The number of controlled substance dispensing records that have been reported to the Prescription Drug Monitoring Program (PDM) since it began collecting data on September 1, 2011.

March 31, 2015 138,633,171

The number of prescriptions of the most commonly 10 dispensed controlled substances.

As of March 31, 2015

The percentage of pharmacies that are reporting controlled substance prescriptions to the Prescription Drug Monitoring Program, as required by section 893.055, Florida Statutes.

The PDMP staff conducted its first audit of pharmacies required to report to the PDMP upon dispensing controlled substances on May 7, 2014. During the period of January-February 2014, 5,213 out of 5,760 (90.5%) pharmacies were found to be in compliance with reporting requirements.

Among all licensed health care practitioners, pharmacists have the highest registration rate, 49.75 percent. Additionally, pharmacists have the highest utilization rate, 89.58 percent, and have queried the database 10,001,830 times.

Among all prescribers, osteopathic physicians have the highest registration rate 27.72 percent. Overall 19.84 percent of all licensed health care practitioners have registered to use the database. In addition, 77.74 percent of all healthcare practitioners registered to use the database have queried 17,585,263 times.

</table>
The percentage of the top 200 prescribers who are registered to access the PDMP database and percentage of those registered who have queried patient specific controlled substance dispensing information.

December 31, 2014 to March 31, 2015

Among all licensed health care practitioners, pharmacists have the highest registration rate (49.75%). In addition, pharmacists have the highest utilization rate (89.58%) and have queried the database 10 million times while prescribers have queried the database 7.58 million times.

- 166/200 (83%) of Top 200 prescribers registered of which 162/166 (97.59%) have queried.
- 170/200 (85%) of Top 200 prescribers are MDs of which 140/170 (82.35%) have registered and 136/140 (97.14%) have queried.
- 30/200 (15%) of top prescribers are DOs of which 26/30 (86.67%) have registered and 26/26 (100%) of those registered have queried.

The number of individuals receiving a controlled substance prescription from five or more prescribers (or 10 or more prescribers) and having controlled substance prescriptions dispensed from five or more pharmacies (or 10 or more pharmacies) during a 90-day period.

61% Decrease in Doctor Shopping

The number of coroner reports that indicate controlled prescription drug use as the primary or contributing cause of death.

The Drugs Identified in Deceased Persons by Florida Medical Examiners 2013 Report shows an 8.3 percent decrease in the number of deaths in which one or more controlled substance prescriptions were identified as the primary cause of death, while oxycodone deaths plunged by 27.3 percent and overall drug deaths fell by 7.3 percent when compared with 2012.

The Drugs Identified in Deceased Persons by Florida Medical Examiners 2014 Interim Report shows a 20.1 percent decrease in deaths caused by oxycodone when compared within the last half of 2013.

27% Decrease in Oxycodone Deaths in Florida Between 2012-2013
