Introduction

This is the annual review report for 2018 Liberty County Community Health Improvement Plan. This will be our last annual review for this CHIP cycle. Like many rural counties, the overall health status for Liberty County has room for improvement. Residents of rural counties often experience significant health disparities such as increased risk of disease with a lack of local resources. The activities and collaborative efforts of the Florida Department of Health in Liberty County and community partners will be reflected within this 2018 Community Health Improvement Plan (CHIP) Annual Report. Community partners such as Big Bend AHEC, Liberty County Extension Office, PanCare, Liberty County Schools and Liberty County Public Library play key roles in maintaining the Liberty County CHIP. This document will serve as a progress review of the strategies that were developed and revised, along with activities that have been implemented. While the CHIP is a community driven and collectively owned health improvement plan, the Florida Department of Health in Liberty County is charged with providing administrative support, tracking and collecting data, and preparing the annual review report. The CHIP is an action-oriented strategic plan that outlines community-driven goals, objectives, strategies and measures for addressing the following top three health priority areas:

1. Education
2. Obesity
3. Risky Youth Behaviors

Overview of the Community Health Improvement Plan (CHIP)

Building a healthier Liberty County began as a community-wide initiative with the goal of establishing an ongoing process for identifying and addressing health needs. The intent of this project was to foster successful partnerships within the community in order to improve the health of Liberty County residents. The Public Health Accreditation Board defines CHIP as “a long-term, systematic effort to address health problems on the basis of the results of assessment activities and the community health improvement process.”

This 2017 CHIP Annual Report reveals the most current progress of efforts by Florida Department of Health in Liberty County (DOH-Liberty) and community partners for the Liberty County CHIP 2015 – 2018.

DOH-Liberty facilitates community wide meetings for the Riverbend Health Advisory Committee to address ongoing health issues, roles, goals and objectives. During the Riverbend Health Advisory meetings the committee members monitor and make needed revisions of the Liberty County CHIP. See Table below for Strategic Issue Areas along with their goals.

STRATEGIC ISSUE AREA	GOAL
Education	Increase high school graduation rate in Liberty County
Obesity	Decrease obesity in Liberty County
Risky Youth Behaviors	Reduce risky behaviors in youth in Liberty County

Summary of CHIP Annual Review Meeting

As part of the CHIP process, an annual evaluation report is required to document successes, challenges, barriers, goal recommendations, objectives, activities, and the creation of an updated version of the CHIP document. In addition, the annual report identifies the lead community group and the data source being used to monitor progress.

During the March 13, 2018 River Bend Health Advisory Committee (RBHAC) meeting, the CHIP was reviewed. Since we are coming to the end of the current CHIP cycle and starting the process for the upcoming 2018 Community Health Assessment (meeting agendas, minutes, and sign in sheets in appendices for 2018 CHA), after discussion among members no new changes would be made to the CHIP at this time. We will continue to work on the strategies as is for the duration of this CHIP cycle.

The key success and progress within this Annual Report is the community partners and their continued dedication and involvement.

Strategic Issue Area #1: Education

While it's known that education leads to better jobs and higher incomes, research also shows that better-educated individuals live longer and lead healthier lives than those with less education, and their children are more likely to thrive. According to Florida CHARTS (2007) elementary school children in Liberty County are almost three times the state rate for not being promoted (9% versus 3.3%). Middle School students are also above the associated state rate for not being promoted (2.9% versus 2.2%).

Goal: Increase high school graduation rate in Liberty County

Strategy 1: Host high school career fair and encourage the development of relationships with career mentors.

Key Partners: Liberty County Chamber of Commerce, local professionals, Faith-Based Groups, Public Officials, Liberty County School District, Florida Department of Health

Why this is important to our community:						
Education is a health issue impacting the residents of Liberty County. Data from the US Census indicates that 25% of residents 25 years and over have a 9 th to 12 th grade education with no diploma, and 42.1% of the county's population have a high school diploma or its equivalent. Among residents 25 years and over, only 13.1% have some college.						
Objective	Indicator	Target by Oct. 2017	Status Oct. 2016	Status Oct. 2017	Status Oct. 2018	Explanation of Status*
Increase high school graduation rate by 10% from 71% to 81% by June 30, 2017.	Percent of graduating students at Liberty County High School.	81%	78%	79%		Improvement has been made in graduation rates according to the US Census.

* Status indicators are as follows:

= Little to no movement towards objective target

= some progress towards meeting the objective target

= reached or surpassed objective target

Strategic Issue Area #2: Obesity

DOH in Liberty County works to maintain health and prevent chronic disease by promoting healthy eating and active living for all residents, regardless of age, in Liberty County. We work with state and local partners on community solutions to help increase healthy food choices and connect people to places and opportunities where they can be regularly active.

Overweight and obesity are conditions that increase the risk for a variety of chronic diseases and health concerns, including heart disease, Type 2 diabetes, heart disease, hypertension, certain cancers, stroke, and high cholesterol (among others). The condition of overweight and obesity are determined by using a calculation, the Body Mass Index (BMI), which takes into account a person's height in proportion to his or her weight. BMI is correlated with the amount of body fat present. The table below summarizes the local effects of obesity for Liberty County.

Goal: Decrease obesity in Liberty County

Strategy 1: Develop community nutrition activities and education.

Key Partners: DOH in Liberty, University of Florida-Institute of Food and Agricultural Science (UF-IFAS), Liberty County School Board, Chamber of Commerce, Faith Based Organizations

Why this is important to our community:						
Liberty County residents who are overweight or obese is a health issue at all age levels. Among WIC children, ages 2 and older, 34.6% are overweight or at risk of being overweight according to FDOH CHARTS data from 2011. Among adults, more Men (45.5%) than Women (33.6%) reported being overweight on the 2010 BRFSS self-report survey. Over one-third of all respondents (41.4%) reported being overweight. Those residents ages 65 years and older had a higher self-report rate of being overweight than resident's ages 18 to 44 and ages 45 to 64.						
Objective	Indicator	Target by Oct. 2017	Status Oct. 2016	Status Oct. 2017	Status Oct. 2018	Explanation of Status
Increase fruit/vegetable intake in adults by 10% from 21.5% to 31.5% by June 30, 2017.	Create 12 or more opportunities for nutrition education/activities.	176	176	813		Three programs offer opportunities for nutrition ed. / activities. CL Ministry Center, classes 2 days/week. Grocery Store Tours (meal prep, label reading, etc.) with 102 participating. Annually, ~661 opportunities

						<p>offered. Heart Health Plus grant – 6 week “cooking Matters” series were held at three churches with over 50 participant benefitting from this opportunity.</p>
--	--	--	--	--	--	---

Goal: Decrease obesity in Liberty County

Strategy 2: Establish comprehensive Physical Education Program in schools.

Key Partners: DOH in Liberty, University of Florida-Institute of Food and Agricultural Science (UF-IFAS), Liberty County School Board, Chamber of Commerce, Faith Based Organizations

Why this is important to our community:						
In Liberty County, 14.9% of high school students are reported to have a BMI at or above the 95 th percentile (FI. CHARTS). According to the U.S. Department of Health and Human Services, childhood obesity has tripled during the last 30 years, estimates suggest that one-third of all children born after 2000 will suffer from diabetes or other obesity-related health problems. Florida Youth Tobacco Survey						
Objective	Indicator	Target by Oct. 2017	Status Oct. 2016	Status Oct. 2017	Status Oct. 2018	Explanation of Status
Decrease percentage of high school students reporting BMI at or above the 95 th percentile by 5% from 14.9% to 9.9% by June 30, 2017	Percentage of high school students reporting a BMI at or below the 95 th percentile. 2012-18% 2014-17%	9.9%	14.9%	18.6%		According to the 2016 Florida Youth Tobacco Survey obesity rates are now at 18.6%.

Goal: Decrease obesity in Liberty County

Strategy 3: Establish nutrition education in high schools.

Key Partners: DOH in Liberty, University of Florida-Institute of Food and Agricultural Science (UF-IFAS), Liberty County School Board, Chamber of Commerce, Faith Based Organizations

Why this is important to our community:						
In Liberty County, 14.9% of high school students are reported to have a BMI at or above the 95 th percentile (FI. CHARTS). According to the Center for Disease Control, 6 in 10 children did not eat enough fruit and 9 in 10 children did not eat enough vegetables in 2007-2010.						
Objective	Indicator	Target by Oct. 2017	Status Oct. 2016	Status Oct. 2017	Status Oct. 2018	Explanation of Status
Establish nutrition education in high schools by June 30, 2017	Number of educational classes completed in 2016-2017 school year.	5	0	3		Nutrition educational classes were done during the year and reached over 50 students.

Goal: Decrease obesity in Liberty County

Strategy 4: Develop community physical fitness activities.

Key Partners: DOH in Liberty, University of Florida-Institute of Food and Agricultural Science (UF-IFAS), Liberty County School Board, Chamber of Commerce, Faith Based Organizations

Why this is important to our community:						
Adults in Liberty County who meet moderate physical activity are at 28.7% which is below Florida's state rate of 34.6%. (Florida BRFSS 2007) Regular physical activity can improve the health and quality of life of Americans of all ages, regardless of the presence of a chronic disease or disability. There are a number of physical assets and resources within Liberty County which can be mobilized to address the obesity health related issues that can be utilized.						
Objective	Indicator	Target by Oct. 2017	Status Oct. 2016	Status Oct. 2017	Status Oct. 2018	Explanation of Status
Increase percentage of adults who meet moderate activity by 5% from 28.7% to 33.7% by June 30, 2017.	Create fitness program and educate public on existing physical assets and resources in the community.	33.7%	28.7%	Pending next Florida BRFSS report		The Tai Chi Moving for Better Balance grant ended in 2016 but DOH-Liberty hosted 1 community-wide walk/run event.

Strategic Issue Area #3: Risky Youth Behavior

DOH in Liberty County and community partners have formed a task force to address the mounting issue of risky youth behaviors in Liberty County. DOH/Liberty works with state and local partners on community solutions to help decrease issues such as teen pregnancy, along with increasing the educational opportunities to youth about risky behaviors that have a lasting impact on their life.

Pregnant teens and their babies are at higher risk of health problems than are pregnant women who are older. The most common complications for pregnant teens — especially those younger than age 15 and those who do not receive prenatal care — include a low level of iron in the blood (anemia), high blood pressure and preterm labor. The table below summarizes the statistics for teen pregnancy for Liberty County.

Goal: Reduce risky behaviors in youth in Liberty County.

Strategy 1: Establish educational program within community to reduce teen pregnancy rates.

Key Partners: DOH-Liberty, Liberty County School Board, Faith Based Organizations

Why this is important to our community:						
Liberty County teens are at an increased risk for teen pregnancy, due to lack of educational resources. The teen pregnancy rate (ages 15-19) for Liberty County is more than double the state of Florida teen birth rate. There is growing concern by the community surrounding this topic and others related to teen pregnancy, such as, STD prevention, self-esteem promotion, and infant mortality reduction. (Florida CHARTS)						
Objective	Indicator	Target by Oct. 2017	Status Oct. 2016	Status Oct. 2017	Status Oct. 2018	Explanation of Status
Reduce teen pregnancy rates from 34.0 per 1000 females 15-19 to 31.0 per 1000 females 15-19.	Reduce teen pregnancy rates by 3%.	31.0 per 1000 females 15-19	34.0 per 1000 females 15-19	23.5 per 1000 females 15-19		Task Force has established curriculum and met with teachers. Curriculum will start in January 2018.

Revisions

Updated 2017 CHARTS data has been added for Reduce teen pregnancy rates. There are no other revisions due to the fact that our current CHIP ends June 2018. We have completed our new 2018 Community Health Assessment and 2018 Community Health Improvement Plan.

Accomplishments

Liberty County residents can celebrate in accomplishing increased opportunities for Decreasing Obesity in Liberty County within the Liberty County CHIP. Various opportunities focused on increased nutrition education and workshop participation among residents. Partnerships in rural counties have proven necessary to make significant impacts among residents, together we are moving in the right direction to reach the ultimate goal of a healthier Liberty County.

Goal	Objective	Accomplishment
Decrease Obesity in Liberty County	Increase fruit/vegetable intake in adults by 10% from 21.5% to 31.5% by June 30, 2017.	The target for this objective was to create opportunities for nutrition education and/or activities. In 2016, 176 opportunities were accomplished and in 2017, approximately 661 opportunities were provided by the Calhoun-Liberty Ministry Center. Grocery Store Tours (meal prep, label reading, etc.) with 102 participating. Heart Health Plus "Cooking Matters" classes were able to reach over 50 community members for a total of 813 community members participating.
How it's important for our community: Nutrition education/activities have increased from 176 to over 800 in 2017 for Calhoun and Liberty County residents.		

Goal	Objective	Accomplishment
Decrease Obesity in Liberty County	Establish nutrition education in high schools by June 30, 2017.	Nutrition educational classes were done during the year and reached over 50 students.
How it's important for our community: Nutrition education/activities have increased from 176 to over 800 in 2017 for Calhoun and Liberty County residents.		

Goal	Objective	Accomplishment
Reduce risky behaviors in youth in Liberty County	Reduce teen pregnancy rates from 34.0 per 1000 females 15-19 to 31.0 per 1000 females 15-19.	Task Force has established curriculum and met with teachers. Curriculum will start in January 2018.
How it's important for our community: Curriculum has been selected and will start January 2018.		

Conclusion

The CHIP serves as a roadmap for a continuous health improvement process for the local public health system by providing a framework for the chosen strategic issue areas. It is not intended to be an exhaustive and static document.

The DOH in Liberty County and community partners will continue to evaluate progress through CHIP implementation reports and discussion/review during Riverbend Health Advisory Committee meetings. The new process has begun for our 2018 CHA and CHIP and we will conduct annual reviews and revisions based on input from partners and create CHIP annual reports by September of each year. The CHIP will continue to change and evolve over time as new information and insight emerge at the local, state and national levels.

By working together, DOH Liberty and community partners can have a significant impact on the community's health, improving where we live, work and play while creating a healthier Liberty County.

Purpose:
Engage community in improving the health of Calhoun and Liberty Counties through open two-way dialogue.

Attendees (e.g. community partners, additional CHD staff) See Attached Sign-In Sheet

Speaker	Topic	Discussion
Susan Chafin, DOH Calhoun/Liberty	Welcome/Call to Order <ul style="list-style-type: none">• Introductions• Brief review of agenda• Prompt attendees to sign-in	Susan Chafin welcomed everyone and asked for self-introductions. Ms. Chafin thanked all for their continued dedication on the Community Health Assessment (CHA).
Susan Chafin	Review Previous Minutes	Review of last minutes from July 24, 2017.
Cecille Lucerno, Staff Attorney - Legal Services of North Florida	Presentation: Legal services to immigrants and LEP populations.	<p>The mission and purpose of Legal Services of North Florida is:</p> <p>Mission: <i>The mission of Legal Services of North Florida is "To provide an opportunity for justice for eligible residents through representation conducted efficiently and comparable in quality to that of the private bar, and through other forms of legal assistance designed to provide a full range of civil legal services to those in need."</i></p> <p>Purpose: LSNF's purpose is to provide case representation and advice to low-income persons in civil matters only. LSNF serves only the low-income and those with certain vulnerable circumstances including the elderly. LSNF never charges a fee for our services to a client. They recognize that there is a large immigrant population not taking advantage of free legal services available to them in our area. Free legal services are available due to grant funding though the Violence Against Women Act. Service area consists of 16 counties including Liberty, Calhoun, Gadsden, Washington and Holmes. Ms. Lucerno asked the group if they have had recent experience with any immigrants who would qualify</p>

COMMUNITY MEETING MINUTES

		for the services. Sean Golder admitted to regular interaction with immigrants at Pancare that he believed could benefit from the services. Ms. Lucerno is looking to educate community partners that these services are available in this area.
Jodi Speciale Marissa Barfield	Status Update of Previous Actions: Teenage Pregnancy Community Conversation	<p>Jodi Speciale and Marissa Barfield recapped what was discussed in the previous meeting concerning the Community Teenage Pregnancy Focus Group. Calhoun and Liberty Counties have had high averages of teen pregnancy rates which stemmed the foundation of the focus group. A handout was disseminated to the group which reflected rates from 2013-2016 of 15-19 year old females with birth rates per 1000. The handout compared Calhoun and Liberty Counties with a bar chart. Schools in both counties have been on board with various activities in an attempt to combat teen pregnancy. Current activities include:</p> <ul style="list-style-type: none"> • Teen Pregnancy Prevention Awareness Month Activities: April/May • Journalism Class Projects • Implementation of Curriculum; 3 R's. This will be incorporated in the area schools in individual ways to best suit the topic of discussion for each lesson. • Rita Smith, ARNP along with nurses at the health department has been visiting the schools presenting to students about various topics. • Flyer in school bathrooms about confidential services available at the local health departments with tear away contact information.
Susan Chafin, DOH Calhoun/Liberty	Open Floor for Community Input	<p>Chuck Durant from Calhoun-Liberty Hospital mentioned the importance of continuity of educating youth on sexual health services. This will not be successful with a "one-time lesson". Ladonna Kelley mentioned that in Calhoun County, they are applying for the wrap-around grant. She believes that this grant will assist with drop-out rates that are believed to be in correlation with teenage pregnancy rates. Sean Golder with</p>

Florida Department of Health in Calhoun/Liberty Counties
Riverbend Health Advisory Committee Meeting
Liberty County-Veterans Memorial Civic Center
March 13, 2018 1:30-3:00 EST

COMMUNITY MEETING MINUTES

		<p>Pancare discussed mental health and its connection with teenage pregnancy and school drop-out rates. Mental health is not being addressed in schools due to strict testing standards. Another topic related to teenage pregnancy is unaccompanied youth. Carolyn Sellers from the Apalachee Center discussed mental health and the need for outreach and education. Ladonna Kelley expressed that mental health services are a tremendous need for youth and we are missing this in our counties. Chuck Durant with Calhoun Liberty Hospital said that studies show that satellite mental health services are proven effective. This could be an option for our counties due to lack of therapists/providers in this profession, particularly psychiatrists. Apalachee Center provides telemed services. Annie Hollister with the Panhandle Area Health Network, Inc. gave a brief overview of their prescription assistance program. The services are free of charge. If there are any individuals in need of prescription medication that cannot afford to buy them, they can assess their individual situation and provide assistance. Sean Golder with Pancare gave a brief update of current services. North Florida Apalachee Regional Planning Council representative, Elise Fisher is trying to connect with areas outside of Leon County and is looking for individuals interested in volunteer opportunities. Chuck Durant with Calhoun Liberty Hospital is working on a process with direct admits in leu of sending a patient through the emergency room. Angela Schneckloth announced that Chipola Healthy Start is focusing on oral health this month as their monthly outreach topic. Kelly King discussed the services that are currently provided at the health department. Calhoun and Liberty Health Department services include child health and women's health. She also discussed the confidential services program. Sean Golder with Pancare announced that they will have a mobile mammogram bus that will be located in Carrabelle on April 28th from 9-3:00 and will be free of charge.</p>
<p>Susan Chafin, DOH Calhoun/Liberty</p>	<p>CHA/CHIP Update</p>	<p>Susan Chafin provided a CHA/CHIP update. The new CHA has been created and after being sent out to the committee for feedback has been completed, The CHA was available for the group to review. Susan reviewed the priority areas that</p>

Speaker	Topic	Discussion
Rachel Bryant, DOH Calhoun/Liberty	Welcome/Call to Order <ul style="list-style-type: none">• Introductions	Welcomed and Introductions
Susan Chafin, DOH Calhoun/Liberty	Brief review of agenda Prompt attendees to sign-in	
Betsy Wood	Priority Areas	Info graphics provided that summarize the data that was found on the three priority areas. Notes from last time were reviewed; Priority area Access: Goal was to increase the number of adults and children who have access to care. Date needs to be set for each objective. 2 nd strategy was to increase health messaging at community events. 3 rd strategy to create a core collaborative health information binder to insure uniform health messaging. The binder is still in progress, if anyone has information they would like added please let them know. First draft of binder is targeted for the end of June. Summary of Strategies is working together collaboratively to know what events are coming up, need to collaborate and put out there to one another. Binders will be distributed to schools, health care, and faith based. Issues: most churches do not have full time pastors; ministry center would be a good contact. Two of the state priority areas are behavioral health which includes mental health and substance abuse and healthy weight, nutrition, and physical activity. Possibly align with the states views, strategies, ideas etc. Two goals that came from our conversation last time. 1: Increase awareness and education about substance use in youth 2: Dealing with substance abuse resources in Calhoun and Liberty County. Do you want to consider including alcohol and/or

COMMUNITY MEETING MINUTES

tobacco? Focus agreed to be on Substance Abuse.

CARE has been coming into Calhoun for several years to educate youth in Calhoun county. Focus has been on 6th -8th next year they are shifting down to 4th-6th grades. Care provides education on: Drug prevention, all forms of drugs. CARE does not service Liberty County. One of the drawbacks is parents do not what certain topics are discussed with their elementary aged students. How can parents hear the same thing the students are hearing? Buy in for adults is have a drawing for a gift card. Needs: to Increase awareness of availability of resources out there. Conduct ongoing training??? This information will be provided in the binder that will be distributed. School district has started a Facebook page to offer resources available within the community and to share resources. From a Church standpoint RCC-Dustin churches try to partner with parents. At most they have 40 hours in a year with them, so understandably parents have the most influence. Parents have 3000 hours verses the church who only has 40 hours of the student's time per year, goal is making students and parents aware of the decisions they make can be. One of the greatest assets is providing people to help. Emphasis keeps coming back to the resource directory. Parents currently getting their information from social media, word of mouth and youth are getting their information from other students and social media. Last time we talked about educating county commissioners to encourage local ownership of substance abuse resources. New resource available at Doctors Memorial hospital, for detoxing clients. They accept Medicaid, Medicare, and self-pay. They arrange after care for clients who desire to continue with treatment after the 2-5 day detox period. Transportation is a major hurdle for both counties. One of the things available is a community guide best practice compendium, look at the best practices, then make a decision about the path to take. Objective is developing informational materials. Ladona needs a drug curriculum which she is in search of in order to teach substance abuse.

COMMUNITY MEETING MINUTES

3yr goal: Obesity Improve youths outlook and understanding on living a healthy life. Objective: Improve youth's nutrition and access to healthy foods. Focus will be on youth.

Look at the BMI data that is in charts from 2011/2012. We can gather the info from charts currently with 1st, 3rd and 6th grades listed in charts. Backpack program: Ladona visited Jackson county back pack program, currently they partner with second harvest. Chief of police has offered to partners with the back-pack program. He has agreed to ordering from second harvest as well as help with manpower. Current needs a place to store the food. Hospital has said they have an employee's club that may/would help with this program. Suggestions: Getting farm share involved, asking Mayhaw center if they have storage for the food. A lot of evidence based strategies dealing with obesity within the schools. Do we want to stay with this idea or expanded upon the back-pack idea? Currently the schools in Liberty has a grant program that supplies fruits and vegetables. Idea: Increase water intake one school gave out water bottles, which has child's name on it. The bottle stays at school, youth can fill up with water throughout the day (elementary students). Fat letters from school. Where do parents take the youth, who need to lose weight. Park activities? Objectives: Encourage youth to spend time outside partaking in physical activities? Contact gyms to see if they would be offering a free class for youth, another idea is to share school playgrounds with the community on the weekends? "shared use playground" Another idea was getting youth during school to getting youth to stand, sit, or sit on balls during school once an hour they stop 5-10 minutes from studies in order to facilitate exercise. School gardens is another idea a garden was put at Tolar, nice school garden at Carr just planted sweet potatoes. Carrs garden will be refunded next year. A taste test will at the beginning of the year for the sweet potatoes in the lunch rooms. Blountstown elementary had a garden, we will be looking at refunding that as well. Betsy says we have talked about a couple of different options for obesity, we can do evidence based research for this. They will compile the information and we will be building out your

COMMUNITY MEETING MINUTES

		<p>BMI of 1,3 and 6 grade students will plateau. The objectives are: "By December 2018, establish a backpack program for youth in Calhoun County. By December 2019, implement a backpack program for youth in Liberty county." The second proposed objective is "By December 2019, increase by 10% the number of opportunities for youth to participate in physical activity over the 2018 baseline". Edda Rodriguez discussed the local resource binder that she has created using feedback from this group. The resource binder will continue to grow as new information is provided.</p>
<p>Betsy Wood</p>	<p>Open Floor for Community Input</p>	<p>Betsy asked the group how agencies will be able to assist Ms. Kelley with the backpack program. Marissa Barfield reported on her understanding of the current progress of the Backpack Program. She relayed that Ms. Kelley is still working to secure an air-conditioned building to keep food and backpack supplies in. She is looking to utilize a portable building at a Calhoun County school. Ms. Kelley was unable to attend today's meeting. James Lewis offered information on a contact that he knows who would be able to offer assistance with repairing an air conditioner if needed. He will share this information with Ms. Kelley. The group looked at target dates for the backpack program in the CHIP and discussed what dates would be best to place in the CHIP. Moving along to addressing how to measure youth BMI's was discussed. Jodi Speciale explained to the group that this is a difficult task at this point. This is a hard number to measure. At this</p>

Health Advisory Meeting
Veteran's Memorial Civic Center
Bristol, Florida
July 12, 2018 at 2:00 EST

COMMUNITY MEETING MINUTES

		<p>time, the best method of measuring is to utilize the 1st, 3rd and 6th grade student BMI's that at measured by the school nurses. The group agreed to set this goal as "Liberty county's BMI will not increase over 20%, and Calhoun county's BMI will not increase over 21%.</p>
	<p>Consider Possible Directions <i>Consider and introduce possible strategies or potential policy needs. This discussion is to guide the group towards local needs.</i></p> <ul style="list-style-type: none">• Strategy/Policy Need 1• Strategy/Policy Need 2• Strategy/Policy Need 3	<p>Betsy voiced the potential need at this time is to identify key messages decided upon by the group. One unanimous message that everyone agreed on to use is "Everybody has 1,440 minutes per day, make 30 minutes physical activity", "Make half your plate fruits and vegetables.", "8 is great! Drink 8 glasses of water each day", and "Power off and Play! to reduce screen time."</p> <p>Spreading the key messages within the community will be added to the work plan. The measurable goal is that key messages will be disseminated at a minimum of one event each month. The group discussed different opportunities to spread the key messages.</p>
	<p>Actions</p>	<p>As changes have been made to the resource binder and CHIP, it will be sent to the group for review and changes will be made as needed.</p>
	<p>Meeting Evaluation <i>Request community members and partners to complete the Community Engagement Survey.</i></p>

COMMUNITY MEETING MINUTES

Florida State University		Health and the Calhoun Liberty Hospital Primary Care clinic will increase by 10% over the 2017 baseline.
Betsy Wood	Open Floor for Community Input	<p>The group discussed the listed clinics currently in objective. There are locations missing in this objective. Additions will be Calhoun County and Liberty County Health Departments, the TMH primary care clinic and the Medical Center of Blountstown. Susan Chafin will reach out to each organization to access the baseline numbers that we need from 2017. The data she will request is the number of patients served in 2017 from Calhoun and Liberty Counties.</p> <p>Betsy discussed how uniform health messages disseminated throughout the community will hopefully break some barriers between the local population and health care providers. The local resource binder that is being created will be a tool used to spread uniform health care access messaging. Edda briefly reviewed the binder in its current state. She encouraged feedback from meeting participants. Marissa Barfield will follow up with the WIC portion and will provide the missing information to Edda to add to the binder. The name of the "binder" was discussed by the group. At this time, the name is misleading. The group agreed to change the name to state more clearly what the binder actually is. Another topic that was discussed was who the permanent "keeper" of this resource will be. The binder/resource guide will be reviewed at each CHIP meeting for updating and review. Adding hyperlinks to websites and phone</p>

August 23, 2018 at 2:00 EST

COMMUNITY MEETING MINUTES

		<p>numbers was also suggested. The electronic, current version of the binder will be housed on the Calhoun/Liberty County website. Key messages were identified at the obesity meeting. Edda encouraged open discussion to establish a few key messages that relate to access to care. The key messages for Access to Care will be xxx. Edda will create an infographic that includes the key messages for access to care. The group discussed that the current 10% seems like a large jump of improvement for a one year time. It was agreed to change the overall goal to be 10% increase over the next three years. Once the baseline numbers are accessed, we will further discuss what an achievable goal will be.</p>
		<p>The next CHIP meeting was set for September 19, 2018 at 2:00 est. will be the meeting for the mental health/substance abuse portion.</p>
	<p>Actions</p>	<p>As changes have been made to the resource binder and CHIP, it will be sent to the group for review and changes will be made as needed.</p>
	<p>Meeting Evaluation <i>Request community members and partners to complete the Community Engagement Survey.</i></p>	<p>Community engagement surveys were distributed and were completed by meeting participants.</p>
