Introduction

This is the annual review report for the 2018 – 2023 Sumter County Community Health Improvement Plan (CHIP). The activities and collaborative efforts of the Sumter County MAPP Steering Committee (SMSC), led by the Florida Department of Health in Sumter, will be reflected within the report. This document will serve as a progress review of the strategies that were developed and the activities that have been implemented. While the CHIP is a community driven and collectively owned health improvement plan, the Florida Department of Health in Sumter County is charged with providing administrative support, tracking and collecting data, and preparing the annual review report.

In a series of bi-monthly meetings beginning in July 2018, the Sumter Performance Management Council (PMC) reviewed and monitored the existing CHIP. In January of 2019 the SMSC held its annual meeting to update members, provide feedback on current progress, give members an opportunity to provide feedback and input, share newly available data, and request volunteers to join the Community Health Behaviors Survey or the Life Expectancy Project Planning Committee. Several members volunteered to join the planning committees. The following is a list of community partners represented on the SMSC.

County Administration	Sumter County Public Works
Early Learning Coalition of Sumter County	The Villages Fire Rescue
Sumter County Fire and EMS	Mid Florida Homeless Coalition
Sumter County School Board	Sumter County Hope Center
Florida Department of Children and Families	Sumter Chamber of Commerce
Parson's Circle Community Outreach	Langley Health Services
Lake-Sumter State College	Nature Coast Early Learning Coalition
Neighbor to Neighbor	LifeStream Behavioral Center

Overview of the Community Health Improvement Plan

The SMSC, led by the Florida Department of Health in Sumter County (DOH-Sumter) initiated the community health assessment process for Sumter County in 2017. This phase of the process culminated in the creation of the [2018 Community Health Assessment Report \(CHA\)](#), in May of 2018. Following the completion of the CHA, the SCMSC began the Community Health Improvement Planning (CHIP) process. The purpose of the CHIP is to define how the SMSC, in collaboration with various community partners, will work together to ensure that, “All Sumter County residents and families will be empowered to engage in healthy, safe, and active lifestyles through strong partnerships and locally available programs and resources.” ~2018 Shared Vision

Using the MAPP framework, the SMSC identified the following Strategic Priority Areas to address in the 2018-2023 CHIP:

1. Maternal and Child Health
2. Chronic Disease
3. Community Engagement

Maternal and Child Health: Goals selected to ensure this priority area is addressed include:

- | | |
|---|---|
| 1. Decreasing age 0-5 motor vehicle crash morbidity & mortality rates | 4. Increasing the number of parenting support resources |
| 2. Decreasing teen birth rates | 5. Increasing access to parenting resources |
| 3. Increasing the rate of mothers that initiate breastfeeding | |

Chronic Disease: Goals selected to ensure this priority area is addressed include:

- | | |
|---|---|
| 6. Reducing the rate of falls deaths & injuries | 9. Improving data quality regarding health behaviors |
| 7. Increasing access to nutrition education | 10. Increasing rates of seatbelt use amongst target populations |
| 8. Increasing access to physical activity opportunities | 11. Maintaining tobacco prevention activities |

Community Engagement centers on the ability of the local public health system to reach, effectively communicate with, and ultimately modify the health behaviors of the communities served. Goals selected to ensure this priority area is addressed include:

- | | |
|--|---|
| 12. Increasing access to available health resources | 14. Improving data quality regarding health marketing effectiveness |
| 13. Increasing collaboration amongst local community organizations | |

Summary of CHIP Annual Review Meeting

During the annual SMSC Meeting, held on January 31st, 2019 a variety of community health related topics were discussed. The broad topics of discussion included health data updates, a review of SMSC goals and progress, and upcoming SMSC events. Key discussions focused on newly available life expectancy data which shows large disparities in life expectancy across the different regions of the county and the need for volunteers to join the Community Health Behaviors Survey and or the Life Expectancy Project Planning Committees. Several SMSC members joined the planning committees.

Strategic Issue Area #1: Maternal and Child Health

Maternal and Child Health focuses on preserving both the health of the mother and the child, through adolescence, and prevention of negative outcomes including infectious and chronic disease and injury.

Goal 1: Decrease ages 0-5 motor vehicle crash morbidity & mortality rate

Strategies:

Strategy 1: Develop car seat promotion program

Key Partners: WIC, Early Learning Coalition of the Nature Coast

Why this is important to our community:

Five and under motor vehicle crash deaths are tragic often preventable events that lead to a significant number of years of potential life lost (YPLL).

<i>Objective</i>	Indicator	Current Level	Target	Status	Explanation of Status*
<i>By June 30, 2019, develop one (1) car seat check in collaboration between DOH-Sumter & WIC.</i>	Number of car seat check events	0	1		Objective completed on 8/21/18, with the help of WIC
<i>By June 30, 2019, develop one (1) car seat check in collaboration between DOH-Sumter & local daycares.</i>	Number of collaborations developed	0	1		On schedule
<i>By June 30, 2019, develop one (1) locally selected strategy to promote existing car seat safety check resources.</i>	Number of strategies developed	0	1		Car seat check promotion billboard created and put up at DOH-Sumter

Goal 2: Decrease teen birth rates

Strategy 1: Provide teen pregnancy resources, education, & training

Key Partners:

Why this is important to our community:

For years, Sumter County has been underperforming, when it comes to preventing teen pregnancy. Teen pregnancy has important ramifications on a number of key health outcomes and factors such as educational attainment.

Objective	Indicator	Current Level	Target	Status	Explanation of Status*
By June 30, 2019, develop one (1) teen pregnancy prevention program.	Number of teen pregnancy programs developed	0	1		On schedule

Goal 3: Increase rate of mothers that initiate breastfeeding

Strategy 1: Increase lactation resources, education, & training

Key Partners: WIC

Why this is important to our community:

In 2016, Sumter County ranked 42 of 67 counties for mothers who initiate breastfeeding. Since 2014 the percent of Sumter County mothers who initiate breastfeeding has been trending upwards, yet is still lower than the state percentage.

Objective	Indicator	Current Level	Target	Status	Explanation of Status*
By June 30, 2019, maintain one (1) DOH-Sumter certified lactation consultant.	Number of lactation consultants maintained	1	1		On schedule
By June 30, 2019, develop one (1) partnership with WIC aimed at the creation of a referral system for breastfeeding support through DOH-Sumter lactation consultant.	Number of partnerships developed	1	1		On schedule
By December 31, 2019; Develop one (1) breastfeeding education outreach campaign.	Number of breastfeeding promotion campaigns developed	0	1		On schedule

Goal 4: Increase number of parenting support resources

Strategy 1: Increase parenting support resources

Key Partners: United Way of Lake and Sumter County

Why this is important to our community:

In three different assessments, members of the Sumter County Community expressed the need to increase parental involvement, support and skills as a method to address a number of issues including teen pregnancy and supporting positive health behaviors.

Objective	Indicator	Current Level	Target	Status	Explanation of Status*
By June 30, 2019, develop one (1) parenting support partnership.	Number of partnerships developed	0	1		On schedule
By June 30, 2019, encourage one (1) parenting support community resource to register with the United Way 211 guide.	Number of partners encouraged to register on 211	0	1		Mary Stickney (WIC Program Director) encouraged to register on 1/31/19

Goal 5: Increase access to parenting resources

Strategy 1: Promote use of resource guides

Key Partners: United Way of Lake and Sumter County, Lake-Sumter State College

Why this is important to our community:

A common gap/barrier identified by the SMSC was a lack of resources and/or a lack of awareness of available resources. This factor is also embodied in the local shared vision, "all Sumter County residents and families will be empowered to engage in healthy, safe, and active lifestyles through strong partnerships and locally available programs and resources."

Objective	Indicator	Current Level	Target	Status	Explanation of Status*
By June 30, 2019, use three (3) methods to promote the United Way 211 guide (print and or online version).	Number of methods used to promote 211	0	3		211 promoted by 3 methods: 1 Print, Langley Resource Fair 12/6 (tobacco table), 1 Online DOH Sumter website, 1 promoted at SMSC Annual Meeting
By June 30, 2019, encourage five (5) community partners to update or add information to the United Way 211 guide.	Number of partners encouraged to register on 211	0	5		6 community partners encouraged on 1/31/19 at the annual SMSC Meeting

* Status indicators are as follows:

= Little to no movement towards objective target

= some progress towards meeting the objective target

= reached or surpassed objective target

Strategic Issue Area #2: Chronic Disease

Chronic Disease, for the purposes of this CHIP, includes a wide variety of non-communicable conditions in the adult population. Examples include disease conditions that result from poor dietary habits, and conditions associated with risky health behaviors such as smoking.

Goal 6: Reduce the rate of falls deaths & injuries

Strategy 1: Develop falls prevention program

Key Partners: Lake-Sumter State College, Advanced Physical Therapy, Sumter Medical Reserve Corps.

Why this is important to our community:

In 2016, the Sumter, Lake, and Marion area led the state in falls-related deaths. Sumter County has the highest median age of any county in the US and current population trends indicate that this fact will likely not be changing.

Objective	Indicator	Current Level	Target	Status	Explanation of Status*
<i>By December 31, 2018, promote falls prevention program via at least three (3) media formats.</i>	Number of media formats used to promote	0	3		Promoted using three methods 1 Healthy Ways, Healthy Days (HWHD) Calendar, 2 Villages News article, Able, Stable, & Well Sumter website
<i>By June 30, 2019, conduct at least two (2) falls home risk assessments.</i>	Number of assessments conducted	0	2		On schedule
<i>By June 30, 2019, conduct at least two (2) falls patient risk assessments.</i>	Number of assessments conducted	0	2		On schedule
<i>By June 30, 2019, complete two (2) Matter of Balance programs in the community.</i>	Number of programs completed	0	2		On schedule
<i>By June 30, 2019, conduct a falls prevention needs assessment with community health care providers & facilities.</i>	Number of needs assessments conducted	0	1		Needs assessment distributed on 8/1/18
<i>By June 30, 2019, deliver one (1) falls prevention education & outreach presentation to health care providers.</i>	Number of presentations conducted	0	1		On schedule
<i>By June 30, 2019, deliver two (2) falls prevention education & outreach presentations to community members.</i>	Number of presentations conducted	0	2		Completed on 1/2/19

Goal 7: Increase access to nutrition education

Strategy 1: Develop nutrition education partnership

Key Partners: Lake-Sumter State College, Sumter County School Board, City Ministries

Why this is important to our community:

Obesity affects 17% of all children and adolescents in the U.S. – triple the rate from just one generation ago (Centers for Disease Control and Prevention).

Objective	Indicator	Current Level	Target	Status	Explanation of Status*
By June 30, 2019, implement one (1) nutrition education program to school-aged children, in addition to existing programs delivered in middle school.	Number of nutrition programs implemented	0	1		Presentation held on 12/11/18
By December 31, 2018, host at least one Health Wise Prize quiz competition event, including a health equity & nutrition component.	Number of events hosted	0	1		Health Wise Prize event hosted on 10/26/18
By June 30, 2019, deliver one (1) nutrition educational presentation for local churches.	Number of presentations	0	1		Event completed on 9/28/18 at City Ministries

Goal 8: Increase access to physical activity opportunities

Strategy 1: Develop physical activity education partnership

Key Partners: Sumter County School Board, City Ministries

Why this is important to our community:

Of the top five causes of death in Sumter County in 2016, four are associated with obesity.

Objective	Indicator	Current Level	Target	Status	Explanation of Status*
By June 30, 2019, implement one (1) physical activity educational program to school-aged children, in addition to existing programs delivered in middle school.	Number of programs implemented	0	1		Presentation held on 12/11/18
By June 30, 2019, deliver one (1) physical activity educational presentation for local churches.	Number of presentations hosted	0	1		Event completed on 9/28/18 at City Ministries

Goal 9: Improve data quality regarding health behaviors

Strategy 1: Conduct community survey

Key Partners: Lake-Sumter State College, Sumter MRC

Why this is important to our community:

According to the Robert Wood Johnson Foundation, in 2014, 19% percent of adults reported that they were sedentary, or reported no physical activity during their leisure time.

Objective	Indicator	Current Level	Target	Status	Explanation of Status*
By December 31, 2019, develop partnerships with local organizations to plan community health behaviors survey.	Number of partnerships developed	0	1		Recruitment email and meeting held
By June 30, 2022, plan, develop, & implement community health behaviors survey.	Number of surveys implemented	0	1		2 community partners recruited to join planning effort
By June 30, 2023, distribute results of community health behaviors survey in updated CHA.	Number of survey results distributed	0	1		Survey planning to begin in 2019

Goal 10: Increase rates of seatbelt use amongst target populations

Strategy 1: Develop social marketing campaign for seatbelt promotion

Key Partners: Early Learning Coalition of the Nature Coast, Lake-Sumter State College

Why this is important to our community:

Rural areas of the US generally have lower rates of seatbelt usage. In 2018, DOH-Sumter staff surveyed 5,037 vehicles. The overall rate of seatbelt usage was 66%. This is well below the percentage seen in Florida and the U.S. which reported seatbelt usage rates of 90.7% and 89.7%, respectively in 2017 (U.S. Department of Transportation, 2018).

Objective	Indicator	Current Level	Target	Status	Explanation of Status*
By June 30, 2019, partner with one (1) local worksite to promote seatbelt use among employees via a social marketing campaign.	Number of marketing campaigns implemented	0	1		Planning committee recruitment began on 1/31/19
By June 30, 2019, deliver provider waiting room DVD that includes seatbelt promotion to ten (10) health care providers.	Number of providers receiving DVDs	0	10		DVD developed

Goal 11: Maintain tobacco prevention activities

Strategy 1: Maintain tobacco prevention activities

Key Partners: Sumter County School Board, Sumter Community Action Partnership (CAP), Tobacco Free Florida, Department of Juvenile Justice (DJJ), Sumter County Health and Wellness Advisory Committee (SCHWAC), Sumter MRC, Langley Health Services, Sumter County Housing Authority, Central Florida Area Health Educator Center (CFAHEC)

Why this is important to our community:

Youth tobacco use rates, in Sumter, are higher than the rate seen in the state, with 3.7% of 11-17-year-old smoking, and 5.1% of Sumter youth using smokeless tobacco products.

Objective	Indicator	Current Level	Target	Status	Explanation of Status*
By June 30, 2019, ensure that all tobacco grant deliverables are completed on time.	Number of tobacco programs maintained	1	1		Grant activities on schedule

Strategic Issue Area #3: Community Engagement

Community Engagement centers on the ability of the local public health system to reach, effectively communicate with, and ultimately modify the health behaviors of the communities served.

Goal 12: Increase access to available health resources

Strategy 1: Promote local health resources

Key Partners: United Way of Lake and Sumter County, Lake-Sumter State College, Sumter County School Board

Why this is important to our community:

A common gap/barrier identified by the SMSC was a lack of resources and/or a lack of awareness of available resources. This factor is also embodied in the local shared vision, "all Sumter County residents and families will be empowered to engage in healthy, safe, and active lifestyles through strong partnerships and locally available programs and resources."

Objective	Indicator	Current Level	Target	Status	Explanation of Status*
By December 15, 2018, increase the number of 2019 Healthy Ways, Healthy Days calendars produced by 10% from 2018 baseline.	Percentage increase	0%	10%		Ordered 1,180 Calendars (2018)
					Ordered 2,117 calendars (2019)
By January 31, 2019, distribute all 2019 Healthy Ways, Healthy Days (HWHD) Calendars.	Number of calendars distributed	0%	100%		All calendars distributed
By December 31, 2018, include the United Way 211 guide on the DOH-Sumter website.	Link included on website	0	1		Link included on the website

By December 31, 2018, redesign & update the DOH-Sumter brochure.

Number of brochures redesigned	0	1		Brochure redesigned and published
Number of resource mapping events completed	0	1		Planning has not started yet.

By December 31, 2022, conduct resource mapping of the public health resources available for Sumter county residents.

Goal 13: Increase collaboration amongst local community organizations

Strategy 1: Develop Community Health Event promotion partnership

Strategy 2: Improve communication amongst MAPP Steering Committee members

Strategy 3: Increase the number of cohosted/ cosponsored community events

Key Partners: United Way of Lake and Sumter County, Lake-Sumter State College, Sumter County School Board, Early Learning Coalition of the Nature Coast

Why this is important to our community:

A common gap/barrier identified by the SMSC was a lack of resources and/or a lack of awareness of available resources. This factor is also embodied in the local shared vision, “all Sumter County residents and families will be empowered to engage in healthy, safe, and active lifestyles through strong partnerships and locally available programs and resources.”

Objective	Indicator	Current Level	Target	Status	Explanation of Status*
<i>By June 30, 2023, build two (2) partnerships with community organizations for promotion of community health events.</i>	Number of events hosted	0	2		
<i>By June 30, 2023, distribute eight (8) MAPP Steering Committee Newsletters to committee members.</i>	Number of newsletters distributed	0	8		1 Newsletter distributed on 11/15/19
<i>By June 30, 2023, host four (4) MAPP Steering Committee meetings.</i>	Number of meeting held	0	4		One meeting held on 1/31/19
<i>By October 16, 2018, host one (1) cosponsored community event with Lake-Sumter State College (LSSC).</i>	Number of cosponsored events hosted	0	1		Kenny Dixon park cleanup hosted with Lake-Sumter State College

Goal 14: Improve data quality regarding health marketing effectiveness

Strategy 1: Develop DOH-Sumter Marketing Plan

Strategy 2: Evaluate effectiveness of marketing strategies

Key Partners: SMSC

Why this is important to our community:

Having access to current, accurate, and relevant data on health behaviors in our community will not only help with setting our priorities it will also help us develop interventions that the community will be receptive to.

Objective	Indicator	Current Level	Target	Status	Explanation of Status*
By December 31, 2018, conduct a survey to obtain feedback from DOH-Sumter programs & other community organizations on marketing best practices.	Number of surveys completed	0	1		Survey completed on 12/14/17
By December 31, 2018, finalize the DOH-Sumter Marketing Plan & Marketing Toolkit.	Number of toolkits finalized	0	1		Being completed, behind schedule.
By June 30, 2019, share the DOH-Sumter Marketing Toolkit with one (1) community organization.	Number of toolkits distributed	0	1		Tool currently being completed
By December 31, 2018, develop a marketing evaluation tool.	Number of evaluation tools developed	0	1		Tool currently being completed
By December 31, 2020, conduct an evaluation of one (1) strategy from the DOH-Sumter Marketing Plan.	Number of evaluations developed	0	1		Tool currently being completed
By March 31, 2021, disseminate the results of one (1) marketing strategy evaluation to DOH-Sumter staff & one (1) community partner.	Number of community partners	0	1		Tool currently being completed
By May 31, 2021, develop a marketing best practices info sheet.	Sheet developed	0	1		Tool currently being completed

* Status indicators are as follows:

-  = Little to no movement towards objective target
-  = some progress towards meeting the objective target
-  = reached or surpassed objective target

Revisions

Revisions to the CHIP were made after careful review of the goals, objectives, strategies and measures of the 2019 – 2023 CHIP. Recommended changes were made based on the following parameters:

- Change in level of resources and community assets
- Change in health status indicators
- Newly developing or newly identified health issues
- IRB approval required project delayed

Revised Strategic Objective	Current Strategic Objective	Indicator (Data Source)	Current Level	Target	Explanation for Revision	Goal Number	Strategic Issue Area
<i>By June 30, 2020, develop one (1) teen pregnancy prevention program.</i>	By June 30, 2019, develop one (1) teen pregnancy prevention program.	DOH-Sumter	0	1	Change in level of resources and community assets	2	Maternal & Child Health
<i>By June 30, 2023, host one (1) health planning meeting to discuss and plan to address local life expectancy disparities</i>	-NEW-	DOH-Sumter	0	1	Change in level of resources	9	Chronic Disease
<i>By June 30, 2021, develop one (1) parenting support partnership.</i>	By June 30, 2019, develop one (1) parenting support partnership.	DOH-Sumter	0	1	Newly developing or newly identified health issues	4	Maternal & Child Health

Revised Strategic Objective	Current Strategic Objective	Indicator (Data Source)	Current Level	Target	Explanation for Revision	Goal Number	Strategic Issue Area
<i>By June 30, 2020, share the DOH-Sumter Marketing Toolkit with one (1) community organization.</i>	By June 30, 2019, share the DOH-Sumter Marketing Toolkit with one (1) community organization.	DOH-Sumter	0	1	Change in level of resources	14	Community Engagement
<i>By June 30, 2022, partner with one (1) local worksite to promote seatbelt use among employees via a social marketing campaign.</i>	By June 30, 2019, partner with one (1) local worksite to promote seatbelt use among employees via a social marketing campaign.	DOH-Sumter	0	1	Change in level of resources	10	Chronic Disease
<i>By June 30, 2022, complete two (2) Matter of Balance programs in the community.</i>	By June 30, 2019, complete two (2) Matter of Balance programs in the community.	DOH-Sumter	0	2	IRB approval required project delayed	6	Chronic Disease
<i>By June 30, 2020 conduct at least two (2) falls home risk assessments.</i>	By June 30, 2019 conduct at least two (2) falls home risk assessments.	DOH-Sumter	0	2	IRB approval required project delayed	6	Chronic Disease
<i>By June 30, 2020 conduct at least two (2) falls patient risk assessments.</i>	By June 30, 2019 conduct at least two (2) falls patient risk assessments.	DOH-Sumter	0	2	IRB approval required project delayed	6	Chronic Disease
<i>By June 30, 2020 conduct at least two (2) falls patient risk assessments.</i>	By June 30, 2019 conduct at least two (2) falls patient risk assessments.	DOH-Sumter	0	2	IRB approval required project delayed	6	Chronic Disease

Accomplishments

This page contains objectives from the CHIP that are successful.

Goal	Objective	Accomplishment
Goal 7: Increase access to nutrition education	By December 31, 2018, host at least one Health Wise Prize (HWP) quiz competition event, including a health equity & nutrition component.	DOH-Sumter staff successfully planned, setup, moderated, and staffed the first HWP quiz contest.

How it's important for our community: Sumter Health Wise Prize is an innovative program which celebrates public health knowledge by engaging high school students in a health-based quiz competition. This program was designed to educate the community on the variety of functions and areas of public health, and to inspire students to pursue careers in this field.

Public health is an important component of population health, but is often overlooked due to a larger focus being on clinical health treatment. The cost of preventive health is far less expensive than treatment at later stages of disease. Promoting public through prevention efforts is crucial, not only as a way to keep populations healthier, but also to help control rising health care costs of our nation.

On a local level, Sumter County does not currently have a large pool of public health professionals, such as nurses, epidemiologist, health educators, and environmental health specialists. Sumter County is home to the largest retirement population in the nation, with more than half of Sumter County residents being age 65 or older. With the complex health needs of a rising aging population in this county, and nation as a whole, a strong public health workforce is imperative to conserving health and quality of life for the community.

Department of Health in Sumter County has a strong partnership with multiple community organizations and academic institutions which helped in creating this program from ground up and constantly supported it. The program was the result of collaborative effort in which the health department provided the subject matter expertise and facilitation of the program, the local school district supported student recruitment and training efforts, the state college provided a venue and technical support for the competition, and community philanthropic organizations provided financial support for the program.

The curriculum, containing modules on fifteen unique public health topics, was developed and written over the course of two years by health educators of the local health department. Topics were selected based on prevalent health issues in Sumter County, such as obesity, motor vehicle safety, and immunizations. These topics are common issues in public health, and are applicable to diverse populations. The curriculum was approved by the school board prior to dissemination to student participants.

Teams of students were recruited from local high schools to learn the challenging public health curriculum over the course of six months. Each school appointed a designated mentor

to guide students in learning the curriculum and preparing for the competition. Teams also received consistent support from health department staff.

The culmination of the program was the Health Wise Prize event, an exciting, fast-paced quiz competition held in front of a live audience. This two-hour event included two rounds of public health-based questions containing 25 questions each, followed by the final round offering an application-based question. The competition was a success and was thoroughly enjoyed by participants and the audience.

Local and state political figures, administrators of neighboring county health departments, news and media outlets, members of academic institutions, and community leaders attended the event, along with the members from the community. The health department received positive feedback on the program, and multiple opportunities for future partnerships emerged after the event. Academic institutions, neighboring county health departments, and community organizations expressed an enthusiasm for future collaboration.

Goal 12: Increase access to available health resources	By December 15, 2018, increase the number of 2019 Healthy Ways, Healthy Days calendars produced by 10% from 2018 baseline.	DOH-Sumter was able to purchase and increase the number of ordered calendars from 1,180 in 2018 to 2,117 in 2019, without a significant increase in spending. This amounted to 79.40% increase in the number of calendars.
---	--	--

How it's important for our community: These calendars provide important information about key health related resources in the community. The calendars also provide health messaging and education in highly visible, easy to understand format. A lack of access and awareness of health resources is a gap that has been repeatedly identified in multiple local MAPP Assessment

Conclusion

The CHIP serves as a roadmap for a continuous health improvement process for the local public health system by providing a framework for the chosen strategic issue areas. It is not intended to be an exhaustive and static document. We will evaluate progress on an ongoing basis through quarterly CHIP implementation reports and quarterly discussion by community partners. We will conduct annual reviews and revisions based on input from partners and create CHIP annual reports each year by April. The CHIP will continue to change and evolve over time as new information and insight emerge at the local, state and national levels.

By working together, we can have a significant impact on the community's health, improving where we live, work and play and realize the vision of a healthier Sumter County.
