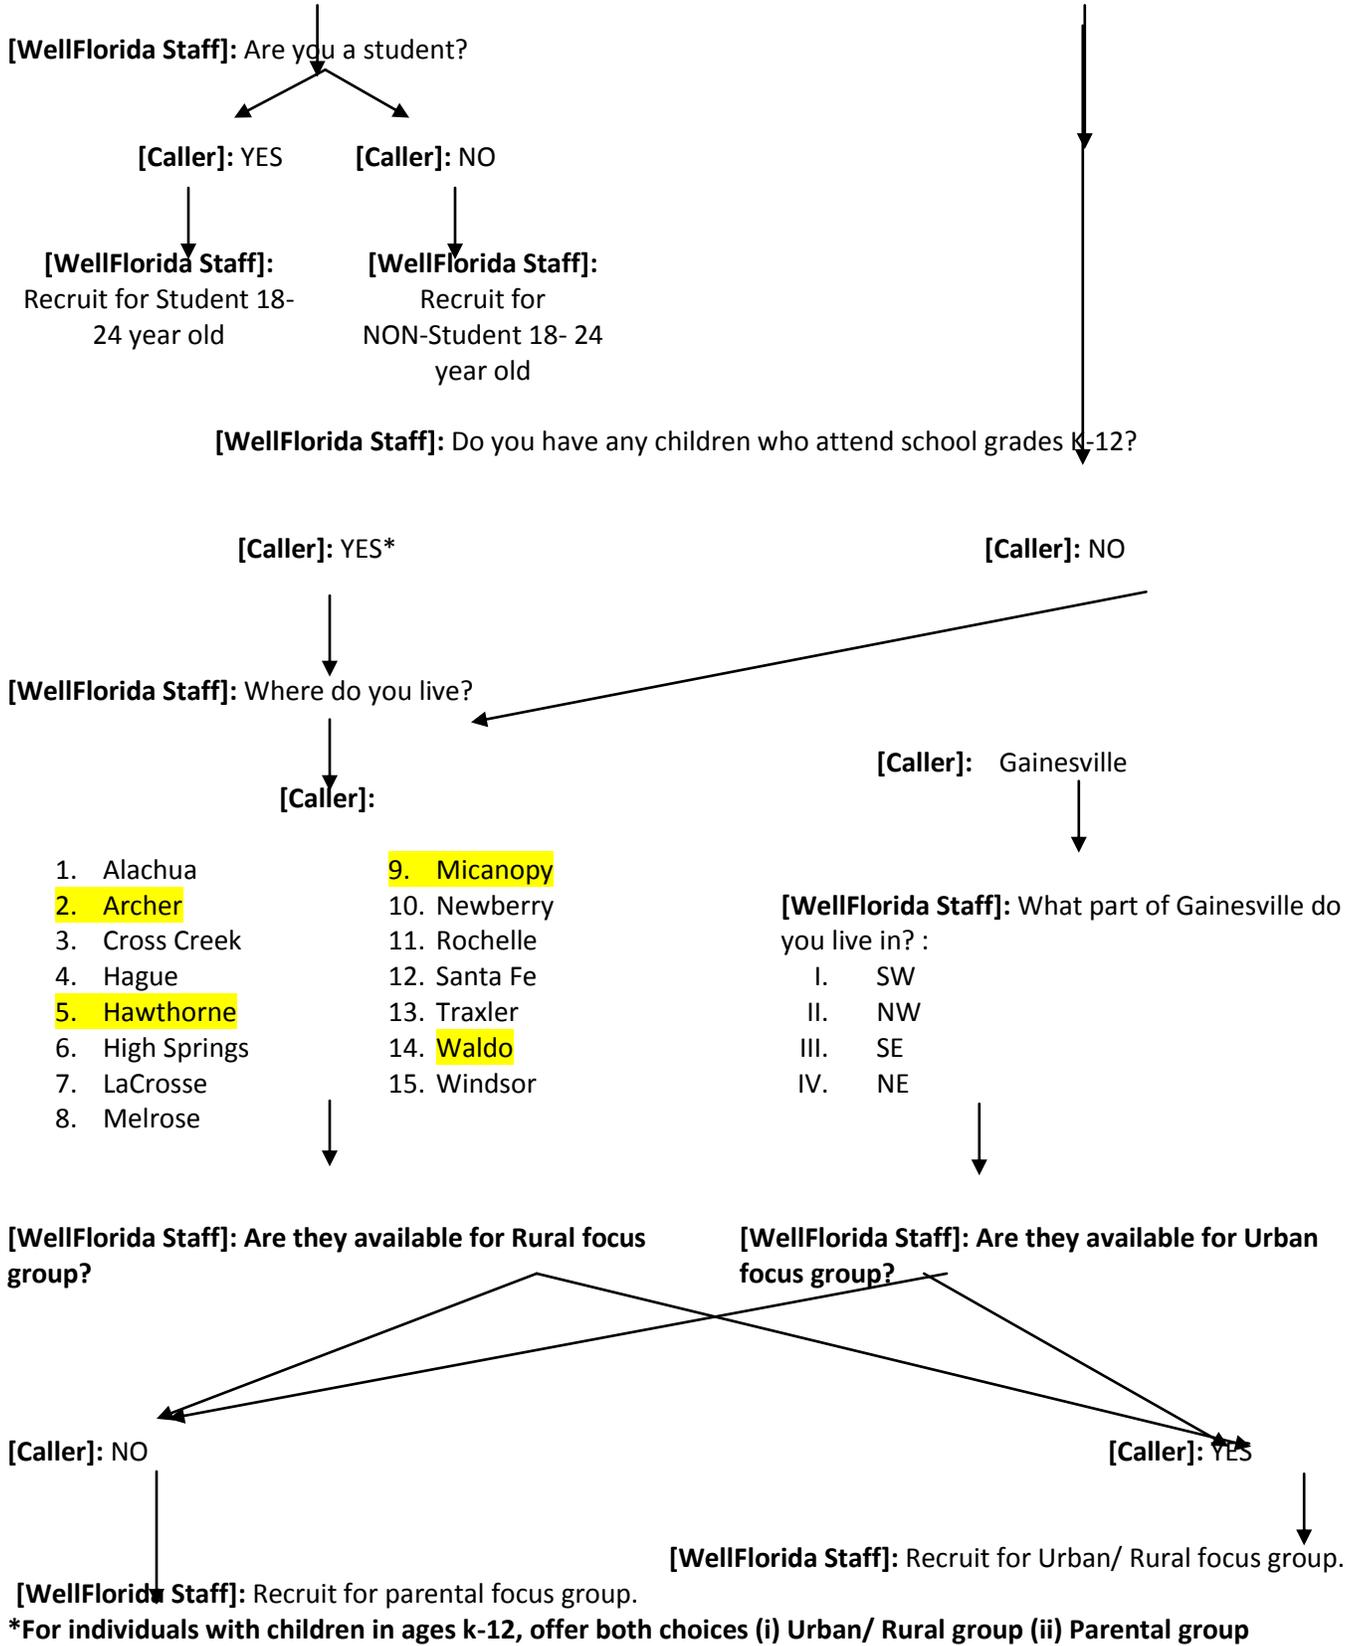

[WellFlorida Staff]: Offer participation in CHOICES group.

[WellFlorida Staff]: How old are you?

[WellFlorida Staff]: How old are you?

Focus Group Consent Form

You are being asked to participate in a focus group conducted by the WellFlorida Council, Inc. The purpose of the group is to discuss the health and health care needs of Alachua county residents. You will be asked to share your experiences with using healthcare services in Alachua County and your opinion about things such as what is important for staying healthy. You were asked to participate because you live in Alachua County.

Some of the risks you may expect during the discussion are the feeling that you haven't thought through some of the questions enough to provide answers, feeling as if you don't have the "right" answer or the questions could make you sad or upset. On the other hand, some of the benefits that you may expect from participating in this discussion are: the opportunity to tell your point-of-view on the subject and to think about your role in finding a solution to the issues of healthcare in our community.

If you decide to join the discussion, here are some things you should know:

- Your participation is completely voluntary. You may choose to leave the discussion group at any time or not answer a question.
- Your name will not be used in any reports about this discussion group. With your permission, the discussion will be tape recorded so that when we write our report we can make sure we understand everything that was said. All information will be identified with a number and stored in locked file cabinet. While all the information in the discussion is confidential, if cases of abuse are detected, these must be reported to the proper authorities.
- At the end of the group, you will receive a \$20 Wal-Mart Gift Card to thank you for your time.
- The discussion will last approximately 1 ½ hours.

If, at any time, you have any questions about this discussion or further information you would like to add, you may contact Kim Gokhale at 352-313-6500 extension: 127.

You may keep a copy of the informed consent.

Your signature below indicates that you agree to be in the discussion and we talked with you about the information in this document and answered all your questions.

Print your name: _____ **Date:** _____

Focus Group Facilitative Question Guide

“Good evening. I would like to welcome you and thank you for taking the time to join our discussion on health and health care in Alachua County.

My name is Kim Gokhale and I represent the WellFlorida Council. Assisting me this evening is Terry Lin/Antoinette Ayers. WellFlorida Council is partnering with the Alachua County Health Department and other leading healthcare providers in the county including Shands healthcare, North Florida Regional Hospital, Palms Medical Group, and CHOICES Health Services to conduct this study. We are attempting to gain information from people who live in Alachua County about their health and health care needs- something you or your family needs to stay healthy or to stop from being sick or hurt. We have invited people here, like yourself, from throughout the county to share thoughts and experiences.

You were selected to participate in this session because you all have certain things in common that are of particular interest to us. We are extremely interested in hearing from you because it will help us to understand what you think are factors influencing an individual’s health and what our county’s most important health needs are. You represent the community members. Remember, there is no right or wrong answers. Each of you has different points of view to offer and we would like to hear each one of them. So, please feel free to share your points of view, even if they differ from what others say.

Before we begin, let me remind you of some ground rules.

Please speak up and only one person should talk at a time. Please wait your turn.

I want to assure you that what you say in this group will remain confidential. Though, we will be on a first name basis while we are here, your names will not be attached to any of your comments when we are generating our report findings. I also want to ask you to respect the confidentiality of others in this group as well. What is shared in here must remain in here.

We are making an audio recording of this session because we do not want to miss any of your comments. If several people are talking at the same time, we will not be able to understand the recording and will lose valuable information.

Keep in mind we are interested in both negative and positive comments; comments about programs that are already being conducted and ones that you would like to see established in the county. Both negative and positive, those related to what is and what should be, will be helpful to us. We may differ in our opinions and may not agree on everything but please be respectful of others’ opinions.

Our session will last about an hour and a half. We will not be taking any formal breaks during the session, but if you need to go to the restroom or would like to grab some additional snacks, please feel free to do so. If you have a cell phone, please turn them off or put them on vibrate. If you must answer the phone, please do so outside and return as quickly as you can.

Are there any questions about what we’re doing today?

(Participants may ask about incentive payments. Inform them that incentives will be distributed at the conclusion of the discussion group.)

Review Consent and demographic form.

If there are no additional questions, we'll begin. You will notice that we have placed name stickers on the table in front of you. If each of you can write your name and stick them on your right shoulder, it will help us remember each other's names. Let's find out some more about each other by going around the room one at a time. Please tell us your first name and how long you have lived in Alachua County? (Go around the room)

Now that we have heard from each of you, I would like to ask some questions for anyone to answer. Please, I ask you to remember to talk one at a time because each one of you have important things to say and we want to make sure that we hear what you have to say. There are not right or wrong answers; we only want to hear your comments.

Let's suppose I am new to the community, and I need some Medical Care (remind of definition: Medical Care - is when you or your family receive help or services while you are sick or hurt or to help you from getting sick or hurt), where would you suggest I go?
Where would you suggest I not go?
Considering your own experiences, what are some things that have helped improve or maintain the health of you or your family? (List on flip chart)
What are problems/difficulties do you see in maintaining or improving you or your family's health? (List on flip chart) PROBE: Was dental or behavioral health mentioned? If not, you may want to ask specifically about dental and behavioral health needs.
In order to improve your family's health, what do you need, or what is missing that would assist you? (List on flip chart)
What barriers, if any, do you see with obtaining medical care needs?
Looking at our community as a whole, would you add anything else to this list?
Overall, what would you say is the most important health need (remind of definition of health need-is something you or your family needs to purchase to stay healthy or to stop from being sick or hurt. Examples might be health insurance, medicines, transportation to a doctor's visit) we have just come up with? If each of you will tell what you think is most important, I will put a check mark by it.
If you were in charge what would be the MOST important thing you would do to address this medical care need?
What community groups can work together to address these health needs?
How should these community groups work together?

What do you feel your role should be in helping the community address its health needs? Are there any other issues you would like to discuss?

Our discussion today was to help us understand how the community feels on the health needs in Alachua County. I really appreciate your participation. Please look out for an announcement for a community visioning event in January of 2010. All community members will be invited to prioritize the most pressing issues facing the community and identify possible initiatives and community activities that could address those issues. We will be happy to see you there. Please sign this sheet if you would like to receive a gift card.

Structured (Key) Interview Guide

This interview will take about 30 minutes to complete and is being recorded for note-taking purposes. When reporting the information, your responses will be used for statistical purposes only and will not in any way be identified with you. Do you have any questions/ or concerns? May I begin asking some questions? Thank you. Please feel free to interrupt me if you have a question later during this interview.

1. How long have you lived and/or worked in Alachua County? On a scale of 1-10 (1 being low knowledge), how knowledgeable do you feel you are about health issues in Alachua County?
2. What do you think are some of the essential components of health care services in a community like Alachua County? (Prompt: What kinds of services/programs/facilities do you think are necessary for a good system of health care for county residents?)
3. What do you think are the most important health issues that affect Alachua County? (Prompt: you may want to consider separate issues for children, adolescents, and adults and you may want to have them consider separate issues for residents, visitors and businesses.)
4. Comment on the types of services that you believe are important for addressing these issues. (Prompt: Please identify any programs you know of that are targeting or should target the issues you identified and indicate whether there are enough services to meet the needs and whether the services are accessible to all who need them.)
5. Now, I am going to name some specific types of services and ask you to share any impressions you have about them, particularly anything you know about how these services are available to all persons in Alachua and whether there are any obstacles to receiving these types of services:
 - a. Primary care (basic and routine services that most people use most often)
 - b. Dental care
 - c. Specialty care
 - d. Mental health
 - e. Hospital care
 - f. Other services?
6. Of all the issues and services we have discussed, which do you think is the most important health care issue?
7. What actions are necessary to address this issue?
8. Who should take responsibility for addressing this issue?
9. What responsibility do you feel you have personally when it comes to the health of the community in Alachua County?
10. Do you have any additional comments you would like to share about health care needs in Alachua County?
11. It is important that we understand any affiliations you have with health care providers in the community that may have helped form your opinions about these issues. Do you serve on any boards or participate in any organization that delivers health care services?
