QUARTERLY DASHBOARD

PERFORMANCE MEASURE

P1
The number of controlled substance dispensing records that have been reported to the Prescription Drug Monitoring Program (PDMP) since it began collecting data on September 1, 2011.

December 31, 2015
166,059,864

P2
The number of prescriptions of the most commonly dispensed controlled substances.

As of December 31, 2015

P3
The percentage of pharmacies that are reporting controlled substance prescriptions to the Prescription Drug Monitoring Program, as required by section 893.055, Florida Statutes.

The PDMP staff conducted its first audit of pharmacies required to report to the PDMP upon dispensing controlled substances on May 7, 2014. During the period of January-February 2014, 5,213 out of 5,760 (90.5%) pharmacies were found to be in compliance with reporting requirements.

The number of controlled substance dispensing records that have been reported to the Prescription Drug Monitoring Program (PDMP) since it began collecting data on September 1, 2011.

As of December 31, 2015

P4
The number of health care practitioners who have requested access to the Prescription Drug Monitoring Program database and the number of authorized users who have requested and received controlled substance dispensing information by user type.

Among all licensed health care practitioners, pharmacists have the highest registration rate, 52.3 percent. Additionally, pharmacists have the highest utilization rate, 90.0 percent, and have queried the database 13,157,852 times.

Among all prescribers, osteopathic physicians have the highest registration rate, 30.3 percent. Overall 21.3 percent of all licensed health care practitioners have registered to use the database. In addition, 84.3 percent of all healthcare practitioners registered to use the database have queried 23,071,779 times.
