Introduction

This is the annual review report for the 2018-2021 Bradford County Community Health Improvement Plan (CHIP). The activities and collaborative efforts of the Florida Department of Health in Bradford County and community partners will be reflected within the report. This document will serve as a progress review of the strategies that were developed and the activities that have been implemented. While the CHIP is a community-driven and collectively owned health improvement plan, the Florida Department of Health in Bradford County is charged with providing administrative support, tracking and collecting data, and preparing the annual review report.

Overview of CHIP and Annual Review Meeting

In October of 2017, the Department of Health in Bradford County convened the CHIP Planning Team. The Planning Team consisted of members from WellFlorida Council, Bradford County Health Advisory Group (our community partners), and the Florida Department of Health in Bradford County. The Planning Team facilitated the CHIP process by using the National Association of City and County Health Officials' Mobilizing for Action through Planning and Partnership (MAPP) strategic planning model. Subject matter experts from a diverse group of partner organizations conducted the four assessments outlined in the MAPP process. Individually, the assessment yielded in-depth analyses of factors and forces that impact population health. Taken together, the assessment findings contribute to a comprehensive view of health and quality of life in Bradford County.

The Planning Team after a review of the community health assessment and data, public surveys, and face to face meetings with stakeholders, arrived at the final strategic area issues, which are: Healthy Lifestyles and Behavior, Maternal and Child Health, and Public Safety.

Summary of CHIP Annual Review Meeting

During the CHIP review process, members reviewed and discussed the current goals and objectives. These discussions included current measures and activities that satisfy these objectives. All objectives were reviewed and/or updated based on need.

2019 Progress and 2020 Revisions

Strategic Issue Area #1: Healthy Lifestyle & Behavior

The Healthy Lifestyle and Behaviors priority health issue focuses on reducing obesity and chronic disease in children and adults by promoting healthy lifestyle choices and reducing illness, disability, and death related to tobacco and other substance use.

Goal 1: Reduce obesity and chronic disease in children and adults to enhance quality of life by promoting healthy lifestyle choices.

Objective 1.1.1 Increase the percent of Bradford adults who are at a healthy weight from 19.8% in 2013 to 20.08% by December 31, 2020.

Strategy	Indicator	Current Level	Target	Status	Explanation of Status	Partners
1.1.1A Bradford Continue to provide Nutrition class and track the number of clients that attend classes to establish a baseline. Monitor BMI if applicable.	# of classes per year	1	2	▲ On Target	Baseline established	DOH-Bradford Program Staff
	Baseline established	4	6		Status ongoing COVID-19 prevented completion	Snap-Ed UF-IFAS Bradford County School Board
1.1.1B: Bradford Produce and distribute "Heart Health Plus" Newsletter monthly.	# of times per year newsletter is distributed	12	12	▲ On Target	Newsletter has been produced and distributed every month since July 2018 Status ongoing	DOH-Bradford Program Staff Local Church participants UF-IFAS
1.1.1C: Bradford Increase awareness of healthy weight activities (walking group, one-on-one lifestyle support services, nutrition group, 5K walk/run, healthy eating, and healthy lifestyles via communication and advertisement.	# of times per year	12	12	▲ On Target	Internal campaign to increase awareness in full swing. Need to expand information sharing outside the organization Status ongoing	DOH-Bradford Program Staff City of Starke: Rails to Trails Shands Starke Hospital

Objective 1.1.2: Reduce the percent of Bradford middle and high school students who are overweight or obese from 43.1% in 2014 to 42.1% by December 31, 2020

Strategy	Indicator	Current Level	Target	Status	Explanation of Status	Partners
1.1.2A: Bradford Provide 5210 to middle school during 18/19 school.	# of times per year	2	4	▲ On Target	Started in '19-'20	DOH-Bradford School Health Snap-Ed program manager

Objective 1.1.3: Decrease the age-adjusted death rate for diabetes in Bradford from 56.6 deaths in 2013-15 to 55.6 deaths per 100,000 by December 31, 2020.

Strategy	Indicator	Current Level	Target	Status	Explanation of Status	Partners
1.1.3A: Bradford Provide at least 2 Diabetes Prevention Education classes (T2 for All) per year.	# of times per year	3	3	▲ On Target	beginning 2019 class April 2019 In progress	DOH-Bradford Program Staff UF IFAS
1.1.3B: Bradford Track the number of annual health screenings/fairs.	# of times per year	6	8	▲ On Target	Completed 6 as of April 2020 In progress	DOH-Bradford Program Staff

Objective 1.1.4: Decrease the age-adjusted death rate for breast cancer in Bradford from 25.2 deaths in 2013-15 to 24.2 deaths per 100,000 by December 31, 2020.

Objective	Indicator	Current Level	Target	Status	Explanation of Status	Partners
1.1.4A: Bradford Track # of clients referred to Florida Breast & Cervical Cancer Early Detection Program.	# of clients enrolled	47 2018-19	50	▲ On Target	Status ongoing	DOH Bradford Clinic and Front Desk Staff Local Physicians offices
1.1.4B: Bradford Increase community awareness for mammogram screening.	# of times per year awareness information is shared	2	2	▲ On Target	Ongoing	DOH-Bradford Program Staff Local Physicians offices

Objective 1.1.5: Increase education and awareness about the HPV vaccine in Bradford through community outreach and increase the number of adolescents who received or completed the HPV vaccination series from 202 adolescents as of June 30, 2017 to 500 by December 31, 2020.

Objective	Indicator	Current Level	Target	Status	Explanation of Status	Partners
1.1.5A: Bradford Increase awareness of HPV vaccine and benefits among healthcare providers and the community.	# of times information is shared	3	4	▲ On Target	Status ongoing	DOH Bradford clinic staff Health Educators
1.1.5B Bradford Track the number of Bradford County adolescents who have received or completed HPV vaccination series.	# of adolescents who have received one or more HPV vaccine	202 as of June 2017	500 by 2020	▲ On Target	Status ongoing	DOH Bradford clinic staff Health Educators

Goal 2: Reduce illness, disability, and death related to tobacco and other substance use.

Objective 1.2.1: Reduce the percent of youth age 11-17 who have smoked cigarettes in their lifetime from 24.3% in 2016 to 23% by December 31, 2020.

Strategy	Indicator	Current Level	Target	Status	Explanation of Status	Partners
1.2.1A: Bradford Increase the number of anti-tobacco community outreach methods based on suggestions received through community input. One of these strategies will include a social marketing component.	# of times per year	7	10	▲ On Target	Status ongoing	DOH-Bradford Tobacco Program Bradford County Tobacco Free Partnership-Quit Doc BC School District
1.2.1B: Bradford Provide Tobacco Education classes to youth who receive In School Suspension (ISS) for underage use/possession of tobacco products.	# of times per year	4	6	▲ On Target	Status ongoing	DOH-Bradford Tobacco Program-Quit Doc BC School District

Objective 1.2.2: Reduce the current smoking rate of adults in Bradford from 27.0% to 26.0% by December 31, 2020 (Florida rate = 15.5%) and reduce the age-adjusted death rate for lung cancer from 37.6 deaths per 100,000 population in 2016 to 36.6 deaths by December 31, 2020 (■) (▲)

Strategy	Indicator	Current Level	Target	Status	Explanation of Status	Partners
1.2.2A: Complete tobacco screening at each clinical visit (required for EHR) at DOH-Bradford County.	% of patients screened per year	88 in 2019	90 per year	▲ On Target	Status ongoing	DOH Bradford clinic staff BC Tobacco Free Partnership-Quit Doc SRAHEC
1.2.2B: Complete tobacco screening at each clinical visit (required for EHR) at DOH-Bradford & track the number of	# of patients referred per year	67	74	▲ On Target	Status ongoing	DOH Bradford clinic staff BC Tobacco Free Partnership-Quit Doc SRAHEC

patients referred for tobacco cessation services.						
1.2.2C: Continue providing tobacco cessation classes at the DOH-Bradford.	# of classes per year	5	10	▲ On Target	Status ongoing	DOH Bradford Program Staff BC Tobacco Free Partnership-Quit Doc SRAHEC
1.2.2D: Increase the number of Bradford residents attending AHEC tobacco cessation classes.	# of participants	25 in 2019	50	▲ On Target	Status ongoing	Suwannee River AHEC BC Tobacco Free Partnership-Quit Doc DOH Bradford Program Staff

Strategic Issue Area #2: Maternal and Child Health

The Maternal and Child Health priority area focuses on improving maternal and child health through health education and prevention strategies.

Goal 1: Improve maternal and child health through health education and prevention strategies.

Objective 2.1.1: Reduce the infant mortality rate (3-year rolling) in Bradford from 2.3 deaths in 2015-17 to 1.3 deaths per 1,000 live births by December 31, 2020.

Strategy	Indicator	Current Level	Target	Status	Explanation of Status	Partners
2.1.1A: Bradford Conduct safe sleep presentations throughout the community.	# of presentations per year	4	6	▲ On Target	Status ongoing	DOH Bradford Healthy Start Staff WIC Community Health Programs
2.1.1B: Bradford Increase the number of mothers who initiate breastfeeding.	Average annual % of mothers who initiate breastfeeding	2016 average of 70.4%	75.4%	▲ On Target	Status ongoing	DOH Bradford Healthy Start Staff WIC Community Health Programs

Objective 2.1.2: Decrease the teen birth rate (15-19-year-old) in Bradford from 45.5 births per 1,000 females age 15-19 in 2013-2015 to 44.5 by December 31, 2020.

Strategy	Indicator	Current Level	Target	Status	Explanation of Status	Partners
2.1.2A: Bradford Increase the number of Long Acting Reproductive Contraception placed in teens receiving Family Planning services at DOH Bradford.	% of teens receiving LARC	35.7%	30%	▲ On Target	In progress	DOH-Bradford Clinic Staff Health Educators
2.1.2B: Maintain the number of FLASH sexual risk avoidance-abstinence education classes offered at the middle and high school.	# of classes	1	1	▲ On Target	In progress	DOH Bradford School Health Bradford County Schools DOH Bradford Program Staff

Strategic Issue Area #3: Public Safety

Unintentional injuries are a leading cause of morbidity and mortality among adults and children in the United States. This issue area focuses on improving deaths from unintentional injuries.

Goal 1: Increase knowledge about public safety.

Objective 3.1.1: Decrease the unintentional injury age-adjusted death rate in Bradford from 59.8 deaths per 100,000 in 2013-2015 to 58.8 deaths per 100,000 by December 31, 2020.

Strategy	Indicator	Current Level	Target	Status	Explanation of Status	Partners
3.1.1A: Bradford Increase the number of water safety awareness outreach efforts.	# of times information is shared	4	4	▲ On Target	Ongoing	DOH Bradford Program Staff Community Partners
3.1.1B: Bradford Assess community resources for car seat safety.	Resource list completed	1	1	▲ On Target	Completed	DOH Bradford Program Staff Community Partners
3.1.1C: Bradford Increase # of Certified Car Seat Technicians	# of technicians	4	4	▲ On Target	Completed	DOH Bradford Healthy Start Staff Safe Kids
3.1.1D: Bradford Conduct car seat presentations throughout the community.	# of presentations	1	1	▲ On Target	In Progress	DOH Bradford Healthy Start Staff Safe Kids Sheriff's Office
3.1.1E: Bradford Increase the number of a bike riders who wear a properly fitted bike helmet.	# of helmet fittings and distributed	67	100	▲ On Target	In Progress	DOH Bradford Program Staff BC Schools Community Partners

Progress in 2019

Progress was made in many areas in 2019:

In objective 1.1.1 Increase the percent of Bradford Adults who are at a healthy weight classes on nutrition were provided and were successful. Two classes were targeted for completion until COVID-19 prevented the fourth class from being completed.

Our Heart Health Plus newsletter has been completed monthly and is distributed by email to all participants and partners for distribution to their clients.

An internal campaign has been completed for staff to assist in healthy weight activities and will continue monthly. The results among staff have been amazing with many staff reducing weight between 5-10% and making great improvement in aerobic activities.

Objective 1.1.2 was started in 2019 and achieved a good reception within the school district and was moving forward until COVID-19 distributed the school year.

Objective 1.1.3 decreasing the age adjusted death rate for diabetes. Diabetes education was provided with community participation until disrupted by COVID-19. 2 out of 3 groups were completed. We increased participation in health screenings and health fairs to 6 falling slightly short of our goal of 8 due to COVID-19

Objective 1.2.1 deals with our progress in reduction of tobacco use in teens. All targets are on target with modest increases in all areas of tobacco cessation and modest increases in the recruitment of new members of BC Tobacco Free Partnership- Quit Doc members. This is due to the population of Bradford County being small, and recruitment of new members is difficult.

Reporting of tobacco screening have increased but again this is difficult since most are repeat patients and not new patients. Staff is doing a better/good job in capturing these numbers. Bradford County is a former tobacco growing county and the use of tobacco is part of the local culture combines with the fact there is a lot of poverty in the county and this tends to increase tobacco use. Results are encouraging that there has been an increase in cessation classes in Bradford County. The tobacco program appears to have an impact on future generations by starting education at a younger age.

Objective 2.1.1 Our progress in the reduction of infant mortality rate is due to increasing safe sleep presentations and working to increase the number of mothers who initiate breastfeeding. These efforts are being led by Healthy Start staff, WIC, and our Community Health Programs team.

Objective 2.1.2 Decreasing the birth rate in teen girls between the age of 15-19 had been successful in the fact that we have seen an increase in use of the Long Acting Reproductive Contraceptive (LARC) from 15.9% to 35.7%.

Objective 3.1.1 Decrease the unintentional injury age-adjusted death rate in Bradford County. We have undertaken a multi-faceted approach to this problem by providing education and articles on water safety awareness in an effort to prevent accidental drownings, we have provided information and education on car seat safety to prevent car seat deaths and injuries, and we have increased the number of certified car seat technicians from 2 to 4 and have been able to conduct car seat safety checks in Bradford County. Another initiative has been to distribute bicycle helmets that are properly fitted to bike riders and preventing head injuries.

How Targets Were Monitored

Targets were monitored using several different methods which include supervisors tasking their staff to track the objectives that were assigned to them. After these data were collected the information was given to the PM Champion who enters the information into the performance tracking tool. The performance tracking tool provides information as to which objectives are on track, not on track, complete, not complete or decision required.

The performance tracking tool is presented at the Bradford-Bradford PMC meeting on a quarterly basis and the results provide a tool for senior management to monitor the findings to either continue with what is being done to meet the objectives or to evaluate a more effective and efficient method to ensure that objectives are on target. This monitoring method allows for a successful outcome.

Trend and Status Descriptions

*Trend Descriptions:

- ▲ = Data trend is upward and in the desired direction for progress
- ▼ = Data trend is downward and in the desired direction for progress
- ▲ = Data trend is upward and in the undesired direction for progress
- ▼ = Data trend is downward and in the undesired direction for progress

**Status Descriptions:

- **On Track** = Objective progress is exceeding expectations or is performing as expected at this point in time
- **Not on Track** = Objective progress is below expectations at this point in time
- **Decision Required** = Objective is at risk of not completing/meeting goal. Management decision is required on mitigation/next steps.
- **Completed** = Objective has been completed or has been met and the target date has passed
- **Not Completed** = Objective has not been completed or has not been met and the target date has passed

Revisions

No revisions to the CHIP were completed this year because we are starting the process of completing a new Community Health Assessment (CHA) that will be complete by November 2020, and a new CHIP will be started in November and completed by March 2021.

Accomplishments

Goal	Objective	Accomplishment
Reduce obesity and chronic disease in children and adults to enhance quality of life by promoting healthy lifestyle choices.	Bradford will continue to provide nutrition class and track the number of clients that attend classes to establish a baseline. Monitor BMI if applicable.	Increased number of classes from 0-3. The classes have been well received and were disrupted do to COVID-19. Classes will resume as soon as it is deemed safe.

Why This Accomplishment is Important for Our Community

These groups have proven successful by the fact they have reached the targeted group with the goal to reduce obesity and chronic disease and provided an easy and effective way for many people to participate and learn techniques to reduce heart disease, chance of stroke, and high cholesterol using these classes.

Goal	Objective	Accomplishment
Increase knowledge about public safety	Increase number of Certified Car Seat Technicians	We have increased the number of Certified Car Seat Technicians from 2 to 4.

Why This Accomplishment is Important for Our Community

Bradford County has a disproportionate number of unintentional death and injury resulting from accidents and this is a positive and beneficial step in the right direction to help reduce those numbers in a vulnerable population by being sure that car seats are installed correctly, and parents and guardians are sufficiently trained in the proper way to install a car seat.

Conclusion

The Bradford County CHIP serves as a roadmap for a continuous health improvement process for the local public health system by providing a framework for the chosen strategic issue areas. It is not intended to be an exhaustive and static document. We will evaluate progress on an ongoing basis through quarterly CHIP implementation reports and quarterly discussion by community partners. We will conduct annual reviews and revisions based on input from partners and create CHIP annual reports by March of each year. The Bradford County CHIP will continue to change and evolve over time as new information and insight emerge at the local, state and national levels.

By working as a cohesive group, Well Florida Council, Bradford County Health Advisory Group (our community partners), and the Florida Department of Health in Bradford County can have a significant impact on the community's health by improving where we live, work and play. These efforts will allow us to realize the vision of a healthier Bradford County.

Speaker	Topic	Discussion
Kasey Cornwall	Welcome/Call to Order	
	Previous Action Items <ul style="list-style-type: none"> • Item 1: Healthy Lifestyle and Behavior • Item 2: Maternal and Child Health • Item 3: Public Safety 	1. Under Healthy Lifestyles and Behaviors Heart Health Plus has made great strides in the faith-based community by adding two more churches to make the total 6 that are participating in the program. 2. Under Maternal and Child health our Healthy Start staff have been working with their clients to increase the number of children who have ever been breastfed. 3. Under Public Safety we have increased our certified car seat technicians from 2-6 and will increase car seat safety checks and trainings to reduce injury and death in infants and toddlers.
	Progress Reports <ul style="list-style-type: none"> • CHIP 	Overall the CHIP is making good progress toward the goals and objectives set, there are a few areas under Maternal and Child Health that seem to never improve much, such as the area of teen birth and repeat teen birth. Supervisors continue to work with their staff and community partners to gather feedback about what's working to improve the health of the community.
	Objectives Not Meeting Target <ul style="list-style-type: none"> • Objective #2.1.1 Reduce the infant mortality rate in Bradford from 2.3 deaths in 2015-17 to 1.3 deaths per 1,000 live births by Dec. 31, 2020. • Objective # 3.1.1 Decrease the unintentional injury age-adjusted death rate in Bradford from 59.8 deaths per 100,000 in 2013-15 to 58.8 per 100,000 by Dec. 31,2020 	Objective #2.1.1: It's difficult to reduce this stat since we are a small county and do not have a lot of infant deaths. One infant death skews the number drastically and makes the county have a high percentage when one does occur. However, we will continue with education on this objective to minimize future deaths. Objective # 3.1: Again, being a small rural county, a statistic can be skewed due to a small number of incidents. However, we will continue to work on education to decrease the percentage.
